Within an environment that values excellent teaching and fosters initiatives in research and public service, the mission of the College of Basic and Applied Sciences at Middle Tennessee State University is to
1. prepare individuals for successful careers in scientific and technical fields in industry, teaching, government, and health services;
2. provide general education through exposure and exploration of natural sciences, applied sciences, and mathematics;
3. provide hands-on experience with state-of-the-art materials and equipment;
4. promote the development and practice of critical thought and expression;
5. develop basic knowledge and promote attitudinal skills and other abilities needed for further graduate or professional study.
Microanalysis and Imaging Center (MIMIC)
The MTSU Microanalysis and Imaging Center (MIMIC) is a core microscopy center jointly operated by the College of Basic and Applied Sciences and the College of Graduate Studies. Training in electron microscopy (EM) techniques, including scanning electron microscopy, transmission electron microscopy, and x-ray analysis is obtained by a trio of laboratory courses that are offered every year to undergraduate and graduate students: Scanning Electron Microscopy, BIOL 4290/6290; Energy Dispersive X-ray Analysis, BIOL 4360/5360; and Transmission Electron Microscopy, BIOL 4270/6410. The courses teach sample preparation, instrument theory, and hands on training on the electron microscopes and ancillary equipment.

Interdisciplinary Microanalysis and Imaging Center
IMIC 4820 - Practical Training in Microanalysis Techniques
1 credit hour
Introduces students to one microanalytical technique. Individual attention provided with the goal that the student will become an independent user with the technical skills to pursue research projects safely, properly, and independently. Emphasis on sample preparation, data collection, and data analysis. May be retaken with emphasis on a different instrument. Pass/Fail.

MTeach
Leigh McNeil, Coordinator
Amy Phelps, Co-Director
Charles Milligan, Co-Director
Sally Millsap, Master Teacher
Mark LaPorte, Master Teacher
Robin Bollman, Master Teacher

MTeach, MTSU’s education program for aspiring secondary mathematics and science teachers, is a joint effort between the College of Basic and Applied Sciences and the College of Education. MTeach students pursue a major in mathematics or a science discipline and complete coursework toward a minor in Secondary Education through the program.

Following are the college departments/schools with a listing of programs offered.

Mathematics and Science Education
MSE 1010 - Step 1: Inquiry Approaches to Teaching
1 credit hour
Prerequisite: An interest in exploring teaching. Readings, discussions, and activities associated with the planning and instruction of inquiry-based mathematics and/or science lessons. Includes field-based teaching.

MSE 2010 - Step 2: Inquiry Lesson Design
1 credit hour
Prerequisite: MSE 1010. Builds on the lesson design skills developed in MSE 1010. Readings, discussions, and activities associated with the planning and instruction of inquiry-based mathematics or science lessons in the middle school. Includes field-based teaching.

MSE 2500 - Step 1/Step 2 Combination
2 credit hours
Affords students seeking secondary school licensure in mathematics or the sciences a foundation in the planning, teaching, and delivering of instructional experiences. Includes field-based teaching.

Professional Seminar
PRSE 4900 - Professional Seminar
1 to 3 credit hours
Prerequisites: Sixty credits and consent of instructor. A professional development seminar for students who want to learn about doing research and prepare for graduate school. May be repeated for up to six credits total.

PRSE 4910 - Professional Seminar
1 to 3 credit hours
Prerequisites: Sixty credits and consent of instructor. A professional development seminar for students who want to learn about doing research and prepare for graduate school. May be repeated for up to six credits total.
Aerospace

Wendy Beckman, Interim Chair

Allen, Babb, Beckman, Callender, Craig, Crews, Dorris, Georgiou, Gossett, Hawkins, Hill, Hunt, Zlotky

Programs in the Department of Aerospace lead to the Bachelor of Science degree with a major in Aerospace and concentrations in Administration, Maintenance Management, Professional Pilot, Technology, Flight Dispatch, and Unmanned Aircraft Systems (UAS) Operations. A minor in Aerospace is also available. All of these programs are designed to prepare students for professional positions in the air transportation or aerospace manufacturing industry or in operations supporting allied areas.

Accreditation

In addition to regional accreditation, the following programs are formally approved by the Aviation Accreditation Board International: Aerospace Administration, Aerospace Maintenance Management, Aerospace Technology, Flight Dispatch, and Professional Pilot.

Academic Common Market

Since the Aerospace Department is a participant in the Academic Common Market, students from selected southern states may enroll at MTSU on an in-state fee basis. Further information is available from the department or Admissions Office.

Professional Relationships

MTSU holds membership in the Aviation Technical Education Council, Aviation Accreditation Board International, the National Business Aircraft Association, the National Intercollegiate Flying Association, and the University Aviation Association.

Advanced Standing

Specific aerospace course credit may be granted to holders of FAA Airframe/Powerplant Certificates. Such aeronautical credential-based credit awards are applicable to MTSU enrollments only and will not transfer to other institutions.

- Maintenance Management Advanced Standing

FAA Collegiate Training Initiative (CTI) for Air Traffic Controllers

- Air Traffic Control Training

Additional Airframe and Powerplant Technician Training

- Aircraft Maintenance Training

Student Organizations

Recognized student organizations in aerospace are Alpha Eta Rho, international aviation fraternity (co-ed); Flying Raiders, intercollegiate competitive flight team; AERO Maintenance Club of MTSU, aircraft maintenance organization; Future Airport Executives (FAE), student chapter of the American Association of Airport Executives; Unmanned Aircraft Systems (UAS) Club; and Women in Aviation, student chapter of Women in Aviation International, and Unmanned Aircraft Systems (UAS) Club.

Honors College

The Department of Aerospace periodically offers Honors sections of AERO 1010, AERO 1020, AERO 4071, and AERO 4730.
Graduate Study
The Aerospace Department offers a Master of Science in Aviation Administration degree program. Requirements and a list of the courses offered for graduate credit are published in the Graduate Catalog.

Aerospace Minor

Department of Aerospace
A minimum of 18 semester hours is required for the minor. The minor may emphasize administrative or technical subject matter. Courses are chosen with the approval of the student’s minor advisor.
Aerospace, Administration Concentration, B.S.

Department of Aerospace
615-898-2788
Gerald Hill, program coordinator
Gerald.Hill@mtsu.edu

The Administration concentration offers instruction designed for students who are interested in careers in the various aspects of aerospace administration and management. Selected General Education and minor courses are interwoven with aerospace courses to provide students with a foundation for such careers. This concentration requires the completion of

1. 40 semester hours in aerospace courses as listed below;
2. a minor as recommended by the faculty advisor and approved by the department chair and dean;
3. a focus area as detailed below;
4. other specific required courses as listed below.

All students choosing a concentration in Aerospace Administration must select a specific segment of the industry in which to focus. Students have the option of choosing from air traffic management (CTI), airport management, airline management, and transportation management. A significant culminating experience (in the form of a capstone course or internship/coop) is required appropriate to that specific area of focus. Students must choose a capstone elective.

Aerospace Core Requirement (13 hours)

- AERO 1010 - Introduction to Aerospace 3 credit hours
- AERO 1020 - Theory of Flight 3 credit hours
- AERO 3020 - Aerospace Materials 3 credit hours
- AERO 3030 - Propulsion Fundamentals 3 credit hours
- AERO 4040 - Aerospace Seminar 1 or 3 credit hours (1 credit hour required)

Capstone Course (3 hours)

- AERO 4050 - Aerospace Internship I 3 credit hours
- AERO 4140 - Seminar in Airline Administration 3 credit hours
- AERO 4170 - Airport Planning and Design 3 credit hours
- AERO 4660 - Air Traffic Control: En-Route Operations 3 credit hours
- TRNS 4640 - Topics in Transportation 3 credit hours

Curriculum: Aerospace, Administration Concentration

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- AERO 1010 - Introduction to Aerospace 3 credit hours
- AERO 1020 - Theory of Flight 3 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1710 - College Algebra 3 credit hours (Math)
- MATH 1810 - Applied Calculus I 3 credit hours
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- Social/Behavioral Science 3 credit hours
- TRNS 1610 - Introduction to Transportation 3 credit hours OR
- TRNS 2620 - Transportation Freight Systems 3 credit hours
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 30 Hours

Sophomore

- AERO 2010 - Aviation Weather 3 credit hours
- AERO 2220 - Navigation 3 credit hours OR
- AERO 2230 - Professional Pilot I 3 credit hours
- Humanities and/or Fine Arts 6 credit hours
- Social/Behavioral Sciences 3 credit hours
- Natural Sciences 4 credit hours (different prefix from one selected below)
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours
- INFS 2200 - Introduction to Microcomputing 3 credit hours OR
- INFS 3100 - Principles of Management Information Systems 3 credit hours
Select 4 hours Natural Science from:
- CHEM 1010 - Introductory General Chemistry I 4 credit hours AND
- CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours
- CHEM 1030 - Chemistry for Consumers 4 credit hours AND
- CHEM 1031 - Chemistry for Consumers Lab 0 credit hours
- CHEM 1110 - General Chemistry I 4 credit hours AND

Senior
• AERO 4040 - Aerospace Seminar 1 or 3 credit hours (1 credit hour)
• AERO 4100 - Airline Management 3 credit hours
• AERO 4150 - Fixed Base Operations Management 3 credit hours
• AERO 4110 - Airport Management 3 credit hours OR
• AERO 4170 - Airport Planning and Design 3 credit hours
• TRNS 3630 - Transportation Systems 3 credit hours
• Minor courses 9 credit hours
• Elective 3 credit hours
• AERO 4050 - Aerospace Internship I 3 credit hours OR
• AERO 4140 - Seminar in Airline Administration 3 credit hours OR
• AERO 4170 Airport Planning and Design 3 credit hours OR
• AERO 4660 - Air Traffic Control: En-Route Operations 3 credit hours OR
• TRNS 4640 - Topics in Transportation 3 credit hours

Subtotal: 28 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Aerospace, Administration, B.S., Academic Map
Aerospace, Flight Dispatch Concentration, B.S.

Department of Aerospace
615-898-2788
Andrea Georgiou, program coordinator
A.Georgiou@mtsu.edu

The Flight Dispatch concentration offers instruction designed to meet the aviation industry's needs by preparing professional, corporate, and airline flight dispatchers. Selected General Education and minor courses are interwoven with required aerospace courses to provide students with a foundation for careers in this area. FAA Flight Dispatch certification will be awarded upon completion of the program. Following are the Flight Dispatch requirements:

1. complete 44 hours of aerospace courses as listed below;
2. adhere to the requirements for these 14 CFR, Part 65 dispatch core courses: AERO 1230, AERO 2220 or AERO 2230, AERO 2010, AERO 3080, AERO 3210 or AERO 3510, AERO 3630/AERO 3631, AERO 4580, and AERO 4590;
   - online courses will not satisfy these requirements,
   - obtain at least a grade of 70 percent,
   - miss no more than 10 percent of the contact hours for each course,
   - make up all missed class time before the end of the semester,
   - must retake a course if more than 10 percent is missed and/or obtain less than a 70 percent.
3. a minor of 18 semester hours to be approved by major advisor.
4. other specific required courses as listed below, including FAA Flight Dispatcher Knowledge Test; must be 21 years of age before the Fall graduation date in order to enroll in AERO 4580.

Aerospace Core Requirement (13 hours)

- AERO 1010 - Introduction to Aerospace 3 credit hours
- AERO 1020 - Theory of Flight 3 credit hours
- AERO 3020 - Aerospace Materials 3 credit hours
- AERO 3030 - Propulsion Fundamentals 3 credit hours
- AERO 4040 - Aerospace Seminar 1 or 3 credit hours (1 credit hour required)

Curriculum: Aerospace, Flight Dispatch Concentration

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Aerospace, Flight Dispatch, B.S., Academic Map
Aerospace, Maintenance Management Concentration, B.S.

Department of Aerospace
615-898-2788
Bill Allen, program coordinator
Bill.Allen@mtsu.edu

The Maintenance Management concentration offers instruction designed for students who are interested in careers as skilled technicians or managers in aircraft manufacturing, aircraft repair, engine overhaul, or space vehicle maintenance. The fundamental skills needed in aerospace vehicle repair and maintenance are stressed together with management skills for such careers. MTSU is an approved Federal Aviation Administration (FAA) FAR Part 147 maintenance technician school for airframe and powerplant mechanics. This concentration requires the completion of

1. 76 hours of aerospace courses;
2. other specific required courses;
3. FAA Airframe and Powerplant Certification prior to graduation.

A minor is not required.

Aerospace Core Requirement (13 hours)

- AERO 1010 - Introduction to Aerospace 3 credit hours
- AERO 1020 - Theory of Flight 3 credit hours
- AERO 3020 - Aerospace Materials 3 credit hours
- AERO 3030 - Propulsion Fundamentals 3 credit hours

• ET 3910 - Introduction to Operations Management 3 credit hours

Subtotal: 32 Hours

NOTE:

Additional aerospace maintenance courses are required if FAA certification is sought. Students enrolled in the Airframe and Powerplant Technician’s Program are required to pass a comprehensive qualification examination prior to receiving authorization to take the FAA examination or prior to receiving a Certificate of Completion from MTSU.

Total hours in program: 133

Academic Map

Following is a printable, suggested four-year schedule of courses:
Aerospace, Maintenance Management, B.S., Academic Map
Aerospace, Professional Pilot Concentration, B.S.

Department of Aerospace
615-898-2788
Paul Craig, program coordinator
Paul.Craig@mtsu.edu

The Professional Pilot concentration offers instruction for students who are interested in careers as commercial pilots. The Professional Pilot concentration requires the completion of:
1. 60 semester hours in aerospace courses as listed below;
2. other specific required courses as listed below;
3. the Instrument Rating-Airplane, the Commercial Single-Engine Pilot Certificate, and the Commercial Multi-Engine Pilot Certificate with Instrument Rating, all at the MTSU Flight School and while enrolled in flight labs. Upon completion, MTSU has been authorized by the FAA to award 500 hours of flight time credit toward the R-ATP.

Aerospace Core Requirement (13 hours)

- AERO 1010 - Introduction to Aerospace 3 credit hours
- AERO 1020 - Theory of Flight 3 credit hours
- AERO 3020 - Aerospace Materials 3 credit hours
- AERO 3030 - Propulsion Fundamentals 3 credit hours

Academic Map

Following is a printable, suggested four-year schedule of courses:
Aerospace, Professional Pilot, B.S., Academic Map
Additional Requirements

In addition to all academic requirements, this concentration requires students to obtain pilot certificates through flight training conducted at the MTSU Flight School. All required flight training will be conducted in a flight lab, in University-owned and maintained aircraft, and by a select group of flight instructors screened and trained for their positions by MTSU. All flight labs will be conducted from the Murfreesboro Municipal Airport. Admission to the University does not guarantee enrollment in a flight lab. To enroll in a flight lab, students must submit a Flight Lab Request Form for each and every semester they wish to fly. The deadlines to submit Flight Lab Request Forms are as follows:

- Fall semester-July 15
- Spring semester-November 15
- Summer session-April 15

Flight Lab Request Forms submitted after the deadline will not be considered. Enrollment in flight labs is limited and selection is made from eligible candidates who are best qualified. Incoming freshmen typically do not receive a flight lab for their first semester. To become eligible for a flight lab, candidates must meet the following minimum standards:

1. have a college cumulative grade point average of 2.50;
2. have a current Second Class FAA medical certificate;
3. must be in good standing within the department and University (if a transfer student, candidate cannot be on probation in any form);
4. have no physical disability that would prohibit completion of the course requirements;
5. have the full required amount of flight lab money deposited in their flight account by the last day of the first week of classes;
6. show proof of American citizenship by presenting a valid current passport or original birth certificate AND a current valid driver's license;
7. have completed all required prerequisite classes for the desired lab.

Retention in the Professional Pilot concentration is based on maintaining a cumulative GPA of 2.50 or better and making consistent and satisfactory progress in flight training. Violation of any MTSU safety practice or procedure or any FAA regulations will result in immediate termination from the flight program. Lab students are required to complete three syllabus events per seven-day week and will be held to a strict attendance policy. There are substantial lab fees for each flight lab. Flight fees will be paid directly to MTSU, and students must maintain a positive balance in their training account at all times. Lab fee information and a complete explanation of all requirements for flight labs can be found in the Additional Lab Information packet obtained through the MTSU Aerospace website, at the MTSU Flight School, or Aerospace Department main office.

Students admitted to the Professional Pilot program must receive all required flight training beyond the Private Pilot Certificate at the MTSU Flight School. Credit for flight time, including cross-country flight time obtained by the student after becoming a Private Pilot, is very limited and is determined by FAA and MTSU regulations. Transfer students who come to MTSU already holding the Instrument Rating may be admitted; however, they must complete the Commercial Single-Engine Certificate, the Commercial Multi-Engine Certificate, and the Flight Instructor Certificate at the MTSU Flight School. Students entering MTSU who already hold a Commercial Pilot Certificate are not eligible for the Professional Pilot concentration.

NOTE: Students interested in military flying careers should contact their local Armed Forces recruiting officer or MTSU's Reserve Officer Training Corps (ROTC) program representatives. Air Force ROTC program information can be obtained by calling (615) 963-5931. For information regarding the Army ROTC program, call (615) 898-2470. Please see Army ROTC for additional information.
The Technology concentration is designed for students interested in technical careers in aerospace and as preparation for those who seek more advanced study at the graduate level. Students will receive a strong background in mathematics, the sciences, engineering technology, and the more technical courses in aerospace. This concentration requires the completion of

1. 31 semester hours of aerospace courses;
2. minors in Mathematics and Engineering Technology;
3. two semesters of computer programming and two semesters of calculus-based physics;
4. other specific required courses.

Aerospace Core Requirement (13 hours)

- AERO 1010 - Introduction to Aerospace 3 credit hours
- AERO 1020 - Theory of Flight 3 credit hours
- AERO 3020 - Aerospace Materials 3 credit hours
- AERO 3030 - Propulsion Fundamentals 3 credit hours
- AERO 4040 - Aerospace Seminar 1 or 3 credit hours (1 credit hour required)

Curriculum: Aerospace, Technology Concentration

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- AERO 1010 - Introduction to Aerospace 3 credit hours
- AERO 1020 - Theory of Flight 3 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- ENGR 1100 - Engineering Fundamentals 3 credit hours
- Social/Behavioral Science 3 credit hours
- Humanities and/or Fine Arts 3 credit hours
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 32 Hours

Sophomore

- AERO 3020 - Aerospace Materials 3 credit hours
- Social/Behavioral Sciences 3 credit hours
• COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
• MATH 2010 - Elements of Linear Algebra 3 credit hours
• ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
• ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
• HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
• ET 3810 - Engineering Thermodynamics 3 credit hours
• ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
• ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
• HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
• ET 3810 - Engineering Thermodynamics 3 credit hours
• ENGR 2110 - Statics 3 credit hours OR
• ET 3830 - Statics 3 credit hours
• PHYS 2110 - Calculus-Based Physics I 0 credit hours (Nat Sci) AND
• PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours (Nat Sci)
• PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
• PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours
• HIST 2010 - Survey of United States History I 3 credit hours OR
• HIST 2020 - Survey of United States History II 3 credit hours OR
• HIST 2030 - Tennessee History 3 credit hours

Subtotal: 32 Hours

Junior

• AERO 3030 - Propulsion Fundamentals 3 credit hours
• AERO 3170 - Flight Safety 3 credit hours
• AERO 3440 - Fundamentals of Aerodynamics 3 credit hours
• CSCI 1170 - Computer Science I 4 credit hours
• ENGR 2120 - Dynamics 3 credit hours OR
• ET 3840 - Dynamics 3 credit hours
• MATH 3120 - Differential Equations I 3 credit hours
• ENGR 3590 - Kinematics and Dynamics of Machinery 3 credit hours OR
• ET 4830 - Vibration 3 credit hours

Subtotal: 29 Hours

Senior

• AERO 4040 - Aerospace Seminar 1 or 3 credit hours (1 credit hour required)
• AERO 4071 - Problems in Aerospace 1 to 3 credit hours (3 credit hours required)
• AERO 4170 - Airport Planning and Design 3 credit hours
• AERO 4310 - Aerospace Vehicle Systems 3 credit hours
• AERO 4440 - Aircraft Performance 3 credit hours
• CHEM 1010 - Introductory General Chemistry I 4 credit hours AND
• CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours
• CSCI 2170 - Computer Science II 4 credit hours
• ENGR 3550 - Fluid Mechanics 3 credit hours OR
• ET 4850 - Fluid Power 3 credit hours
• ENGR 3560 - Mechanics of Materials 3 credit hours OR
• ET 3860 - Strength of Materials 3 credit hours

Subtotal: 27 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Aerospace, Technology Concentration, B.S.
Aerospace, Unmanned Aircraft Systems (UAS) Operations Concentration, B.S.

Department of Aerospace
615-898-2788
Terry Dorris, program coordinator
Terry.Dorris@mtsu.edu

The Unmanned Aircraft Systems (UAS) Operations concentration offers instruction for students who are interested in a career in unmanned aviation—whether that is flying the Unmanned Aircraft, providing support services (consulting, data analysis, UAS construction/modification/repair, etc.) or in managerial roles at a company operating UAS. The Unmanned Aircraft Systems Operations concentration requires the completion of:

1. 45 semester hours in aerospace courses;
2. 34 semester hours of interdisciplinary support courses;
3. other specific required courses;
4. Private Pilot Certificate.

Aerospace Core Requirement (13 hours)

- AERO 1010 - Introduction to Aerospace 3 credit hours
- AERO 1020 - Theory of Flight 3 credit hours
- AERO 3020 - Aerospace Materials 3 credit hours
- AERO 3030 - Propulsion Fundamentals 3 credit hours
- AERO 4040 - Aerospace Seminar 1 or 3 credit hours (1 credit hour required)

Curriculum: Aerospace, Unmanned Aircraft Systems (UAS) Operations Concentration

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- AERO 1010 - Introduction to Aerospace 3 credit hours

Aerospace, Unmanned Aircraft Systems Operations, B.S., Academic Map

Additional Requirements

In addition to all academic requirements, this concentration requires students to obtain a Private Pilot certificate, generally earned through flight training conducted at the MTSU Flight School. All required flight training will be conducted in a flight lab, in University-owned and maintained aircraft, and by a select group of flight instructors screened and trained for their positions by MTSU. All flight labs will be conducted from the Murfreesboro Municipal Airport. Admission to the University does not guarantee enrollment in a flight lab. To enroll in a flight lab, students must submit a Flight Lab Request Form for every semester they wish to fly. The deadlines to submit Flight Lab Request forms are as follows:
- Fall semester-July 15
- Spring semester-November 15
- Summer session-April 15

Flight Lab Request Forms submitted after the deadline will not be considered. Enrollment in flight labs is limited and selection is made from eligible candidates who are best qualified. Incoming freshmen typically do not receive a flight lab for their first semester. To become eligible for a flight lab, candidates must meet the following minimum standards:
1. have a college cumulative grade point average of 2.50;
2. have a current Second Class FAA medical certificate;
3. must be in good standing within the department and University (if a transfer student, candidate cannot be on probation in any form);
4. have no physical disability that would prohibit completion of the course requirements;
5. have the full required amount of flight lab money deposited in their flight account by the last day of the first week of classes;
6. show proof of American citizenship by presenting a valid current passport or original birth certificate AND a current valid driver's license;
7. have completed all required prerequisite classes for the desired lab.

Retention in the Unmanned Aircraft Systems (UAS) Operations concentration is based on maintaining a cumulative GPA of 2.50 or better. Violation of any MTSU safety practice or procedure or any FAA regulations will result in immediate termination from the program. Flight fees will be paid directly to MTSU, and students must maintain a positive balance in their training accounts at all times. Lab fee information and a complete explanation of all requirements for flight labs can be found in the Additional Lab Information packet obtained through the MTSU Aerospace website, at the MTSU Flight School, or Aerospace Department main office.
Aerospace

AERO 1010 - Introduction to Aerospace
3 credit hours
History of aerospace, opportunities in the field, fundamentals of flight, navigation, meteorology, and Federal Aviation Regulations. Open to all students desiring a general and practical knowledge of aviation.

AERO 1020 - Theory of Flight
3 credit hours
Topics include basic aerodynamics with emphasis on lift, weight, thrust, and drag forces and moments acting upon an airplane in flight. A flight demonstration is required at student expense. The flight demonstration requires scheduled time at the airport campus for guided simulator and flight demonstrations. Fee required.

AERO 1230 - Aviation Laws and Regulations
3 credit hours
Those portions of Titles 14 and 49 of the U.S. Code of Federal Regulations concerning airman certification and aircraft operations.

AERO 1340 - Introduction to Aerospace Maintenance
3 credit hours
Organization and operation of aircraft maintenance activities. Federal regulations and aviation maintenance law. Maintenance management function in practical settings. Lecture course that meets 45 contact hours a semester.

AERO 1380 - Aerospace Maintenance Shop Practices
3 credit hours
Use of common tools, measuring devices, and special aircraft tools. Shop layout for aircraft maintenance management. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours per semester.

AERO 1710 - Introduction to Unmanned Aircraft Systems
3 credit hours
An overview of Unmanned Aircraft Systems (UAS), including UAS history, technology, and applications. Introduces methods of UAS operation, challenges to UAS integration, and regulations/standards governing UAS operation.

AERO 2010 - Aviation Weather
3 credit hours
Atmosphere, measurement of meteorological elements, and effects of these on air operations.

AERO 2201 - Professional Pilot Flight Lab I
2 credit hours
Prerequisite: AERO 2230 or simultaneous completion of AERO 2230. Flight instruction leading to the FAA Private Pilot Certificate; the first of four flight labs in the Professional Pilot concentration sequence. Private Pilot certificate must be completed during this course. Requires a minimum of four training sessions per week at the airport campus in the spring/fall semester and a minimum of five training sessions per week at the airport campus in the summer session. Fee required.

AERO 2220 - Navigation
3 credit hours
The principles of pilotage, dead reckoning, and radio/electronic methods of navigation as applied to cross-country flight planning.

AERO 2230 - Professional Pilot I
3 credit hours
First of five classes in the Professional Pilot concentration sequence. Provides students with aeronautical knowledge required for certification as a Private Pilot. Emphasis placed on acquisition of basic knowledge in the areas of aerodynamics, performance, systems, weather, Federal Aviation Regulations, and flight planning.

AERO 2331 - Airframe Inspection
3 credit hours
Pre/corequisites: AERO 1340 and AERO 1380. Requirements, techniques, and procedures. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

AERO 2342 - Powerplant Inspection
3 credit hours
Pre/corequisites: AERO 1340 and AERO 1380. Requirements, techniques, and procedures. Students must provide basic tools and safety equipment. Lecture/laboratory that meets 90 contact hours a semester.

AERO 2371 - Aircraft Welding
3 credit hours
Prerequisite: AERO 1380. Various types of aircraft
welding techniques and procedures. Students must provide basic tools and safety equipment. Lecture/laboratory that meets 45 contact hours a semester.

**AERO 2381 - Non-Metallic Structures: Dope, Fabric, and Finishing**  
*3 credit hours*  
Prerequisite: AERO 1380. Aircraft fabric covering and finishing. Students must provide basic tools and safety equipment. Lecture/laboratory that meets 45 contact hours a semester.

**AERO 2930 - Cooperative Education**  
*3 credit hours*  
Provides students with opportunities for on-the-job experiences related to academic major. Consult department. Pass/Fail.

**AERO 2940 - Cooperative Education**  
*3 credit hours*  
Provides students with opportunities for on-the-job experiences related to academic major. Consult department. Pass/Fail.

**AERO 3020 - Aerospace Materials**  
*3 credit hours*  
Prerequisites: AERO 1010, AERO 1020, and MATH 1810 or MATH 1910. Explores materials used in aerospace applications throughout their development from the standpoint of their properties, economic impact, and future possibilities. The need for new materials to fill current requirements included. Lecture that meets for 45 contact hours a semester.

**AERO 3030 - Propulsion Fundamentals**  
*3 credit hours*  
Prerequisites: AERO 1010 and AERO 1020. Principles of operations, major components, and important features of typical propulsion systems used in aircraft and missiles, from reciprocating to reaction. Lecture that meets for 45 contact hours a semester.

**AERO 3050 - Women in Aviation**  
*3 credit hours*  
Explores the many roles of women in this nontraditional field. Research on the history of women in aviation and their political and social impact on aviation, industry, and the country.

**AERO 3080 - Aviation Weather II**  
*3 credit hours*  
Prerequisite: AERO 2010. Advanced weather concepts, forecasting, and applications to flight dispatch problems. Spring only.

**AERO 3100 - Aerospace in Our Lives**  
*3 credit hours*  
Open course for non-majors which allows exploration of the aerospace world in which we live. Credit not applicable to Aerospace major.

**AERO 3170 - Flight Safety**  
*3 credit hours*  
Prerequisite: AERO 1020. Addresses safety issues inherent in flight operations, including human factors, maintenance and design factors, and weather implications. Examines numerous case studies involving aircraft accidents or incidents to assist students in identifying potential risks and hazards in flight environment.

**AERO 3202 - Cross-Country Flight Lab**  
*1 credit hour*  
Prerequisite: Commercial Pilot Certificate. Flight instruction leading to the completion of additional cross county flight time. Fee required.

**AERO 3203 - Professional Pilot Flight Lab II**  
*2 credit hours*  
Prerequisites: Private Pilot Certificate; AERO 3210 or simultaneous completion of AERO 3210. Flight instruction leading to the FAA Instrument Rating; second of four flight labs in the Professional Pilot concentration sequence. Instrument Rating must be completed during this course. Requires a minimum of four training sessions per week at the airport campus in the spring/fall semester and a minimum of five training sessions per week a the airport campus in the summer session. Fee required.

**AERO 3204 - Professional Pilot Flight Lab III**  
*2 credit hours*  
Prerequisites: AERO 3203 and AERO 3215 or simultaneous completion of AERO 3215. Flight instruction leading to the FAA Commercial Pilot Certificate-Airplane Single-Engine Land; third of four flight labs in the Professional Pilot concentration sequence. Commercial Pilot Single-Engine Land Certificate must be completed during this course. Requires a minimum of four training sessions per week at the airport campus in the spring/fall semester and a minimum of five training sessions per week at the airport campus in the summer session. Fee required.
AERO 3205 - Conventional Landing Gear Airplane Laboratory
1 credit hour
Prerequisite: Private Pilot Certificate. Flight and ground instruction leading to conventional landing gear operation endorsement. Course includes flight and ground instruction. Fee required. NOTE: This is not an FAA Part 141 course.

AERO 3206 - Advanced Conventional Landing Gear Flight Laboratory
1 credit hour
Prerequisite: AERO 3205. Flight and ground instruction in a high-performance conventional landing gear aircraft leading to a log book endorsement in this type of aircraft. Fees required. NOTE: This is not an FAA Part 141 course.

AERO 3210 - Professional Pilot II
3 credit hours
Prerequisites: Private Pilot Certificate; AERO 2230 and AERO 2010. Second of five classes in the Professional Pilot concentration sequence. Provides students with aeronautical knowledge required for completion of the Instrument Rating. Emphasis on acquisition of basic knowledge in the area of instrument flight.

AERO 3215 - Professional Pilot III
3 credit hours

AERO 3222 - High-Altitude Aircraft Operations Laboratory
1 credit hour
Prerequisite: AERO 3240. Simulator and ground instruction in an aircraft simulator leading to a high-altitude log book endorsement. Fees required. NOTE: This is not an FAA-approved Part 141 course.

AERO 3223 - High-Performance Aircraft Flight Laboratory
1 credit hour
Prerequisite: AERO 3204. Flight and ground instruction in a high-performance aircraft leading to a log book endorsement in this type of aircraft. Fees required. NOTE: This is not an FAA-approved Part 141 course.

AERO 3230 - Crew Resource Management
3 credit hours
Augments the student's ability to understand the emotional and logical gaps in communication in the present-day aviation crew environment by developing a better understanding of the student's relational style and personality traits in himself/herself and others. Personality profile is optional and confidential.

AERO 3240 - Professional Pilot IV
3 credit hours
Prerequisites: AERO 3204 and AERO 3261 or simultaneous completion of AERO 3261. Fourth class in the Professional Pilot concentration sequence. Provides students with an introduction to cabin class aircraft and flight in the multi-crew environment. Topics include advanced aircraft systems, flight management systems, crew resource management, aeronautical decision making, and aviation safety. Reviews Part 14 CFR Part 61, 91, 119, 121, and 135 regulations. Includes the training requirements of 14 CFR 61.31 for high performance and pressurized aircraft. Examines flight in cabin class aircraft using the training format employed by the air carrier industry. Includes LOFT assessments with students working as crew and learning typical air carrier procedures in the department's BE-1900 flight training device. Meets for six hours per week and consists of lecture and laboratory. Fee required.

AERO 3241 - Air Charter Flight Laboratory
1 credit hour
Prerequisites: AERO 3203, AERO 3204, AERO 3223, AERO 3240; consent of instructor. Air charter operation. Students will be utilized as co-pilots during transportation of university personnel. NOTE: This is not an FAA-approved Part 141 course.

AERO 3261 - Professional Pilot Flight Lab IV
1 credit hour
Prerequisites: AERO 3204 and AERO 3215. Flight instruction leading to the FAA Commercial Pilot Airplane Multi-engine Land Certificate; last of four flight labs in the Professional Pilot concentration sequence. Commercial Pilot Multi-engine Land Certificate must be completed during this course. Fee required. Requires a minimum of three training sessions per week at the airport campus in the spring/fall semester and a minimum of four training
sessions per week at the airport campus in the summer session. Fee required. NOTE: This is not an FAA Part 141 course.

AERO 3301 - Sheet Metal Repair
3 credit hours
Prerequisites: AERO 1340, AERO 1380, and AERO 3020 or simultaneous completion of AERO 3020. Provides practical experience in the repair of sheet metal structures, including major repairs and alterations. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

AERO 3322 - Aerospace Reciprocating Engine Overhaul
3 credit hours
Prerequisites: AERO 1380 and AERO 3030. Completion of a major overhaul on an aircraft engine, including procedures and acceptable techniques used in engine disassembly, inspection, repair, reassembly, and operational testing. Lecture/laboratory that meets for 90 contact hours a semester.

AERO 3362 - Advanced Aerospace Engine Systems Maintenance and Repair
3 credit hours
Prerequisites: AERO 1380 and AERO 3030. The operation of powerplant component systems; induction, exhaust, instrumentation, engine electrical, and propeller systems. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

AERO 3371 - Aircraft Finishing and Non-Destructive Inspection
3 credit hours
Prerequisites: AERO 1380, AERO 3030, and AERO 3322. Fundamentals of non-destructive inspection techniques including dye penetrant, magnetic particle, eddy current, and ultrasonic inspection. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 45 contact hours a semester.

AERO 3392 - Reciprocating Engine Maintenance Repair
3 credit hours
Prerequisites: AERO 1340, AERO 1380, and AERO 3322. Reciprocating engines including theory, construction, fuel metering, ignition, and operational maintenance procedures. Inspection and repair processes are applied to operating engine systems. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

AERO 3440 - Fundamentals of Aerodynamics
3 credit hours
Prerequisites: MATH 1810 or MATH 1910, PHYS 2010/PHYS 2011 or PHYS 2110/PHYS 2111. Topics include the incompressible aerodynamics of powered flight to include theories of lift, drag and moments. Additional topics include stability and control, aircraft design, and compressible aerodynamics if time permits. A flight test exercise is conducted at student expense. The flight test requires that the class meet at the airport campus for several weeks during the semester. Open class times before and/or after the class are recommended. Fee required.

AERO 3450 - Instrument Flight Fundamentals for Non-Pilots
3 credit hours
Prerequisite: AERO 2230 or AERO 2220. (Not open to Professional Pilot majors or students who have completed AERO 3210.) Offers preparation for certification as a Flight Dispatcher and the Air Traffic Control Candidates. Classroom and flight simulator instruction emphasizes advanced knowledge in the areas of aerodynamics, performance, systems, Federal Aviation Regulations. No fee required.

AERO 3510 - Introduction to Air Traffic Control
3 credit hours
Prerequisites: AERO 1010, AERO 1020, AERO 1230, AERO 2010, AERO 2220 or AERO 2230, and AERO 3210 or AERO 3510. Required corequisite: AERO 3631. Introduces students to the many aspects of the Air Traffic Control System and the procedures and policies used in the National Airspace System. A final grade of B is required for continuation in the ATC-CTI program. Fall only. For complete ATC-CTI policy go to mtsu.edu/aerospace/cti.php.

AERO 3630 - Introduction to Air Traffic Control Lab
1 credit hour
Required corequisite: AERO 3630. Focuses on the many aspects of the Air Traffic Control System; introduces the Air Traffic Control Tower, the Terminal Radar Approach Control, and En-Route systems. Students required to attend simulation labs which will give them hands on application of tasks and procedures used in the National Airspace System. Fee required. A final grade of B is required for
continuation in the ATC-CTI program. Requires four hours contact time required per week. Fall only. For complete ACT-CTI policy to http://mtsu.edu/aerospace/cti.php.

**AERO 3640 - Air Traffic Control: Tower Operations**
3 credit hours
Prerequisite: AERO 3630. Prerequisite: Grade of B in AERO 3630. Required corequisite: AERO 3641. Presents the many aspects of the Air Traffic Control Tower. Opportunity to learn the different positions, procedures, and regulations that apply to the safe and expeditious flow of air traffic. A final grade of B is required for continuation in the ATC-CTI program. Spring only. For complete ATC-CTI policy go to http://mtsu.edu/aerospace/cti.php.

**AERO 3641 - Air Traffic Control: Tower Operations Lab**
1 credit hour
Prerequisite: Grade of B in AERO 3631; corequisite: AERO 3640. Focuses on the multiple policies and procedures of Air Traffic Control Tower operations. Students required to attend simulation labs that provide hands-on application of tasks and procedures used in the National Airspace System. A final grade of B is required for continuation in the ATC-CTI program. Fee required. Four hours contact time required per week. Spring only. For complete ATC-CTI policy go to http://mtsu.edu/aerospace/cti.php.

**AERO 3710 - Unmanned Aircraft Systems I**
3 credit hours
Prerequisite: AERO 1710. An overview of the different aircraft and the various systems utilized in Unmanned Aircraft Systems (UAS) platforms currently being operated. Systems overview includes launch and recovery, ground stations, command and control, autopilots, telemetry, communications, robotics, power plants, and design concepts.

**AERO 3720 - Unmanned Aircraft Systems II**
3 credit hours
Prerequisite: AERO 1710. An overview of the regulatory requirements associated with the operation of an Unmanned Aircraft System (UAS). Overview includes Federal Aviation Regulations (FAR), National Airspace System (NAS) requirements, Certificates of Authorization (COA) requirements, as well as industry requirements.

**AERO 3730 - Unmanned Aircraft Systems III**
3 credit hours
Prerequisites: AERO 1710, AERO 3710, and AERO 3720. An overview of the business requirements associated with the operation of Unmanned Aircraft Systems (UAS). Overview includes Federal Aviation Regulations (FAR) practical applications, National Airspace System (NAS) utilization, Certificate of Authorization (COA) approvals, and business plan development for a profitable, viable UAS company.

**AERO 3970 - Cooperative Education**
3 credit hours
Provides students with opportunities for on-the-job experiences related to academic major. Consult department. Pass/Fail.

**AERO 3980 - Cooperative Education**
3 credit hours
Provides students with opportunities for on-the-job experiences related to academic major. Consult department. Pass/Fail.

**AERO 4040 - Aerospace Seminar**
1 or 3 credit hours
Prerequisite: Senior standing or final semester of aerospace program. A capstone course involving analysis, synthesis, and integration of relevant academic experiences. Required of all aerospace students prior to graduation. Meets three hours each week.

**AERO 4050 - Aerospace Internship I**
3 credit hours
Prerequisites: Junior standing and consent of department chair. Student is employed by an acceptable airline, airport director, or aerospace industry for 300 hours of field work. Pass/Fail.

**AERO 4060 - Aerospace Internship II**
3 credit hours
Prerequisites: Junior standing and consent of department chair. A continuation of the internship program with a different employer and place of work or a significant job category change. Pass/Fail.

**AERO 4071 - Problems in Aerospace**
1 to 3 credit hours
Individual directed study in the field of aerospace.
AERO 4100 - Airline Management  
3 credit hours  
Airline operation and implementation of sound management practice.

AERO 4110 - Airport Management  
3 credit hours  
Airport operations and development of airport master plan. Fall only.

AERO 4130 - Aerospace Physiology  
3 credit hours  
Instruction, readings, and structured experiences to insure familiarity with the various physiological and health-related factors affecting a flyer's safety and performance.

AERO 4140 - Seminar in Airline Administration  
3 credit hours  
Prerequisites: AERO 4100 and senior standing. Capstone course for students selecting the airline management focus within Aerospace Administration. Individually directed course on a selected topic within the airline industry. Addresses specific airline industry issues and develops solutions to these issues in the global context within which airlines operate.

AERO 4150 - Fixed Base Operations Management  
3 credit hours  
The FBO operator and the essential role played in general aviation.

AERO 4170 - Airport Planning and Design  
3 credit hours  
Prerequisite: Senior standing or permission of department; students using this course as a capstone for the Airport Management focus within Aerospace Administration must also have AERO 4110. Methods utilized in airport planning and design, including the consideration of the needs of stakeholders in the design process. Students will have opportunity to apply knowledge of airport management with the planning and design of a new airport in a major project.

AERO 4201 - Flight Instructor-Airplane Lab  
1 credit hour  
Prerequisites: AERO 4210, current FAA Commercial Pilot Certificate, and consent of instructor. Flight and ground instruction leading to the FAA Flight Instructor - Airplane Certificate. Covers all topics of the Flight Instructor - Airplane Practical Test Standards. Flight fees required. NOTE: This is not an FAA Part 141 course.

AERO 4202 - Flight Instructor-Instrument Lab  
1 credit hour  
Prerequisites: Current FAA Commercial Pilot Certificate with an instrument rating, AERO 3210, and consent of the instructor. Flight and ground instruction leading to the FAA Flight Instructor - Instrument Certificate. Covers all topics of the Flight Instructor - Instrument Practical Test Standards. Flight fees required. NOTE: This is not an FAA Part 141 course.

AERO 4203 - Flight Instructor-Multi-Engine Lab  
1 credit hour  
Prerequisites: Current FAA Commercial Pilot Certificate with an Instrument rating and consent of the instructor. Flight and ground instruction leading to the FAA Flight Instructor - Multiengine Certificate. Covers all topics of the Flight Instructor - Multiengine Practical Test Standards. Flight fees required. NOTE: This is not an FAA Part 141 course.

AERO 4210 - Flight Instructor Fundamentals  
3 credit hours  
Prerequisite: Certified Flight Instructor Certificate. Ground and flight instruction leading to the instrument and multiengine instructor ratings. Flight training for this course is to be taken at the MTSU Flight School. The ratings must be completed during the course. Students should consult with the chief flight instructor for a scheduled flight slot. Fee required.

AERO 4220 - Advanced Certified Flight Instructor Fundamentals  
3 credit hours  
Prerequisite: Certified Flight Instructor Certificate. Ground and flight instruction leading to the instrument and multiengine instructor ratings. Flight training for this course is to be taken at the MTSU Flight School. The ratings must be completed during the course. Students should consult with the chief flight instructor for a scheduled flight slot. Fee required.

AERO 4250 - Professional Pilot V  
3 credit hours  
Prerequisite: AERO 3240. Capstone course in the Professional Pilot concentration sequence. Provides students with an experiential view of the duties of a professional pilot. Topics include turbojet aircraft systems, advanced avionics and flight management systems, transport aircraft flight techniques (including operations in all flight regimes and in difficult operational conditions), and stall and upset recognition and recovery in transport category aircraft.
Crew resource management, aeronautical decision making, and professionalism developed. Turbofan aircraft training in the format employed by air carriers, including LOFT scenarios in the department's CRJ-200 flight training device. Meets for six hours per week; lecture and laboratory activities. Fee required.

**AERO 4301 - Advanced Aerospace Vehicle Structural Repair**  
3 credit hours  
Prerequisites: AERO 1340, AERO 1380, and AERO 3020 or simultaneous completion of AERO 3020. Non-typical structures including bonded and plastic structures. Includes planning and organizing of major structural repair projects and rebuilding of severely damaged aircraft. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

**AERO 4310 - Aerospace Vehicle Systems**  
3 credit hours  
Prerequisites: AERO 1010 and AERO 1020. Design, use, and function of typical hydraulic, mechanical, and electrical systems used on transport category aircraft. Lecture that meets for 45 contact hours a semester.

**AERO 4311 - Aerospace Accessory Systems Maintenance and Repair**  
3 credit hours  
Prerequisites: AERO 2331, AERO 2342, and ET 3610. Practical experience in the maintenance, inspection, and repair of aircraft systems and components. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours per semester.

**AERO 4312 - Turbine Engine System**  
3 credit hours  
Prerequisites: AERO 1340, AERO 1380, and AERO 3030. Advanced course in the maintenance of complex systems. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

**AERO 4332 - Reciprocating Engine Troubleshooting**  
3 credit hours  
Prerequisites: AERO 1340, AERO 1380, AERO 2342, and AERO 3030. Provides practical experience in inspecting and troubleshooting problems with reciprocating engines and powerplant systems. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

**AERO 4340 - Maintenance Management Capstone**  
3 credit hours  
Prerequisite: Students must be in the last 18 hours of coursework before graduation. Students assigned a specific task directly related to the knowledge and skills gained during their progress through the Maintenance Management concentration. Students expected to complete assigned project with minimum guidance from the instructor. Pass/fail; passing grade required for graduation from the Maintenance Management program.

**AERO 4342 - Turbine Engine Inspection and Troubleshooting**  
3 credit hours  
Prerequisites: AERO 1340, AERO 1380, AERO 3030, and AERO 4312. Provides practical experience in turbine engine inspection to include hot section inspection, engine operation, and troubleshooting. Students must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

**AERO 4371 - Advanced Aerospace Vehicle Systems Overhaul**  
3 credit hours  
Prerequisites: AERO 1340, AERO 1380, AERO 4310, and ET 3610. Complete repair and overhaul of complex aerospace vehicle systems including hydraulics, electric, pneumatics, fuel, and oil. Shop layout and quality control procedures stressed. Student must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester.

**AERO 4381 - Advanced Aerospace Accessory Systems Maintenance and Repair**  
3 credit hours  
Prerequisites: AERO 1340, AERO 1380, AERO 4310, and ET 3610. Repair and overhaul of complex accessory systems and subsystems. Practical experience in overhaul of air conditioning, pressurization, oxygen, electrical power generation and control, electrical motors, electrical system configuration and troubleshooting. Student must provide basic tools and safety equipment. Lecture/laboratory that meets for 90 contact hours a semester. Special fee applies for an electronics project.
AERO 4392 - Aerospace Turbine Engine Maintenance and Overhaul
3 credit hours
Prerequisite: AERO 4342. Field maintenance and repair of turbine engines and components. Includes limited overhaul procedures and techniques. Management procedures stressed. Student must provide basic tools and safety equipment. Lecture/laboratory meets for 90 contact hours a semester.

AERO 4400 - Space
3 credit hours
History of global space exploration and the successes and failures of manned and unmanned efforts in the race to the moon.

AERO 4440 - Aircraft Performance
3 credit hours
Prerequisite: AERO 3440. Topics include determination of airplane performance given basic aerodynamic, propulsion, structural, and atmospheric characteristics/conditions. A flight test exercise is conducted at student expense. The flight test requires that the class meet at the airport campus for several weeks during the semester. Open class times before and/or after the class are recommended. Fee required.

AERO 4490 - Aerospace Science for Teachers
3 credit hours
An introduction to the total aviation and space effort.

AERO 4580 - Flight Dispatch and ATP Written Preparation
3 credit hours
Prerequisites: AERO 1230, AERO 3080, AERO 3210 or AERO 3510, and AERO 3630/AERO 3631. Must be 21 years of age before the Fall graduation date. First of two classes providing students with the knowledge required for certification as an aircraft dispatcher. Topics include dispatch resource management, aircraft systems and limitations, weight and balance, and aircraft performance. The FAA computerized aircraft dispatcher (ADX) exam must be passed during this course. Fall only.

AERO 4590 - Flight Dispatch
3 credit hours
Prerequisite: AERO 4580. Second of two classes providing students with the knowledge required for certification as an aircraft dispatcher. Explores factors necessary to prepare a flight plan such as weather analysis, enroute charts, dispatch release, and emergency/abnormal procedures. As this is the capstone course for the Flight Dispatch concentration, students must obtain the aircraft dispatch certification upon course completion. Spring only.

AERO 4650 - Air Traffic Control: TRACON Operations
3 credit hours
Prerequisite: Grade of B in AERO 3640; corequisite: AERO 4651. Focuses on operations of the Air Traffic Control Terminal Radar Approach Control and procedures and policies that apply to the safe and expeditious flow of air traffic in the National Airspace System. A final grade of B is required for continuation in the ATC-CTI program. Fall only. For complete ATC-CTI policy go to http://mtsu.edu/aerospace/cti.php.

AERO 4651 - Air Traffic Control: TRACON Operations Lab
1 credit hour
Prerequisite: Grade of B in AERO 4650; corequisite: AERO 4651. Focuses on the many aspects of the Air Traffic Terminal Radar Approach Control System; radar and data side of the TRACON positions; and all procedures, regulations, and specific phraseology that apply to the safe and expeditious flow of air traffic. Designed to provide experience in real world simulation of the TRACON environment. Fee required. A final grade of B is required for continuation in the ATC-CTI program. Four hours contact time required per week. Fall only. For complete ATC-CTI policy go to http://mtsu.edu/aerospace/cti.php.

AERO 4660 - Air Traffic Control: En-Route Operations
3 credit hours
Prerequisite: Grade of B in AERO 4650; required corequisite: AERO 4661. Focuses on the many aspects of the Air Traffic Control En-Route System. Radar and data sides of the En-Route positions addressed. Radar and Non-Radar procedures, regulations, and specific phraseology that apply to the safe and expeditious flow of air traffic presented. A final grade of B is required for continuation in the ATC-CTI program. Spring only. For complete ATC-CTI policy go to http://mtsu.edu/aerospace/cti.php.

AERO 4661 - Air Traffic Control: En-Route Operations Lab
1 credit hour
Prerequisite: Grade of B in AERO 4651; corequisite: AERO 4660. Focuses on the many aspects of the Air
Traffic Control En-Route System. Radar and data side of the En-Route positions addressed. Students will have opportunity to demonstrate all procedures, regulations, and specific phraseology that apply to the safe and expeditious flow of air traffic. Students will be required to attend labs to provide hands-on application of task and procedures used in the En-Route environment. Fee required. A final grade of B is required for continuation in the ATC-CTI program. Four hours contact time required per week. Spring only. For complete ATC-CTI policy go to www.mtsu.edu/aerospace/cti.php.

AERO 4710 - Unmanned Aircraft Systems Operations Track Capstone
3 credit hours
Prerequisites: AERO 1710, AERO 2201, AERO 2230, AERO 3710, AERO 3720, and AERO 3730. Capstone course in Unmanned Aircraft Systems (UAS) Operations. Actual UAS operations in the National Airspace System (NAS) conducted.

AERO 4730 - Honors Seminar in Aviation Psychology
3 credit hours
Application and physiological testing and research techniques in aviation education, management, and technology.

Transportation

TRNS 1610 - Introduction to Transportation
3 credit hours
Transportation development, identification, and evaluation of the elements of the transportation system including historical, legislative, and trend analysis. Fall only.

TRNS 2620 - Transportation Freight Systems
3 credit hours
An overview of cargo systems and transportation freight rates. Includes an analysis of transportation issues and the relationship between the shipper, the modes of transportation, and the consumer. Spring only.

TRNS 3630 - Transportation Systems
3 credit hours
Prerequisite: TRNS 1610 or TRNS 2620 or permission of instructor. An overview of the structure and management of a logistics distribution system. Distribution logistics as a function area and as a strategic element of the total transportation system. Fall only.

TRNS 4640 - Topics in Transportation
3 credit hours
Prerequisites: TRNS 3630 and senior standing or permission of instructor. Capstone course for students selecting the transportation management focus within Aerospace Administration. Individually directed course on a selected topic in transportation. Topics include regional, domestic, or global factors impacting the transportation industry. Covers the elements of a transportation system, historical development, legislation, and significant trends.
Agribusiness and Agriscience

Jessica Carter, Interim Director
Anderson, Brzezicki, Cui, Downs, Gardner, Gill, Haffner, Hoffman, Johnston, Neely, Phillips, Ricketts, Spooner, Whitaker, Youngblood

Programs in the School of Agribusiness and Agriscience lead to the Bachelor of Science degree with majors in Agribusiness, Animal Science, and Plant and Soil Science. A concentration in Horse Science is available in the Animal Science major. Certification in Agricultural Education is available in each of the three majors. A preparatory program is also offered for additional study in veterinary medicine.
A minor in Agriculture is available.

Graduate Study
A Master of Science in Horse Science is offered. Students choose from one of three concentrations: Equine Education, Equine Physiology, or Industry Management.
A graduate minor is offered in Agriculture. Requirements and a list of the courses offered for graduate credit are published in the Graduate Catalog.
Agribusiness, Agricultural Education Certification, B.S.

School of Agribusiness and Agriscience
615-898-2430
Cliff Ricketts, program coordinator
Cliff.Ricketts@mtsu.edu

Agribusiness majors seeking certification to teach agricultural education in secondary schools (grades 7-12) must complete (1) the Agribusiness major, (2) a Secondary Education minor, and (3) professional agricultural education courses.

A major in Agribusiness requires a minimum of 43 semester hours of courses to include
   a. 21 hours in Agribusiness;
   b. an additional nine (9) hours from ABAS as indicated under the Agribusiness major requirements; and
   c. a general core of ABAS 1000, ABAS 1410, ABAS 1610, ABAS 2210, and ABAS 3130.

Curriculum: Agribusiness, Agricultural Education Certification

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- ABAS 1000 - Orientation in Agriculture 1 credit hour
- ABAS 1410 - Elements of Animal Science 3 credit hours
- ABAS 1610 - Elements of Plant Science 3 credit hours
- ABAS 2210 - Introduction to Agricultural Engineering 3 credit hours
- ABAS 2230 - Introduction to Vocational Agricultural Education 3 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- Mathematics 3 to 4 credit hours
- Humanities and/or Fine Arts 3 credit hours
- BIOL 1030 - Exploring Life 4 credit hours (Nat Sci) AND
- BIOL 1031 - Exploring Life Lab 0 credit hours (Nat Sci)

Subtotal: 29-30 Hours

Sophomore

- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- PSCI 1030 - Topics in Physical Science 4 credit hours (Nat/Sci) AND
- PSCI 1031 - Topics in Physical Science Lab 0 credit hours (Nat Sci)
- YOED 2500 - Planning and Assessment 3 credit hours
- ABAS 3130 - Principles of Agricultural Economics 3 credit hours
- ABAS 4230 - Adult Education in Vocational-Technical Education and Program Development 3 credit hours
- ECON 2410 - Principles of Economics, Macroeconomics 3 credit hours (Soc/Beh Sci)
- Social/Behavioral Sciences 3 credit hours
- Humanities and/or Fine Arts 3 credit hours
Choose 6 hours from:

- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 34 Hours

Junior

- ABAS 3340 - Soil 3 credit hours
- ABAS 3600 - Horticulture in Our Lives 3 credit hours
- ABAS 4210 - Farm Power and Equipment 3 credit hours OR
- Animal Science or Plant and Soil Science elective 3 credit hours
- ABAS 4150 - Agricultural Policy 3 credit hours OR
- ABAS 4190 - International Agriculture 3 credit hours
- Agribusiness electives 12 credit hours
- YOED 3000 - Classroom Management 3 credit hours
- YOED 3300 - Problem-Based Instructional Strategies 3 credit hours

Subtotal: 30 Hours

Senior

- ABAS 3440 - Livestock Management 3 credit hours
- ABAS 4220 - Methods of Teaching Agriscience and Agriculture Mechanics 3 credit hours
- ABAS 4250 - Leadership in Agricultural Industries 3 credit hours
- YOED 4020 - Residency I: Grades K-12 6 credit hours
- YOED 4400 - Residency II 12 credit hours

Subtotal: 27 Hours

Total hours in program: 120

NOTE:

*Internship courses may not be used to fulfill this requirement.

Academic Map

Justin Gardner, program coordinator
Justin.Gardner@mtsu.edu

The program leading to a major in Agribusiness is designed for students who are interested primarily in the non-farm phases of agriculture.

A major in Agribusiness requires a minimum of 43 semester hours of courses to include

a. 18 hours in Agribusiness;
b. an additional six (6) hours from ABAS as indicated under the Agribusiness major requirements; and
c. a general core of ABAS 1000, ABAS 1410, ABAS 1610, ABAS 2130, ABAS 2210, ABAS 3130, and ABAS 4150 or ABAS 4190.

A minor from another department is required.

Curriculum: Agribusiness

Curricular listing include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- ABAS 1000 - Orientation in Agriculture 1 credit hour
- ABAS 1410 - Elements of Animal Science 3 credit hours

- CHEM 1010 - Introductory General Chemistry I 4 credit hours (Nat Sci) AND
- CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours (Nat Sci)*
- CHEM 1020 - Introductory General Chemistry II 4 credit hours AND
- CHEM 1021 - Intro to General Chemistry II Lab 0 credit hours
  Choose 6 hours from:
  - HIST 2010 - Survey of United States History I 3 credit hours OR
  - HIST 2020 - Survey of United States History II 3 credit hours OR
  - HIST 2030 - Tennessee History 3 credit hours

Subtotal: 29 Hours

Junior

- ABAS 3130 - Principles of Agricultural Economics 3 credit hours
- ABAS 3340 - Soil 3 credit hours OR
- ABAS 4310 - Forage Crops 3 credit hours
- ABAS 3440 - Livestock Management 3 credit hours
- ABAS 3420 - Genetics of Domestic Livestock 3 credit hours
- Minor requirements 12 credit hours
- Animal Science electives 6 credit hours. **

Subtotal: 30 Hours

Senior

- ABAS 4410 - Animal Nutrition and Feeding 3 credit hours
- ABAS 4510 - Domestic Animal Reproductive Physiology 3 credit hours
- Animal Science electives 6 credit hours **
- Minor requirements 6 credit hours
- Upper-division electives 9 credit hours
- Animal Science/Agribusiness elective 3 credit hours

Subtotal: 30 Hours

Total hours in program: 120

NOTE:
* This chemistry sequence is not intended for students on a pre-veterinary plan of study. View the Veterinary Medicine Study Preparation section of this catalog.
**Electives must come from the following courses: ABAS 3430, ABAS 3450, ABAS 3470, ABAS 3480, ABAS 3490, ABAS 3500, ABAS 3540, ABAS 4090, ABAS 4260, ABAS 4470, ABAS 4490, ABAS 4520, ABAS 4860.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Animal Science, B.S., Academic Map
Animal Science, Horse Science Concentration, B.S.

School of Agribusiness and Agriscience
Rhonda Hoffman, program coordinator
615-898-2432 (SAG) or 615-898-2908 (Horse Science Center)
Rhonda.Hoffman@mtsu.edu

The Horse Science concentration is designed to meet the needs of persons majoring in Animal Science who wish to emphasize horse science and related courses.

A major in Animal Science requires a minimum of 43 semester hours of courses to include
  a. 21 hours of Horse Science concentration courses: ABAS 2400, ABAS 3040 or ABAS 3430, ABAS 3410, ABAS 3300, ABAS 2480, ABAS 4090 or ABAS 4440, and one course from the following: ABAS 4040, ABAS 4170, ABAS 4450, ABAS 4460, ABAS 4540, or ABAS 4550.
  b. 3-hour Animal Science or Agribusiness elective; and
  c. a general core of ABAS 1000, ABAS 1410, ABAS 1610, ABAS 2210, ABAS 3130, ABAS 3340 or ABAS 4310, and ABAS 3440.

A minor from another department is required.

Curriculum: Animal Science, Horse Science

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- ABAS 1000 - Orientation in Agriculture 1 credit hour
- ABAS 1410 - Elements of Animal Science 3 credit hours
- ABAS 1610 - Elements of Plant Science 3 credit hours
- Mathematics 3 to 4 credit hours (MATH 1710 recommended)
- Humanities and/or Fine Arts 3 credit hours
- Social/Behavioral Sciences 3 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND
- BIOL 1111 - General Biology Lab 0 credit hours (Nat Sci)
- BIOL 1120 - General Biology 4 credit hours AND
- BIOL 1121 - General Biology Lab 0 credit hours

Subtotal: 30-31 Hours

Sophomore

- Minor course 3 credit hours
- ABAS 2400 - Fundamentals of Horsemanship 3 credit hours
- Humanities and/or Fine Arts 3 credit hours
- Social/Behavioral Sciences 3 credit hours
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
• CHEM 1010 - Introductory General Chemistry I 4 credit hours (Nat Sci) AND
• CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours (Nat Sci)
  OR
• CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
• CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
• CHEM 1020 - Introductory General Chemistry II 4 credit hours AND
• CHEM 1021 - Intro to General Chemistry II Lab 0 credit hours
  OR
• CHEM 1120 - General Chemistry II 4 credit hours AND
• CHEM 1121 - General Chemistry II Lab 0 credit hours
  Choose 6 hours from:
  • HIST 2010 - Survey of United States History I 3 credit hours OR
  • HIST 2020 - Survey of United States History II 3 credit hours OR
  • HIST 2030 - Tennessee History 3 credit hours

Subtotal: 32 Hours

Junior

• Animal Science or Agribusiness elective 3 credit hours
• ABAS 3130 - Principles of Agricultural Economics 3 credit hours
• ABAS 3300 - Equine Health 3 credit hours
• ABAS 3340 - Soil 3 credit hours OR
• ABAS 4310 - Forage Crops 3 credit hours
• ABAS 2210 - Introduction to Agricultural Engineering 3 credit hours
• ABAS 3440 - Livestock Management 3 credit hours
• Minor requirements 6 credit hours
• Upper-division electives 6 credit hours

Subtotal: 30 Hours

Senior

• ABAS 3040 - Stable Management 3 credit hours OR
• ABAS 3430 - Horse Production 3 credit hours
• ABAS 3410 - Horse Breeds and Genetics 3 credit hours
• ABAS 2480 - Equine Evaluation and Selection 3 credit hours
• ABAS 4090 - Equine Reproduction and Breeding 3 credit hours OR
• ABAS 4440 - Equine Nutrition and Feeding 3 credit hours
• ABAS 4040 - Equine Event and Facility Management 3 credit hours OR
• ABAS 4170 - Equine Industry 3 credit hours OR
• ABAS 4450 - Techniques of Teaching Horsemanship 3 credit hours OR
• ABAS 4460 - Behavior and Training of Horses 4 credit hours OR
• ABAS 4540 - Equine Assisted Therapy 3 credit hours OR
• ABAS 4550 - Equine Exercise Physiology 3 credit hours
• Minor requirements 9 credit hours
• Upper-division electives 3 to 4 credit hours

Subtotal: 28 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Animal Science, Horse Science, B.S., Academic Map
Plant and Soil Science, Agricultural Education Certification, B.S.

School of Agribusiness and Agriscience
615-898-2430
Cliff Ricketts, program coordinator
Cliff.Ricketts@mtsu.edu

Plant and Soil Science majors seeking certification to teach agricultural education in secondary schools (grades 7-12) must complete (1) the Plant and Soil Science major, (2) a minor in Secondary Education, and (3) professional agricultural education courses.

A major in Plant and Soil Science requires a minimum of 43 semester hours of courses to include
a. 21 hours in Plant and Soil Science;
   b. an additional nine (9) hours from ABAS as indicated under the Plant and Soil Science major requirements; and
   c. a general core of ABAS 1000, ABAS 1410, ABAS 1610, ABAS 2210, and ABAS 3130.

Curriculum: Plant and Soil Science, Agricultural Education Certification

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Science, and Social/Behavioral Sciences categories.

Freshman

- ABAS 1000 - Orientation in Agriculture 1 credit hour
- ABAS 1410 - Elements of Animal Science 3 credit hours
- ABAS 1610 - Elements of Plant Science 3 credit hours
- ABAS 2230 - Introduction to Vocational Agricultural Education 3 credit hours
- Mathematics 3 to 4 credit hours
- Humanities and/or Fine Arts 3 credit hours
- Social/Behavioral Sciences 3 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- BIOL 1030 - Exploring Life 4 credit hours (Nat Sci) AND
- BIOL 1031 - Exploring Life Lab 0 credit hours (Nat Sci)

Subtotal: 29-30 Hours

Sophomore

- ABAS 2210 - Introduction to Agricultural Engineering 3 credit hours
- ABAS 3440 - Livestock Management 3 credit hours
- ABAS 3600 - Horticulture in Our Lives 3 credit hours
- Social/Behavioral Sciences 3 credit hours
- Humanities and/or Fine Arts 3 credit hours
- ABAS 4230 - Adult Education in Vocational-Technical Education and Program Development 3 credit hours
- YOED 2500 - Planning and Assessment 3 credit hours
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
• PSCI 1030 - Topics in Physical Science 4 credit hours (Nat Sci) AND
• PSCI 1031 - Topics in Physical Science Lab 0 credit hours (Nat Sci)

Choose 6 hours from:
• HIST 2010 - Survey of United States History I 3 credit hours OR
• HIST 2020 - Survey of United States History II 3 credit hours OR
• HIST 2030 - Tennessee History 3 credit hours

Subtotal: 34 Hours

Junior

• ABAS 3340 - Soil 3 credit hours
• COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
• ABAS 4210 - Farm Power and Equipment 3 credit hours OR
• Or Agribusiness or Animal Science elective 3 credit hours
• Plant and Soil Science electives 15 credit hours
• YOED 3000 - Classroom Management 3 credit hours
• YOED 3300 - Problem-Based Instructional Strategies 3 credit hours

Subtotal: 30 Hours

Senior

• ABAS 3130 - Principles of Agricultural Economics 3 credit hours
• ABAS 4220 - Methods of Teaching Agriscience and Agriculture Mechanics 3 credit hours
• ABAS 4250 - Leadership in Agricultural Industries 3 credit hours
• YOED 4020 - Residency I: Grades K-12 6 credit hours
• YOED 4400 - Residency II 12 credit hours

Subtotal: 27 Hours

Total hours in program: 120

NOTE:

For certification to teach agriscience, students should see advisor.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Plant and Soil Science, Agricultural Education Certification, B.S., Academic Map
Plant and Soil Science, B.S.

School of Agribusiness and Agriscience
615-494-8996
Nathan Phillips, program coordinator
Nate.Phillips@mtsu.edu

The program leading to a major in Plant and Soil Science is designed for students interested in agronomy, horticulture, and/or soil sciences. Students may choose to concentrate on either one of these areas within this major. A major in Plant and Soil Science requires a minimum of 43 semester hours of courses to include
a. 24 hours in Plant and Soil Science;
b. an additional three (3) hours from ABAS as indicated under the Plant and Soil Science major requirements; and
c. a general core of ABAS 1000; ABAS 1410; ABAS 1610; ABAS 2210; ABAS 3130; and ABAS 3340.

A minor from another department is required.

Curriculum: Plant and Soil Science

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- ABAS 1000 - Orientation in Agriculture 1 credit hour
- ABAS 1410 - Elements of Animal Science 3 credit hours
- ABAS 1610 - Elements of Plant Science 3 credit hours
- Humanities and/or Fine Arts 3 credit hours
- Social/Behavioral Sciences 3 credit hours
- Mathematics 3 to 4 credit hours (MATH 1710 recommended)

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Plant and Soil Science, B.S., Academic Map
Veterinary Medicine Study Preparation

School of Agribusiness and Agriscience
Students who wish to pursue studies in veterinary medicine should follow the appropriate catalog requirements at institutions offering advanced degrees in the field. The following curriculum will enable a student to continue in a standard veterinary curriculum to complete work for a degree in veterinary medicine:

Requirements

- ENGL 1010 - Expository Writing 3 credit hours
- ENGL 1020 - Research and Argumentative Writing 3 credit hours
- CHEM 1110 - General Chemistry I 4 credit hours AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours
- BIOL 1110 - General Biology 4 credit hours AND
- BIOL 1111 - General Biology Lab 0 credit hours
- BIOL 1120 - General Biology 4 credit hours AND
- BIOL 1121 - General Biology Lab 0 credit hours
- Humanities and Social Science 18 credit hours *
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours
- PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
- PHYS 2021 - Physics Problems Laboratory II 4 credit hours
- CHEM 3010 - Organic Chemistry I 4 credit hours AND
- CHEM 3011 - Organic Chemistry I Lab 0 credit hours
- BIOL 2230 - Microbiology 4 credit hours AND
- BIOL 2231 - Microbiology Lab 0 credit hours
- CHEM 3020 - Organic Chemistry II 4 credit hours AND
- CHEM 3021 - Organic Chemistry II Lab 0 credit hours
- BIOL 3250 - Genetics 4 credit hours AND
- BIOL 3251 - Genetics Lab 0 credit hours
- BIOL 4210 - Cell and Molecular Biology 4 credit hours AND **
- BIOL 4211 - Cell and Molecular Biology Lab 0 credit hours **
- CHEM 3530 - Principles of Biochemistry 4 credit hours AND
- CHEM 3531 - Principles of Biochemistry Lab 0 credit hours
- Math 0-6 credit hours ***

Subtotal: 72-78 credit hours

NOTE:

*May include English literature, speech, music, art, philosophy, religion, language, history, economics, anthropology, medical vocabulary, political science, psychology, sociology, and geography.
**Should have had organic chemistry plus BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121, and BIOL 3250/BIOL 3251 prior.
***MATH 1710 and/or MATH 1720 should be taken if student needs background for Physics.

The above requirements represent the very minimum, and those students without an adequate farm background could benefit by taking such agriculture courses as elements of animal science, livestock management, livestock...
production courses, animal nutrition, and animal reproduction. Many students who are accepted to a professional veterinary program first complete the four-year Animal Science major at MTSU and earn the B.S. degree.

**Academic Map**

Following is a printable, suggested four-year schedule of courses:

**Veterinary Study Academic Map**
Agribusiness and Agriscience
(Agricultural Education)

ABAS 2010 - World Food and Society
3 credit hours
A global examination of the economic, political, social, and cultural issues related to hunger including war, politics, inequities, malnutrition, population growth, food production, biotechnology, ecological destruction, and food aid. Students will examine personal and societal values concerning world food issues and explore possible directions and solutions for the future. Includes a service learning experience.

ABAS 2230 - Introduction to Vocational Agricultural Education
3 credit hours
Duties of the vocational agriculture teacher with special emphasis on the Future Farmers of America and Supervised Agricultural Experience Programs. Lecture/Lab.

ABAS 4120 - Alternative Fuels
3 credit hours
Nature, scope, and importance of alternative fuel vehicles in light, medium, and heavy applications. Topics include theory of operation and safety with an emphasis on gaseous and liquid fuels (ethanol, methanol, biodiesel, hydrogen, solar, wind, and other alternative fuels). Lecture/lab.

ABAS 4210 - Farm Power and Equipment
3 credit hours
Gasoline engines with actual work experience in overhaul. Work also with transmissions, hydraulics, braking systems, and other farm equipment including use of shop manuals, operation manuals, and parts books. Five hours lecture/lab.

ABAS 4220 - Methods of Teaching Agriscience and Agriculture Mechanics
3 credit hours
Integrating science into agriculture emphasizing biology, chemistry, and physics. Emphasis on mechanical skills such as small gas engines, gas welding, and electricity. Lecture/lab.

ABAS 4230 - Adult Education in Vocational-Technical Education and Program Development
3 credit hours
How to teach adults and administer adult programs.

Agribusiness and Agriscience
(Agribusiness)

ABAS 1201 - Agribusiness: Fundamentals and Applications
3 credit hours
Introduces key agribusiness principles and their application to the food industry. Major microeconomic,
macroeconomics, and global forces influencing both
producers’ and consumers’ decision of food and fiber
products considered and discussed. Leading
problems and current issues facing the industry
discussed.

ABAS 2130 - Introduction to Agribusiness
3 credit hours
Nature, scope, importance, and relationship to the
general economy.

ABAS 3130 - Principles of Agricultural Economics
3 credit hours
Applying the principles of economics to agricultural
problems.

ABAS 3140 - Real Property Law for Commerce
and Agriculture
3 credit hours
(Same as BLAW 4470/FIN 4470.) Prerequisite: Junior
standing. Legal rights and limitations of ownership of
property, estates, titles, methods of transferring titles,
abstract of titles, mortgages, leases, easements,
restrictions on the use of property, real estate
development, application of contract law to real
property, and the role of real estate in the
administration of estates. Emphasis on specific
application to agricultural businesses and farms.

ABAS 3160 - Value Added Agriculture
3 credit hours
A comprehensive analysis of the value-added
agricultural industry including marketing farm products
directly to consumers.

ABAS 3200 - International Wine Industry
3 credit hours
Prerequisite: ABAS 2500 or permission of instructor.
Introduces the wine industry of a country other than
the U.S; taught onsite in the host country. Wine
industry from the ground up explored–from the
nurseries which propagate grapevines, to the
vineyards that produce the grapes, to the wineries
that produce and market the wines. Marketing of host
country wines, domestically and abroad, studied.
Participants must be 21 years of age to enroll.
Combined lecture/lab.

ABAS 3810 - Milk Processing and Marketing
3 credit hours
Prerequisite: PSCI 1030/PSCI 1031 or CHEM
1010/CHEM 1011 and CHEM 1020/CHEM
1021 or CHEM 1110/CHEM 1120 and CHEM
1120/CHEM 1121. Biological, chemical, and physical
properties of cow’s milk and its value as an animal
food source; techniques of processing and marketing;
governmental regulations; laboratory testing.
Lecture/lab.

ABAS 3850 - Wine Science and Industry
3 credit hours
Prerequisites: ABAS 1610 and CHEM 1020/CHEM
1021 or CHEM 1120/CHEM 1121 or PSCI 1030/PSCI
1031. The science and marketing of wine, including
grape production, fruit processing, and fermentation
technologies. Explores wine marketing in Tennessee,
the U.S., and the world. Student must be 21 years of
age to enroll. Lecture/lab.

ABAS 4115 - Agritourism
3 credit hours
Prerequisite: ABAS 3160, LSTS 4550, or permission
of instructor. Emphasis on any activity, enterprise, or
business that combines primary elements and
characteristics of Tennessee agriculture and tourism
and provides an experience for visitors that stimulates
economic activity and impacts both farm and
community income.

ABAS 4130 - Agricultural Price Analysis and Price
Management
3 credit hours
Prerequisite: ABAS 3130. Analysis of the forces that
drive agricultural markets, the risk inherent in these
markets, and tools that can be used to defray
agriculture-specific risk including production risk.

ABAS 4140 - Economics of Agribusiness
Management
3 credit hours
Prerequisite: ABAS 3130 or approval of instructor.
Application of economic concepts to agribusiness
firms.

ABAS 4145 - Agricultural Finance
3 credit hours
Prerequisites: MATH 1010, MATH 1530, MATH
1630, MATH 1710, MATH 1720, MATH 1730, MATH
1810, or MATH 1910 and ABAS 2130 or ABAS 3130.
Application of finance to farms and agribusiness;
topics include farm real estate, financing farm inputs,
and financing commodity marketing plans.
ABAS 4150 - Agricultural Policy
3 credit hours
Prerequisite: ABAS 3130. Agricultural policy in a democratic society; relationship of farm groups to public policy; types of agricultural programs and appraisal of their results.

ABAS 4160 - Agricultural Cooperatives
3 credit hours
Prerequisite: ABAS 3130. Role of agricultural cooperatives in collective bargaining for farmers; historical development, economic organization, and structural aspects.

ABAS 4170 - Equine Industry
3 credit hours
Prerequisites: ABAS 2130 or ABAS 3130 and ABAS 3040 or approval of instructor. Operational strategies and management issues facing the equine enterprises. Financial, legal, and taxation issues pertaining to the U.S. and international equine industry. Lecture/lab.

ABAS 4180 - Internship in Agribusiness
6 credit hours
Prerequisite: Approval of instructor. In-depth practical experience in a specific area of agribusiness. NOT OPEN TO STUDENTS WHO HAVE RECEIVED CREDIT FROM ANOTHER SCHOOL INTERNSHIP COURSE.

ABAS 4190 - International Agriculture
3 credit hours
Prerequisite: ABAS 3130 or approval of instructor. Interdisciplinary experiential learning in a foreign country. Foreign agriculture and agribusiness explored in the classroom and onsite through a planned trip. Students required to hold (or acquire) a valid US passport and participate in a one- to two-week visit to a foreign country during the course. Combined lecture/lab.

ABAS 4200 - Fruit and Vegetable Marketing
3 credit hours
Prerequisite: BIOL 1030/BIOL 1031 or CHEM 1010/CHEM 1011 or CHEM 1020/CHEM 1021 or CHEM 1110/CHEM 1111 or CHEM 1120/CHEM 1121 or PSCI 1030/PSCI 1031 or approval of instructor. Basic biochemistry of respiration, handling techniques and practices, quality assessment and marketing of fruit +and vegetable crops. Both domestic and international marketing of fruit and vegetable products discussed. Examines the economic impact of improper handling on both the local producer and the end user.

ABAS 4810 - The Food Industry
3 credit hours
An overview from production to processing to marketing. Covers the current status of the world’s largest employer, including where and how foods are produced, distributed, and marketed and where the industry is heading in the future.

ABAS 4820 - Principles of Food Processing
3 credit hours
Prerequisite: PSCI 1030/PSCI 1031 or CHEM 1010/CHEM 1011, and CHEM 1020/CHEM 1110 or CHEM 1120/CHEM 1121. Principles used in the modern food industry, including thermal, refrigerated, frozen, and irradiation methods. Includes coverage of the techniques used to process major food commodities such as meats, cereal grains, and fats and oils. Lecture/lab.

ABAS 4830 - Food Quality Control
3 credit hours
Prerequisites: PSCI 1030/PSCI 1031 and BIOL 1030/BIOL 1031 or approval of instructor. Quality control and sensory evaluation techniques utilized in food processing. Instrumental and physical methods of quality determination of raw and processed food products, hazard analysis and critical control point (HACCP), and quality philosophies employed in the industry. Sensory evaluation techniques and statistical analysis of evaluation results covered.

ABAS 4850 - Food Safety Issues from Production to Consumption
3 credit hours
(Same as NFS 4260.) Prerequisite: BIOL 2230/BIOL 2231 or permission of instructor. Issues impacting food production, food storage and transportation, food processing, and food consumption within food production facilities, the home, and food service facilities. Consumer concerns evaluated based on risk theory and scientific evaluation of safety, including decision-making through critical thinking. Food standards and regulations designed to improve safety of the food supply discussed.
Agribusiness and Agriscience (Animal Science)

**ABAS 1110 - Introduction to Horse Care and Use**
3 credit hours
Survey of basic equine care, breeds, use, management, and behavior.

**ABAS 1410 - Elements of Animal Science**
3 credit hours
Overview of domestic animal species, including reproduction, genetics, feeding, management, and product marketing. Species include beef, dairy, horses, swine, sheep, goats, and companion animals.

**ABAS 2110 - Basic Horsemanship**
1 credit hour
Preparation and orientation for students interested in taking horse science courses with an animal handling component. Topics include facility safety, horse control and handling, grooming, saddling, daily care considerations, and facility maintenance. Lecture and one two-hour laboratory each week.

**ABAS 2400 - Fundamentals of Horsemanship**
3 credit hours
Behavior, philosophy, and language for communicating with and influencing the equine athlete. Develops basic control skills, balance and coordination, gaits; use of equipment; understanding equestrian competition. Two-hour lecture and two-hour laboratory each week.

**ABAS 2480 - Equine Evaluation and Selection**
3 credit hours
Individual parts, conformation, and gaits of the horse as they relate to selecting and judging horses for production, recreation, and sport.

**ABAS 3040 - Stable Management**
3 credit hours
Prerequisite: ABAS 2400 or approval of instructor. Business aspects of horse facility management and ownership emphasized. Practical approaches to management of horses and responsible horse ownership also covered. Lecture/lab.

**ABAS 3300 - Equine Health**
3 credit hours
Familiarizes students with normal physiologic parameters and how to recognize and deal with health issues of horses. Topics include care of the pregnant broodmare, foal care, routine health maintenance, infectious diseases, commonly used medications, dentistry, lameness, neurological diseases, colic, parasites, ophthalmology, dermatology, reproduction, geriatrics, and alternative therapies. Lecture/lab.

**ABAS 3310 - Animal Care and Welfare**
3 credit hours
Prerequisite: ABAS 1410 or permission of the instructor. Applied aspects of animal care and welfare, including physical condition, feeding, proper housing, and environmental adaptation of animals to human interaction.

**ABAS 3400 - Horsemanship-Equitation**
3 credit hours
Prerequisite: ABAS 2400 and approval of instructor. Understanding, recognizing, and producing lateral control in the horse. Lateral exercises; lateral movements; developing lateral balance and control, track, gait, pace, impulsion, and rhythm. Two hour lecture and two-hour laboratory each week.

**ABAS 3410 - Horse Breeds and Genetics**
3 credit hours
A review of the history of the horse from the prehistoric era to present day with a focus on the development and contributions of horse breeds in the U.S. and state horse industry. Roles of breed associations, principles of genetics, selection of desired traits, genetic abnormalities associated with specific breeds, and matching breeds to disciplines discussed.

**ABAS 3420 - Genetics of Domestic Livestock**
3 credit hours
Prerequisites: ABAS 1410; BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121; junior-level classification or higher. Basic principles of genetics, crossbreeding, inbreeding, and molecular genetics. Animal breeding topics include use of quantitative traits, prediction of breeding value, methods of selection, and genetic evaluations. **Offered fall only.**

**ABAS 3430 - Horse Production**
3 credit hours
Prerequisite: ABAS 2110 or ABAS 2400 or approval of instructor. Scientific principles relevant to production requirements of horses as related to exercise physiology and performance, growth, reproductive physiology and state, age, and clinical support. Facilities management, marketing, legal...
aspects of horse ownership, and career opportunities covered. Lecture/lab.

**ABAS 3440 - Livestock Management**  
3 credit hours  
Prerequisite: ABAS 1410. Management practices for farm animal species. Practices include animal handling, restraint techniques, feeding, milking, castrations, identification methods, and herd health problems. Lecture/lab.

**ABAS 3450 - Anatomy and Physiology of Domestic Animals**  
3 credit hours  
Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121; ABAS 1410. The parts, functions, and anatomical relationships of various organs and systems of domestic animals. Lecture/lab.

**ABAS 3460 - Farrier Science**  
3 credit hours  
Basic techniques in the science and art of making, fitting, and actual shoeing of horses according to proper methods. One lecture and two-hour laboratory periods. *(Offered at irregular times in conjunction with the University College.)*

**ABAS 3470 - Beef Cattle Production**  
3 credit hours  
Prerequisites: ABAS 1410; junior-level classification or higher. Management practices essential for economic beef production including breeding, feeding, and herd health. Purebred, commercial, stocker, feedlot, and processing segments evaluated. Lecture/lab. *Offered fall only.*

**ABAS 3480 - Swine Production**  
3 credit hours  
Prerequisites: ABAS 1410; junior-level classification or higher. Understanding management of the pig's environment and genetics to maximize profits. Includes nutrition, reproduction, genetics, housing, herd health, and management practices. Lecture/lab. *Offered Spring only.*

**ABAS 3490 - Poultry Production and Marketing**  
3 credit hours  
Prerequisites: ABAS 1410; junior-level classification or higher. A comprehensive study of commercial chicken production. Topics include the structure of the U.S. commercial chicken industries; poultry housing and equipment; broiler, broiler breeder, hatchery, and commercial layer management; and poultry/egg processing. Field trips used to supplement course materials. Lecture/lab or online.

**ABAS 3500 - Small Ruminant Production**  
3 credit hours  
Prerequisite: ABAS 1410. The study of efficient sheep and goat production and management in the U.S. Topics include genetics and selection, reproduction, health and parasite control, nutrition, forages and grazing management, and product quality and marketing. Lecture/lab.

**ABAS 3540 - Dairy Production**  
3 credit hours  
Prerequisite: ABAS 1410; juniors and seniors only. Feeding and management, ruminant digestion, physiology of milk secretion, production testing and official records, sanitary regulations, handling and marketing of raw milk. Lecture/lab.

**ABAS 3550 - Dairy Production**  
3 credit hours  
Prerequisite: PSCI 1030/PSCI 1031 or CHEM 1010/CHEM 1020, or CHEM 1110/CHEM 1120. Biological, chemical, and physical properties of cow's milk and its value as an animal food source; techniques of processing and marketing; governmental regulations; laboratory testing. Lecture/lab.

**ABAS 3900 - Horses and Horsemanship**  
3 credit hours  
Basic requirements of horse ownership, care and associated expenses, inherent risks and safety around horses, and resources available in the horse industry. For non-horse-science majors. Lecture/lab.

**ABAS 4040 - Equine Event and Facility Management**  
3 credit hours  
Prerequisite: ABAS 3040 or ABAS 3440 or approval of instructor. Fundamentals of managing equine and other livestock events and facilities covered. Involves active participation in preparing for and conducting equine events held on campus. Lecture/lab.

**ABAS 4090 - Equine Reproduction and Breeding**  
3 credit hours  
Prerequisite: ABAS 3040 or ABAS 3440 or approval of instructor. Reproductive anatomy and physiology of the stallion and mare as they relate to modern breeding practices. Vocational training in
semen handling, artificial insemination, and neonatal care. Two hours lecture and two hours laboratory.

**ABAS 4170 - Equine Industry**
3 credit hours
Prerequisites: ABAS 2130 or ABAS 3130 and ABAS 3040 or approval of instructor. Operational strategies and management issues facing the equine enterprises. Financial, legal, and taxation issues pertaining to the U.S. and international equine industry. Lecture/lab.

**ABAS 4260 - Behavior of Domestic Animals**
3 credit hours
Behavior aspects of raising and managing domestic animals to include equine, swine, goats, cattle, sheep, dogs, and cats. Communication, ingestive, sexual, social, aggressive, and abnormal behaviors emphasized. Lecture/lab.

**ABAS 4400 - Advanced Horsemanship-Equitation**
3 credit hours
Prerequisites: ABAS 2400 and ABAS 3400 and approval of instructor. Coordination and refinement of skills from previous horsemanship courses. Understanding, recognizing, and producing longitudinal flexion in the horse. Collection, extension, and stride control. Two-hour lecture and two-hour laboratory each week.

**ABAS 4410 - Animal Nutrition and Feeding**
3 credit hours
Prerequisites: ABAS 1410 and CHEM 1010/CHEM 1011 and CHEM 1020/CHEM 1021 or approval of instructor. Equine digestion and utilization of nutrients, appropriate feeds and feeding management, and diseases with a nutritional component. Nutrient requirements for the horse at various stages, including maintenance, reproduction, growth, performance, age, and clinical support discussed.

**ABAS 4440 - Behavior and Training of Horses**
4 credit hours
Prerequisites: ABAS 2400, ABAS 3400, ABAS 4400, and approval of instructor. The psychology, theory, and practice of training and behavior modification in horses. Students assigned a project horse for the semester. Two hours lecture and four hours laboratory.

**ABAS 4450 - Techniques of Teaching Horsemanship**
3 credit hours
Prerequisites: ABAS 2400, ABAS 3400, ABAS 4400, and approval of instructor. Development of communication, evaluation, and presentation skills for teaching horsemanship. Two-hour lecture and two-hour laboratory each week.

**ABAS 4460 - Advanced Beef Production**
3 credit hours
Prerequisites: ABAS 1410 and ABAS 3470 or approval of instructor. In-depth analysis of various systems of beef production. Extensive field trips to cow-calf, feedlot, stocker, and purebred operations. Offered Spring only.

**ABAS 4470 - Livestock Evaluation**
3 credit hours
Prerequisite: Approval of instructor. Comparative evaluation of beef cattle, swine, sheep, and horses. Develops defense of placing through an organized set of reasons involving terms describing the animal's characteristics. Importance of these characteristics to the animal function stressed. Lecture/lab.

**ABAS 4480 - Domestic Animal Reproductive Physiology**
3 credit hours
Prerequisites: ABAS 1410; BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121; junior-level classification or higher. Advanced study of the anatomy, physiology, and endocrinology of reproduction in domestic animal
species. Topics include male and female reproductive anatomy, hormonal control of reproductive processes, reproductive development, the estrus cycle, male physiology, and lactation. Current techniques to control animal reproduction described. Lecture/lab. 

Offered Spring only.

**ABAS 4520 - Companion Animal Management**
3 credit hours
A comprehensive study of dog and cat management. Topics include canine and feline history; selective breeding; functional anatomy; reproductive physiology and management; nutrition and feeding management; diseases and health management; behavior, communication, and training. Service role of the dog and cat highlighted.

**ABAS 4540 - Equine Assisted Therapy**
3 credit hours
Focuses on the effective modality of the horse/human bond as it relates to various forms of equine-assisted therapy with an emphasis on therapeutic riding for people with disabilities. Management of a NARHA-approved therapeutic program and instructor certification also covered. One hour classroom lecture, online, and experiential learning components.

**ABAS 4545 - Equine Assisted Activities and Therapies II**
3 credit hours
Prerequisite: ABAS 4540 or approval of instructor. In-depth education for equine assisted activities and therapies (EAAT), including business planning and administration, lesson planning and structure, and equine selection and management. Offers preparation for those seeking a career within EAAT services and organizations. Two one-hour lectures and one two-hour laboratory per week.

**ABAS 4550 - Equine Exercise Physiology**
3 credit hours
Prerequisite: ABAS 2400 or approval of instructor. Applied aspects of equine exercise physiology, including physical, physiological, metabolic and mental adaptation to athletic training, exercise metabolism, thermoregulation, biomechanics of movement, effects of surface and footing, common unsoundnesses observed during training and competition, exercising testing, and an overview of shoeing for performance.

**ABAS 4580 - Advanced Judging of Horses**
3 credit hours
Prerequisite: ABAS 2480. Systems of judging for current horse show disciplines and exercises for students who aspire to become professional judges. Ethics, contracts with management, and procedures for becoming a judge are part of focus.

**ABAS 4590 - Dairy Cattle Judging**
3 credit hours
Ideal dairy cattle type and relationship to performance and longevity. Classification and evaluation according to type of the various breeds and comparative judging within the breed. Selection for genetic improvement.

**ABAS 4860 - Meat Science and Technology**
3 credit hours
Prerequisites: ABAS 1410 and sophomore-level classification or higher. Selecting, inspecting, grading, fabricating, packaging, preserving, and cooking red meat products. Other topics include anatomy, structure, and composition of muscle, food safety, and microbiology. Offered Spring only.

**ABAS 4980 - Seminar in Horse Science**
3 credit hours
Familiarizes horse science majors with important current scientific investigation.

**Agribusiness and Agriscience (Plant and Soil Science)**

**ABAS 1101 - Introduction to Ornamental Horticulture**
3 credit hours
Ornamental horticulture from the scientific basis to commercial operations and management systems. Emphasis on the role of horticulture in everyday living through the introductory study of growing, maintenance, and utilization of plants to benefit people and the environment. Topics include basis of plant science and history, scope, and nature of ornamental horticulture including coverage of such diverse topics as production, craftsmanship, and business management skills.

**ABAS 1610 - Elements of Plant Science**
3 credit hours
Fundamental plant processes; plant tissues, structures, environment, growth, development, reproduction, and propagation. Lecture/Lab.
ABAS 3330 - Field Crop Production
3 credit hours
Economic importance, adaptation, origin, and history; botanical characteristics; cultural methods, uses, breeding, and pests of field crops. Lecture/Lab.

ABAS 3340 - Soil
3 credit hours
Physical, chemical, and biological properties. Lecture/lab.

ABAS 3350 - Soil Fertility and Fertilizer
3 credit hours
Use of fertilizer and liming materials in soil-plant relationships. Lecture/lab.

ABAS 3360 - Irrigation and Drainage
3 credit hours
Prerequisite: ABAS 3340. Comparative evaluation and interpretation of irrigation and drainage systems; water supply development; interrelationships of the environment and plants; scheduling irrigation; examination of economic and legal factors. Lecture/lab.

ABAS 3370 - Soil Analysis
3 credit hours
Prerequisite: ABAS 3340. Analysis of soils in laboratory. Lecture/lab.

ABAS 3630 - Agroforestry
3 credit hours
Culture, conservation, management, and utilization of forest stands. Lecture/lab.

ABAS 3640 - Woody Landscape Plants
3 credit hours
Distribution, characteristics, relationships, and adaptation of native and exotic trees shrubs, and vines for landscape use. One-hour lecture and four-hour lab.

ABAS 3660 - Vegetable Gardening
3 credit hours
Principles of home and commercial vegetable production; adaptation, culture, fertility, diseases, and insects of vegetables. Lecture/lab.

ABAS 3670 - Fruit Production
3 credit hours
Prerequisite: ABAS 1610 or 4 hours of biology. Introduces art and science of fruit production in the United States. Focuses on temperate fruit production, but also includes a general overview of citrus production. Conveys a general understanding of fruit production in the United States including propagation, orchard management, pollination, harvest, cultural practices, pests, and trends in the industry.

ABAS 3850 - Wine Science and Industry
3 credit hours
Prerequisites: ABAS 1610 and CHEM 1020/CHEM 1021 or CHEM 1120/CHEM 1121 or PSCI 1030/PSCI 1031. The science and marketing of wine, including grape production, fruit processing, and fermentation technologies. Explores wine marketing in Tennessee, the U.S., and the world. Student must be 21 years of age to enroll. Lecture/lab.

ABAS 4200 - Fruit and Vegetable Marketing
3 credit hours
Prerequisites: PSCI 1030/PSCI 1031 and BIOL 1030/BIOL 1031, CHEM 1110/CHEM 1120, CHEM 1010/CHEM 1011 or CHEM 1020/CHEM 1021 or approval of instructor. Basic biochemistry of respiration, handling techniques and practices, quality assessment and marketing of fruit and vegetable crops. Both domestic and international marketing of fruit and vegetable products discussed. Examines the economic impact of improper handling on both the local producer and the end user.

ABAS 4300 - Plant Protection
3 credit hours
Prerequisite: ABAS 1610 or 4 hours of biology. Principles of protecting crop plants from damage by weeds, insects, diseases, and other biotic factors. Pest control by chemical, cultural, and biological methods with an emphasis on integrated pest management.

ABAS 4310 - Forage Crops
3 credit hours
Adaptation, distribution, establishment, management, culture, and utilization of forage legumes and grasses. Lecture/lab.

ABAS 4320 - Plant Physiology
4 credit hours
(Also as BIOL 4500.) Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121, CHEM 1020/CHEM 1021, ABAS 3340. Plant mineral nutrition, photosynthesis, growth, development, and metabolism at the cellular and whole plant levels. Three hours lecture and three hours laboratory.
ABAS 4330 - Turf Management
3 credit hours
Prerequisite: ABAS 1610 or BIOL 1120/BIOL 1121 or ABAS 1101. Establishment and management of turf grasses for lawns, golf courses, and parks. Lecture/lab.

ABAS 4340 - Soil Formation and Remediation
3 credit hours
Prerequisite: ABAS 3340. The relation of climate, plant and animal life, geological formations, and land forms to soil genesis and remediation. Lecture/lab.

ABAS 4350 - Soil Survey and Land Use
3 credit hours
Prerequisite: ABAS 3340 or approval of instructor. Soil properties used to determine suitability for land use. Lecture/lab.

ABAS 4370 - Soil and Water Conservation
3 credit hours
Principles and practices of soil and water conservation in rural and urban environments. Lecture/lab.

ABAS 4380 - Interior Landscaping
3 credit hours
Principles and practices of designing, installing, and maintaining landscapes in malls, public buildings, and other indoor environments. Lecture/lab.

ABAS 4390 - Urban and Sports Turf Soils
3 credit hours
Prerequisites: ABAS 3340 and ABAS 4330. Describe, design, manage, and evaluate urban and sports turf soils. Lecture/lab.

ABAS 4500 - Sustainability in Agricultural Ecosystems
3 credit hours
Prerequisites: ABAS 1610 or 4 hours of biology. Theories of agroecology; focuses on sustainable agricultural practices and concepts. The impact of specific agricultural technologies and land use practices on the productivity of agricultural ecosystems, environmental quality, and human health. Examines the environmental science and agronomy of both conventional and alternative sustainable practices including benefits and limitations. Lecture/lab.

ABAS 4610 - Arboriculture
3 credit hours
Prerequisite: ABAS 1610 or BIOL 1120/BIOL 1121. The culture of trees, shrubs, and vines in the landscape. Planting, transplanting, fertilizing, irrigation, pruning, problem diagnosis, and damage repair included. Lecture/lab.

ABAS 4620 - Greenhouse Management
3 credit hours
Prerequisite: ABAS 1610 or BIOL 1120/BIOL 1121. Analysis of soils, fertilizers, irrigation techniques, container preparation, ventilation, growth regulation, and carbon dioxide enrichment for greenhouse operation. Two-hour lecture and two-hour lab.

ABAS 4630 - Floriculture
3 credit hours
Prerequisite: ABAS 1610 or BIOL 1120/BIOL 1121. Propagation and other cultural practices for the production and maintenance of plants and flowers in the home. Two-hour lecture and two-hour lab.

ABAS 4640 - Landscaping
3 credit hours
Application of the principles of design, the use of proportionate-sized woody landscape plants, and other practices to produce low-maintenance-cost landscapes. One-hour lecture and four-hour lab.

ABAS 4660 - Nursery Management
3 credit hours
Prerequisite: ABAS 1610 or BIOL 1120/BIOL 1121. Principles and practices of nursery management as a business. Nursery administration, financial management, and marketing. Cultural management of field- and container-grown nursery plants. Lecture/lab.

ABAS 4670 - Plant Propagation
3 credit hours
Prerequisite: ABAS 1610 or BIOL 1120/BIOL 1121. Anatomical features and physiological principles involved in propagating plants from seed and by division, cutting, budding, and grafting. Use of growth regulators and environmental factors. Two-hour lecture and two-hour lab.

ABAS 4680 - Internship in Plant and Soil Science
6 credit hours
Prerequisite: Approval of instructor. Practical experience in a specific area of agronomy, horticulture, or soils. Classroom material related to practical application. NOT OPEN TO STUDENTS
WHO HAVE RECEIVED CREDIT FROM ANOTHER SCHOOL INTERNSHIP.

Agribusiness and Agriscience
(General)

ABAS 1000 - Orientation in Agriculture
1 credit hour
Job opportunities in agriculture, departmental facilities, extracurricular activities at MTSU associated with specific phases of agriculture. Pass/Fail.

ABAS 1301 - Introduction to Agricultural Leadership
3 credit hours
Introduces agricultural leadership and illustrates the relationship between leadership styles, personality types, communication styles, and career selection. Offers preparation for leadership positions in agricultural careers and communities.

ABAS 2210 - Introduction to Agricultural Engineering
3 credit hours
Prerequisite: MATH 1710 or MATH 1010 or approval of instructor. Basic principles, mechanics, combustion engines, electricity, building construction, and machinery with applications of problem solving techniques. Lecture/Lab.

ABAS 2500 - Wine Appreciation
3 credit hours
The fundamentals of wine appreciation, wine label interpretation, and wine judging. Students will evaluate wine products and must be 21 years of age to enroll. Lecture/lab.

ABAS 3010 - Agri-Media Skills
3 credit hours
Applications of oral and written skills in communicating about agricultural research, shows, and sales.

ABAS 3600 - Horticulture in Our Lives
3 credit hours
Emphasis on the role of horticulture in everyday living, through principles of growing plants in the home, floral design, home landscaping, and gardening. Lecture/lab.

ABAS 4100 - Microcomputer Applications in Agriculture
3 credit hours
Includes use of agricultural software, agricultural communications networks, computer dairy feeding systems, and farm records.

ABAS 4250 - Leadership in Agricultural Industries
3 credit hours
Prerequisite: Junior or senior standing or consent of instructor. A capstone course to enhance students' leadership and human relation skills in the workplace. Topics include leadership styles, theories, characteristics of leaders (conceptual, technical, human relations), communication styles, group dynamics, conducting successful meetings, problem solving, goal setting, attitudes, motivation, self-concept, learning styles, time management, and employability skills.

ABAS 4700 - Agriculture in Our Lives
3 credit hours
Everyone who eats and wears clothes is affected by agriculture, yet only a small percentage of the population actively farms. Course allows exploration of various organizations, both private and public, that support agriculture, provide career opportunities, and regulate the safety and fair trade upon which agribusiness depends. Issues that affect the lives of farmers and which may affect the future of many aspects of agriculture are explored. Local travel will be required. Combined lecture/lab.

ABAS 4910 - Problems in Agriculture
1 to 6 credit hours
Problem or problems selected from one of the major disciplines. May involve conferences with instructor, library work, field study and/or laboratory activity. Students can take from one to three credits with a maximum of three per semester.

ABAS 4990 - Seminar
1 credit hour
Students required to research and give an oral report on a current agricultural topic.
Biology

Lynn Boyd, Chair

The Department of Biology offers preparation for teachers of biology, for biologists in industrial and governmental employment, and for students planning for graduate study in biology or for advanced professional courses in health sciences. The program for the Biology major leads to the Bachelor of Science degree. Students choose from concentrations in Organismal Biology and Ecology, Genetics and Biotechnology, Microbiology, and Physiology. Students interested in the health professions, such as medicine, pharmacy, dentistry, etc., should select the Physiology concentration. A minor in another field is required for Biology majors. A minor in Secondary Education is suggested for those persons planning to teach. A minor in Biology is also available. The Department of Biology participates in an interdisciplinary major in Forensic Science in conjunction with Chemistry and Criminal Justice Administration. MTSU is an affiliate of the Gulf Coast Research Laboratory (GCRL) in Ocean Springs. For information on attendance or course offerings visit the GCRL website at www.usm.edu/gcrl/summer_field/index.php.

Honors College
The Department of Biology offers the following courses in Honors:
BIOL 1030/BIOL 1031 (Fall Semester)
BIOL 1110/BIOL 1111 (Fall Semester)
BIOL 1120/BIOL 1121 (Spring Semester)
BIOL 2230/BIOL 2231 (Spring Semester)
BIOL 3250/BIOL 3251 (Fall Semester)
BIOL 3400/BIOL 3401 (Spring Semester)

Graduate Study
The Master of Science is offered in Biology. Requirements for this degree and a list of the courses offered for graduate credit are published in the Graduate Catalog.

Biology Minor

Department of Biology
The minor in Biology requires 19 semester hours as follows:
1. BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121;
2. BIOL 2230/BIOL 2231, BIOL 3250/BIOL 3251;
3. Three or more semester hours chosen from upper-division courses or BIOL 2010/BIOL 2011 and BIOL 2020/BIOL 2021.

A 2.00 GPA is required for courses satisfying the minor in Biology. All Biology minors are assigned an advisor by contacting the Biology Department at (615) 898-2847 or emailing biology@mtsu.edu.
Biology, Genetics and Biotechnology Concentration, B.S.

Department of Biology
615-898-2847
Matt Elrod-Erickson, program coordinator
Matt.Elrod-Erickson@mtsu.edu

The major in Biology requires 42 semester hours including a biology core for all concentrations of 29 semester hours:
1. BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121;
2. BIOL 2230/BIOL 2231, BIOL 3250/BIOL 3251, BIOL 3400/BIOL 3401, BIOL 3500, BIOL 4200;
3. BIOL 4110/BIOL 4111 or BIOL 4210/BIOL 4211 or BIOL 4500.

Other requirements include
1. MATH 1910 and one of the following: BIOL 4350/BIOL 4351 or MATH 2050 or MATH 1920;
2. 12 hours of chemistry (CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, and CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011).

All Biology majors are assigned a professional advisor. The student is responsible for seeking the assistance of the advisor. This catalog is not intended to provide the detail necessary for self-advising. Every Biology major is required to declare a concentration area. Each area requires semester hours to be selected from a set of designated courses.

Concentration Requirements

- BIOL 4550 - Biotechnology 3 credit hours
- BIOL 4450 - Molecular Genetics 4 credit hours
  OR
- BIOL 4460 - Human Genetics 3 credit hours AND
- BIOL 4461 - Human Genetics Lab 0 credit hours

One course selected from:

- BIOL 4270 - Transmitting Electron Microscopy 4 credit hours
- BIOL 4290 - Scanning Electron Microscopy 4 credit hours
- BIOL 4300 - Immunology 4 credit hours AND
- BIOL 4301 - Immunology Lab 0 credit hours
- BIOL 4450 - Molecular Genetics 4 credit hours
- BIOL 4460 - Human Genetics 3 credit hours AND
- BIOL 4461 - Human Genetics Lab 0 credit hours
- BIOL 4510 - Food and Industrial Microbiology 4 credit hours
- BIOL 4570 - Principles of Toxicology 3 credit hours AND
- BIOL 4571 - Principles of Toxicology Lab 0 credit hours
- BIOL 4720 - Animal Development 4 credit hours AND
- BIOL 4721 - Animal Development Lab 0 credit hours
- BIOL 4750 - Plant Biotechnology 4 credit hours

Curriculum: Biology, Genetics and Biotechnology

Curricular listings include General Education requirements in Communication, History, Humanities, and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.
Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- MATH 1910 - Calculus I 4 credit hours (Math)
- BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND
- BIOL 1111 - General Biology Lab 0 credit hours
- BIOL 1120 - General Biology 4 credit hours AND
- BIOL 1121 - General Biology Lab 0 credit hours
- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours

Subtotal: 29 Hours

Sophomore

- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- Humanities and/or Fine Arts 3 credit hours
- Minor course 3 credit hours
- Upper-division elective 3 credit hours
- BIOL 2230 - Microbiology 4 credit hours AND
- BIOL 2231 - Microbiology Lab 0 credit hours
- BIOL 3250 - Genetics 4 credit hours AND
- BIOL 3251 - Genetics Lab 0 credit hours
- CHEM 3010 - Organic Chemistry I 4 credit hours AND
- CHEM 3011 - Organic Chemistry I Lab 0 credit hours OR
- CHEM 2030 - Elements of Organic Chemistry 4 credit hours AND
- CHEM 2031 - Elements of Organic Chemistry Lab 0 credit hours

Choose 6 hours from:
- HIST 2010 - Survey of United States History I 3 credit hours
- HIST 2020 - Survey of United States History II 3 credit hours
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 30 Hours

Junior

- BIOL 3500 - Evolution 3 credit hours
- BIOL 4550 - Biotechnology 3 credit hours
- Social/Behavioral Sciences (2 prefixes) 6 credit hours
- Humanities and/or Fine Arts 3 credit hours
- Upper-division minor course 3 credit hours
• Upper-division minor or elective course 3 credit hours
• BIOL 3400 - General Ecology 4 credit hours AND
• BIOL 3401 - General Ecology Lab 0 credit hours
• BIOL 4110 - General Physiology 4 credit hours AND
• BIOL 4111 - General Physiology Lab 0 credit hours
  OR
• BIOL 4210 - Cell and Molecular Biology 4 credit hours AND
• BIOL 4211 - Cell and Molecular Biology Lab 0 credit hours
  OR
• BIOL 4500 - Plant Physiology 4 credit hours
• BIOL 4350 - Biometry 4 credit hours AND
• BIOL 4351 - Biometry Lab 0 credit hours
  OR
• MATH 1920 - Calculus II 4 credit hours
  OR
• MATH 2050 - Probability and Statistics 3 credit hours

Subtotal: 32-33 Hours

Senior
• BIOL 4200 - Seminar 2 credit hours
• BIOL 4450 - Molecular Genetics 4 credit hours
  OR
• BIOL 4460 - Human Genetics 3 credit hours AND
• BIOL 4461 - Human Genetics Lab 0 credit hours
• Concentration elective (choose from list above) 3 credit hours
• Upper-division BIOL 4 credit hours
• Upper-division minor or elective courses 6-9 credit hours
• Elective (3000-4000 level) course 3 credit hours
• Elective course 3-6 credit hours

Subtotal: 27-28 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Biology, Genetics and Biotechnology, B.S., Academic Map
Biology, Microbiology Concentration, B.S.

Department of Biology
615-898-2847
Steve Wright, program coordinator
Steven.Wright@mtsu.edu

The major in Biology requires 42 semester hours including a biology core for all concentrations of 29 semester hours:

1. BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121;
2. BIOL 2230/BIOL 2231, BIOL 3250/BIOL 3251, BIOL 3400/BIOL 3401, BIOL 3500, BIOL 4200;
3. BIOL 4110/BIOL 4111 or BIOL 4210/BIOL 4211 or BIOL 4500.

Other requirements include

1. MATH 1910 and one of the following: BIOL 4350/BIOL 4351 or MATH 2050 or MATH 1920;
2. 12 hours of chemistry (CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, and CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011).

All Biology majors are assigned a professional advisor. The student is responsible for seeking the assistance of the advisor. This catalog is not intended to provide the detail necessary for self-advising.

Every Biology major is required to declare a concentration area. Each area requires semester hours to be selected from a set of designated courses.

Concentration Requirements

Minimum of 10 hours selected from

- BIOL 3050 - Parasitology 3 credit hours AND
- BIOL 3051 - Parasitology Lab 0 credit hours
- BIOL 3210 - Environmental Microbiology 3 credit hours AND
- BIOL 3211 - Environmental Microbiology Lab 0 credit hours
- BIOL 4080 - Mycology 4 credit hours AND
- BIOL 4081 - Mycology Lab 0 credit hours
- BIOL 4300 - Immunology 4 credit hours AND
- BIOL 4301 - Immunology Lab 0 credit hours
- BIOL 4430 - Diagnostic Microbiology 4 credit hours
- BIOL 4440 - General Virology 4 credit hours
- BIOL 4450 - Molecular Genetics 4 credit hours
- BIOL 4510 - Food and Industrial Microbiology 4 credit hours
- BIOL 4550 - Biotechnology 3 credit hours
- BIOL 4730 - Microbial Physiology and Biochemistry 4 credit hours

Curriculum: Biology, Microbiology

Curricular listings include General Education requirements in Communication, History, Humanities, and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND
- BIOL 1111 - General Biology Lab 0 credit hours (Nat Sci)
- BIOL 1120 - General Biology 4 credit hours AND
- BIOL 1121 - General Biology Lab 0 credit hours
• CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
• CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
• CHEM 1120 - General Chemistry II 4 credit hours AND
• CHEM 1121 - General Chemistry II Lab 0 credit hours
• ENGL 1010 - Expository Writing 3 credit hours (Comm)
• ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
• MATH 1910 - Calculus I 4 credit hours (Math)
• COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)

Subtotal: 29 hours

Sophomore

• BIOL 2230 - Microbiology 4 credit hours AND
• BIOL 2231 - Microbiology Lab 0 credit hours
• BIOL 3250 - Genetics 4 credit hours AND
• BIOL 3251 - Genetics Lab 0 credit hours

Subtotal: 32-34 Hours

Senior

- BIOL concentration 6-7 credit hours
- Upper-division minor or elective 6-9 credit hours
- Upper-division BIOL elective 4 credit hours
- Elective (3000-4000 level) 3 credit hours
- Elective 3-6 credit hours
- BIOL 4200 - Seminar 2 credit hours

Subtotal: 27-28 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Biology, Microbiology, B.S., Academic Map
Biology, Organismal Biology and Ecology Concentration (Botany), B.S.

Department of Biology
615-898-2847
Dennis Mullen, program coordinator
Dennis.Mullen@mtsu.edu

The major in Biology requires 42 semester hours including a biology core for all concentrations of 29 semester hours:

1. BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121;
2. BIOL 2230/BIOL 2231, BIOL 3250/BIOL 3251, BIOL 3400/BIOL 3401, BIOL 3500, BIOL 4200;
3. BIOL 4110/BIOL 4111 (Zoology Track) or BIOL 4210/BIOL 4211 or BIOL 4500 (Botany Track).

Other requirements include

1. MATH 1910 and one of the following: BIOL 4350/BIOL 4351 or MATH 2050 or MATH 1920;
2. 12 hours of chemistry (CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, and CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011).

All Biology majors are assigned a professional advisor. The student is responsible for seeking the assistance of the advisor. This catalog is not intended to provide the detail necessary for self-advising.

Every Biology major is required to declare a concentration area. Each area requires semester hours to be selected from a set of designated courses.

Students may select from the Organismal Biology and Ecology concentration courses below or may choose from the botany, zoology, ecology, or general biology (satisfies Teacher Education requirements) tracks.

Concentration Requirements

Minimum of 10 hours selected from

- BIOL 3020 - Comparative Anatomy of the Vertebrates 4 credit hours AND
- BIOL 3021 - Comparative Anatomy of the Vertebrates Lab 0 credit hours
- BIOL 3030 - Non-Flowering Plants 4 credit hours
- BIOL 3040 - Entomology 3 credit hours
- BIOL 3050 - Parasitology 3 credit hours AND
- BIOL 3051 - Parasitology Lab 0 credit hours
- BIOL 4060 - Dendrology 3 credit hours
- BIOL 4080 - Mycology 4 credit hours AND
- BIOL 4081 - Mycology Lab 0 credit hours
- BIOL 4120 - Flowering Plants 4 credit hours
- BIOL 4140 - Invertebrate Zoology 4 credit hours AND
- BIOL 4141 - Invertebrate Zoology Lab 0 credit hours
- BIOL 4180 - Vertebrate Zoology 4 credit hours AND
- BIOL 4181 - Vertebrate Zoology Lab 0 credit hours
- BIOL 4220 - Ichthyology 4 credit hours AND
- BIOL 4221 - Ichthyology Lab 0 credit hours
- BIOL 4250 - Limnology 4 credit hours AND
- BIOL 4251 - Limnology Lab 0 credit hours
- BIOL 4390 - Ethology 4 credit hours AND
- BIOL 4391 - Ethology Lab 0 credit hours
- BIOL 4520 - Plant Anatomy and Development 4 credit hours
- BIOL 4570 - Principles of Toxicology 3 credit hours AND
- BIOL 4571 - Principles of Toxicology Lab 0 credit hours
- BIOL 4580 - Marine Biology 4 credit hours AND
- BIOL 4581 - Marine Biology Lab 0 credit hours
- BIOL 4590 - Principles of Environmental Toxicology 4 credit hours
- BIOL 4700 - Principles of Plant-Animal Interactions 3 credit hours AND
- BIOL 4701 - Principles of Plant-Animal Interaction Lab 0 credit hours

Botany

Select from
- BIOL 3030 - Non-Flowering Plants 4 credit hours
- BIOL 4060 - Dendrology 3 credit hours
- BIOL 4080 - Mycology 4 credit hours AND
- BIOL 4081 - Mycology Lab 0 credit hours
- BIOL 4120 - Flowering Plants 4 credit hours
- BIOL 4520 - Plant Anatomy and Development 4 credit hours
- BIOL 4700 - Principles of Plant-Animal Interactions 3 credit hours AND
- BIOL 4701 - Principles of Plant-Animal Interaction Lab 0 credit hours

Curriculum: Biology, Organismal Biology and Ecology (Botany)

Curricular listings include General Education requirements in Communication, History, Humanities, and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

Subtotal: 27-28 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Biology, Organismal Biology and Ecology (General), B.S., Academic Map
Biology, Organismal Biology and Ecology Concentration (Zoology), B.S.

Department of Biology
615-898-2847
Dennis Mullen, program coordinator
Dennis.Mullen@mtsu.edu

The major in Biology requires 42 semester hours including a biology core for all concentrations of 29 semester hours:

1. BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121;
2. BIOL 2230/BIOL 2231, BIOL 3250/BIOL 3251, BIOL 3400/BIOL 3401, BIOL 3500, BIOL 4200;
3. BIOL 4110/BIOL 4111 (Zoology Track) or BIOL 4210/BIOL 4211 or BIOL 4500 (Botany Track).

Other requirements include

1. MATH 1910 and one of the following: BIOL 4350/BIOL 4351 or MATH 2050 or MATH 1920;
2. 12 hours of chemistry (CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, and CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011).

All Biology majors are assigned a professional advisor. The student is responsible for seeking the assistance of the advisor. This catalog is not intended to provide the detail necessary for self-advising.

Every Biology major is required to declare a concentration area. Each area requires semester hours to be selected from a set of designated courses.

Students may select from the Organismal Biology and Ecology concentration courses below or may choose from the botany, zoology, ecology, or general biology (satisfies Teacher Education requirements) tracks.

Concentration Requirements

Minimum of 10 hours selected from

- BIOL 3020 - Comparative Anatomy of the Vertebrates 4 credit hours AND
- BIOL 3021 - Comparative Anatomy of the Vertebrates Lab 0 credit hours
- BIOL 3030 - Non-Flowering Plants 4 credit hours
- BIOL 3040 - Entomology 3 credit hours
- BIOL 3050 - Parasitology 3 credit hours AND
- BIOL 3051 - Parasitology Lab 0 credit hours
- BIOL 4060 - Dendrology 3 credit hours
- BIOL 4080 - Mycology 4 credit hours AND
- BIOL 4081 - Mycology Lab 0 credit hours
- BIOL 4120 - Flowering Plants 4 credit hours
- BIOL 4140 - Invertebrate Zoology 4 credit hours AND
- BIOL 4141 - Invertebrate Zoology Lab 0 credit hours
- BIOL 4180 - Vertebrate Zoology 4 credit hours AND
- BIOL 4181 - Vertebrate Zoology Lab 0 credit hours
- BIOL 4220 - Ichthyology 4 credit hours AND
- BIOL 4221 - Ichthyology Lab 0 credit hours
- BIOL 4250 - Limnology 4 credit hours AND
- BIOL 4251 - Limnology Lab 0 credit hours
- BIOL 4390 - Ethology 4 credit hours AND
- BIOL 4391 - Ethology Lab 0 credit hours
- BIOL 4520 - Plant Anatomy and Development 4 credit hours
- BIOL 4570 - Principles of Toxicology 3 credit hours AND
- BIOL 4571 - Principles of Toxicology Lab 0 credit hours
• BIOL 4580 - Marine Biology 4 credit hours AND
• BIOL 4581 - Marine Biology Lab 0 credit hours
• BIOL 4590 - Principles of Environmental Toxicology 4 credit hours
• BIOL 4700 - Principles of Plant-Animal Interactions 3 credit hours AND
• BIOL 4701 - Principles of Plant-Animal Interaction Lab 0 credit hours

Zoology Track

Select from
• BIOL 3020 - Comparative Anatomy of the Vertebrates 4 credit hours AND
• BIOL 3021 - Comparative Anatomy of the Vertebrates Lab 0 credit hours
• BIOL 3040 - Entomology 3 credit hours
• BIOL 3050 - Parasitology 3 credit hours AND
• BIOL 3051 - Parasitology Lab 0 credit hours
• BIOL 4140 - Invertebrate Zoology 4 credit hours AND
• BIOL 4141 - Invertebrate Zoology Lab 0 credit hours
• BIOL 4180 - Vertebrate Zoology 4 credit hours AND
• BIOL 4181 - Vertebrate Zoology Lab 0 credit hours
• BIOL 4220 - Ichthyology 4 credit hours AND
• BIOL 4221 - Ichthyology Lab 0 credit hours
• BIOL 4390 - Ethology 4 credit hours AND
• BIOL 4391 - Ethology Lab 0 credit hours

Curriculum: Biology, Organismal Biology and Ecology (Zoology)

Curricular listings include General Education requirements in Communication, History, Humanities, and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

• ENGL 1010 - Expository Writing 3 credit hours (Comm)
• ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
• COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
• MATH 1910 - Calculus I 4 credit hours (Math)
• BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND
• BIOL 1111 - General Biology Lab 0 credit hours (Nat Sci)
• BIOL 1120 - General Biology 4 credit hours AND
• BIOL 1121 - General Biology Lab 0 credit hours
• CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
• CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
• CHEM 1120 - General Chemistry II 4 credit hours AND
• CHEM 1121 - General Chemistry II Lab 0 credit hours

Subtotal: 29 Hours

Sophomore

• ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
Humanities and/or Fine Arts 3 credit hours
Minor course 3 credit hours
Upper-division elective 3 credit hours
BIOL 2230 - Microbiology 4 credit hours AND
BIOL 2231 - Microbiology Lab 0 credit hours
BIOL 3250 - Genetics 4 credit hours AND
BIOL 3251 - Genetics Lab 0 credit hours
CHEM 3010 - Organic Chemistry I 4 credit hours AND
CHEM 3011 - Organic Chemistry I Lab 0 credit hours
OR
CHEM 2030 - Elements of Organic Chemistry 4 credit hours AND
CHEM 2031 - Elements of Organic Chemistry Lab 0 credit hours
Choose 6 hours from:
HIST 2010 - Survey of United States History I 3 credit hours
HIST 2020 - Survey of United States History II 3 credit hours
HIST 2030 - Tennessee History 3 credit hours

Subtotal: 30 Hours

Junior

BIOL 3500 - Evolution 3 credit hours
Social/Behavioral Sciences (2 prefixes) 6 credit hours
Humanities and/or Fine Arts 3 credit hours
Upper-division minor course 3 credit hours
Upper-division minor or elective 3 credit hours
BIOL Organismal and Ecology Concentration-Zoology Track 3-4 credit hours
BIOL 3400 - General Ecology 4 credit hours AND
BIOL 3401 - General Ecology Lab 0 credit hours
BIOL 4110 - General Physiology 4 credit hours (recommended for Zoology track) AND
BIOL 4111 - General Physiology Lab 0 credit hours
OR
BIOL 4210 - Cell and Molecular Biology 4 credit hours AND
BIOL 4211 - Cell and Molecular Biology Lab 0 credit hours
OR
BIOL 4500 - Plant Physiology 4 credit hours

Academic Map

Following is a printable, suggested four-year schedule of courses:
Biology, Physiology Concentration, B.S., Academic Map
Biology, Teacher Licensure (MTeach), B.S.

Department of Biology

Students seeking a license to teach in secondary schools (grades 7-12) must complete (1) a major in the subject they intend to teach, (2) a minor in Secondary Education, and (3) additional teacher licensure requirements. Students must contact their Secondary Education Minor advisors for approval of appropriate courses.

Curriculum: Biology, Teacher Licensure (MTeach)

Curricular listings include General Education requirements in Communication, History, Humanities, and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)

Academic Map

Following is a printable, suggested four-year schedule of courses:
Biology, Teacher Licensure (MTeach), B.S., Academic Map
Biology

BIOL 1030 - Exploring Life
4 credit hours
Corequisite: BIOL 1031. Designed for non-majors. Offers understanding, experiences, and skills related to common biological issues. Includes class discussions, small group activities, lectures, selected readings, and laboratory investigations. Students earning an A in BIOL 1030/1031 and wishing to declare a major or minor in Biology may substitute BIOL 1030/BIOL 1031 for BIOL 1110/BIOL 1111 toward meeting the requirement for the major or minor. Three hours lecture and one two-hour laboratory.

BIOL 1031 - Exploring Life Lab
0 credit hours
Corequisite: BIOL 1030.

BIOL 1110 - General Biology
4 credit hours
Corequisite: BIOL 1111. Primarily for Biology majors and minors and other science-oriented students. Biological principles and processes, including introduction to the nature of science, cells (structure, function, metabolism, division), genetics, evolution, viruses, bacteria, protists, and fungi. Three hours lecture and one three-hour laboratory. While BIOL 1110 can be used to fulfill half the 8-hour General Education requirement for Natural Sciences, it is the first semester of a two-semester sequence primarily designed for science majors.

BIOL 1111 - General Biology Lab
0 credit hours
Corequisite: BIOL 1110.

BIOL 1120 - General Biology
4 credit hours
Prerequisite: BIOL 1030/BIOL 1031 with a minimum grade of A or BIOL 1110/BIOL 1111. Corequisite: BIOL 1121. Primarily for Biology majors and minors and other science-oriented students. Survey of plants and animals emphasizing evolution, structure, function, reproduction, growth, and ecology. Three hours lecture and one three-hour laboratory.

BIOL 1121 - General Biology Lab
0 credit hours
Corequisite: BIOL 1120.

BIOL 2000 - Orientation to the Medical Lab
2 credit hours
Corequisite: BIOL 2001. Open to anyone in medical and allied medical careers, but may not be taken as part of Biology major. Survey of medical lab careers, curricula, and affiliated laboratory programs; experience in medical laboratory testing procedures. One hour lecture and one two-hour laboratory.

BIOL 2001 - Orientation to the Medical Lab Field Experience Lab
0 credit hours

BIOL 2010 - Human Anatomy and Physiology I
4 credit hours
Completion of BIOL 1030 and BIOL 1031 or a grade of C or better in high school chemistry and biology within the last five years is strongly recommended. Corequisite: BIOL 2011. Meets requirements for many pre-health professional programs including nursing. Structure and function of the cell, integumentary, skeletal, muscle, and nervous systems. Three hours lecture and one three-hour laboratory.

BIOL 2011 - Human Anatomy and Physiology I Lab
0 credit hours
Corequisite: BIOL 2010.

BIOL 2020 - Human Anatomy and Physiology II
4 credit hours
Prerequisite: C or better in BIOL 2010/BIOL 2111. Corequisite: BIOL 2021. Meets requirements for many pre-health professional programs including nursing. Structure and function of endocrine, circulatory, respiratory, urinary, digestive, and reproductive systems. Biology majors passing both BIOL 2010/BIOL 2111 and BIOL 2020/BIOL 2021 with a C or better may substitute both courses for BIOL 3020. However, the substitution is not recommended for pre-med students and does not count for upper-division hours. Three hours lecture and one three-hour laboratory.

BIOL 2021 - Human Anatomy and Physiology II Lab
0 credit hours
Corequisite: BIOL 2020.
BIOL 2030 - Anatomy and Physiology
3 credit hours
Prerequisite: BIOL 1030/BIOL 1031 or BIOL 1110/BIOL 1111. Corequisite: BIOL 2031. General structure and physiological activities of human systems. Two hours lecture and one two-hour laboratory.

BIOL 2031 - Anatomy and Physiology Lab
0 credit hours
Corequisite: BIOL 2030.

BIOL 2230 - Microbiology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121 or BIOL 1030/BIOL 1031 and BIOL 1120/BIOL 1121 or BIOL 2010/BIOL 2011 and BIOL 2020/BIOL 2021. Concepts and techniques pertaining to the morphology, physiology, reproduction, isolation, cultivation and identification of microorganisms with particular emphasis on bacteria. Topics include the impact of microorganisms in our daily lives, both adverse and beneficial. Background in General Chemistry is strongly recommended. Three hours lecture and one three-hour laboratory.

BIOL 2231 - Microbiology Lab
0 credit hours
Corequisite: BIOL 2230.

BIOL 3000 - Life Science for Elementary Teachers
4 credit hours
Prerequisites: 8 hours of science including BIOL 1030/BIOL 1031 or equivalent. A process-oriented approach to the study of life with emphasis on execution and analysis of activities and experiments suited to the elementary school classroom. Six hours lecture and laboratory. (May not be used for Biology majors or minors.)

BIOL 3010 - Embryology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121. Corequisite: BIOL 3011. Early development of the frog, chick, pig, and human. Living material, whole mounts, and serial sections are used for studying cleavage, germ layer formation, histogenesis, and organogenesis. Three hours lecture and one three-hour laboratory.

BIOL 3011 - Embryology Lab
0 credit hours
Corequisite: BIOL 3010.

BIOL 3020 - Comparative Anatomy of the Vertebrates
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121. Corequisite: BIOL 3021. Vertebrate morphology and the development and function of systems and organs. Three hours lecture and one three-hour laboratory.

BIOL 3021 - Comparative Anatomy of the Vertebrates Lab
0 credit hours
Corequisite: BIOL 3020.

BIOL 3030 - Non-Flowering Plants
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121. Structure, physiology, methods of reproduction, and classification of the algae, fungi, liverworts, mosses, and ferns. Six hours lecture/laboratory.

BIOL 3040 - Entomology
3 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121. Morphology, classification, evolution, life histories, and economic importance of insects. Five hours of lecture and laboratory.

BIOL 3050 - Parasitology
3 credit hours
Prerequisite: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121. Corequisite: BIOL 3051. Life histories, host-parasite relationships, and control measures of the more common parasites of humans and domesticated animals. Two hours lecture and one three-hour laboratory.

BIOL 3051 - Parasitology Lab
0 credit hours
Corequisite: BIOL 3050.

BIOL 3070 - Biology Seminar on Environmental Problems
3 credit hours
Causes, effects, and solutions of environmental problems. Three hours per week.
BIOL 3100 - History and Philosophy of Biology  
3 credit hours  
Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121. Historical development of biology; the philosophy, ideas, and contributions of outstanding biologists. Three hours lecture.

BIOL 3160 - Social Issues and Genetic Technology  
3 credit hours  
Prerequisite: BIOL 1030/BIOL 1031 or BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121. Exploration of genetic principles related to contemporary issues. Provides students with the background needed to evaluate topics such as the release of genetically engineered plants and animals, the use of DNA fingerprinting techniques, the relationship between race and IQ, and others which impact their lives. Impact of genetics on society as well as society’s influence on the science will be explored. Role of genetics in medicine and agriculture also emphasized. Three hours lecture.

BIOL 3200 - Internship in Biology  
2 to 4 credit hours  
Prerequisite: Permission of department. Practical experience for students in a professional setting.

BIOL 3210 - Environmental Microbiology  
3 credit hours  
Prerequisite: BIOL 2230/BIOL 2231. Corequisite: BIOL 3211. Deals with microorganisms commonly found in air, water, and soil. Two hours lecture and one three-hour laboratory.

BIOL 3211 - Environmental Microbiology Lab  
0 credit hours  
Corequisite: BIOL 3210.

BIOL 3220 - Environmental Regulations and Compliance  
3 credit hours  
Prerequisite: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121. An in-depth review and application of governmentally established regulations concerning environmental quality. Emphasis on major federal acts. Three hours lecture.

BIOL 3230 - Introduction to Biological Literature  
2 credit hours  
Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121. Application of methods of literature research in the biological sciences and techniques of scientific presentation and writing. Two hours lecture.

BIOL 3240 - Introduction to Evolution  
3 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121 or BIOL 1030/BIOL 1031. Scientific principles and concepts formulating the biological theory of evolution. Includes historical development of modern theory; Darwin's natural selection theory; and problems in speciation, systematics, and geographical distribution of species. Three hours lecture.

BIOL 3250 - Genetics  
4 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121 or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121. Corequisite: BIOL 3251. An introductory course in genetics. Surveys and explores the sub-disciplines of genetics, including classical, molecular, and evolutionary genetics. Emphasis on the experiments, techniques, and theories forming the foundation of modern genetic research and its applications. Three hours lecture and one two-hour laboratory.

BIOL 3251 - Genetics Lab  
0 credit hours  
Corequisite: BIOL 3250.

BIOL 3340 - Pathophysiology  
3 credit hours  
(Same as NURS 3010.) Prerequisites: BIOL 2230/BIOL 2231, BIOL 2010/BIOL 2011, BIOL 2020/BIOL 2021. Basic mechanisms of disease processes and their role in disrupting normal physiology. Three hours lecture.

BIOL 3350 - Principles of Radiation in Medicine  
3 credit hours  
BIOL 3400 - General Ecology  
4 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121 and CHEM 1110/CHEM 1111. Corequisite: BIOL 3401. Basic concepts of the ecosystem and community aquatic and terrestrial habitats and population ecology; complemented by field and laboratory activities. Three hours lecture and one-three hour laboratory.

BIOL 3401 - General Ecology Lab  
0 credit hours  
Corequisite: BIOL 3400.

BIOL 3500 - Evolution  
3 credit hours  
Prerequisite: BIOL 3250/BIOL 3251. Evolutionary biology for majors. Topics include history of evolutionary thinking, mechanisms of evolution, basic quantitative and population genetics, life-history theory, evolution of sex, correlated responses to selection, speciation, macroevolution, molecular evolution, fossil record and geologic time scale, phylogenetic inference, and the emergence of life. Three hours lecture.

BIOL 3890 - Biology Instruction Internship  
1 credit hour  
Prerequisites: Successful completion of target courses and permission of instructor. A course to refine thinking, communication, and interpersonal skills through exposure to on-the-spot technical questions and a laboratory teaching experience as an assistant in a biology laboratory. Credits will not count toward a major or minor in Biology. May be repeated for up to three credits.

BIOL 4060 - Dendrology  
3 credit hours  
Prerequisite: BIOL 1120/BIOL 1121. Woody plants with emphasis on important timber trees of North America. Five hours lecture/laboratory.

BIOL 4070 - Economic Botany  
3 credit hours  
Prerequisite: BIOL 1120/BIOL 1121. Useful plants which have shaped civilization. Topics include origin of agriculture, fruits and nuts, grains and legumes, vegetables, spices and herbs, oils and waxes, medicinal plants, psychoactive plants. Three hours lecture.

BIOL 4080 - Mycology  
4 credit hours  
Prerequisite: BIOL 1120/BIOL 1121. Corequisite: BIOL 4081. Emphasizes taxonomy, morphology, and culture of fungi and their importance to humans. Three hours lecture and one three-hour laboratory.

BIOL 4081 - Mycology Lab  
0 credit hours  
Corequisite: BIOL 4080.

BIOL 4110 - General Physiology  
4 credit hours  
Prerequisites: BIOL 3250/BIOL 3251; CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011. Corequisite: BIOL 4111. Physiological and chemical properties of life processes in animals using an organ systems approach. Emphasis on mammalian physiology. Three hours lecture and one three-hour laboratory.

BIOL 4111 - General Physiology Lab  
0 credit hours  
Corequisite: BIOL 4110.

BIOL 4120 - Flowering Plants  
4 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121. Structure and classification of seed plants; a survey of local flora. Six hours lecture/laboratory.

BIOL 4130 - Histology  
4 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121 and CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011. Corequisite: BIOL 4131. Microscopic anatomy of vertebrate cells, tissues, and organs. Three hours lecture and one three-hour laboratory.

BIOL 4131 - Histology Lab  
0 credit hours  
Corequisite: BIOL 4130.

BIOL 4140 - Invertebrate Zoology  
4 credit hours  
Prerequisites: BIOL 1110/BIOL 1111, or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121. Corequisite: BIOL 4141. Morphology, classification, evolution, life histories,
and economic importance of invertebrate phyla. Three hours lecture and one three-hour laboratory.

BIOL 4141 - Invertebrate Zoology Lab
0 credit hours
Corequisite: BIOL 4140.

BIOL 4150 - Radiation Biology
3 credit hours

BIOL 4170 - Endocrinology
3 credit hours
Prerequisites: BIOL 3250/BIOL 3251, BIOL 4110/BIOL 4111 or BIOL 2020/BIL 2021; CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011. Study of hormones and other chemical messengers including synthesis, secretion, transport, receptors, cellular, and physiological activity. Focus on humans and other vertebrates. Three hours lecture.

BIOL 4180 - Vertebrate Zoology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with minimum grade of A and BIOL 1120/BIOL 1121. Corequisite: BIOL 4181. Structure, life history, and classification of fish, amphibians, and mammals. Local representatives emphasized. Three hours lecture and one three-hour laboratory.

BIOL 4181 - Vertebrate Zoology Lab
0 credit hours
Corequisite: BIOL 4180.

BIOL 4200 - Seminar
2 credit hours
Prerequisites: BIOL 2230/BIOL 2231, BIOL 3250/BIOL 3251, BIOL 3400/BIOL 3401, and BIOL 3500. Readings and discussions from scientific literature on a particular theme that will incorporate and integrate cellular biology and energetics; genetics and molecular biology; organismal biology of plants, animals, and microbes; evolution; and ecology. Majors are advised to take this course during the semester of graduation. Two hours lecture.

BIOL 4210 - Cell and Molecular Biology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121 and BIOL 3250/BIOL 3251 or BIOL 2230/BIOL 2231 and CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011. Corequisite: BIOL 4211. Cellular morphology and function. Three hours lecture and one three-hour laboratory.

BIOL 4211 - Cell and Molecular Biology Lab
0 credit hours
Corequisite: BIOL 4210.

BIOL 4220 - Ichthyology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121. Corequisite: BIOL 4221. The morphology, physiology, taxonomy, and ecology of fishes. Three hours lecture and one three-hour laboratory.

BIOL 4221 - Ichthyology Lab
0 credit hours
Corequisite: BIOL 4220.

BIOL 4250 - Limnology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121 and CHEM 1110/CHEM 1111. Corequisite: BIOL 4251. Biological, chemical, and physical aspects of lakes and streams. Three hours lecture and one three-hour laboratory.

BIOL 4251 - Limnology Lab
0 credit hours
Corequisite: BIOL 4250.

BIOL 4260 - Nature Study
3 credit hours
Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121. Identification of local plants and animals and a consideration of the ecological principles governing them. Four hours lecture/laboratory.

BIOL 4270 - Transmitting Electron Microscopy
4 credit hours
Prerequisite: Permission of department. Tissue fixation, dehydration, embedding, and thin sectioning for examination and development of micrographs.
using a Zeiss electron microscope. Seven hours lecture/laboratory.

BIOL 4280 - Undergraduate Research in Biology
1 to 4 credit hours
Prerequisite: Permission of department. Selection, design, and conduction of projects typically allied with an instructor's research program. May be repeated for a total of twelve credits. Only four credits may count toward the Biology major.

BIOL 4290 - Scanning Electron Microscopy
4 credit hours
Prerequisite: Permission of department. Preparation of biological and non-biological materials for examination and development of micrographs using an ISI electron microscope. Seven hours lecture/laboratory.

BIOL 4300 - Immunology
4 credit hours
Prerequisite: BIOL 2230/BIOL 2231. Corequisite: BIOL 4301. Humoral and cellular mechanisms of immunity. Three hours lecture and one three-hour laboratory.

BIOL 4301 - Immunology Lab
0 credit hours
Corequisite: BIOL 4300.

BIOL 4320 - Seminar: Advancements in Biology
2 credit hours
Prerequisite: Senior standing. A broad overview of biological principles and recent research developments. Two hours lecture.

BIOL 4330 - Biome Analysis
1 to 4 credit hours
Prerequisite: Permission of department and junior or senior standing. An intensive classroom and on-site study of a specific biome. Special emphasis on data collection and analysis. Consult the department chair for specific credits and costs.

BIOL 4331 - Biome Analysis Cedar Glade
1 to 4 credit hours
Prerequisite: Permission of department and junior or senior standing. An intensive classroom and on-site study of a specific biome. Special emphasis on data collection and analysis. Consult the department chair for specific credits and costs.

BIOL 4332 - Biome Analysis Marine
1 to 4 credit hours
Prerequisite: Permission of department and junior or senior standing. An intensive classroom and on-site study of a specific biome. Special emphasis on data collection and analysis. Consult the department chair for specific credits and costs.

BIOL 4333 - Biome Analysis Desert
1 to 4 credit hours
Prerequisite: Permission of department and junior or senior standing. An intensive classroom and on-site study of a specific biome. Special emphasis on data collection and analysis. Consult the department chair for specific credits and costs.

BIOL 4350 - Biometry
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121 and BIOL 3250/BIOL 3251 and MATH 1910. Corequisite: BIOL 4351. Statistical methods utilized in biological research. Three hours lecture and one three-hour laboratory.

BIOL 4351 - Biometry Lab
0 credit hours
Corequisite: BIOL 4350.

BIOL 4360 - Energy Dispersive X-Ray Analysis
1 credit hour
Prerequisite: BIOL 4290. Elemental analysis of materials using an energy dispersive x-ray system with scanning electron microscopy. Three hours laboratory.

BIOL 4390 - Ethology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121. Corequisite: BIOL 4391. Innate and learned animal behavior in primitive and advanced animals including behavior associated with space, reproduction, and food getting. Three hours lecture and one three-hour laboratory.

BIOL 4391 - Ethology Lab
0 credit hours
Corequisite: BIOL 4390.

BIOL 4400 - Medical Botany
3 credit hours
Prerequisite: BIOL 1120/BIOL 1121. Plants affecting...
human health. Included are poisonous and psychoactive as well as remedial plants; both ethnobotanical and modern medicinal uses treated. Three hours lecture.

**BIOL 4430 - Diagnostic Microbiology**  
4 credit hours  
Prerequisite: BIOL 2230/BIOL 2231. Microorganisms that cause disease in humans and other animals, their isolation and identification, mechanisms of disease causation, and methods of control. Six hours lecture/laboratory.

**BIOL 4440 - General Virology**  
4 credit hours  
Prerequisites: BIOL 2230/BIOL 2231; CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121. Viruses, with emphasis on their clinical importance and impact on biotechnology. Six hours lecture/laboratory.

**BIOL 4450 - Molecular Genetics**  
4 credit hours  
Prerequisites: BIOL 2230/BIOL 2231, BIOL 3250/BIOL 3251; CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121. Basic techniques of microbial genetics and gene manipulation with emphasis on the application of molecular genetics in basic and applied research. Six hours lecture/laboratory.

**BIOL 4460 - Human Genetics**  
3 credit hours  
Prerequisite: BIOL 3250/BIOL 3251. Corequisite: BIOL 4461. Application of the fundamental laws of inheritance to humans. Two hours lecture and one two-hour laboratory.

**BIOL 4461 - Human Genetics Lab**  
0 credit hours  
Corequisite: BIOL 4460.

**BIOL 4500 - Plant Physiology**  
4 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121 and BIOL 3250/BIOL 3251 and CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011. Plant growth, development, and metabolism at the cellular and whole plant levels. Three hours lecture and three hours laboratory.

**BIOL 4510 - Food and Industrial Microbiology**  
4 credit hours  
Prerequisite: BIOL 2230/BIOL 2231. Corequisite: BIOL 4511. Interaction between microorganisms and food; industrial processes of importance to humans. Six hours lecture/laboratory.

**BIOL 4511 - Food and Industrial Microbiology Lab**  
0 credit hours  
Corequisite: BIOL 4510.

**BIOL 4520 - Plant Anatomy and Development**  
4 credit hours  
Prerequisites: BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121. Explores plant cells, tissues, and organs from seed to fruit. Covers organization of cells and tissues and the dynamic nature of these structures, and whenever appropriate, molecular mechanisms responsible for their development and nature. Six hours lecture/laboratory.

**BIOL 4540 - Topics in Environmental Education**  
1 to 4 credit hours  
Prerequisites: Junior standing or above and permission of department. An intensive classroom and field study of natural science and resources in Tennessee. Special emphasis on data collection, analysis, and problem solving. Target groups are upper-division students in biology and education. Consult the department chair for specific credits and costs. THIS COURSE DOES NOT APPLY TO THE BIOLOGY MAJOR OR MINOR.

**BIOL 4550 - Biotechnology**  
3 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121, BIOL 2230/BIOL 2231, and BIOL 3250/BIOL 3251. Instruction in both theory and application of current research methodologies in biology and molecular biology. Topics include immunochemistry, polymerase chain reaction, restriction enzyme analysis, and electrophoresis. Five hours lecture/laboratory.

**BIOL 4560 - Neurobiology**  
4 credit hours  
Prerequisites: BIOL 1030/BIOL 1031 with a minimum grade of A or BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121. Corequisite: BIOL 4561. Introduces comparative neurobiology. Topics include the basic structure and function of the nerve cell and organization of nervous systems of representative species of invertebrate and vertebrate animals. Three hours lecture and one three-hour laboratory.
BIOL 4561 - Neurobiology Lab
0 credit hours
Corequisite: BIOL 4560.

BIOL 4570 - Principles of Toxicology
3 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121 and CHEM 1110/CHEM 1111, CHEM 1120/CHM 1121, and CHEM 3010/CHEM 3011. Corequisite: BIOL 4571. Study of adverse effects of chemical agents on living organisms; current toxicological techniques used in the laboratory. Three hours lecture and three-hour laboratory.

BIOL 4571 - Principles of Toxicology Lab
0 credit hours
Corequisite: BIOL 4570.

BIOL 4580 - Marine Biology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121, CHEM 1110/CHEM 1111, and CHEM 1120/CHM 1121. Corequisite: BIOL 4581. Introduction to the biological, chemical, and physical characteristics of major marine environments and their associated flora and fauna. Three hours lecture and one three-hour laboratory.

BIOL 4581 - Marine Biology Lab
0 credit hours
Corequisite: BIOL 4580.

BIOL 4590 - Principles of Environmental Toxicology
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121, CHEM 1110/CHEM 1111, CHEM 1120/CHM 1121, and CHEM 3010/CHEM 3011. Ecological effects of chemicals in the environment and techniques currently utilized to assess these effects. Lab includes current environmental assessment techniques, including biomonitoring. Six hours lecture/laboratory.

BIOL 4700 - Principles of Plant-Animal Interactions
3 credit hours
Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121. Corequisite: BIOL 4701. Evolutionary and ecological perspectives on how plants attract and repel organisms that influence their ability to survive and leave progeny. Topics include angiosperm evolution; the coevolution of plants with pollinators, herbivores, mycorrhizae, and N-fixing bacteria; how plant secondary metabolites facilitate or mitigate these interactions. Two hours lecture and three-hour laboratory.

BIOL 4701 - Principles of Plant-Animal Interaction Lab
0 credit hours
Corequisite: BIOL 4700.

BIOL 4720 - Animal Development
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121 and BIOL 3250/BIOL 3251; BIOL 4210 recommended. Corequisite: BIOL 4721. Processes and underlying molecular mechanisms by which a single fertilized egg develops into an adult organism, focusing on vertebrate development, but including insights gained from other model organisms. Three hours lecture and two hours lab.

BIOL 4721 - Animal Development Lab
0 credit hours
Corequisite: BIOL 4720.

BIOL 4730 - Microbial Physiology and Biochemistry
4 credit hours
Prerequisites: BIOL 1110/BIOL 1111 and BIOL 1120/BIOL 1121 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 2230/BIOL 2231; CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, and CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011. Survey of the physiology and biochemistry of prokaryotic and eukaryotic microorganisms. Six hours lecture/laboratory.

BIOL 4740 - Research Methods
3 credit hours
(Same as CHEM/PHYS/MATH 4740.) Prerequisite: YOED 3520. Provides secondary science and mathematics teacher candidates with the tools that scientists use to solve scientific problems. Students will use these tools in a laboratory setting, communicate findings, and understand how scientists develop new knowledge.
BIOL 4750 - Plant Biotechnology  
4 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121 and BIOL 3250/BIOL 3251. Processes and reasoning behind the human manipulation of plant species for agricultural and technological purposes. Topics include traditional breeding techniques, tissue culture, plant cell transformation, and general plant molecular biology techniques as well as current debate over genetically modified organisms. Six hours lecture/laboratory.

BIOL 4760 - Introduction to Bioinformatics  
3 credit hours  
Prerequisites: BIOL 1110/BIOL 1111 or BIOL 1030/BIOL 1031 with a minimum grade of A and BIOL 1120/BIOL 1121 and CSCI 1170 or consent of instructor. Application of computer science to biological questions. Specifically applies to the computational aspects of data gathering, processing, storage, analysis, and visualization methods for use in revising and testing biological hypotheses. Students should have a strong background in either computer science or biology, be willing to learn about the other field in an accelerated fashion, and be willing to work cooperatively as part of an interdisciplinary team. Four hours of lecture/problem-solving per week.

Forensic Science - Biology  

FSBI 4300 - Immunology  
4 credit hours  
Prerequisite: BIOL 2230/BIOL 2231; CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121. Corequisite: FSBI 4301. Instruction in theory and application of humoral and cellular mechanisms of immunity. Emphasis on understanding the mechanisms by which we respond to disease-causing organisms, allergens, self antigens, as well as the importance of immunology techniques in scientific research, clinical laboratory science, and forensic science. Three hours lecture and one three-hour laboratory.

FSBI 4301 - Immunology Lab  
0 credit hours  
Corequisite: FSBI 4300.

FSBI 4550 - Biotechnology  
3 credit hours  
Prerequisites: BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121, BIOL 2230/BIOL 2231; CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121. Instruction in both the theory and application of current research methodologies in molecular biology including their forensic science application. Topics include DNA/RNA isolation, recombinant DNA methods, polymerase chain reaction, DNA sequencing, DNA fingerprinting, protein purification, and immunochemistry. Five hours lecture/laboratory.
The Department of Chemistry has as its objectives preparation and training in both scientific principles and skills for chemists seeking industrial or governmental employment; students planning graduate study in the sciences or advanced professional courses of study in medicine or engineering; science teachers in public or private schools; and for students wishing to meet institutional requirements in chemistry. Programs in the department lead to the Bachelor of Science degree with majors or concentrations in Professional Chemistry, Chemistry, Biochemistry, or Science. The Professional Chemistry and Biochemistry Programs do not require a minor, and the other programs require a minor of at least 18 semester hours. Minors are also offered in Chemistry and Science. In addition, pre-professional programs for cytotechnology, dentistry, dental hygiene, health information management, medicine, medical technology, nuclear medicine technology, occupational therapy, pharmacy, physical therapy, radiation therapy technology, chiropractic, and diagnostic medical sonography are offered under the Health Sciences concentration. The department participates in an interdisciplinary major in Forensic Science with Biology and Criminal Justice Administration. A grade of C or better is required on all transfer credits accepted as part of a major or minor in the Department of Chemistry. Students must have a grade point average of at least 2.00 on courses counting toward a major or minor in any of the department's programs. No more than 8 hours of 1000-level chemistry, 8 hours of 1000-level biology, or 8 hours of 2000-level physics courses may count toward a Chemistry or Science major or minor. No 1000-level physics course may count toward a Science major or minor.

Laboratory safety is of primary importance in the Department of Chemistry. Students are required to follow all laboratory safety rules, a statement of which will be provided to all students at the first laboratory period. Approved safety goggles must be worn at all times while in the laboratory. Failure to comply with any of the laboratory rules may result in the student's removal from the laboratory for that laboratory period. Continued violation of safety rules can result in the withdrawal of the student from the course.

Teacher Licensure in Chemistry (7-12)
Students seeking a license to teach chemistry in secondary schools (grades 7-12) must complete (1) a major in Chemistry, (2) a minor in Secondary Education, and (3) a course (PSCI 1030/PSCI 1031) in addition to the General Education requirements. Students must contact their Secondary Education minor advisors for approval of appropriate courses. See MTeach for minor requirements and more information.

Teacher Licensure in Interdisciplinary Studies (K-6)
Students may become licensed to teach in grades K-6 including science by following the Interdisciplinary Studies major. The science and math courses required are PSCI 1030/PSCI 1031 and PSCI 4030; BIOL 1030/BIOL 1031 and BIOL 3000; and MATH (MATH 1010 or MATH 1710), MATH 1410, and MATH 1420. See other requirements for majors in the Elementary and Special Education Department section.

Three-and-One Programs
The following programs lead to an MTSU degree: pre-chiropractic, pre-cytotechnology, pre-dental, pre-medical technology, pre-pharmacy, pre-nuclear medicine technology, pre-radiation therapy technology, and diagnostic medical sonography. Since acceptance into dental or pharmacy school after three years is highly competitive, most students complete the specified pre-dental or pre-pharmacy curriculum and then complete a fourth year at MTSU which will lead to a bachelor's degree in biology, chemistry, or science. General requirements for a degree under this concentration:
1. Complete the specified three-year pre-professional curriculum consisting of at least 90 hours.
2. Apply to, be accepted in, and successfully complete either one year (30 hours) in the professional school or one year of an approved clinical or laboratory school (for which 30 hours will be granted).
3. Each program will require a minimum of 35 hours of science (biology, chemistry, physics).
4. Twenty-one (21) upper-division hours from MTSU of which 12 must be in science as approved by the advisor.
   NOTE: Any hours granted for laboratory experience do not apply to these 21 upper-division hours.
5. The last 30 semester hours of MTSU coursework must be in residence at MTSU.
6. Students seeking financial aid assistance for the final year of the Three-and-One Program should confer with the new institution regarding financial aid eligibility requirements. During the final year at another institution, the MTSU Financial Aid and Scholarships Office will not be awarding federal, state, or institutional financial aid.

Other Transfer Programs
The following programs do not lead to an MTSU degree: pre-dental hygiene, pre-health information management, and pre-occupational therapy. Students apply to the professional school during the second or third year.

Honors College
The Department of Chemistry offers the following courses in Honors: CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, CHEM 3010/CHEM 3011, CHEM 3020/CHEM 3021 and PSCI 1030/PSCI 1031. See current online class schedule and Honors information in this catalog.

Graduate Study
The Department of Chemistry offers the Master of Science degree. The Graduate Catalog has degree requirements and course listings.
Biochemistry, B.S.

Department of Chemistry
615-898-5466
Paul Kline, program coordinator
Paul.Kline@mtsu.edu

The major in Biochemistry consists of 55 semester hours in chemistry (36 hours) and biology (19 hours). The 36 semester hours in chemistry include CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, CHEM 3010/CHEM 3011, CHEM 3020/CHEM 3021, CHEM 4330/CHEM 4331, CHEM 4500, CHEM 4510, CHEM 4550/CHEM 4551, and 6 semester hours of upper-division chemistry electives. The 19 semester hours in Biology include BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121, BIOL 2230/BIOL 2231, BIOL 3250/BIOL 3251 and 3 semester hours of upper-division biology electives. Also required are MATH 1910; PHYS 2010/PHYS 2011, PHYS 2020/PHYS 2021, and fulfillment of University General Education requirements. A minimum of 12 upper-division semester hours in the biochemistry major must be taken at MTSU. No minor is required.

Curriculum: Biochemistry

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) (See Note 1) AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci) (See Note 1)
- CHEM 1120 - General Chemistry II 4 credit hours (See Note 2) AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours (See Note 2)
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND
- BIOL 1111 - General Biology Lab 0 credit hours (Nat Sci)
- BIOL 1120 - General Biology 4 credit hours AND
- BIOL 1121 - General Biology Lab 0 credit hours Choose 6 hours from:
  - HIST 2010 - Survey of United States History I 3 credit hours OR
  - HIST 2020 - Survey of United States History II 3 credit hours OR
  - HIST 2030 - Tennessee History 3 credit hours

Subtotal: 28 Hours

Sophomore

- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- BIOL 2230 - Microbiology 4 credit hours AND
- BIOL 2231 - Microbiology Lab 0 credit hours
- BIOL 3250 - Genetics 4 credit hours AND
- BIOL 3251 - Genetics Lab 0 credit hours
- CHEM 3010 - Organic Chemistry I 4 credit hours AND
• CHEM 3011 - Organic Chemistry I Lab 0 credit hours
• CHEM 3020 - Organic Chemistry II 4 credit hours AND
• CHEM 3021 - Organic Chemistry II Lab 0 credit hours
• MATH 1910 - Calculus I 4 credit hours (Math)
• COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
• Social/Behavioral Sciences 3 credit hours
• Elective 1 credit hour

Subtotal: 30 Hours

Junior

• CHEM 4500 - Biochemistry I 3 credit hours
• CHEM 4510 - Biochemistry II 3 credit hours
• PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND
• PHYS 2011 - Physics Problems Laboratory I 4 credit hours
• PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
• PHYS 2021 - Physics Problems Laboratory II 4 credit hours
• CHEM 4550 - Bioanalytical Chemistry 4 credit hours AND
• CHEM 4551 - Bioanalytical Chemistry Lab 0 credit hours
• Humanities and/or Fine Arts 3 credit hours
• Social/Behavioral Sciences 3 credit hours
• Electives 5 credit hours
• BIOL elective (upper-division) 3 credit hours

Subtotal: 32 Hours

Senior

• CHEM 4330 - Physical Chemistry Fundamentals I 4 credit hours AND
• CHEM 4331 - Physical Chemistry Fundamentals I Lab 0 credit hours
• CHEM upper-division electives 6 credit hours
• Humanities and/or Fine Arts 3 credit hours
• Upper-division electives 8 credit hours
• Electives 9 credit hours

Subtotal: 30 Hours

Total hours in program: 120

NOTE:

Included in the electives will be the hours necessary for the completion of the required 42 upper-division hours for graduation requirements and the necessary hours to satisfy the 120-hour graduation requirement.
NOTE 1: A student who has had little or no high school chemistry or is not satisfied with his/her high school chemistry should first take CHEM 1010/CHEM 1011 before taking CHEM 1110/CHEM 1111.
NOTE 2: A student who has a sufficiently high score on the ACT Mathematics test may begin with MATH 1910. If the background in math is weak, MATH 1710 should be taken before MATH 1730.
Academic Map

Following is a printable, suggested four-year schedule of courses:
Biochemistry, B.S., Academic Map
Chemistry Minor

Department of Chemistry
The minor in Chemistry consists of at least 19 semester hours of chemistry. At least four upper-division hours must be taken at MTSU. Consult your advisor to determine which courses will satisfy minor requirements.

Required (8 hours)

- CHEM 1110 - General Chemistry I 4 credit hours AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours

Electives (11 hours)

- 11 hours of chemistry (maximum of 8 hours in freshman-level chemistry)

NOTE: CHEM 3890 and research courses cannot be used to satisfy the minor in chemistry.
Chemistry, B.S.

Department of Chemistry
615-898-2954
Norma Dunlap, program coordinator
Norma.Dunlap@mtsu.edu

The Chemistry major consists of 36 semester hours in chemistry including CHEM 1110/CHEM 1111 *, CHEM 1120/CHEM 1121, CHEM 2230/CHEM 2231, CHEM 3010/CHEM 3011, CHEM 3020/CHEM 3021, CHEM 4330/CHEM 4331, CHEM 4340/CHEM 4341, (or CHEM 4360/CHEM 4361), and at least 7 hours from among the upper-division electives: (CHEM 3530/CHEM 3531 or CHEM 4500), CHEM 3000, CHEM 3880, CHEM 3890, CHEM 4000, CHEM 4010, (CHEM 4230/CHEM 4231), CHEM 4400, CHEM 4510, CHEM 4530, CHEM 4560, CHEM 4610, CHEM 4700, CHEM 4780, CHEM 4880, and PSCI 4080. Also required are MATH 1910; PHYS 2010/PHYS 2011, PHYS 2020/PHYS 2021; BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121; one minor; and fulfillment of University General Education requirements. A minimum of 12 upper-division hours in the Chemistry major must be taken at MTSU.

*Students with a weak background in Chemistry should take CHEM 1011/CHEM 1010 before taking CHEM 1110/CHEM 1111.

NOTE: Students who wish to get jobs as chemists are strongly encouraged to take additional upper-division courses, especially CHEM 4230/CHEM 4231, follow the plan for the professional major or take more advanced chemistry courses upon graduation. The Chemistry major requires one minor of at least 18 hours. Students who plan to graduate with no more than 120 hours should consult their advisors to be sure 42 upper-division hours are included in their curriculum.

Curriculum: Chemistry

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours
- BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND
- BIOL 1111 - General Biology Lab 0 credit hours (Nat Sci)
- BIOL 1120 - General Biology 4 credit hours AND
- BIOL 1121 - General Biology Lab 0 credit hours
- MATH 1730 - Pre-Calculus 4 credit hours (Math)
- MATH 1910 - Calculus I 4 credit hours

Subtotal: 29-30 Hours

Senior

Choose 6 hours from:
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours
- CHEM elective (upper division) 4 credit hours
- Minor course (upper division) 6 credit hours
- Elective (upper division) 7 credit hours
- Minor or elective courses (upper division) 8 credit hours

Subtotal: 31 Hours

Total hours in program: 120
Academic Map

Following is a printable, suggested four-year schedule of courses:
Chemistry, B.S., Academic Map
Chemistry, Professional Concentration (Biomolecular Track)

Department of Chemistry
615-898-2071
Andrienne Friedli, program coordinator
Andrienne.Friedli@mtsu.edu

This curriculum is approved by the American Chemical Society. With this degree students are more likely to be hired as practicing chemists or gain admission to professional programs or graduate schools. See the General Education section for suggestions about how to fit General Education course requirements into this program. A minimum of 12 upper-division hours of chemistry courses must be taken at MTSU. No minor is required for this major. Students who wish to double major in Chemistry and another subject area, such as Biology, or who are not prepared to begin calculus in their freshman year should consider the regular Chemistry major, which has fewer prescribed chemistry courses. The Professional Chemistry curriculum offers a choice of two tracks—one with a biomolecular emphasis and one with a materials science emphasis—that differ starting in the junior year. Some courses are offered only one semester each year, and others are offered in alternative years, so please consult early and often with your advisor to plan your schedule. With either Chemistry major, students may substitute University Physics (PHYS 2110/PHYS 2111, PHYS 2120/PHYS 2121) for College Physics (PHYS 2010/PHYS 2011, PHYS 2020/PHYS 2021).

Recommended Curriculum: Chemistry, Professional (Biomolecular Track)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories

- PSCI 1031 - Topics in Physical Science Lab 0 credit hours

Subtotal: 29-30 Hours

Total hours in program: 124
Academic Map

Following is a printable, suggested four-year schedule of courses:
Chemistry, Teacher Licensure (MTeach), B.S., Academic Map
Science Minor

Department of Chemistry
The minor in Science consists of 24 semester hours acceptable for a minor: 16 hours in biology, chemistry, or physics, and 8 semester hours in one of the other two. At least 4 upper-division hours in a science must be taken at MTSU. Consult your advisor to determine which courses will satisfy minor requirements.

NOTE: Some BIOL, CHEM, and PHYS courses do not count toward the Science minor.
Science, General Science Concentration with Teacher Licensure, B.S.

Department of Chemistry
The major in Science has two concentrations-General Science and Health Science. A minimum of 9 semester hours of upper-division courses in either concentration of the Science major must be taken at MTSU. The Science major requires only one minor which must include at least 3 semester hours at the upper-division level taken at MTSU. Students may become licensed to teach biology, chemistry, or physics in secondary schools (grades 7-12) by completing (1) a major in science with a General Science concentration in which 19 hours of coursework has been taken in two of three areas of chemistry, biology, or physics; (2) courses in addition to the General Education requirements (see advisor); and (3) a minor in Secondary Education through MTeach. Students may also become licensed to teach biology, chemistry, or physics by majoring in the subject they intend to teach (see requirements listed under the specific major).

Curriculum: Science, General Science with Teacher Licensure

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND

Science, General Science Concentration, B.S.

Department of Chemistry  
615-898-5265  
Preston MacDougall, program coordinator  
Preston.MacDougall@mtsu.edu

The major in Science has two concentrations-General Science and Health Science. A minimum of 9 semester hours of upper-division courses in either concentration of the Science major must be taken at MTSU. The Science major requires only one minor which must include at least 3 semester hours at the upper-division level taken at MTSU. The General Science concentration is a broad-based science degree requiring 19 semester hours acceptable for a minor in each of two fields selected from biology, chemistry, and physics plus 8 semester hours from the third field. Each student should work closely with his/her advisor in completing the program for the General Science concentration.

Curriculum: Science, General Science

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)

The major in Science has two concentrations-General Science and Health Science. A minimum of 9 semester hours of upper-division courses in either concentration of the Science major must be taken at MTSU. The Science major requires only one minor which must include at least 3 semester hours at the upper-division level taken at MTSU. The Health Science concentration is for students who expect to enter a professional school after completing an appropriate pre-professional curriculum. There are three groups of programs. One group leads to an MTSU degree through completion of three years of the program at MTSU, acceptance into a professional school, and successful completion of one year. These programs are referred to as three-and-one programs and result in a bachelor's degree in science from MTSU with a health science concentration. Some programs listed under health science are designed for transfer only and do not lead to a degree from MTSU while other programs require completion of a baccalaureate degree prior to entrance.

Admission to the MTSU pre-professional program does not assure admission to a professional program. In the beginning of the third year, the student should make application to the program of choice, following the procedures of the particular program. Selection for admission is competitive and is made by the admissions committee of the respective program according to its selection standards.

The limits on class size in most of the professional programs may prevent acceptance of some qualified applicants. In the event a first application is unsuccessful, the program may be easily changed to a Chemistry, Biochemistry, or Biology major leading to a B.S. degree, and then application may be made a second time.

Students should note the following:

Chemistry: Students with a weak background or no high school chemistry should enroll in CHEM 1010/CHEM 1011 before taking CHEM 1110/CHEM 1111.

Irregularities: Advanced placement, remedial courses, failure of required courses, or summer school may cause some students to deviate from the sequence in the recommended curriculum. Regular consultation with the advisor is most important.

Advisors: Advisors to these programs are assigned in the Clara W. Todd Pre-professional Health Science Advising Center located in the Chemistry Department. The advisor will provide a curriculum sheet as a guide for the program. Guidance is provided on the recommended courses and procedures to be followed in leading to applications to a professional program. A pre-professional evaluation committee aids the students in providing recommendations requested by the professional programs.

Degree from MTSU: Students who plan to obtain degrees from MTSU must file the Intent to Graduate Form.
Science, Health Science Concentration, Diagnostic Medical Sonography Curriculum, B.S.

Department of Chemistry
The major in Science has two concentrations—General Science and Health Science. A minimum of 9 semester hours of upper-division courses in either concentration of the Science major must be taken at MTSU. Academic Map

Following is a printable, suggested four-year schedule of courses:
Science, Health Science (Pre-Cytotechnology), B.S., Academic Map
Science, Health Science Concentration, Pre-Dental Curriculum, B.S.

Department of Chemistry  
615-898-5487  
Ngee Chong, program coordinator  
Ngee.Chong@mtsu.edu

The major in Science has two concentrations-General Science and Health Science. A minimum of 9 semester hours of upper-division courses in either concentration of the Science major must be taken at MTSU. The Science major requires only one minor which must include at least 3 semester hours at the upper-division level taken at MTSU.

The Health Science concentration is for students who expect to enter a professional school after completing an appropriate pre-professional curriculum. There are three groups of programs. One group leads to an MTSU degree through completion of three years of the program at MTSU, acceptance into a professional school, and successful completion of one year. These programs are referred to as three-and-one programs and result in a bachelor's degree in science from MTSU with a health science concentration. Some programs listed under health science are designed for transfer only and do not lead to a degree from MTSU while other programs require completion of a baccalaureate degree prior to entrance.

Admission to the MTSU pre-professional program does not assure admission to a professional program. In the beginning of the third year, the student should make application to the program of choice, following the procedures of the particular program. Selection for admission is competitive and is made by the admissions committee of the respective program according to its selection standards.

The limits on class size in most of the professional programs may prevent acceptance of some qualified applicants. In the event a first application is unsuccessful, the program may be easily changed to a Chemistry, Biochemistry, or Biology major leading to a B.S. degree, and then application may be made a second time.

Students should note the following:

**Chemistry** - Students with a weak background or no high school chemistry should enroll in CHEM 1010/CHEM 1011 before taking CHEM 1110/CHEM 1111.

**Irregularities** - Advanced placement, remedial courses, failure of required courses, or summer school may cause some students to deviate from the sequence in the recommended curriculum. Regular consultation with the advisor is most important.

**Advisors** - Advisors to these programs are assigned in the Clara W. Todd Pre-professional Health Science Advising Center located in KUC 316. The advisor will provide a curriculum sheet as a guide for the program. Guidance is provided on the recommended courses and procedures to be followed in leading to applications to a professional program. A pre-professional evaluation committee aids the students in providing recommendations requested by the professional programs.

**Degree from MTSU** - Students who plan to obtain degrees from MTSU must file the Intent to Graduate Form.

**Curriculum: Science, Health Science, Pre-Dental**

The following curriculum is proposed for students planning to enter the College of Dentistry at the University of Tennessee-Memphis and will meet the requirements for a B.S. degree from MTSU upon successful completion of one year in dental school. (See Academic Policies and Procedures.)

**NOTE:** Many applicants find that a B.S. degree is required to be competitive for acceptance; therefore, most pre-dental students usually pursue a Chemistry major and Biology minor or vice versa. Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Subtotal: 30 Hours

Senior

- Professional program credits (granted upon successful completion of first year of approved program) 30 credit hours

Subtotal: 30 Hours

Total hours in program: 120

NOTE:

*Prerequisite to MATH 1910 is MATH 1730 or Math ACT greater than or equal to 26.
Total of 90 hours prior to professional program. Total upper-division hours must equal at least 21.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Science, Health Science (Pre-Dental), B.S., Academic Map
Science, Health Science Concentration, Pre-Dental Hygiene Curriculum, B.S.

Department of Chemistry  
615-898-2076  
Beng Ooi, program coordinator  
Beng.Ooi@mtsu.edu

The major in Science has two concentrations-General Science and Health Science. A minimum of 9 semester hours of upper-division courses in either concentration of the Science major must be taken at MTSU. The Science major requires only one minor which must include at least 3 semester hours at the upper-division level taken at MTSU. The Health Science concentration is for students who expect to enter a professional school after completing an appropriate pre-professional curriculum. There are three groups of programs. One group leads to an MTSU degree through completion of three years of the program at MTSU, acceptance into a professional school, and successful completion of one year. These programs are referred to as three-and-one programs and result in a bachelor's degree in science from MTSU with a health science concentration. Some programs listed under health science are designed for transfer only and do not lead to a degree from MTSU while other programs require completion of a baccalaureate degree prior to entrance.

Admission to the MTSU pre-professional program does not assure admission to a professional program. In the beginning of the third year, the student should make application to the program of choice, following the procedures of the particular program. Selection for admission is competitive and is made by the admissions committee of the respective program according to its selection standards. The limits on class size in most of the professional programs may prevent acceptance of some qualified applicants. In the event a first application is unsuccessful, the program may be easily changed to a Chemistry, Biochemistry, or Biology major leading to a B.S. degree, and then application may be made a second time.

Students should note the following:

Chemistry: Students with a weak background or no high school chemistry should enroll in CHEM 1010/CHEM 1011 before taking CHEM 1110/CHEM 1111.

Irregularities: Advanced placement, remedial courses, failure of required courses, or summer school may cause some students to deviate from the sequence in the recommended curriculum. Regular consultation with the advisor is most important.

Advisors: Advisors to these programs are assigned in the Clara W. Todd Pre-professional Health Science Advising Center located in KUC 316. The advisor will provide a curriculum sheet as a guide for the program. Guidance is provided on the recommended courses and procedures to be followed in leading to applications to a professional program. A pre-professional evaluation committee aids the students in providing recommendations requested by the professional programs.

Degree from MTSU: Students who plan to obtain degrees from MTSU must file the Intent to Graduate Form.

Curriculum: Science, Health Science, Pre-Dental Hygiene

The following curriculum is proposed for students planning to make application to the dental hygiene program in the College of Allied Health Sciences at the University of Tennessee-Memphis. Students who plan to apply for admission to other schools of dental hygiene should consult their advisors. Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND

Curriculum: Science, Health Science, Pre-Health Information Management

The pre-health information management curriculum below is recommended for students planning to enter a health information management program. Information pertaining to pre-health information management is available in DSB 241.

To gain the best first-hand knowledge about health information management, you should contact health information managers (medical record administrators), visit facilities, and talk to them directly. Working in an office of health information management on a paid or volunteer basis is recommended. Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Degree from MTSU-Students who plan to obtain degrees from MTSU must file the Intent to Graduate Form.

Curriculum: Science, Health Science, Pre-Medical

The pre-medical curriculum offers preparation for students to make application to all of the medical schools in Tennessee and most of the medical schools in the United States. A student planning to enter a medical school in another state is expected to supply the advisor with a catalog from the school under consideration. Students are encouraged to complete a baccalaureate degree prior to entering medical school. The pre-medical curriculum lists all general education requirements, pre-medical requirements for application to medical schools, and recommended coursework. Since student can obtain a degree of their choice, it is very important to work closely with advisors regarding recommended coursework and fulfillment of degree requirements. The following sequence of classes may not yield a degree (see advisor). Students who plan to apply for admission to a school of optometry, osteopathy, podiatry, or physician assistant should follow this general pre-medical curriculum.

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Curriculum: Science, Health Science, Pre-Medical Technology

The medical technology degree program requires the successful completion of three years (minimum of 90 semester hours) academic work followed by a minimum of 12 months (30 semester hours or equivalent) in a medical technology program approved by a national accrediting agency and by Middle Tennessee State University. The academic program must fulfill all General Education requirements for a B.S. degree, include at least 21 semester hours of courses numbered 3000 or above, and at least the last two semesters (30 semester hours) must be in residence at MTSU. All other requirements for graduation given elsewhere in this catalog must be met. Specific course requirements are shown below.

Upon approval, a student with the MLT certification from a nationally accredited program at a community college or from any other nationally accredited MLT program may enroll at MTSU, follow the academic part of the medical technology curriculum, fulfill MTSU requirements for graduation, and receive credit (30 semester hours for programs with credit hours not assigned) for MLT clinical work to be applied toward the B.S. degree. In addition to appropriate MLT certification, three years of full-time laboratory experience are required, in accordance with state and national regulations.
Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Subtotal: 31 Hours

Senior

- Professional program credits (granted upon successful completion of first year of approved program) 30 credit hours

Subtotal: 30 Hours

Total hours in program: 120

NOTE:

Total of 90 hours prior to professional program. Total upper-division hours must equal at least 21.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Science, Health Science (Pre-Nuclear Medicine), B.S., Academic Map
Science, Health Science Concentration, Pre-Occupational Therapy
Curriculum, B.S.

Department of Chemistry
615-898-5265
Preston MacDougall, program coordinator
Preston.MacDougall@mtsu.edu

The major in Science has two concentrations-General Science and Health Science. A minimum of 9 semester hours of upper-division courses in either concentration of the Science major must be taken at MTSU. The Science major requires only one minor which must include at least 3 semester hours at the upper-division level taken at MTSU. The Health Science concentration is for students who expect to enter a professional school after completing an appropriate pre-professional curriculum. There are three groups of programs. One group leads to an MTSU degree through completion of three years of the program at MTSU, acceptance into a professional school, and successful completion of one year. These programs are referred to as three-and-one programs and result in a bachelor's degree in science from MTSU with a health science concentration. Some programs listed under health science are designed for transfer only and do not lead to a degree from MTSU while other programs require completion of a baccalaureate degree prior to entrance.

Admission to the MTSU pre-professional program does not assure admission to a professional program. In the beginning of the third year, the student should make application to the program of choice, following the procedures of the particular program. Selection for admission is competitive and is made by the admissions committee of the respective program according to its selection standards. The limits on class size in most of the professional programs may prevent acceptance of some qualified applicants. In the event a first application is unsuccessful, the program may be easily changed to a Chemistry, Biochemistry, or Biology major leading to a B.S. degree, and then application may be made a second time.

Students should note the following:

Chemistry—Students with a weak background or no high school chemistry should enroll in CHEM 1010/CHEM 1011 before taking CHEM 1110/CHEM 1111.

Irregularities—Advanced placement, remedial courses, failure of required courses, or summer school may cause some students to deviate from the sequence in the recommended curriculum. Regular consultation with the advisor is most important.

Advisors—Advisors to these programs are assigned in the Clara W. Todd Pre-professional Health Science Advising Center located in KUC 316. The advisor will provide a curriculum sheet as a guide for the program. Guidance is provided on the recommended courses and procedures to be followed in leading to applications to a professional program. A pre-professional evaluation committee aids the students in providing recommendations requested by the professional programs.

Degree from MTSU—Students who plan to obtain degrees from MTSU must file the Intent to Graduate Form.

Curriculum: Science, Health Science, Pre-Occupational Therapy

The following curriculum is proposed for students planning to enter the occupational therapy program at the College of Allied Health Sciences, University of Tennessee-Memphis. The program requires three (3) years of study (90 semester hours) at MTSU followed by two calendar years at UT-Memphis. While a bachelor's degree is not required, students are encouraged to obtain a bachelor's degree before attending the occupational therapy program at UT-Memphis. Successful completion of the program will entitle the student to receive a Master of Science degree in occupational therapy granted by UT-Memphis. Students who plan to apply for admission to other schools of occupational therapy should consult with their advisors.

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.
Freshman

- BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND
- BIOL 1111 - General Biology Lab 0 credit hours (Nat Sci)
- BIOL 1120 - General Biology 4 credit hours AND
- BIOL 1121 - General Biology Lab 0 credit hours

Curriculum: Science, Health Science, Pre-Pharmacy

The following curriculum is proposed for students planning to enter pharmacy school after three years of study at MTSU. Well-prepared students with advanced placement credits may be able to complete pharmacy admission requirements in two years and should consult with their advisors regarding course selection. The course schedule below meets prerequisites for most pharmacy schools. Students should work closely with an advisor to ensure all course requirements are met for all pharmacy schools to which they plan to apply. Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

**Degree from MTSU** - Students who plan to obtain degrees from MTSU must file the Intent to Graduate Form.

Curriculum: Science, Health Science, Pre-Physical Therapy

The following curriculum is proposed for students planning to make application to a physical therapy program. Students are encouraged to complete a baccalaureate degree of choice prior to entering a physical therapy (PT) school. Consult your advisor. Since different schools have different prerequisites, curriculum guide sheets for this and other PT schools in Tennessee should be obtained from the coordinator of pre-professional advising. At that time, a pre-physical therapy advisor is assigned. Frequent contact with the advisor is essential to being properly prepared for application to the professional schools. Volunteer work in physical therapy is required.

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Curriculum: Science, Health Science, Pre-Radiation Therapy Technology

The Radiation Therapy Technology degree program requires a successful completion of three years (minimum of 90 semester hours) academic work at MTSU followed by a minimum of 12 months (30 semester hours or equivalent) in a radiation therapy technology program approved by a national accrediting agency and by Middle Tennessee State University. The academic program must fulfill all General Education requirements for a B.S. degree, include at least 21 semester hours of courses numbered 3000 or above, and at least the last two semesters (junior year, 30 semester hours) must be in residence at MTSU. All other requirements for admission given elsewhere must be met. Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Chemistry

**CHEM 1010 - Introductory General Chemistry I**
4 credit hours
Corequisite: CHEM 1011. For students with no prior courses in chemistry; to be taken before CHEM 1110/CHEM 1111. Fundamental concepts of chemistry: measurements, matter, chemical bonds, chemical reactions, nuclear chemistry, states of matter, solutions, and electrolytes. Three hours of lecture and one three-hour laboratory. Will not count toward a major or minor in Chemistry.

**CHEM 1011 - Intro to General Chemistry I Lab**
0 credit hours
Corequisite: CHEM 1010.

**CHEM 1020 - Introductory General Chemistry II**
4 credit hours
Prerequisite: CHEM 1010/CHEM 1011. Corequisite: CHEM 1021. Topics include hydrocarbons, organic functional groups, isomerism, carbohydrates, lipids, nucleic acids and proteins, enzymes, and metabolism. Three hours of lecture and one three-hour laboratory. Will not count toward a major or minor in Chemistry.

**CHEM 1021 - Intro to General Chemistry II Lab**
0 credit hours
Corequisite: CHEM 1020.

**CHEM 1030 - Chemistry for Consumers**
4 credit hours
Corequisite: CHEM 1031. Language, development, structure, and role of chemistry as it relates to the knowledge and activities of the educated person. Examples will be taken from medicine and human health, environmental pollution, energy and its costs, etc. Understanding of the relationship between chemistry and society will be enhanced using special subtopics: lectures, demonstrations, and inquiry-based laboratory work drawing from the expertise of the individual instructor. For nonscience majors. Three hours lecture and one two-hour laboratory. (Does not count toward any major or minor.)

**CHEM 1031 - Chemistry for Consumers Lab**
0 credit hours
Corequisite: CHEM 1030.

**CHEM 1110 - General Chemistry I**
4 credit hours
Prerequisite: High school chemistry. Corequisite: CHEM 1111. Fundamental concepts of atomic structure, molecular structure and bonding, chemical reactions, stoichiometric relationships, periodic properties of the elements, thermochemistry, and properties of gases. Three hours of lecture and one three-hour laboratory.

**CHEM 1111 - General Chemistry I Lab**
0 credit hours
Corequisite: CHEM 1110.

**CHEM 1120 - General Chemistry II**
4 credit hours
Prerequisite: CHEM 1110/CHEM 1111. Corequisite: CHEM 1121. Chemical equilibrium, solid and liquid states of matter, chemistry of acids and bases, principles of chemical kinetics, precipitation reactions, elementary thermodynamics, electrochemistry, and nuclear chemistry. Three hours of lecture and one three-hour laboratory.

**CHEM 1121 - General Chemistry II Lab**
0 credit hours
Corequisite: CHEM 1120.

**CHEM 2030 - Elements of Organic Chemistry**
4 credit hours
Prerequisite: CHEM 1020/CHEM 1021 or CHEM 1120/CHEM 1121. Corequisite: CHEM 2031. Aspects of organic chemistry fundamental to an understanding of reactions in living organisms. Three hours lecture and one three-hour laboratory.

**CHEM 2031 - Elements of Organic Chemistry Lab**
0 credit hours
Corequisite: CHEM 2030.

**CHEM 2230 - Quantitative Analysis**
5 credit hours
Prerequisites: CHEM 1120/CHEM 1121 with minimum grade of C- (or equivalent course). Corequisite: CHEM 2231. Gravimetric, volumetric, optical, and electrochemical analysis with examples from clinical chemistry, water pollution chemistry, occupational health and safety, and industrial chemistry. Three hours lecture and two, three-hour laboratories.

**CHEM 2231 - Quantitative Analysis Lab**
0 credit hours
Corequisite: CHEM 2230.

**CHEM 2880 - Undergraduate Research I**
1 to 4 credit hours
Prerequisite: Permission of the instructor. Student
research allied with the instructor's research or designed specifically for the particular student. Minimum of three clock-hours work per week required for each credit hour. Up to four hours may count in the General Science major, but does not count for a major or minor in Chemistry. May be repeated for a total of four credits.

CHEM 2930 - Cooperative Education
3 credit hours
Provides students with opportunities for on-the-job training in conjunction with on-campus academic experiences. Department chair should be consulted. Pass/Fail.

CHEM 2940 - Cooperative Education
3 credit hours
Provides students with opportunities for on-the-job training in conjunction with on-campus academic experiences. Department chair should be consulted. Pass/Fail.

CHEM 3000 - Careers in Chemistry and Biochemistry
1 credit hour
Prerequisite: CHEM 2030 or CHEM 3010. Communicating science, taking standardized tests, applying for graduate/professional school or a job, using library and online resources, and other professional skills. Capstone course. One-hour lecture. Offered each spring.

CHEM 3010 - Organic Chemistry I
4 credit hours
Prerequisite: CHEM 1120/CHEM 1121 or equivalent. Corequisite: CHEM 3011. Types of carbon compounds, their nomenclature, reactions, and physical properties. Three hours lecture and one three-hour laboratory.

CHEM 3011 - Organic Chemistry I Lab
0 credit hours
Corequisite: CHEM 3010.

CHEM 3020 - Organic Chemistry II
4 credit hours
Prerequisite: CHEM 3010. Corequisite: CHEM 3021. A continuation of CHEM 3010. Three hours lecture and one three-hour laboratory.

CHEM 3021 - Organic Chemistry II Lab
0 credit hours
Corequisite: CHEM 3020.

CHEM 3080 - Liquid Chromatography Techniques
1 credit hour
Prerequisite: CHEM 2230 / CHEM 2231 or consent of instructor. Techniques involving the use of liquid, column, paper, thin-layer, and ion-exchange chromatography for the purpose of purifying and/or separating compounds.

CHEM 3090 - Techniques of Gas Chromatography
1 credit hour
Prerequisite: CHEM 2230/ CHEM 2231 or consent of instructor. Principles, techniques, and applications of gas chromatography. Selection of column materials, packing of columns, and types of detectors. Separation of mixtures of hydrocarbons, drugs, and pesticides.

CHEM 3530 - Principles of Biochemistry
4 credit hours

CHEM 3531 - Principles of Biochemistry Lab
0 credit hours
Corequisite: CHEM 3530. Lab to accompany CHEM 3530. One three-hour laboratory per week.

CHEM 3880 - Undergraduate Research II
1 to 4 credit hours
Prerequisite: Permission of instructor; CHEM 2230 recommended. Student research allied with the instructor's research or designed specifically for the particular student. Minimum of three clock-hours work per week required for each credit hour. Summary report or some other form of presentation required. A total of no more than four hours of research credits may be counted toward a major in chemistry. May be repeated for a total of 12 credits.

CHEM 3890 - Chemistry Instruction Internship
1 to 3 credit hours
Prerequisites: Successful completion of target courses and permission of instructor. A course to refine thinking, communication, and interpersonal skills through exposure to on-the-spot technical questions and a laboratory teaching experience as an assistant in an introductory chemistry laboratory. Course credits will count toward a major in General Science and one hour will count toward a major in
Chemistry. May be repeated for a total of three credits.

**CHEM 3970 - Cooperative Education**  
3 credit hours  
Provides students with opportunities for on-the-job training in conjunction with on-campus academic experiences. Department chair should be consulted. Pass/Fail.

**CHEM 3980 - Cooperative Education**  
3 credit hours  
Provides students with opportunities for on-the-job training in conjunction with on-campus academic experiences. Department chair should be consulted. Pass/Fail.

**CHEM 4000 - Medicinal Chemistry**  
3 credit hours  
Prerequisites: CHEM 3010/CHEM 3011 and CHEM 3020/CHEM 3021 or CHEM 2030/CHEM 2031 with permission of instructor. Drug design and development including structural changes involved in making drug analogs. Drug interaction with macromolecular targets including receptors, enzymes, and DNA. Various classes of drugs and their mechanisms for the treatment of specific therapeutic areas.

**CHEM 4100 - Organic Spectroscopy**  
3 credit hours  
Prerequisite: CHEM 3020/CHEM 3021. Theory of and practice in the interpretation of mass, infrared, Raman, ultraviolet-visible, and nuclear magnetic resonance spectra. Three hours lecture.

**CHEM 4150 - Bioorganic Chemistry**  
3 credit hours  
Prerequisites: CHEM 3010/CHEM 3011 and CHEM 3020/ CHEM 3021 or CHEM 2030/ CHEM 2031 with permission of the instructor. Focuses on the structure and function of bioorganic molecules (i.e., peptides, proteins, nucleic acids, carbohydrates, and peptidomimetics), similarities between enzymatic reactions and bench-top organic reactions, and the techniques and instrumentation used to study bioorganic molecules.

**CHEM 4190 - Mass Spectrometry**  
1 credit hour  
Prerequisite: CHEM 2230/CHEM 2231, CHEM 4550/CHEM 4551, or consent of instructor. Mass spectrographic analysis emphasizing the use of the instrument in obtaining mass spectral data. Technique of obtaining spectra using gas chromatographic effluents as well as normal sampling procedures. Routine maintenance and an introduction to the interpretation of simple spectra.

**CHEM 4230 - Instrumental Analysis**  
4 credit hours  
(Same as FSCH 4230.) Prerequisite: CHEM 2230/CHEM 2231, or CHEM 4550/CHEM 4551. Corequisite: CHEM 4231. Potentiometric titration, polarographic, coulometric, gas chromatographic, ultraviolet, visible and infrared absorption, and atomic absorption techniques of analysis. Requirements and limitations of each technique for obtaining quantitative measurements; applications to various chemical systems from both theoretical and experimental standpoints. Three hours lecture and one three-hour laboratory.

**CHEM 4231 - Instrumental Analysis Lab**  
0 credit hours  
(Same as FSCH 4231.) Corequisite: CHEM 4230.

**CHEM 4280 - Atomic Absorption Analysis Techniques**  
1 credit hour  
Prerequisite: CHEM 2230 / CHEM 2231 or consent of instructor. Laboratory study of atomic absorption spectrophotometry emphasizing the use of the instrument in making analytical measurements. Research instrumentation, flame, and non-flame techniques.

**CHEM 4330 - Physical Chemistry Fundamentals I**  
4 credit hours  
Prerequisites: MATH 1910; PHYS 2020/PHYS 2021; CHEM 2230/CHEM 2231 or CHEM 4550/CHEM 4551. Corequisite: CHEM 4331. Basic study of physical chemistry including modern theories of atomic and molecular structure, chemical thermodynamics, electrochemistry, chemical kinetics, and related theoretical topics. Three hours lecture and one three-hour laboratory.

**CHEM 4331 - Physical Chemistry Fundamentals I Lab**  
0 credit hours  
Corequisite: CHEM 4330.

**CHEM 4340 - Physical Chemistry Fundamentals II**  
4 credit hours  
Prerequisite: CHEM 4330/CHEM 4331. A continuation
of CHEM 4330/CHEM 4331. Corequisite: CHEM 4341. Three hours lecture and one three-hour laboratory.

CHEM 4341 - Physical Chemistry Fundamentals II Lab
0 credit hours
Corequisite: CHEM 4340.

CHEM 4350 - Physical Chemistry I
4 credit hours
Prerequisites: CHEM 2230/CHEM 2231; MATH 1920; PHYS 2020/PHYS 2021 or PHYS 2120/PHYS 2121.
Corequisite: CHEM 4351. Quantitative principles of chemistry involving extensive use of calculus. Thermodynamics, phase changes, chemical equilibria, electrochemistry, reaction kinetics, quantum chemistry, molecule structure, and statistical mechanics. Three hours lecture and one three-hour laboratory.

CHEM 4351 - Physical Chemistry I Lab
0 credit hours
Corequisite: CHEM 4350.

CHEM 4360 - In-depth Physical Chemistry
5 credit hours
Prerequisite: CHEM 4330/CHEM 4331; MATH 1920.
Corequisite: CHEM 4361. A molecular approach to traditional physical chemistry. Concepts and theorems of classical thermodynamics revisited on the basis of quantum and statistical mechanics applied to simple molecular models. Necessary mathematical apparatus discussed in sufficient detail, but only at applied level. Laboratory session provides hands-on experience with quantum-chemistry computational software to predict thermochemical and spectroscopic properties of molecules. Three hours lecture and two three-hour laboratories. Offered every spring.

CHEM 4361 - Physical Chemistry II Lab
0 credit hours
Corequisite: CHEM 4360.

CHEM 4380 - Nuclear Magnetic Resonance Experimental Methods
1 credit hour
Prerequisite: CHEM 3020/CHEM 3021 or CHEM 2030/CHEM 2031. NMR measurements, operation of the spectrometer, and evaluation of the quality of spectra produced.

CHEM 4400 - Foundations of Inorganic Chemistry Aq: Aqueous and Bio-inorganic Chemistry
3 credit hours
Prerequisites: CHEM 1120 or equivalent; CHEM 2030 or CHEM 3010 recommended. The basic concepts and theories of inorganic chemistry and how these are used to predict and understand the physical and chemical properties of compounds of the elements other than carbon. Inorganic compounds in the air, water, earth, and in the laboratory and in biochemistry, geochemistry, and industrial materials and processes.

CHEM 4410 - Foundations of Inorganic Chemistry B: Structure, Bonding, Metallic, and Organometallic Chemistry
3 credit hours
Prerequisites: CHEM 3010 and CHEM 4400; corequisite: CHEM 4360/CHEM 4361 recommended. Atomic theory for chemical periodicity; symmetry and group theory; molecular orbital theory; coordination, organometallic, and bioinorganic chemistry of the transition metals.

CHEM 4430 - Advanced Synthetic Laboratory Techniques
2 credit hours
Prerequisite: CHEM 3020/CHEM 3021. Corequisite: CHEM 4431. Techniques for synthesis and purification or organic, organometallic, and inorganic compounds. Practice in the measurement of NMR and IR spectra. Skills in library use for research. Four hours laboratory and one-hour lecture.

CHEM 4431 - Advanced Synthetic Laboratory Techniques Lab
0 credit hours
Corequisite: CHEM 4430.

CHEM 4450 - In-Depth Inorganic Chemistry Aq: Aqueous and Bio-inorganic Chemistry
3 credit hours
Prerequisites: CHEM 2230, CHEM 3010, and CHEM 4410. In-depth study of concepts and theories of inorganic chemistry and how these are used to predict and understand the physical and chemical properties of compounds of the elements. Inorganic compounds in the air, water, earth, and in the laboratory and in biochemistry, geochemistry, and industrial materials and processes. Not open to students who have taken or are taking CHEM 4400. Offered alternate spring semesters.
CHEM 4460 - In-Depth Inorganic Chemistry B: Structure, Bonding, Metallic, and Organometallic Chemistry  
3 credit hours  
Prerequisites: CHEM 3010 and CHEM 4400 required; CHEM 3020 recommended; co-registration in CHEM 4360/CHEM 4361 recommended. In-depth study of atomic theory for chemical periodicity; symmetry and group theory; molecular orbital theory; chemistry of metals, nonmetals, and organometallic compounds. Not open to students who have taken or are taking CHEM 4410. Offered alternate spring semesters.

CHEM 4500 - Biochemistry I  
3 credit hours  
Prerequisite/corequisite: CHEM 3020/CHEM 3021; not open to those who have had CHEM 3530/CHEM 3531. Chemical properties of biological molecules such as amino acids, proteins, enzymes, and carbohydrates. Chemical basis of enzyme catalysis and reactions of carbohydrate metabolism. Three hours lecture per week.

CHEM 4510 - Biochemistry II  
3 credit hours  
Prerequisite: CHEM 4500. Structure and metabolism of lipids, amino acids, nucleotides, and nucleic acids at the molecular level. Emphasis on chemistry of metabolic reactions. Three hours lecture per week.

CHEM 4520 - Topics in Biochemistry  
3 credit hours  
Prerequisite: CHEM 3530 or CHEM 4500 or permission of instructor. Lectures, readings, and discussions of topics of current interest in biochemistry. Three hours lecture.

CHEM 4530 - Biochemical Techniques  
2 credit hours  
Prerequisite/corequisite: CHEM 4500 or consent of instructor. Laboratory in biochemical techniques with emphasis on protein purification, enzyme kinetics, carbohydrate and lipid analysis, and manipulation of DNA. Six hours of laboratory per week.

CHEM 4550 - Bioanalytical Chemistry  
4 credit hours  
Prerequisite: CHEM 2030/CHEM 2031 or CHEM 3020/CHEM 3021; corequisite: CHEM 4551. Survey of basic quantitative, qualitative, and purification methods with specific emphasis on molecules of interest to biochemistry. Three hours lecture and one three-hour lab per week.

CHEM 4551 - Bioanalytical Chemistry Lab  
0 credit hours  
Corequisite: CHEM 4550. Laboratory to accompany CHEM 4550. One three-hour laboratory per week.

CHEM 4580 - Medical Technology Clinical Practicum  
6 credit hours  
Intensive classroom and laboratory studies covering principles and techniques in the areas of clinical chemistry, microbiology, immunohematology, bloodbanking, and related areas. Pass/Fail.

CHEM 4600 - Introduction to Environmental Chemistry  
3 credit hours  
Prerequisites: CHEM 1120/CHEM 1121 and 8 hours of BIOL and/or CHEM beyond the freshman level. Introduces major environmental issues including climate change, water quality, air pollution, landfills, hazardous wastes, fossil fuels, and alternative energy. The quality of environment and the changes in the environment due to contamination explored. Three hours lecture.

CHEM 4610 - Environmental Chemistry  
3 credit hours  
Prerequisites: CHEM 1120/CHEM 1121, CHEM 2030/CHEM 2031 or CHEM 3010/CHEM 3011, 8 hours of upper-division biology or chemistry, and junior or senior standing. Fundamental chemical principles applied to the fate and behavior of environmental contaminants in soil-water environments. Important toxins explored and their movement and occurrence in ecosystems explained based on chemical and physical parameters. Topics will include pesticides, dioxin, mercury, and bioaccumulation. Three hours lecture.

CHEM 4700 - Polymers, an Introduction  
3 credit hours  
Prerequisite: CHEM 3020/CHEM 3021; physical chemistry strongly recommended. Chemistry of polymers; their structure, properties, and applications. Three hours lecture.

CHEM 4730 - Advanced Physical Chemistry  
4 credit hours  
Prerequisite: CHEM 4360/4361 or permission of instructor. Corequisite: CHEM 4731. Modern chemical
concepts as applied to the areas of thermodynamics, electrochemistry, and chemical kinetics. Three hours lecture and one three-hour calculation laboratory.

CHEM 4731 - Advanced Physical Chemistry Lab
0 credit hours
Corequisite: CHEM 4730

CHEM 4740 - Research Methods
3 credit hours
(Same as BIOL/PHYS/MATH 4740.) Prerequisite: YOED 3520. Provides secondary science and mathematics teacher candidates with the tools that scientists use to solve scientific problems. Students will use these tools in a laboratory setting, communicate findings, and understand how scientists develop new knowledge.

CHEM 4780 - Polymer and Materials Chemistry Laboratory
2 credit hours
Prerequisite: CHEM 3020/CHEM 3021; corequisites: CHEM 4700; CHEM 4330/CHEM 4331 strongly recommended. Laboratory introduction to synthesis, kinetics, characterization, engineering, and applications of polymers and other modern materials.

CHEM 4880 - Research
4 credit hours
Prerequisites: 24 hours of ACS-approved chemistry courses. Student research allied with the instructor's research or designed specifically for the particular student. Minimum of twelve (12) hours a week. Student must write a formal report which is approved by the instructor to receive credit for this course.

Forensic Science - Chemistry

FSCH 3530 - Principles of Biochemistry
4 credit hours
Prerequisites: CHEM 2030/CHEM 2031 or CHEM 3020/CHEM 3021. Corequisite: FSCH 3531. Structure, properties, and functions of carbohydrates, lipids, proteins, and nucleic acids and their reactions in living organisms. Three hours lecture and one three-hour lab.

FSCH 3531 - Principles of Biochemistry Lab
0 credit hours
Corequisite: FSCH 3530.

FSCH 4230 - Instrumental Analysis in Forensic Science
4 credit hours
Prerequisite: CHEM 2230/CHEM 2231. Corequisite: FSCH 4231. Potentiometric titration, polarographic, coulometric gas, chromatographic, ultraviolet, visible and infrared absorption, and atomic absorption techniques of analysis. Requirements and limitations of each technique for obtaining quantitative measurements; applications to various chemical systems from both theoretical and experimental standpoints. Three hours lecture and one three-hour laboratory.

FSCH 4231 - Instrumental Analysis in Forensic Science Lab
0 credit hours
Corequisite: FSCH 4230

Physical Science

PSCI 1030 - Topics in Physical Science
4 credit hours
Corequisite: PSCI 1031. Language, development, structure, and role of physical science (physics, chemistry, astronomy, and geology) as it relates to the knowledge and activities of the educated person. For nonscience majors. Three hours lecture and one two-hour laboratory. (A General Education course [Nat Sci]. Does not count toward any major or minor.)

PSCI 1031 - Topics in Physical Science Lab
0 credit hours
Corequisite: PSCI 1030.

PSCI 1130 - Contemporary Issues in Science
0 credit hours
Corequisite: PSCI 1131. Lecture emphasizing the application of basic concepts in science to topics of contemporary interest to the general citizenry. Covers basic science related to selected topics. Specific topics will vary. For nonscience majors. Does not count toward any major or minor.

PSCI 1131 - Activities for Contemporary Issues in Science
4 credit hours
Corequisite: PSCI 1130. Laboratory and activity emphasizing the application of basic concepts in science to topics of contemporary interest to the general citizenry. Includes laboratory activities, group-oriented problem-solving using computers and class discussion of selected contemporary issues in
science. Two two-hour laboratory sessions. For nonscience majors. Does not count toward any major or minor.

PSCI 3890 - Physical Science Instruction Internship
1 to 3 credit hours
Prerequisite: Successful completion of the target course (PSCI 1030/PSCI 1031) or one semester of chemistry and one semester of physics and permission of instructor. Opportunity to refine thinking, communication, and interpersonal skills through exposure to on-the-spot technical questions and a laboratory teaching experience as an assistant in an introductory physical science laboratory. Course credits will not count toward a major or minor in Chemistry or General Science. May be repeated for up to three credits.

PSCI 4030 - Experimental Physical Science
4 credit hours
Prerequisite: PSCI 1030/PSCI 1031. Basic concepts, laws, and principles of astronomy, chemistry, geology, and physics with particular emphasis on the utilization of equipment available or easily improvised in actual school situations to illustrate these concepts, laws, and principles.

PSCI 4080 - Problems in Physical Science
4 credit hours
Prerequisite: Consent of instructor. A problem from chemistry, physics, or other physical science appropriate to the student's background and interest. A formal written report must be submitted and approved by the instructor to receive credit for this course.
Computer Science

Chrisila C. Pettey, Chair
Butler, Carroll, Cheatham, Dong, Gu, Li, Phillips, Sarkar, Seo, Untch, J. Yoo, S. Yoo

The Department of Computer Science offers a full range of courses designed to prepare students who plan to enter computing careers in business, government, education, and industry as well as those who plan to enter graduate school. The department emphasizes a blend of theory, abstraction, and design needed to prepare students to meet their future goals.

Programs in the department lead to the Bachelor of Science degree with a major in Computer Science. Students may select a concentration in Professional Computer Science accredited by the Computing Accreditation Commission of ABET, www.abet.org, or a concentration in Business Applications. Only one minor is required for a Computer Science major with a concentration in Business Applications. The Professional Computer Science concentration does not require a minor. In addition, a minor in Computer Science is offered.

NOTE: TN eCampus courses will not count toward the major or minor without prior approval of the department.

Class Attendance Policy
The instructor can at his/her own discretion drop a student after two class meetings if the student fails to attend the first two class meetings.

Transfer Credit Policy
A student may be able to apply up to 18 hours of Computer Science (CSCI) transfer credit from a non-ABET accredited computer science program toward the major if approved by the department transfer advisor. A student may be able to apply up to 35 hours of CSCI transfer credit from an ABET accredited computer science program toward the major if approved by the department transfer advisor. Transfer credit from the approved Tennessee Transfer Pathway Associates Degree in Computer Science will be accepted toward the major. A person seeking a second bachelor's degree must satisfy the COMM 2200 requirement as well as all the math, science, and computer science course requirements for the Professional Computer Science concentration. A person seeking a second bachelor's degree in the Business Applications concentration must satisfy all the math, business, and computer science course requirements. A minimum of 9 upper-division hours in CSCI must be completed at MTSU for the major, and a minimum of 3 upper-division hours in CSCI must be completed at MTSU for the minor.

Graduate Study
The Master of Science is offered in Computer Science as is a graduate minor on the master's and doctoral levels. Requirements and a list of courses offered for graduate credit may be found in the Graduate Catalog.

Computer Science Minor

Department of Computer Science
A minor in Computer Science consists of 17 semester hours. CSCI 1150 is considered a service course and does not count toward a major or minor. Credit in secondary computer languages toward a minor is limited to three hours. A GPA of 2.00 is required in the Computer Science minor.

Required (8 hours)

- CSCI 1170 - Computer Science I 4 credit hours
- CSCI 2170 - Computer Science II 4 credit hours
Electives (9 hours)

- 9 additional hours including 6 hours selected from upper-division computer science with approval of the minor advisor
Computer Science, Business Applications Concentration (Business Administration Minor), B.S.

Department of Computer Science
615-898-2397
Chrisila Pettey, program coordinator
Chrisila.Pettey@mtsu.edu

A major in Computer Science consists of 41 hours of General Education requirements, 44 hours of Computer Science requirements, and 35 hours of supporting and elective courses. Specifically a major must have

1. a core of CSCI 1010, CSCI 1170, CSCI 2170, CSCI 3080, CSCI 3110, CSCI 3130, CSCI 3240, and CSCI 4700;
2. a mathematics core of MATH 1910, MATH 1920, and MATH 2050;
3. additional math courses (3 hours) that can be counted toward a math major;
4. COMM 2200;
5. PHIL 3170;
6. additional courses as described below.

A maximum of 3 hours in the major may come from, CSCI 4280, CSCI 4600, and CSCI 4910. Credit in secondary computer languages toward the major is limited to 3 hours. In order to take any computer science course having a prerequisite, the student must have earned a grade of C (2.00) or higher in the prerequisite. Each course counted toward the 44 credit hours of required Computer Science courses must be completed with a grade of C (2.00) or higher.

CSCI 1150 is considered a service course and does not count toward a major or minor.

The Business Applications concentration with a minor in Business Administration requires the following in addition to the core requirements:

1. CSCI 4410 and CSCI 4560;
2. 12 hours of computer science electives, at least 9 of which are upper division;
3. a minor in Business Administration which requires INFS 2200 or INFS 3100; ACTG 3000 (or ACTG 2110 and ACTG 2120); FIN 3000 or FIN 3010; BLAW 3400 or BLAW 3430; MGMT 3610; and MKT 3820.

NOTE: The Computer Science Department has a full-time academic advisor. Additionally, all Computer Science majors are assigned a faculty mentor. The student is responsible for seeking the assistance of the advisor. This catalog is not intended to provide the detail necessary for self-advising.

Curriculum: Business Applications Concentration (Business Administration Minor)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- CSCI 1010 - Computer Science Colloquium 1 credit hour
- CSCI 1170 - Computer Science I 4 credit hours
- CSCI 2170 - Computer Science II 4 credit hours
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
Choose 6 hours from:

- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 29 Hours

Sophomore

- CSCI 3130 - Assembly and Computer Organization 4 credit hours
- CSCI 3240 - Introduction to Computer Systems 4 credit hours
- Natural Sciences 8 credit hours
- Social/Behavioral Sciences 3 credit hours
- CSCI elective 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- INFS 2200 - Introduction to Microcomputing 3 credit hours OR
- INFS 3100 - Principles of Management Information Systems 3 credit hours

Subtotal: 31 Hours

Junior

- CSCI 3080 - Discrete Structures 3 credit hours
- CSCI 3110 - Algorithms and Data Structures 3 credit hours
- PHIL 3170 - Ethics and Computing Technology 3 credit hours
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- FIN 3000 - Principles of Financial Management 3 credit hours OR
- FIN 3010 - Business Finance 3 credit hours
- ACTG 3000 - Survey of Accounting for General Business 3 credit hours OR
- ACTG 2110 - Principles of Accounting I 3 credit hours AND
- ACTG 2120 - Principles of Accounting II 3 credit hours
- MGMT 3610 - Principles of Management 3 credit hours
- Math elective 3 credit hours
- CSCI upper-division elective 3 credit hours
- Elective 3 credit hours

Subtotal: 30 Hours

Senior

- CSCI 4410 - Web Technologies 3 credit hours
- CSCI 4560 - Database Management Systems 3 credit hours
- CSCI 4700 - Software Engineering 3 credit hours
- CSCI upper-division electives 6 credit hours
- Social/Behavioral Sciences 3 credit hours
- Humanities and/or Fine Arts 6 credit hours
- BLAW 3400 - Legal Environment of Business 3 credit hours OR
- BLAW 3430 - Commercial Law 3 credit hours
- MKT 3820 - Principles of Marketing 3 credit hours

Subtotal: 30 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Computer Science, Business Application (Business Administration Minor), B.S., Academic Map
Computer Science, Business Applications Concentration (Mathematics Minor), B.S.

CSCI 1150 is considered a service course and does not count toward a major or minor.

The Business Applications concentration with a minor in Mathematics requires the following in addition to the core requirements:

1. CSCI 4410 and CSCI 4560;
2. 12 hours of computer science electives, at least 9 of which are upper division;
3. a minor in Mathematics which requires ACTG 2110, ECON 2420, FIN 3000, MGMT 3610, and one of ACTG 2120, BLAW 3400, MKT 3820, ACSI 4230, or MGMT 3620.

NOTE: The Computer Science Department has a full-time academic advisor. Additionally all Computer Science majors are assigned a faculty mentor. The student is responsible for seeking the assistance of the advisor. This catalog is not intended to provide the detail necessary for self-advising.

Curriculum: Business Applications Concentration (Mathematics Minor)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- CSCI 1010 - Computer Science Colloquium 1 credit hour
- CSCI 1170 - Computer Science I 4 credit hours
- CSCI 2170 - Computer Science II 4 credit hours
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
Choose 6 hours from:
- HIST 2010 - Survey of United States History I 3 credit hours
- HIST 2020 - Survey of United States History II 3 credit hours
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 29 Hours

Sophomore
- CSCI 3130 - Assembly and Computer Organization 4 credit hours
- CSCI 3240 - Introduction to Computer Systems 4 credit hours
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- MATH 2050 - Probability and Statistics 3 credit hours
- Natural Sciences (2 prefixes) 8 credit hours
- Social/Behavioral Sciences 3 credit hours
- CSCI elective 3 credit hours
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)

Subtotal: 31 Hours

Junior
- ACTG 2110 - Principles of Accounting I 3 credit hours
- CSCI 3080 - Discrete Structures 3 credit hours
- CSCI 3110 - Algorithms and Data Structures 3 credit hours
- FIN 3000 - Principles of Financial Management 3 credit hours
- PHIL 3170 - Ethics and Computing Technology 3 credit hours
- CSCI upper-division electives 6 credit hours
- MATH electives 7 credit hours
- MGMT 3610 - Principles of Management 3 credit hours

Subtotal: 31 Hours

Senior
- CSCI 4410 - Web Technologies 3 credit hours
- CSCI 4560 - Database Management Systems 3 credit hours
- CSCI 4700 - Software Engineering 3 credit hours
- ECON 2420 - Principles of Economics, Microeconomics 3 credit hours
- ACTG 2120 - Principles of Accounting II 3 credit hours OR
- ACSI 4230 - Mathematics of Compound Interest 3 credit hours OR
- BLAW 3400 - Legal Environment of Business 3 credit hours OR
- MGMT 3620 - Supply Chain Operations 3 credit hours OR
- MKT 3820 - Principles of Marketing 3 credit hours
- Humanities and/or Fine Arts 6 credit hours
- Social/Behavioral Sciences 3 credit hours

College of Basic and Applied Sciences 243
- CSCI upper-division elective 3 credit hours
- Elective 2 credit hours

Subtotal: 29 Hours

Total hours in program: 120

Computer Science, Business Application (Mathematics Minor), B.S., Academic Map
Computer Science, Professional Computer Science Concentration, B.S.

Department of Computer Science
615-898-2397
Chrisila Pettey, program coordinator
Chrisila.Pettey@mtsu.edu

A major in Computer Science consists of 41 hours of General Education requirements, 44 semester hours of computer science courses, and 35 hours of supporting and elective courses. Specifically a major must have

1. a core of CSCI 1010, CSCI 1170, CSCI 2170, CSCI 3080, CSCI 3110, CSCI 3130, CSCI 3240, and CSCI 4700;
2. a mathematics core of MATH 1910, MATH 1920, and MATH 2050;
3. additional math courses (4 hours) that can be counted toward a math major;
4. COMM 2200;
5. PHIL 3170;
6. additional courses as described below.

A maximum of 3 hours in the major may come from CSCI 4280, CSCI 4600, and CSCI 4910. Credit in secondary computer languages toward the major is limited to 3 hours. In order to take any computer science course having a prerequisite, the student must have earned a grade of C (2.00) or better in the prerequisite. Each course counted toward the 44 credit hours of required Computer Science courses must be completed with a grade of C (2.00) or higher. CSCI 1150 is considered a service course and does not count toward a major or minor.

The Professional Computer Science concentration which is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org, requires the following in addition to the core requirements:

1. CSCI 3210 and CSCI 4160;
2. 3 hours in an approved high-level language;
3. upper-division computer science electives (9 hours);
4. a two-semester sequence in a laboratory science for Science majors (8 hours);
5. 4 additional hours in science for Science majors and/or courses with strong emphasis on quantitative methods with a different rubric than the 8-hour science sequence required above.
6. 30 semester hours of humanities, social sciences, and other disciplines (excluding science, mathematics, computer science, and physical education).

Curriculum: Professional Computer Science

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- CSCI 1010 - Computer Science Colloquium 1 credit hour
- CSCI 1170 - Computer Science I 4 credit hours
- CSCI 2170 - Computer Science II 4 credit hours
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
Choose 6 hours from:
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 29 hours

Sophomore
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- CSCI 3130 - Assembly and Computer Organization 4 credit hours
- CSCI 3240 - Introduction to Computer Systems 4 credit hours
- CSCI 303_ 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours
- Nat Sci (Rubric 1) 4 credit hours
- Nat Sci (Rubric 1, second semester) 4 credit hours
- Social/Behavioral Sciences 3 credit hours
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)

Subtotal: 31 Hours

Junior
- CSCI 3080 - Discrete Structures 3 credit hours
- CSCI 3110 - Algorithms and Data Structures 3 credit hours
- CSCI 3210 - Theory of Programming Languages 3 credit hours
- Math elective 4 credit hours
- CSCI upper-division elective 3 credit hours
- Electives to meet 120 credit hours 9 credit hours
- PHIL 3170 - Ethics and Computing Technology 3 credit hours
- Natural Sciences (different prefix from year-long lab sequence) 4 credit hours **

Subtotal: 32 Hours

Senior
- CSCI 4160 - Compiler Design and Software Development 3 credit hours
- CSCI 4700 - Software Engineering 3 credit hours
- CSCI upper-division elective 6 credit hours
- Social/Behavioral Sciences 3 credit hours
- Electives to meet 120 credit hours 7 credit hours
- Humanities and/or Fine Arts 6 credit hours

Subtotal: 28 Hours

Total hours in program: 120
NOTE:

*Professional Computer Science concentration students choose one year-long sequence from BIOL 1110/BIOL 1111, BIOL 1120/BIOL 1121, CHEM 1010/CHEM 1011, CHEM 1020/CHEM 1021, CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, PHYS 2010/PHYS 2011, PHYS 2020/PHYS 2121, PHYS 2110/PHYS 2111, PHYS 2120/PHYS 2121.

**Professional Computer Science concentration students choose one course with different prefix from that chosen in sophomore year from BIOL 1110/BIOL 1111, CHEM 1010/CHEM 1011, CHEM 1110/CHEM 1111, PHYS 2010/PHYS 2011, PHYS 2110/PHYS 2111.

Academic Map

Following is a printable, suggested four-year schedule of courses:

Computer Science, Professional Computer Science, B.S., Academic Map
Computer Science

CSCI 1010 - Computer Science Colloquium
1 credit hour
Introduces new computer science students to the computer science major. Topics include degree requirements, faculty resources, research opportunities, and career options.

CSCI 1150 - Computer Orientation
3 credit hours
A general introduction to computers with an emphasis on personal computing, database, word processing, presentation graphics, spreadsheets, and Internet tools. Does not count for Computer Science major or minor.

CSCI 1160 - Introduction to Computing: A Multimedia Approach
4 credit hours
Prerequisite: Sufficient background in algebra. Computer science concepts and computer software development using a multimedia approach to program development. Algorithms, programming, and documentation of media computation problems including modifying, editing, and creating picture and sound files. Explores computer science hardware and software terminology. Counts toward a Computer Science major or minor upon successful completion with a grade of A or B and approval by Computer Science chair. Three lecture hours and two laboratory hours.

CSCI 1170 - Computer Science I
4 credit hours
Prerequisite: Sufficient background in algebra and trigonometry. The first of a two-semester sequence using a high-level language; language constructs and simple data structures such as arrays and strings. Emphasis on problem solving using the language and principles of structured software development. Three lecture hours and two laboratory hours.

CSCI 2170 - Computer Science II
4 credit hours
Prerequisite: CSCI 1170 or equivalent. A continuation of CSCI 1170. Topics include introductory object-oriented programming techniques, software engineering principles, records, recursion, pointers, stacks and queues, linked lists, trees, and sorting and searching. Three lecture hours and two laboratory hours.

CSCI 3033 - Computer Languages: Java
3 credit hours
Prerequisite: CSCI 2170 or consent of instructor. An opportunity for a Computer Science major or minor to gain experience and training in a secondary language. Covers the syntax, advantages, disadvantages, limitations, and selected applications of a language. Credit will not be given toward a Computer Science major or minor if credit has been received for the same language in another course. Credit in secondary computer languages is limited to 3 hours for the major or minor.

CSCI 3037 - Computer Languages: Visual Programming
3 credit hours
Prerequisite: CSCI 2170 or consent of instructor. An opportunity for a Computer Science major or minor to gain experience and training in a secondary language. Covers the syntax, advantages, disadvantages, limitations, and selected applications of a language. Credit will not be given toward a Computer Science major or minor if credit has been received for the same language in another course. Credit in secondary computer languages is limited to 3 hours for the major or minor.

CSCI 3038 - Computer Languages: Python
3 credit hours
Prerequisite: CSCI 2170 or consent of instructor. An opportunity for a Computer Science major or minor to gain experience and training in a secondary language. Covers the syntax, advantages, disadvantages, limitations, and selected applications of a language. Credit will not be given toward a Computer Science major or minor if credit has been received for the same language in another course. Credit in secondary computer languages is limited to 3 hours for the major or minor.

CSCI 3080 - Discrete Structures
3 credit hours
(Same as MATH 3080.) Prerequisites: CSCI 1160 or CSCI 1170 and MATH 1910 or consent of instructor. Topics include formal logic, proof techniques, matrices, graphs, formal grammars, finite state machines, Turing machines, and binary coding schemes.

CSCI 3110 - Algorithms and Data Structures
3 credit hours
Prerequisite: CSCI 2170; corequisite: CSCI 3080. Topics include additional object-oriented
programming techniques, algorithm design, analysis of algorithms, advanced tree structures, indexing techniques, internal and external sorting, graphs, and file organizations.

CSCI 3130 - Assembly and Computer Organization
4 credit hours
Prerequisite: CSCI 2170. Assembly language and the organization and basic architecture of computer systems. Topics include hardware components of digital computers, microprogramming, and memory management. Laboratory exercises involve logical, functional properties of components from gates to microprocessors. Three lectures and one two-hour laboratory.

CSCI 3160 - Introduction to Assembly Language
3 credit hours
Prerequisite: CSCI 1170 or equivalent. Computer architecture and assembly language. Major emphasis on addressing techniques, macros, and program segmentation and linkage.

CSCI 3180 - Introduction to Numerical Analysis
3 credit hours
(Same as MATH 3180.) Prerequisites: MATH 1920 and either CSCI 1160 or CSCI 1170. Topics include series approximation, finite differences interpolation, summation, numerical differentiation and integration, iteration, curve fitting, systems of equations and matrices, and error analysis.

CSCI 3210 - Theory of Programming Languages
3 credit hours
Prerequisites: CSCI 2170 and COMM 2200; corequisite: CSCI 3080. Syntax and theory of multiple languages covered with emphasis on binding times, parsers, grammars, finite automata, regular expressions, type checking and equivalence, scope of variables, exception handling, parameter passing, and storage management.

CSCI 3240 - Introduction to Computer Systems
4 credit hours
Prerequisites: CSCI 2170 and either CSCI 3130 or ET 3620. Provides a programmer's view of how computer systems execute programs, store information, and communicate. Topics include machine-level code and its generation by optimizing compilers, computer arithmetic, memory organization and management, networking technology and protocols, and supporting concurrent computation. Three lecture hours and one two-hour laboratory.

CSCI 3250 - Operating Systems
3 credit hours
Prerequisite: CSCI 3240. Concepts and facilities of an operating system. Major concepts in memory, processor, device, and information management are covered as well as interrelationships between the operating system and the architecture of the computer system.

CSCI 3420 - Social, Ethical, and Legal Implications of Computing
2 credit hours
Prerequisites: A three-hour course in computing, COMM 2200, and junior standing. Introduction to the impact of computers on society and the ethical and legal issues confronting computer users and professionals. Does not count toward a minor in Computer Science.

CSCI 4160 - Compiler Design and Software Development
3 credit hours
Prerequisites: CSCI 3080, CSCI 3110, and either CSCI 3130 or CSCI 3160. The various phases of a compiler along with grammars, finite automata, regular expressions, LR parsing, error recovery, backward and forward flow analysis, and code optimization. A term project consisting of the design and construction of a functional compiler required.

CSCI 4250 - Computer Graphics
3 credit hours
Prerequisites: CSCI 2170 and CSCI 3080 or consent of instructor. Topics include vector drawing displays, raster scan displays, input devices and techniques, graphics software, transformations, projections, interpolation, and approximation.

CSCI 4280 - Undergraduate Research
1 to 4 credit hours
Prerequisite: Permission of instructor and department. Independent investigation of a selected research problem under the guidance of a faculty member resulting in an oral and written report of results. Does not count toward a minor in Computer Science. May be repeated for a maximum of four credits. A maximum of three credits in the major may come from CSCI 3970, 4280, CSCI 4600, and CSCI 4910.

CSCI 4300 - Data Communication and Networks
3 credit hours
Prerequisite: CSCI 3240 or CSCI 3250. Computer network architectures, protocol hierarchies, and the
open systems interconnection model. Modeling, analysis, design, and management of hardware and software on a computer network.

**CSCI 4330 - Parallel Processing Concepts**
3 credit hours
Prerequisites: CSCI 3130 and CSCI 3240 or CSCI 3250. Basic concepts in parallel processing and programming in a parallel environment. Topics include classification of parallel architectures, study of actual parallel architectures, design and implementation of parallel programs, parallel software engineering.

**CSCI 4350 - Introduction to Artificial Intelligence**
3 credit hours
Prerequisites: CSCI 3110 and CSCI 3080 or equivalent. Principles include search strategies, knowledge representation, reasoning, and machine learning. Applications include expert systems and natural language understanding.

**CSCI 4360 - Intelligent Robot System**
3 credit hours
Prerequisites: CSCI 2170 and CSCI 3080. Principles and applications of intelligent mobile robotics. Various architectures used in the basic AI robotics development paradigms and basic techniques used for robot navigation. Strong emphasis on hands-on mobile robot design, construction, programming, and experimentation using a variety of robot building platforms.

**CSCI 4410 - Web Technologies**
3 credit hours
Prerequisites: CSCI 3080 and CSCI 3110. An intensive introduction into current Web technologies including basic HTML, tools for Web page design, XML, client-side methods, and server-side methods. Students will be required to implement several Web-based projects.

**CSCI 4560 - Database Management Systems**
3 credit hours
Prerequisites: CSCI 3080 and CSCI 3110. The relational and object models of database design along with relational algebras, data independence, functional dependencies, inference rules, normal forms, schema design, modeling languages, query languages, and current literature.

**CSCI 4600 - Independent Study in Computer Science**
1 to 6 credit hours
Prerequisites: Senior standing and consent of instructor. Students wishing to enroll must submit a written course/topic proposal to the department prior to the semester in which CSCI 4600 is taken. Proposal must be approved prior to taking the course. At the course conclusion, each enrollee must submit a written report to the department. May count up to 3 hours toward Computer Science major.

**CSCI 4700 - Software Engineering**
3 credit hours
Prerequisites: CSCI 3080, CSCI 3110, and COMM 2200. Consists of a theoretical component and a practical component. Topics include the history of software engineering, software development paradigms and life cycles, and computer-aided software engineering (CASE). Team project developed in parallel with the theory.

**CSCI 4800 - Software Testing**
3 credit hours
Prerequisites: CSCI 2170 and CSCI 3080. Integrates theory and applications of software testing techniques. Provides actual hands-on testing experience. Considers multiple testing paradigms.

**CSCI 4850 - Neural Nets**
3 credit hours
Prerequisite: CSCI 3080. Various neural net architectures, theory, and applications including models such as Perceptron, back propagation, Kohonen, ART, and associative memory. Learning and conditioning methods also studied.

**CSCI 4900 - Selected Topics in Computer Science**
3 credit hours
Prerequisite: CSCI 2170. Advanced topics in computer science to be selected and announced at time of class scheduling. May be repeated for up to six credits total.

**CSCI 4910 - Computer Science Internship**
1 to 6 credit hours
Prerequisite: CSCI 3110. Must have completed at least 30 semester hours with two semesters at MTSU; must have taken at least two computer science courses at MTSU; minimum overall average of 2.75 and 3.00 in computer science. Employment experience in a computer-related function in a firm, governmental agency, etc. Must be approved by the department.
Concrete Industry Management

Heather Brown, Chair
Ahmed, Huddleston, Knight, Yang
www.mtsucim.com/

The objective of the Concrete Industry Management (CIM) program is to produce graduates grounded in the basics of concrete’s production techniques and its use in a multitude of construction applications. A CIM degree is designed to provide the graduate with a broad array of initial opportunities within the industry that include sales, operations, technical services, project, production, and concrete construction management. CIM students gain both theoretical and practical knowledge of the concrete industry, its production techniques, and construction applications through typical classroom-style learning, as well as hands-on experience through a required internship opportunity.

The Concrete Industry Management major includes two concentrations: Production, Sales, and Service (PSS) and Concrete Contracting (COCO). Examples of PSS employment include technical sales, operations manager, sales and marketing professional, product distribution, quality control manager, environmental and safety officer, logistics, ITD support, trade association staffer, and technical magazine staffer. Examples of COCO employment include project management or engineering for a general contractor, specialty contractor or subcontractor, concrete specialist in an architectural/engineering firm or government entity, estimator, draftsman, surveying staff, and safety officer.

In addition to the CIM major, graduates acquire a minor in business administration, which includes the study of personnel management, systems integration, marketing, sales and promotion as they relate to concrete products and services. The CIM core curriculum includes typical college-level general study requirements, general business, and concrete-related introductory course work. Advanced level courses and internships broaden the students’ understanding of the workings of the concrete industry.

A Road Construction Technology certificate offers students an opportunity to advance knowledge in this specialized area of construction.

CIM is a joint initiative of a growing number of universities supported by networks of local, state, and regional concrete industry producers, suppliers, and contractors that pledge their time, talent, and resources to support the development of each university’s CIM program. Currently, there are five universities designated as schools with CIM programs. The CIM program was originally founded at Middle Tennessee State University in 1996 and later expanded to the New Jersey Institute of Technology, California State University-Chico, and Texas State University-San Marcos.

A National Steering Committee (NSC) composed of industry-leading organizations helps to provide funding for each university and oversight and direction for the overall CIM Program. Organizations that support and participate at the NSC level include the American Concrete Pipe Association, American Society of Concrete Contractors’ Education Foundation, National Concrete Masonry Association’s Foundation, National Precast Concrete Association, National Ready Mixed Concrete Association, Precast/Prestressed Concrete Institute’s Foundation, Portland Cement Association, and the RMC Research and Education Foundation.

The Jones College of Business also offers a concentration in Concrete Industry Management within the Master of Business Administration. For further information, see the Graduate Catalog.
Concrete Industry Management, Concrete Contracting Concentration, B.S.

Department of Concrete Industry Management
615-904-8060
Heather Brown, program coordinator
Heather.Brown@mtsu.edu
www.mtsucim.com/

The major in Concrete Industry Management is designed to produce broadly educated, articulate graduates, grounded in basic science and mathematics, who are knowledgeable about concrete technology and techniques and are able to manage people and systems and to promote products or services related to the concrete industry. Examples of opportunities in the field include technical sales of products used to manufacture concrete; operations management of a concrete production facility; sales and marketing of production, construction, and finishing equipment; product distribution, supply chain management, and logistics; project management for a concrete or general contractor; work as a concrete specialist in an architectural/engineering firm or government entity; and support positions such as writer or editor for a technical magazine or professional/trade association management. The Concrete Contracting concentration offers preparation for entry-level positions with general and concrete contractors, project management firms, masonry contractors, precast erection firms, or government agencies responsible for construction projects. Position opportunities include project management, estimating, field supervision, planning and scheduling, and various other management positions.

Core classes in the major include CIM 1010, CIM 1050, CIM 3000, CIM 3050, CIM 3060, CIM 3100, CIM 3300, CIM 4030, CIM 4150, CIM 4200, and CIM 4910.

Grading Policy
Students majoring in the Concrete Industry Management (CIM) program must receive grades of C (2.00) or better in all CIM courses in order for the courses to count toward graduation. A minimum grade of C (2.00) is required in all CIM classes that are prerequisites to other CIM classes.

Curriculum: Concrete Industry Management, Concrete Contracting

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- GEOL 1030 - Introduction to Earth Science 3 credit hours (Nat Sci) AND
  - GEOL 1031 - Introduction to Earth Science Lab 1 credit hour (Nat Sci)
  OR
- GEOL 1040 - Physical Geology 4 credit hours (Nat Sci) AND
  - GEOL 1041 - Physical Geology Lab 0 credit hours (Nat Sci)
- CHEM 1010 - Introductory General Chemistry I 4 credit hours (Nat Sci) AND
  - CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours (Nat Sci)
  OR
- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
  - CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
- CIM 1010 - Introduction to the Concrete Industry 1 credit hour
- CIM 1050 - Blueprint Reading 1 credit hour
• CSCI 1150 - Computer Orientation 3 credit hours
• MATH 1720 - Plane Trigonometry 3 credit hours (Math)
• PSY 1410 - General Psychology 3 credit hours recommended (Soc/Beh Sci)

Subtotal: 28 Hours

Sophomore

• ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
• ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
• HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
• PSY 3020 - Basic Statistics for Behavioral Science 3 credit hours OR
• BIA 2610 - Statistical Methods 3 credit hours OR
• MATH 1530 - Applied Statistics 3 credit hours
• ECON 2410 - Principles of Economics, Macroeconomics 3 credit hours recommended (Soc/Beh Sci)
• Humanities and/or Fine Arts 3 credit hours
• CIM 2050 - Advanced Blueprint Reading 2 credit hours
• CIM 3000 - Fundamentals of Concrete: Properties and Testing 4 credit hours
• CIM 3050 - Concrete Construction Methods 3 credit hours
• CIM 3070 - Site Planning, Layout, and Preparation 3 credit hours
Choose 6 hours from:
• HIST 2010 - Survey of United States History I 3 credit hours OR
• HIST 2020 - Survey of United States History II 3 credit hours OR
• HIST 2030 - Tennessee History 3 credit hours

Subtotal: 30 Hours

NOTE:

CIM 3300, Concrete Industry Internship, will be taken sometime after the sophomore year for two credit hours.

Junior

• CIM 3060 - Understanding the Concrete Construction System 3 credit hours
• CIM 3080 - Formwork Design and Computerized Drafting 3 credit hours
• CIM 3100 - Applications of Concrete Construction 3 credit hours
• CIM 3200 - Concrete Project Estimating 3 credit hours
• CIM 4030 - Issues in the Concrete and Construction Industry: A Legal and Ethical Perspective 1 credit hour
• MGMT 3610 - Principles of Management 3 credit hours
• MKT 3820 - Principles of Marketing 3 credit hours
• FIN 3000 - Principles of Financial Management 3 credit hours OR
• FIN 3010 - Business Finance 3 credit hours
• ACTG 3000 - Survey of Accounting for General Business 3 credit hours
• ENGR 3920 - Engineering Safety 3 credit hours (formerly ET 4420)
• CIM 3090 - Computer Applications in Concrete and Construction Industries 3 credit hours OR
• CIM 4400 - Decorative Concrete 3 credit hours OR
• CIM 4500 - Masonry 3 credit hours OR
• CIM 4600 - Design, Production, and Manufacture of Precast Concrete 3 credit hours OR
• SPAN 1010 - Elementary Spanish I 3 credit hours

Subtotal: 31 Hours

Senior

• BLAW 3400 - Legal Environment of Business 3 credit hours
• CIM 4010 - Design and Construction Issues 3 credit hours
• CIM 4070 - Concrete Contracting Personnel Management 3 credit hours
• CIM 4100 - Field Management and Supervision 3 credit hours
• CIM 4150 - Concrete Problems: Diagnosis, Prevention, and Dispute Resolution 3 credit hours
• CIM 4200 - Senior Concrete Lab 2 credit hours
• CIM 4910 - Capstone 3 credit hours
• ENGL 3605 - Applied Writing 3 credit hours OR
• ENGL 3620 - Professional Writing 3 credit hours OR
• COMM 3230 - Professional Public Speaking 3 credit hours OR
• HSC 3020 - Presentation Techniques 3 credit hours OR
• JOUR 2710 - Media Writing 3 credit hours
• Humanities and/or Fine Arts 3 credit hours
• Cognate elective 3 credit hours

Subtotal: 29 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Concrete Industry Management, Concrete Contracting, B.S, Academic Map

Concrete Industry Management Cognate Courses

Production, Sales, and Service students must choose any four courses from below. Concrete Contracting students must choose one course.

Agribusiness and Agriscience

• ABAS 3140 - Real Property Law for Commerce and Agriculture 3 credit hours
• ABAS 3340 - Soil 3 credit hours
• ABAS 3360 - Irrigation and Drainage 3 credit hours
• ABAS 3370 - Soil Analysis 3 credit hours

Advertising

• ADV 3020 - Principles of Advertising 3 credit hours
Business Communications

- BCED 1400 - Introduction to Business 3 credit hours
- BCED 2010 - Career Decision Making 1 credit hour
- BCED 2020 - Job Search Communication 1 credit hour
- BCED 2030 - Workplace Etiquette and Protocol 1 credit hour
- ENTR 2900 - Entrepreneurship 3 credit hours

Communication

- COMM 2300 - Interpersonal Communication 3 credit hours
- COMM 3210 - Argumentation and Debate 3 credit hours
- COMM 3340 - Interview Communication 3 credit hours
- COMM 3350 - Diversity in Communication 3 credit hours
- COMM 4320 - Theories of Persuasive Communication 3 credit hours

Concrete Industry Management

- CIM 3090 - Computer Applications in Concrete and Construction Industries 3 credit hours
- CIM 4400 - Decorative Concrete 3 credit hours
- CIM 4500 - Masonry 3 credit hours
- CIM 4600 - Design, Production, and Manufacture of Precast Concrete 3 credit hours
  For Production, Sales, and Service:
  - CIM 3070 - Site Planning, Layout, and Preparation 3 credit hours
  - CIM 3080 - Formwork Design and Computerized Drafting 3 credit hours
  - CIM 4010 - Design and Construction Issues 3 credit hours
  - CIM 4070 - Concrete Contracting Personnel Management 3 credit hours
  - CIM 4100 - Field Management and Supervision 3 credit hours
  For Concrete Contracting:
  - CIM 4050 - Management of Concrete Products: Ordering and Delivering 3 credit hours
  - CIM 4060 - Management of Concrete Products: Production Facilities 3 credit hours

Economics

- ECON 3210 - The Financial System and the Economy 3 credit hours
- ECON 4400 - Economics of Antitrust and Regulation 3 credit hours
- ECON 4420 - Labor and Human Resource Economics 3 credit hours

Environmental Sustainability and Technology

- EST 2810 - Introduction to Environmental Science 3 credit hours
- EST 4810 - Energy and the Environment 3 credit hours
- EST 4820 - Solar Building Design 3 credit hours
- EST 4840 - Energy Auditing 3 credit hours

Engineering/Engineering Technology

- ENGR 3970 - Engineering Economy 3 credit hours
- ET 2310 - Computer-Assisted Drafting and Design I 3 credit hours
- **ET 3360 - Computer-Assisted Drafting and Design II** 3 credit hours
- **ET 4330 - Advanced Computer-Aided Drafting** 2 credit hours

### Finance
- **FIN 4110 - Managerial Finance** 3 credit hours

### Foreign Language (choose one language)
- Elementary I and II or equivalent
- Intermediate I and II or equivalent

### Geology
- **GEOL 3000 - Mineralogy** 5 credit hours
- **GEOL 4000 - Petrology and Petrography** 5 credit hours
- **GEOL 4120 - Environmental Geology** 4 credit hours

### Global Studies and Cultural Geography
- **GS 2010 - Introduction to Cross-Cultural Experiences** 3 credit hours
- **GEOG 4370 - Urban Geographies: Key Trends, Problems, and Solutions** 3 credit hours

### Information Systems
- **INFS 2400 - Web Development** 3 credit hours
- **INFS 3100 - Principles of Management Information Systems** 3 credit hours
- **INFS 3200 - Business Application Development** 3 credit hours

### Leadership Studies
- **LEAD 2000 - Introduction to Leadership Studies** 3 credit hours
- **LEAD 3010 - Leadership Theories and Practices** 3 credit hours

### Management
- **ENTR 3650 - New Venture Creation** 3 credit hours
- **ENTR 4920 - Small Business Management** 3 credit hours
- **MGMT 3630 - Organization Theory** 3 credit hours
- **MGMT 3710 - Management of Quality** 3 credit hours
- **MGMT 3730 - Management of Innovation** 3 credit hours
- **MGMT 3740 - Advanced Supply Chain Strategies** 3 credit hours
- **MGMT 3810 - Human Resources Management** 3 credit hours
- **MGMT 3890 - Managerial Decision Making** 3 credit hours
- **MGMT 4490 - Industrial Relations Legislation** 3 credit hours
- **MGMT 4500 - Employment Discrimination Law** 3 credit hours
- **MGMT 4510 - Unions and Collective Bargaining** 3 credit hours
- **MGMT 4640 - Human Resources Planning and Staffing** 3 credit hours
- **MGMT 4680 - Organization Behavior** 3 credit hours
- MGMT 4700 - Problems in Supply Chain Operations 3 credit hours
- MGMT 4710 - International Business 3 credit hours
- MGMT 4730 - Global Comparative Management 3 credit hours

Marketing

- MKT 3840 - Professional Selling 3 credit hours
- MKT 3850 - Promotion 3 credit hours
- MKT 3860 - Purchasing 3 credit hours
- MKT 3870 - Principles of Transportation 3 credit hours
- MKT 3900 - Social Media Marketing and E-Commerce 3 credit hours
- MKT 3910 - Consumer Behavior 3 credit hours
- MKT 3930 - Marketing Research 3 credit hours
- MKT 3950 - Business-to-Business Marketing 3 credit hours
- MKT 3960 - Marketing Channels Management 3 credit hours
- MKT 4800 - Sales Management 3 credit hours
- MKT 4850 - Advanced Selling 3 credit hours
- MKT 4870 - Services Marketing 3 credit hours
- MKT 4880 - Applied Marketing Research 3 credit hours

MBA Preparatory

- ACTG 3020 - Managerial Accounting 3 credit hours
- BIA 3620 - Introduction to Business Analytics 3 credit hours
- ECON 2420 - Principles of Economics, Microeconomics 3 credit hours
- INFS 3100 - Principles of Management Information Systems 3 credit hours

Organizational Communication

- ORCO 3240 - Introduction to Organizational Communication 3 credit hours
- ORCO 3250 - Organizational Communication in Communities 3 credit hours
- ORCO 3500 - Strategic Communication in Organizations 3 credit hours
- ORCO 3650 - Conflict and Organizations 3 credit hours

Philosophy

- PHIL 2110 - Elementary Logic and Critical Thinking 3 credit hours

Physical Geography

- PGEO 4490 - Remote Sensing 4 credit hours
- PGEO 4530 - Geographic Information Systems 3 credit hours

Public Relations

- PR 2040 - Public Relations Principles 3 credit hours
Transportation

- TRNS 1610 - Introduction to Transportation 3 credit hours
- TRNS 2620 - Transportation Freight Systems 3 credit hours
- TRNS 3630 - Transportation Systems 3 credit hours

University Seminar

- UNIV 4010 - MTSU Institute of Leadership Excellence 3 credit hours
Concrete Industry Management, Production, Sales, and Service Concentration, B.S.

Department of Concrete Industry Management
615-904-8060
Heather Brown, program coordinator
Heather.Brown@mtsu.edu
www.mtsucim.com/

The major in Concrete Industry Management is designed to produce broadly educated, articulate graduates, grounded in basic science and mathematics, who are knowledgeable about concrete technology and techniques and are able to manage people and systems and to promote products or services related to the concrete industry. Examples of opportunities in the field include technical sales of products used to manufacture concrete; operations management of a concrete production facility; sales and marketing of production, construction, and finishing equipment; product distribution, supply chain management, and logistics; project management for a concrete or general contractor; work as a concrete specialist in an architectural/engineering firm or government entity; and support positions such as writer or editor for a technical magazine or professional/trade association management. The Production, Sales, and Service concentration is geared toward developing technical managers for ready mix, block, and precast concrete production facilities as well as their suppliers, such as admixture, aggregate, cement, and equipment companies. Position opportunities include operations management, sales and sales management, marketing management, human resource management, technical service and quality control, or environmental and safety management. All students in the Production, Sales, and Service concentration are required to choose a business-related cognate from the list below in addition to the CIM major requirement of completing a Business Administration minor. Twelve (12) hours must be successfully completed in a single chosen cognate area prior to graduation. Core classes in the major include CIM 1010, CIM 1050, CIM 3000, CIM 3050, CIM 3060, CIM 3100, CIM 3300, CIM 4030, CIM 4150, CIM 4200, CIM 4910.

Grading Policy
Students majoring in the Concrete Industry Management (CIM) program must receive grades of C (2.00) or better in all CIM courses in order for the courses to count toward graduation. A minimum grade of C (2.00) is required in all CIM classes that are prerequisites to other CIM classes.

Curriculum: Concrete Industry Management, Production, Sales, and Service

Curricular listings include General Education requirements in Communication, History, Humanities, and/or Fine Arts, Mathematics, Natural Sciences and Social/Behavioral Sciences categories.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1630 - College Mathematics for Managerial, Social, and Life Sciences 3 credit hours (Math) OR
- MATH 1720 - Plane Trigonometry 3 credit hours (Math)
- GEOL 1030 - Introduction to Earth Science 3 credit hours (Nat Sci) AND
- GEOL 1031 - Introduction to Earth Science Lab 1 credit hour (Nat Sci) OR
- GEOL 1040 - Physical Geology 4 credit hours (Nat Sci) AND
- GEOL 1041 - Physical Geology Lab 0 credit hours (Nat Sci)
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
• CIM 1010 - Introduction to the Concrete Industry 1 credit hour
• CIM 1050 - Blueprint Reading 1 credit hour
• CHEM 1010 - Introductory General Chemistry I 4 credit hours (Nat Sci) AND
• CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours (Nat Sci) OR
• CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
• CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
• CSCI 1150 - Computer Orientation 3 credit hours
• PSY 1410 - General Psychology 3 credit hours recommended (Soc/Beh Sci)

Subtotal: 28 Hours

Sophomore

• ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
• ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
• HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
• ENGR 3920 - Engineering Safety 3 credit hours (formerly ET 4420)
• Humanities and/or Fine Arts 6 credit hours
• CIM 3000 - Fundamentals of Concrete: Properties and Testing 4 credit hours
• CIM 3050 - Concrete Construction Methods 3 credit hours
• ECON 2410 - Principles of Economics, Macroeconomics 3 credit hours recommended (Soc/Beh Sci)
• PSY 3020 - Basic Statistics for Behavioral Science 3 credit hours OR
• BIA 2610 - Statistical Methods 3 credit hours OR
• MATH 1530 - Applied Statistics 3 credit hours
Choose 6 hours from
• HIST 2010 - Survey of United States History I 3 credit hours OR
• HIST 2020 - Survey of United States History II 3 credit hours OR
• HIST 2030 - Tennessee History 3 credit hours

Subtotal: 31 Hours

NOTE:
CIM 3300, Concrete Industry Internship, will be taken sometime after the sophomore year for two credits.

Junior

• ACTG 3000 - Survey of Accounting for General Business 3 credit hours
• MGMT 3610 - Principles of Management 3 credit hours
• MKT 3820 - Principles of Marketing 3 credit hours
• CIM 3060 - Understanding the Concrete Construction System 3 credit hours
• CIM 3100 - Applications of Concrete Construction 3 credit hours
• CIM 4030 - Issues in the Concrete and Construction Industry: A Legal and Ethical Perspective 1 credit hour
• CIM 4050 - Management of Concrete Products: Ordering and Delivering 3 credit hours
• BLAW 3400 - Legal Environment of Business 3 credit hours
• FIN 3000 - Principles of Financial Management 3 credit hours OR
• FIN 3010 - Business Finance 3 credit hours
ENGL 3605 - Applied Writing 3 credit hours OR
ENGL 3620 - Professional Writing 3 credit hours OR
COMM 3230 - Professional Public Speaking 3 credit hours OR
HSC 3020 - Presentation Techniques 3 credit hours OR
JOUR 2710 - Media Writing 3 credit hours OR
CIM 3090 - Computer Applications in Concrete and Construction Industries 3 credit hours OR
CIM 4400 - Decorative Concrete 3 credit hours OR
CIM 4500 - Masonry 3 credit hours OR
CIM 4600 - Design, Production, and Manufacture of Precast Concrete 3 credit hours

Subtotal: 31 Hours

Senior
- Cognate 12 credit hours
- CIM 4060 - Management of Concrete Products: Production Facilities 3 credit hours
- CIM 4150 - Concrete Problems: Diagnosis, Prevention, and Dispute Resolution 3 credit hours
- CIM 4300 - Concrete Mixture Design 2 credit hours
- CIM 4910 - Capstone 3 credit hours
- ET 3910 - Introduction to Operations Management 3 credit hours OR
- MGMT 3620 - Supply Chain Operations 3 credit hours

Subtotal: 28 Hours

Total hours in program: 120

NOTE:
Students should consult their advisors each semester to plan their schedules. The advisor listing can be found at www.mtsucim.com/.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Concrete Industry Management, Production, Sales, and Service, B.S., Academic Map

Concrete Industry Management Cognate Courses
Production, Sales, and Service students must choose any four courses from below. Concrete Contracting students must choose one course.

Agribusiness and Agriscience
- ABAS 3140 - Real Property Law for Commerce and Agriculture 3 credit hours
- ABAS 3340 - Soil 3 credit hours
- ABAS 3360 - Irrigation and Drainage 3 credit hours
- ABAS 3370 - Soil Analysis 3 credit hours
Advertising

- ADV 3020 - Principles of Advertising 3 credit hours

Business Communications

- BCED 1400 - Introduction to Business 3 credit hours
- BCED 2010 - Career Decision Making 1 credit hour
- BCED 2020 - Job Search Communication 1 credit hour
- BCED 2030 - Workplace Etiquette and Protocol 1 credit hour
- ENTR 2900 - Entrepreneurship 3 credit hours

Communication

- COMM 2300 - Interpersonal Communication 3 credit hours
- COMM 3210 - Argumentation and Debate 3 credit hours
- COMM 3340 - Interview Communication 3 credit hours
- COMM 3350 - Diversity in Communication 3 credit hours
- COMM 4320 - Theories of Persuasive Communication 3 credit hours

Concrete Industry Management

- CIM 3090 - Computer Applications in Concrete and Construction Industries 3 credit hours
- CIM 4400 - Decorative Concrete 3 credit hours
- CIM 4500 - Masonry 3 credit hours
- CIM 4600 - Design, Production, and Manufacture of Precast Concrete 3 credit hours
  For Production, Sales, and Service:
  - CIM 3070 - Site Planning, Layout, and Preparation 3 credit hours
  - CIM 3080 - Formwork Design and Computerized Drafting 3 credit hours
  - CIM 4010 - Design and Construction Issues 3 credit hours
  - CIM 4070 - Concrete Contracting Personnel Management 3 credit hours
  - CIM 4100 - Field Management and Supervision 3 credit hours
  For Concrete Contracting:
  - CIM 4050 - Management of Concrete Products: Ordering and Delivering 3 credit hours
  - CIM 4060 - Management of Concrete Products: Production Facilities 3 credit hours

Economics

- ECON 3210 - The Financial System and the Economy 3 credit hours
- ECON 4400 - Economics of Antitrust and Regulation 3 credit hours
- ECON 4420 - Labor and Human Resource Economics 3 credit hours

Environmental Sustainability and Technology

- EST 2810 - Introduction to Environmental Science 3 credit hours
- EST 4810 - Energy and the Environment 3 credit hours
- EST 4820 - Solar Building Design 3 credit hours
- EST 4840 - Energy Auditing 3 credit hours
Engineering/Engineering Technology

- ENGR 3970 - Engineering Economy 3 credit hours
- ET 2310 - Computer-Assisted Drafting and Design I 3 credit hours
- ET 3360 - Computer-Assisted Drafting and Design II 3 credit hours
- ET 4330 - Advanced Computer-Aided Drafting 2 credit hours

Finance

- FIN 4110 - Managerial Finance 3 credit hours

Foreign Language (choose one language)

- Elementary I and II or equivalent
- Intermediate I and II or equivalent

Geology

- GEOL 3000 - Mineralogy 5 credit hours
- GEOL 4000 - Petrology and Petrography 5 credit hours
- GEOL 4120 - Environmental Geology 4 credit hours

Global Studies and Cultural Geography

- GS 2010 - Introduction to Cross-Cultural Experiences 3 credit hours
- GEOG 4370 - Urban Geographies: Key Trends, Problems, and Solutions 3 credit hours

Information Systems

- INFS 2400 - Web Development 3 credit hours
- INFS 3100 - Principles of Management Information Systems 3 credit hours
- INFS 3200 - Business Application Development 3 credit hours

Leadership Studies

- LEAD 2000 - Introduction to Leadership Studies 3 credit hours
- LEAD 3010 - Leadership Theories and Practices 3 credit hours

Management

- ENTR 3650 - New Venture Creation 3 credit hours
- ENTR 4920 - Small Business Management 3 credit hours
- MGMT 3630 - Organization Theory 3 credit hours
- MGMT 3710 - Management of Quality 3 credit hours
- MGMT 3730 - Management of Innovation 3 credit hours
- MGMT 3750 - Advanced Supply Chain Strategies 3 credit hours
- MGMT 3810 - Human Resources Management 3 credit hours
- MGMT 3890 - Managerial Decision Making 3 credit hours
- MGMT 4490 - Industrial Relations Legislation 3 credit hours
• MGMT 4500 - Employment Discrimination Law 3 credit hours
• MGMT 4510 - Unions and Collective Bargaining 3 credit hours
• MGMT 4640 - Human Resources Planning and Staffing 3 credit hours
• MGMT 4680 - Organization Behavior 3 credit hours
• MGMT 4700 - Problems in Supply Chain Operations 3 credit hours
• MGMT 4710 - International Business 3 credit hours
• MGMT 4730 - Global Comparative Management 3 credit hours

Marketing
• MKT 3840 - Professional Selling 3 credit hours
• MKT 3850 - Promotion 3 credit hours
• MKT 3860 - Purchasing 3 credit hours
• MKT 3870 - Principles of Transportation 3 credit hours
• MKT 3900 - Social Media Marketing and E-Commerce 3 credit hours
• MKT 3910 - Consumer Behavior 3 credit hours
• MKT 3930 - Marketing Research 3 credit hours
• MKT 3950 - Business-to-Business Marketing 3 credit hours
• MKT 3960 - Marketing Channels Management 3 credit hours
• MKT 4800 - Sales Management 3 credit hours
• MKT 4850 - Advanced Selling 3 credit hours
• MKT 4870 - Services Marketing 3 credit hours
• MKT 4880 - Applied Marketing Research 3 credit hours

MBA Preparatory
• ACTG 3020 - Managerial Accounting 3 credit hours
• BIA 3620 - Introduction to Business Analytics 3 credit hours
• ECON 2420 - Principles of Economics, Microeconomics 3 credit hours
• INFS 3100 - Principles of Management Information Systems 3 credit hours

Organizational Communication
• ORCO 3240 - Introduction to Organizational Communication 3 credit hours
• ORCO 3250 - Organizational Communication in Communities 3 credit hours
• ORCO 3500 - Strategic Communication in Organizations 3 credit hours
• ORCO 3650 - Conflict and Organizations 3 credit hours

Philosophy
• PHIL 2110 - Elementary Logic and Critical Thinking 3 credit hours

Physical Geography
• PGEO 4490 - Remote Sensing 4 credit hours
• PGEO 4530 - Geographic Information Systems 3 credit hours
Public Relations

- PR 2040 - Public Relations Principles 3 credit hours

Transportation

- TRNS 1610 - Introduction to Transportation 3 credit hours
- TRNS 2620 - Transportation Freight Systems 3 credit hours
- TRNS 3630 - Transportation Systems 3 credit hours

University Seminar

- UNIV 4010 - MTSU Institute of Leadership Excellence 3 credit hours
Road Construction Technology Certificate

Department of Concrete Industry Management
615-904-8060
Heather Brown, program coordinator
Heather.Brown@mtsu.edu
www.mtsucim.com/

The Road Construction Technology certificate offers students an opportunity to advance their knowledge in this specialized area of construction. This one-year program requires 15 hours.

Road Construction Technology Certificate (15 hours)

- CIM 1500 - Basic Road Construction Safety 2 credit hours
- CIM 2500 - Road Construction Problem Solving and Decision Making 3 credit hours
- CIM 2510 - Fundamentals of Road Construction 3 credit hours
- CIM 2520 - Advanced Road Construction 3 credit hours
- CIM 3310 - Road Construction Internship I 2 credit hours
- CIM 3320 - Road Construction Internship II 2 credit hours
Concrete Industry Management

CIM 1010 - Introduction to the Concrete Industry
1 credit hour
Overview of the history, career opportunities, job functions, and professional organizations in the concrete industry. Introduction to the concrete industry management curriculum, instructional exceptions, and methodologies.

CIM 1050 - Blueprint Reading
1 credit hour
Provides a broad-based background in interpreting blueprints. Typical plans for both residential and commercial building reviewed.

CIM 1500 - Basic Road Construction Safety
2 credit hours
Prerequisite: Permission of department. The study of best-known safe work practices in the road construction industry. Upon successful completion of the course, student will have a working knowledge of how to be safe as well as maintain a safe work environment. Offers preparation for the MSHA and OSHA certification exams.

CIM 2050 - Advanced Blueprint Reading
2 credit hours
Prerequisite: CIM 1050. Further develops the skills presented in CIM 1050.

CIM 2500 - Road Construction Problem Solving and Decision Making
3 credit hours
Prerequisite: Permission of department. Study of various problem solving and decision making methodologies as well as best-known customer service practices. Upon successful completion of this course, student will have a working knowledge of how to quickly analyze the situation and resolve it by using superior communication and negotiation skills.

CIM 2510 - Fundamentals of Road Construction
3 credit hours
Prerequisite: Permission of department. Develops fundamental skills in the areas of construction science, building and construction design, material resources, technical writing, applied math, and basic computer skills.

CIM 2520 - Advanced Road Construction
3 credit hours
Prerequisite: Permission of department. Further develops skills acquired from CIM 2510 in the areas of construction science, building and construction design, material resources, technical writing, applied math, and computer skills.

CIM 3000 - Fundamentals of Concrete: Properties and Testing
4 credit hours
Prerequisites: CHEM 1010/CHEM 1011 or CHEM 1110/CHEM 1111; CIM 1010 or CMT 1100. Concrete testing, admixtures, placing, and finishing. Effects of concrete-making materials on properties of fresh and hardened concrete materials. Three hours lecture and three hours laboratory.

CIM 3050 - Concrete Construction Methods
3 credit hours
Prerequisite: CIM 3000 or CMT 1100. Forming and shoring, placing and reinforcing; transporting, placing, consolidating, finishing, jointing, and curing concrete for cast-in-place foundations, pavements, slabs on ground, structural frames, and other structural members; erecting precast concrete members; waterproofing concrete foundations.

CIM 3060 - Understanding the Concrete Construction System
3 credit hours
Prerequisite: CIM 3000. Detailed look at how the concrete construction industry works. Includes review of model building codes, building officials and their function, concrete industry codes and standards, concrete construction processes, quality assurance systems, contract documents, and concrete construction markets.

CIM 3070 - Site Planning, Layout, and Preparation
3 credit hours
Prerequisites: CIM 1010 and General Education Math requirement. Activities required to successfully prepare a site for concrete work. Includes initial site investigation, surveying, groundwork, subbase preparation, and elevations. Exposes students to modern technological tools and methods such the use of GPS, EDM, and lasers. Two hours lecture and three hours laboratory.

CIM 3080 - Formwork Design and Computerized Drafting
3 credit hours
Prerequisite: CIM 3050. Overview of costs and safety with regard to formwork selection, design, and construction. Reviews the various forming systems.
available and how they may be integrated for use in specific project circumstances. Includes a basic review of CAD drafting techniques and their applications.

CIM 3090 - Computer Applications in Concrete and Construction Industries
3 credit hours
Studies most commonly used computer software applications being used by the concrete and construction industries. Upon completion students will have working knowledge of the software in the advanced CIM classes as well as the industry.

CIM 3100 - Applications of Concrete Construction
3 credit hours
Prerequisite: CIM 3050. Details many uses of concrete in the construction of buildings, pavements, and other facilities. Emphasis on the advantages, disadvantages, and unique problems faced by materials suppliers, contractors, and design professionals when concrete is chosen for specific applications.

CIM 3200 - Concrete Project Estimating
3 credit hours
Prerequisite: CIM 2050 and General Education Math Requirement. Project drawings to prepare both basic and detailed estimates. Activities include practice implementing the printreading, estimating, and other skills acquired using actual sets of finished drawings. Projects will become more complicated as the semester progresses and will include below-grade, flatwork, and above-grade examples.

CIM 3300 - Concrete Industry Internship
2 credit hours
Prerequisite: CIM 3000. Opportunity for students to gain supervised, practical work experience in their particular field of interest within the concrete industry. The student will be evaluated by his/her supervisor, and a final report will be submitted by the student detailing the internship experience.

CIM 3310 - Road Construction Internship I
2 credit hours
Prerequisite: Permission of department. This 400-hour, hands-on training will consist of working with earth moving equipment, pavers, compaction equipment, milling and cutting equipment, crushing equipment, recycling/stabilizing equipment, below grade construction. Trained MTSU faculty and industry professionals will lead this effort and put the interns through highly structured training program.

CIM 3320 - Road Construction Internship II
2 credit hours
Prerequisite: Permission of department. This 400-hour, hands-on training will further enhance the training received in CIM 3310. It will consist of working with earth moving equipment, pavers, compaction equipment, milling and cutting equipment, crushing equipment, recycling/stabilizing equipment, below grade construction. Trained industry professionals will lead this effort and put the interns through highly structured training program. This training will take place at the participant's dealer location.

CIM 3600 - Advanced Concrete Project Management
3 credit hours
Prerequisite: CIM 3060. A continuation of the construction management concepts taught in CIM 3060. Emphasis on application of advanced project management concepts. A group activity involving management of a complex concrete construction project.

CIM 4010 - Design and Construction Issues
3 credit hours
Prerequisite: CIM 3200. A review of concrete construction materials and their physical and mechanical properties. Special emphasis placed on the concepts of mechanics of materials and resolving design/construction mismatches.

CIM 4030 - Issues in the Concrete and Construction Industry: A Legal and Ethical Perspective
1 credit hour
Prerequisite: CIM 3100. Involves a case study approach to critically analyzing historical and current events in the concrete and construction industry. Particular emphasis on developing a managerial decision-making process incorporating ethical, legal, financial, and other business perspectives.

CIM 4050 - Management of Concrete Products: Ordering and Delivering
3 credit hours
Prerequisite: CIM 3100. Provides student with basic understanding on managing order and delivery processes common to all concrete products. Emphasis on planning, organizing, and controlling at
both the first-line supervisory and managerial levels. Key differences in the order and delivery functions of ready mix concrete, concrete masonry, pre-cast concrete, pre-stress concrete, and concrete pipe supplemented by product-specific guest lectures and plant tours.

**CIM 4060 - Management of Concrete Products: Production Facilities**
3 credit hours
Prerequisite: CIM 3100. Provides student with basic understanding of managing the manufacturing process common to all concrete products production facilities. Emphasis on planning, organizing, and controlling at both the first-line supervisory and managerial levels. Review of key differences in manufacturing process of ready mix concrete, concrete masonry, precast concrete, pre-stress concrete, and concrete pipe explained through product-specific guest lectures and plant tours.

**CIM 4070 - Concrete Contracting Personnel Management**
3 credit hours
Prerequisites: CIM declared major and senior standing. Application of personnel management techniques in the contracting business. Emphasis on adapting management styles to various employee personality traits, training techniques, personal management, effective and efficient management of equipment and other resources, and leadership development.

**CIM 4100 - Field Management and Supervision**
3 credit hours
Prerequisite: Senior standing. Offers knowledge and skills to effectively manage concrete construction jobsite activities. Emphasis on safety, equipment identification and use, maintenance, contingency plans, and worksite productivity.

**CIM 4150 - Concrete Problems: Diagnosis, Prevention, and Dispute Resolution**
3 credit hours
Prerequisite: CIM 3100. Diagnosing and preventing problems related to concrete production, testing, construction, and performance. Identifying causes of fresh and hardened concrete problems such as fast and slow setting, air content variations, low strength, cracking, and scaling. Pre-job conferences and dispute resolution methods.

**CIM 4200 - Senior Concrete Lab**
2 credit hours
Prerequisites: CIM 3000 and senior standing. Opportunity for students to gain in-depth knowledge of the technical aspects of concrete and cement chemistry in a laboratory environment. The student will be evaluated by his/her ability to investigate a concrete situation and resolve the issue with a laboratory project. Graded activities include in-class exercises, written reports, and oral presentations. One hour lecture and three hours laboratory.

**CIM 4300 - Concrete Mixture Design**
2 credit hours
Prerequisite: CIM 3100. A detailed study on the standard practices of designing and proportioning various types of concrete mixtures. Addresses the basic principles that govern the use of different types of cements, aggregates, supplementary cementitious materials, and chemical admixtures in concrete mixture design.

**CIM 4400 - Decorative Concrete**
3 credit hours
Prerequisite: CIM 3000. Understanding and utilizing decorative concrete design applications, production, stamping, staining, and sealing. Manufacturing of concrete countertops, as well as vertical, flooring, and ornamental applications.

**CIM 4500 - Masonry**
3 credit hours
Prerequisite: CIM 3000. Use, types, and manufacture of concrete masonry units. Discusses common techniques and technical considerations relating to construction using concrete masonry. Reviews typical laboratory testing procedures used for very specific compliance of concrete masonry units for use in construction.

**CIM 4600 - Design, Production, and Manufacture of Precast Concrete**
3 credit hours
Prerequisite: CIM 3050. Covers all relevant topics within the precast concrete industry including design, manufacture, handling, transportation, safety, quality, and erection of precast concrete productions. Helps minimize learning curve as a new professional in the precast industry.
CIM 4800 - Special Problems in Concrete Industry Management
1 to 3 credit hours
Prerequisites: Permission of department and declared CIM major. Opportunity to pursue projects of individual interest in concrete industry management. Projects may be technical and/or managerial in nature and may require any combination of literature reviews, lab work, field studies, and other research methods. A faculty member will approve a formally submitted proposal for the study, supervise progress, and grade a report and a presentation which are required upon completion of the project. May be repeated for up to 6 hours of undergraduate credit.

CIM 4910 - Capstone
3 credit hours
Prerequisites: CIM 3300 and senior standing; to be taken last semester. Intensive study of a problem(s) appropriate to the major and the student's career interest. Solution(s) for problem(s) presented to a committee of concrete industry representatives. Presentation must emphasize depth of analysis, completeness and effectiveness of solution, and presentation skills.
Engineering Technology

Walter W. Boles, Chair

Allen, Bedekar, Boraiko, Carter, Chen, Foroudastan, Gore, Gormley, Hatfield, Hu, Mathis, Nasab, Perry, Salman, Sbenaty, Sridhara, Vanhook

The purpose of Engineering Technology is to prepare students for a broad range of technical and industrial management positions. This is accomplished through nationally accredited programs, a project-based learning environment, and extensive collaboration with industry. The department faculty members have appropriate academic credentials in addition to significant industrial experience. Numerous opportunities are available for students to participate in nationally competitive projects related to topics as diverse as space robotics, solar-powered vehicles, and the development of a project manual and master plan for a residential subdivision. Several programs require heavy interaction with the industrial sector, which allows students to work on projects with potential employers. Experiential learning opportunities exist through cooperative and internship classes. Highly motivated students may wish to obtain important industry-recognized certifications that exceed accreditation requirements. Students may study an array of the latest breakthroughs in topic areas such as mechatronics engineering, engineering technology, construction, engineering systems, rapid prototyping of electrical and mechanical systems, safety, and environmental sustainability. The combination of these programs and activities offers preparation for graduates entering the fast-paced technology sector.

The Robert E. and Georgianna West Russell Chair of Manufacturing Excellence is designed to promote quality interaction with local industry. Students are encouraged to benefit from the scheduled activities, seminars, and short courses sponsored by the Chair of Manufacturing Excellence.

The department offers Bachelor of Science degrees in Construction Management, Engineering Technology, Environmental Sustainability and Technology, and Mechatronics Engineering.

The Engineering Technology major includes three concentrations: Computer Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology.

The Environmental Sustainability and Technology major includes strong science components and environmental applications.

Mechatronics Engineering blends the disciplines of mechanical, electrical, and computer engineering using a systems integration and design approach. Demand for graduates is extremely high.

Pre-professional programs are offered in Pre-Architecture and Pre-Engineering. In each case the student will complete his/her program after transferring to the appropriate school. See Pre-Architecture and Pre-Engineering for additional information.

Minors are offered in Engineering Technology, Construction Management, Electronics, Engineering Systems, and Environmental Science and Technology.

Courses are offered which apply toward Six Sigma certification, Lean Manufacturing certification, and Project Management Professional certification.

Cooperative Education work experiences are possible for most programs. Interested students should check with their advisors.

Graduate Study

The Engineering Technology Department offers the Master of Science with thesis and non-thesis options. Requirements and a list of graduate courses offered may be found in the Graduate Catalog.
Construction Management Minor

Department of Engineering Technology
The minor in Construction Management consists of 18 semester hours.

Required Courses (6 hours)

- CMT 3150 - Residential Building Construction and Materials I 3 credit hours
- CMT 3160 - Cost Estimating I 3 credit hours

Electives (12 hours)

- 12 hours of Engineering Technology and Construction Management courses as approved by the minor advisor
Construction Management, Commercial Construction Management Concentration, B.S.

Department of Engineering Technology
615-898-2776
Al Carter, program coordinator
Al.Carter@mtsu.edu

The Construction Management major is a broad-based program designed to prepare students for positions in the construction industry. Corporate and private construction companies seek graduates to fill job positions in the field and in management. Students may select from three concentrations: Land Development/Residential Building Construction Management, Electrical Construction Management, and Commercial Construction Management. The merging of a strong technical background with the ability to lead personnel and manage systems produces a graduate who is invaluable to the construction industry.

The Commercial Construction Management concentration is designed to prepare students to assume positions of responsibility within the commercial construction industry worldwide. Students who graduate are able to secure positions as project estimators, codes inspectors, assistant project engineers, assistant superintendents or superintendents, assistant or project managers, and/or ultimately owners of construction-related companies. Students will get many hands-on opportunities for learning with the project-based program and will also be able to obtain practical experience in the industry through the internship/cooperative education requirements with companies that construct a variety of commercial structures.

Curriculum: Construction Management, Commercial Construction Management

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- Humanities and/or Fine Arts 6 credit hours
- Social/Behavioral Sciences (ECON 2410 recommended) 6 credit hours
- MATH 1730 - Pre-Calculus 4 credit hours (Math)
- MATH 1910 - Calculus I 4 credit hours
- CMT 1100 - Introduction to Construction Systems 3 credit hours
- ET 2310 - Computer-Assisted Drafting and Design I 3 credit hours

Subtotal: 32 Hours

Sophomore

- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours (Nat Sci) AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours (Nat Sci) OR
- PHYS 1110 - Discovering Physics 4 credit hours (Nat Sci)
• CHEM 1010 - Introductory General Chemistry I 4 credit hours (Nat Sci) AND
• CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours (Nat Sci)
  OR
• CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
• CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
• ENGR 2110 - Statics 3 credit hours
• ENGR 3920 - Engineering Safety 3 credit hours
• CMT 3000 - Commercial Construction and Materials 3 credit hours
• ET 2920 - Industrial Orientation Internship 1 to 3 credit hours (1 credit hour)
• CMT 3190 - Construction Land Development Operations 3 credit hours OR
• CMT 3195 - Sustainable Construction 3 credit hours OR
• CIM 3050 - Concrete Construction Methods 3 credit hours
  Choose 6 hours from:
  • HIST 2010 - Survey of United States History I 3 credit hours OR
  • HIST 2020 - Survey of United States History II 3 credit hours OR
  • HIST 2030 - Tennessee History 3 credit hours

Subtotal: 30 Hours

Junior

• CMT 3160 - Cost Estimating I 3 credit hours
• CMT 3320 - Architectural Computer-Aided Drafting and Design 3 credit hours
• CMT 3500 - Land Surveying 3 credit hours
• CMT 4100 - Mechanical and Electrical Systems 3 credit hours
• CMT 4120 - Scheduling 3 credit hours
• ET 3860 - Strength of Materials 3 credit hours
• ENGR 3970 - Engineering Economy 3 credit hours
• MKT 3820 - Principles of Marketing 3 credit hours
• BLAW 3400 - Legal Environment of Business 3 credit hours
• ET 2920 - Industrial Orientation Internship 1 to 3 credit hours (1 credit hour)
• COMM 2200 - Fundamentals of Communication 3 credit hours

Subtotal: 31 Hours

Senior

• ACTG 3000 - Survey of Accounting for General Business 3 credit hours
• CMT 4000 - Soils, Foundations and Earth Moving Equipment 3 credit hours
• CMT 4010 - Construction Law 3 credit hours
• CMT 4140 - Construction Management Principles 3 credit hours
• CMT 4200 - Commercial Cost Estimating and Bidding 3 credit hours
• CMT 4280 - Commercial Construction Capstone 3 credit hours
• ENGR 3915 - Technical Project Management and Soft Skills 3 credit hours
• FIN 3000 - Principles of Financial Management 3 credit hours
• Elective 3 credit hours

Subtotal: 27 credit hours
Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Construction Management, Commercial Construction Management, B.S., Academic Map
Construction Management, Electrical Construction Management
Concentration, B.S.

Department of Engineering Technology
615-898-2776
David Hatfield, program coordinator
David.Hatfield@mtsu.edu

The Construction Management major is a broad-based program designed to prepare students for positions in the construction industry. Corporate and private construction companies seek graduates to fill job positions in the field and in management. Students may select from three concentrations: Land Development/Residential Building Construction Management, Electrical Construction Management, and Commercial Construction Management. The merging of a strong technical background with the ability to lead personnel and manage systems produces a graduate who is invaluable to the construction industry.

The Electrical Construction Management concentration is a result of the collective efforts of the National Joint Apprenticeship Training Committee (NJATC), the National Electrical Contractors Association, the International Brotherhood of Electrical Workers, Pellissippi State Community College, and Middle Tennessee State University to establish this program nationwide. Typically, students transfer to MTSU to complete 33 hours of distance learning and receive advanced credit to finish their degrees. It is possible for a student who is or is not seeking a journeyman's license to start taking courses at MTSU or online their freshman year. If a student wants to become an electrical journeyman, an interview with MTSU's construction advisor for Electrical Construction Management program and NJATC educational director can be arranged. Availability of space will be deciding factors as to when a student can start training. A four-year degree in this concentration will provide a strong background in technical and management skills to help graduates obtain middle management positions in the electrical construction management field.

Curriculum: Construction Management, Electrical Construction Management

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1710 - College Algebra 3 credit hours (Math)

The Construction Management major is a broad-based program designed to prepare students for positions in the construction industry. Corporate and private construction companies seek graduates to fill job positions in the field and in management. Students may select from three concentrations: Land Development/Residential Building Construction Management, Electrical Construction Management, and Commercial Construction Management. The merging of a strong technical background with the ability to lead personnel and manage systems produces a graduate who is invaluable to the construction industry.

The Land Development/Residential Building Construction Management concentration offers preparation for a variety of construction-related positions. The concentration is accredited by the Association of Technology, Management, and Applied Engineering (ATMAE). As students progress, they are expected to develop creativity and the communication skills necessary to meet the challenges of industry. Students engage in a variety of activities to build a strong background in the field, including lectures by industry members, field trips, and hands-on activities in the classroom and in the field. The program is designed to prepare graduates for supervisory or staff positions in a variety of construction-related businesses (land development, construction firms, wholesalers of construction materials, construction material manufacturing, lumberyards, etc.) Employment opportunities for graduates include general supervision, project management, human relations, sales and marketing, production and inventory control, quality control, estimating, scheduling, and land development.

Curriculum: Construction Management, Land Development/Residential Building Construction Management

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.

Electronics Minor

Department of Engineering Technology
The minor in Electronics consists of at least 16 semester hours. Only non-majors may minor in Electronics.

Required Courses (10 hours)

- ET 3610 - Introduction to Electricity and Electronics 4 credit hours
- ET 3620 - Digital Circuits Fundamentals 3 credit hours
- ET 3630 - Electronics 3 credit hours

Electives (6 hours)

Choose two courses from the following:

- ET 3640 - Digital Circuits Design 3 credit hours
- ET 3650 - Introduction to Microprocessors 3 credit hours
- ET 3660 - Communication Electronics 3 credit hours
- ET 3670 - Computer-Assisted Printed Circuit Board Design 2 credit hours
- ET 4600 - Programmable Logic Controllers 2 credit hours
- ET 4610 - Instrumentation and Controls 3 credit hours
- ET 4640 - Industrial Electricity 3 credit hours
- ET 4660 - Microprocessor Interfacing 3 credit hours
- ET 4670 - Microprocessor Design 3 credit hours
- ET 4790 - Advanced Problems in Technology 3 credit hours
Engineering Systems Minor

Department of Engineering Technology
The 15-hour minor in Engineering Systems is available to Engineering Technology majors as well as other MTSU majors and offers preparation for positions in both the industrial and service sectors. Industry sought-after certifications can be earned in Lean Manufacturing and/or Six Sigma (Greenbelt level) upon completion of an industry project during an industry internship. Core competitive attributes applicable to all enterprises are emphasized and include quality, cost, and delivery systems (QCD) through successful completion of the following 3-hour semester courses:

- ET 3910 - Introduction to Operations Management (online)
- ET 3920 - Industrial Internship I
- ET 3960 - Industrial Quality Technology (hybrid online)
- ET 4900 - Productivity Strategies (online)
- ENGR 3930 - Systems Engineering

Engineering Technology Minor

Department of Engineering Technology
The minor in Engineering Technology consists of 18 semester hours of courses as approved by the minor advisor. A minimum of 9 hours must be upper-division courses. The minor must include 8 semester hours in one of the following areas: drafting, electronics, engineering, industrial facilities and management, metals, or safety.
Engineering Technology, Computer Engineering Technology Concentration, B.S.

Department of Engineering Technology
615-898-2776
Saleh Sbenaty, program coordinator
Saleh.Sbenaty@mtsu.edu

Engineering Technology is a technologically advanced program at the Bachelor of Science level utilizing theoretical concepts and hands-on instruction. Program selection is from the following concentrations: Computer Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology.

The Computer Engineering Technology concentration requires 53 hours and is accredited by ABET, Inc. (http://www.abet.org) and provides the student with a sound technical base in electric and electronic circuits, digital systems, and computer hardware and software. Microcontroller, microprocessor, FPGA, and microcomputer applications in the area of control and automation as well as programming, data acquisition, transfer, and analysis are also emphasized.

Employment opportunities exist in various industrial fields that require the design and applications of digital computers such as manufacturing, medical, aerospace, control, instrumentation and measurements, and networking, installations, and maintenance of computers.

NOTE: A grade of C or better is required on transfer credits accepted as part of a major in Engineering Technology.

Engineering Technology Core

- ENGR 1100 - Engineering Fundamentals 3 credit hours
- ENGR 3915 - Technical Project Management and Soft Skills 3 credit hours
- ENGR 3920 - Engineering Safety 3 credit hours
- ENGR 3970 - Engineering Economy 3 credit hours
- ET 3601 - Electrical Circuit Analysis I 3 credit hours
- ET 3602 - Electrical Circuit Analysis II 3 credit hours
- ET 4710 - Professional Development Seminar 1 credit hour

Computer Engineering Technology Capstone

- ET 4801 - Computer Engineering Technology 1 to 3 credit hours (3 credit hours required)

Optional Computer Science Minor

The minor will include CSCI 1170, CSCI 2170, CSCI 3160, CSCI 3180 (14 hours) and at least 3 additional hours in upper-division computer science courses as approved by the minor and major advisors.

Curriculum: Engineering Technology, Computer Engineering Technology

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.

Chong Chen, program director
Chong.Chen@mtsu.edu

Engineering Technology is a technologically advanced program at the Bachelor of Science level utilizing theoretical concepts and hands-on instruction. Program selection is from the following concentrations: Computer Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology.

The Electromechanical Engineering Technology concentration requires 66 hours and is accredited by ABET, Inc. (http://www.abet.org) and is structured to prepare the student for positions in industry requiring the integration of electricity (for power and control) and mechanical devices (for force and motion) to perform tasks associated with manufacturing and the performance of services.

Employment opportunities exist in fields such as robotics, fluid power, industrial electricity, heating and air conditioning, and industrial automation. This concentration is in high demand from technology-based companies such as automotive and high-tech manufacturing operations.

**NOTE:** A grade of C or better is required on transfer credits accepted as part of a major in Engineering Technology.

- ET 4610 - Instrumentation and Controls 3 credit hours
- ET 4640 - Industrial Electricity 3 credit hours
- ET 4710 - Professional Development Seminar 1 credit hour
- ET 4802 - Electro-Mechanical Engineering Technology 1 to 3 credit hours (3 credit hours required)
- ET 4850 - Fluid Power 3 credit hours
- ET 4860 - Robotics 3 credit hours
- ENGR 3970 - Engineering Economy 3 credit hours

Subtotal: 30 Hours

Total hours in program: 124

Academic Map

Following is a printable, suggested four-year schedule of courses:
Engineering Technology, Electromechanical Engineering Technology, B.S., Academic Map
Engineering Technology, Mechanical Engineering Technology Concentration, B.S.

Department of Engineering Technology
615-898-2776
Sid Sridhara, program coordinator
Sid.Sridhara@mtsu.edu

Engineering Technology is a technologically advanced program at the Bachelor of Science level utilizing theoretical concepts and hands-on instruction. Program selection is from the following concentrations: Computer Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology. The Mechanical Engineering Technology concentration requires 67 hours is accredited by ABET, Inc. (http://www.abet.org) and enables students to obtain the skills necessary for placement in highly competitive jobs in machine design, manufacturing, engineering, field service engineering, technical sales, thermal analysis, product design, utilities operations, air conditioning design, plant operations, and a variety of other professions. Through design projects and laboratory training, students examine how to relate such skills to a variety of fields in mechanical engineering technology including product and machine design, power generation, utilities, and manufacturing. The educational quality of this program is especially high in that it provides students with the opportunity to mesh their in-class experiences with project-oriented assignments and real-world experience in national competitions such as the Great Moonbuggy Race, the Solar BikeRayce, SAE Formula One Collegiate Competition, Space Elevator, USLI Rocket Launch, and the Mini Baja Race.

The prospects for a graduate in mechanical engineering technology are as broad as the major concentration itself. Graduates can expect opportunities to work on a variety of projects from developing and producing engines and transportation equipment in the automobile, ship, rail, and aviation industries to working as a member on an engineering technologist design team to improve high-performance automobiles and air-conditioned environments. Students graduating from mechanical engineering technology programs often find themselves in highly responsible, challenging, and extremely rewarding positions.

NOTE: A grade of C or better is required on transfer credits accepted as part of a major in Engineering Technology.

Engineering Technology Core

- ENGR 1100 - Engineering Fundamentals 3 credit hours
- ET 3601 - Electrical Circuit Analysis I 3 credit hours
- ET 3602 - Electrical Circuit Analysis II 3 credit hours
- ENGR 3920 - Engineering Safety 3 credit hours
- ET 4710 - Professional Development Seminar 1 credit hour
- ENGR 3915 - Technical Project Management and Soft Skills 3 credit hours
- ENGR 3970 - Engineering Economy 3 credit hours

Mechanical Engineering Technology Capstone

- ET 4803 - Mechanical Engineering Technology 1 to 3 credit hours (3 credit hours required)

Curriculum: Engineering Technology, Mechanical Engineering Technology

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.
Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1730 - Pre-Calculus 4 credit hours (Math)
- MATH 1910 - Calculus I 4 credit hours
- ENGR 1100 - Engineering Fundamentals 3 credit hours
- ENGR 1210 - Introduction to Materials Science and Engineering 3 credit hours
- ET 2310 - Computer-Assisted Drafting and Design I 3 credit hours
- CSCI 1170 - Computer Science I 4 credit hours
- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)

Subtotal: 31 Hours

Sophomore

- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- Humanities and/or Fine Arts (2 prefixes) 6 credit hours
- MATH 1920 - Calculus II 4 credit hours
- ENGR 2110 - Statics 3 credit hours
- ET 3210 - Machine Tool Technology 3 credit hours
- ET 3360 - Computer-Assisted Drafting and Design II 3 credit hours
- ET 3601 - Electrical Circuit Analysis I 3 credit hours
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours (Nat Sci) AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours (Nat Sci)
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 32 Hours

Junior

- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- Social/Behavioral Sciences (2 prefixes) 6 credit hours
- ENGL 3620 - Professional Writing 3 credit hours
- ENGR 2120 - Dynamics 3 credit hours
- ET 3260 - Manufacturing Processes and Materials II 3 credit hours
- ET 3602 - Electrical Circuit Analysis II 3 credit hours
- ET 3810 - Engineering Thermodynamics 3 credit hours
- ET 3860 - Strength of Materials 3 credit hours
- ET 4330 - Advanced Computer-Aided Drafting 2 credit hours
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours
Subtotal: 32 Hours

Senior

- ET 4340 - Design of Machine Elements 3 credit hours
- ENGR 3920 - Engineering Safety 3 credit hours
- ET 4710 - Professional Development Seminar 1 credit hour
- ET 4850 - Fluid Power 3 credit hours
- ENGR 3970 - Engineering Economy 3 credit hours
- ET 4815 - Heating, Ventilation, and Air Conditioning 3 credit hours
- ET 4860 - Robotics 3 credit hours
- ET 4803 - Mechanical Engineering Technology 1 to 3 credit hours (3 credit hours)
- ET 4830 - Vibration 3 credit hours
- ENGR 3915 - Technical Project Management and Soft Skills 3 credit hours
- ET 2920 - Industrial Orientation Internship 1 to 3 credit hours

Subtotal: 29 Hours

Total hours in program: 124

Academic Map

Following is a printable, suggested four-year schedule of courses:

Engineering Technology, Mechanical Engineering Technology, B.S., Academic Map
Environmental Science and Technology Minor

Department of Engineering Technology
The minor in Environmental Science and Technology consists of 15 semester hours of courses chosen from the concentrations including EST 2810. At least 9 hours must be at the upper-division level.

Required Course (3 hours)

- EST 2810 - Introduction to Environmental Science 3 credit hours

Electives (12 hours)

- 12 hours of courses chosen from the various concentrations; at least 9 hours must be upper-division
Environmental Sustainability and Technology, B.S.

Department of Engineering Technology
615-898-2776
Kathy Mathis, program coordinator
Kathy.Mathis@mtsu.edu

The Environmental Sustainability and Technology major includes course work in energy technology in the engineering technology, geosciences, soils as well as the classical sciences departments. This major studies the classic energy sources and the renewable/alternative energy possibilities. Students will be able to apply their knowledge with utility, construction, municipalities, and other energy related industries for energy generation sources as well as conservation efforts.

The requirements for a major include a core, 41 hours in General Education, and a guided cognate of several hours in an identified specialty or concentration. Courses are offered by Agribusiness and Agriscience, Biology, Chemistry, Engineering Technology, and Geosciences.

Typical employment opportunities exist in the various levels of governmental agencies and as environmental consultants in manufacturing, construction, and agricultural industries in such areas as air and water quality control, environmental analysis, recycling, hazardous and solid waste management, and noise.

Students are encouraged to pursue opportunities offered through the Center for Energy Efficiency and the CLEAR Water Institute. The center promotes energy economics and environmental awareness and stewardship for students, faculty, administrators, and others in the community. Through interaction with local, state, and federal associations, the center offers certification seminars, educational and training opportunities, and leadership in achieving energy management and efficiency goals. The institute is an interdisciplinary group of scientists that address environmental issues related to water quality. Undergraduate research opportunities exist.

Students should consult their advisors each semester to plan their schedules.

**Freshman**

Academic Map

Following is a printable, suggested four-year schedule of courses:
Environmental Sustainability and Technology, B.S., Academic Map
Mechatronics Engineering, B.S.

Department of Engineering Technology
615-898-2776
Ahad Nasab, program coordinator
Ahad.Nasab@mtsu.edu

The Mechatronics Engineering degree encompasses knowledge and skills in mechanical engineering, electronics engineering, digital controls, computer programming, and project management to enable the students to analyze and design automation and robotics systems used in today's advanced manufacturing environment. This program offers preparation in diagnostics and design of integrated industrial automation systems as well as the various aspects of project and process management, systems engineering, and risk management. This program emphasizes the latest techniques in systems approach in design and problem solving which is highly supported by today's industry. The Mechatronics Engineering program is designed to prepare students for engineering positions as automation system designers and project managers in various industries such as automotive, aerospace, advanced manufacturing, green energy, biotechnology, healthcare, homeland security and defense, and transportation and logistics.

Curriculum: Mechatronics Engineering

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)

Total hours in program: 128
Academic Map

Following is a printable, suggested four-year schedule of courses:
Mechatronics Engineering, B.S., Academic Map
Pre-Architecture

Department of Engineering Technology
615-898-2776
Al Carter, program coordinator
Al.Carter@mtsu.edu

The Pre-Architecture program is recommended as the first year of a five-year program leading to the Bachelor of Architecture degree. After successful completion of the courses listed, students are eligible to apply for admission to the school of architecture of their choice. It should be understood that students who complete this year of work will not automatically be assured of admission to the remaining four years of work in a school of architecture. Those who wish to apply to a school of architecture should see their advisors no later than February 1 in order to have time to follow the proper procedure to be considered for admission for the fall term of the following year. The recommended program for the first year follows.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours
- ENGL 1020 - Research and Argumentative Writing 3 credit hours
- COMM 2200 - Fundamentals of Communication 3 credit hours
- MATH 1910 - Calculus I 4 credit hours
- ENGR 1100 - Engineering Fundamentals 3 credit hours
- Social Science Electives 6 credit hours
- Science 8 credit hours

Subtotal: 30 Hours

NOTE:

*To be selected based on the transfer school requirements and the approval of the advisor. The student should have the catalog of the transfer school at the time of registration, if possible.

Students should consult their advisors each semester to plan their schedules.
Pre-Engineering

Department of Engineering Technology
615-898-2776
Ahad Nasab, program coordinator
Ahad.Nasab@mtsu.edu

The Pre-Engineering program requires additional study at an engineering school such as Tennessee State University, Tennessee Technological University, the University of Memphis, the University of Tennessee, or Vanderbilt University in order to obtain an engineering degree. Depending upon the program chosen, the student will complete two or three* years of the curricula shown below at MTSU. Students should consult their advisors and an advisor at the school to which they want to transfer concerning specific information on acceptance/transfer of the courses listed below to the engineering school of their choice. Information on the pre-engineering program in agricultural engineering can be found under the School of Agribusiness and Agriscience.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours
- ENGL 1020 - Research and Argumentative Writing 3 credit hours
- CHEM 1110 - General Chemistry I 4 credit hours AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours
- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- ENGR 1100 - Engineering Fundamentals 3 credit hours
- ET 2310 - Computer-Assisted Drafting and Design I 3 credit hours
- CSCI 1170 - Computer Science I 4 credit hours

Subtotal: 32 Hours

Sophomore

- PHYS 2110 - Calculus-Based Physics I 0 credit hours AND
- PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours
- PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
- PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3120 - Differential Equations I 3 credit hours
- STAT 3150 - Mathematical Statistics I 3 credit hours
- ET 3360 - Computer-Assisted Drafting and Design II 3 credit hours
- ET 3860 - Strength of Materials 3 credit hours
- ENGR 2110 - Statics 3 credit hours
- ENGR 2120 - Dynamics 3 credit hours
- ENGR 3970 - Engineering Economy 3 credit hours
- COMM 2200 - Fundamentals of Communication 3 credit hours

Subtotal: 36 Hours
NOTE:

*Additional classes are available to juniors based on which school they are planning to attend. For example, MTSU offers a wide variety of engineering courses that may be available to third-year pre-engineering students. Students wanting to stay for a third year and take these courses may do so, but they must consult their advisors in advance. Students should consult their advisors each semester to plan their schedules.

Standard Four-Year Engineering Program

This program will require four years to complete. The student is required to take the freshman and sophomore years indicated above and then transfer to an engineering school. The engineering school would then require two years of additional study to complete requirements toward the degree.

The pre-engineering program at MTSU has been closely coordinated with several engineering schools. A student who elects to transfer should confer with his or her faculty advisor two semesters prior to transfer.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Pre-Engineering Academic Map
Construction Management Technology

CMT 1100 - Introduction to Construction Systems
3 credit hours
Introduces the major systems encountered when managing construction. Includes those operations of the residential and commercial construction industry, their similarities and how they differ in scope and daily practice. Basic entry-level plan reading skills, specifications, estimating and scheduling concepts incorporated as part of the business management functions pertaining to the construction industry. Seminar style to include student research, guest lecturers, and potential site visits. Required for graduation in Construction Management and should be taken prior to beginning CM upper-division coursework.

CMT 3000 - Commercial Construction and Materials
3 credit hours
Blueprint reading, commercial construction materials and equipment, commercial construction systems, new materials and procedures, and fundamentals essential to knowledge of the commercial construction field. Lecture, field observations, and site/or plant visits required.

CMT 3150 - Residential Building Construction and Materials I
3 credit hours
Introduces the residential construction industry. Includes basic fundamentals, terminology, materials, current methods, techniques, and associated problems. Recommended for those desiring general knowledge of residential construction or who plan to work in the construction industry. Two hours lecture and three hours laboratory.

CMT 3155 - Land Development and Residential Building
3 credit hours
Prerequisite: Junior status or permission of department. Online course for land development and infrastructure layout. House plans, methods, and techniques used in building conventional structure. Recommended for those desiring general knowledge as a consumer of residential construction. (Required for Electrical Construction Management concentration. Land Development/Residential Building Construction Management major or minor students cannot use this course to replace CMT 3150.)

CMT 3160 - Cost Estimating I
3 credit hours
Prerequisite: CMT 1100 or CMT 3150. Principles and practices involved in the preparation of a cost estimate for a residential home. Topics include introduction to cost estimating, materials, and labor costs for residential building.

CMT 3180 - Construction and Materials II
3 credit hours
Prerequisite: CMT 3150. A continuation of CMT 3150 with emphasis on new building materials and various types of construction. Light commercial construction included.

CMT 3190 - Construction Land Development Operations
3 credit hours
Topics include contractor procedures in land development, land development infrastructure, and management methods.

CMT 3195 - Sustainable Construction
3 credit hours
Prerequisite: CMT 3190 or permission of department. Introduces current green building technologies and LEED (Leadership in Energy and Environmental Design) and NAHB (National Association of Home Builders) Green Building Guidelines and other green build programs. Also covers the impact of the building industry on the environment and how that impact can be minimized by the use of green technology.

CMT 3210 - Residential Codes, Regulations, Specifications, and Plan Reading
3 credit hours
The residential and subdivision infrastructure construction language for plan reading, codes, regulations, and specifications. Lectures and hands-on activities. Industry will provide guest lecturers and show examples of some of their work in the field. Students will be required to visit architects, city and county codes department representatives, and contractors during the semester.

CMT 3320 - Architectural Computer-Aided Drafting and Design
3 credit hours
Prerequisite: Junior or senior standing, ET 2310, or
permission of department. Using computers to draw and design residential architectural plans. Specifically geared toward the construction area of concentration. Two hours lecture and three hours laboratory.

**CMT 3500 - Land Surveying**  
3 credit hours  
Prerequisite: MATH 1720 or MATH 1730 or MATH 1910. Basic surveying operations such as chaining, differential leveling, transverse methods and calculations, structural layout, topographic mapping, and slope staking for road and utilities in subdivisions. Basic surveying instruments used include the chain, automatic level, transit, and theodolite. Environmental issues relating to land and land development covered. Two hours lecture and three hours laboratory.

**CMT 4000 - Soils, Foundations and Earth Moving Equipment**  
3 credit hours  
Properties and testing of soils on a job site, different kinds of foundations used, and an overview of the different kinds and costs of earth moving equipment used in the commercial construction industry.

**CMT 4010 - Construction Law**  
3 credit hours  
Prerequisite: Junior standing. Practical approach to the legal system in construction. Topics include licensing requirements, business associations, hiring professionals, employment issues, insurance, worker’s comp, tort liability, contracts, financing, sale of property, title issues, liens, land use, bankruptcy, and warranties.

**CMT 4100 - Mechanical and Electrical Systems**  
3 credit hours  
Prerequisite: CMT 3320. Fundamentals and computer design of mechanical, electrical, and plumbing systems used in the residential and light commercial building construction industry. Two hours lecture and three hours laboratory.

**CMT 4110 - Cost Estimating II**  
3 credit hours  
Prerequisites: CMT 4100, CMT 4120, and CMT 4130. Use of computer to estimate total cost of land development and housing costs for capstone project.

**CMT 4120 - Scheduling**  
3 credit hours  
Prerequisite: CMT 3000 or CMT 3180. Flow of labor and material toward specified goal, weather, trade characteristics, and material availability in work scheduling shown by graphs.

**CMT 4130 - Construction Administration**  
3 credit hours  
Prerequisites: Senior standing, CMT 3160, CMT 3190, and CMT 3320. Management and administration of construction to include contracts, office, and field work.

**CMT 4140 - Construction Management Principles**  
3 credit hours  
Detailed look at how the construction industry works. Includes review of model building codes, building officials and their functions, construction industry codes and standards, quality assurance systems, contract documents, and principles of managing construction contracts.

**CMT 4170 - Capstone-LDRB Construction Management**  
3 credit hours  
Prerequisites: CMT 4100, CMT 4120, and CMT 4130. Final preparation of development plans, etc., for subdivision. Basic principles of presentations. Presentation of capstone project to Building Construction Technical Committee.

**CMT 4172 - Capstone for Electrical Construction Management**  
3 credit hours  
Prerequisite: Senior status; permission of department. Taken during the last semester of coursework at MTSU. Student will develop a project(s) that relates to the material covered in concentration courses. Proposed outline(s) required and must be approved by the Electrical Construction Management advisor before starting.

**CMT 4200 - Commercial Cost Estimating and Bidding**  
3 credit hours  
Commercial estimating including take-offs from blueprints, using preferred computer estimating programs, educational trips to Dodge Room in Nashville, actually seeing a job being estimated and bid.

**CMT 4280 - Commercial Construction Capstone**  
3 credit hours  
Construction portfolio presented to subcommittee of advisory committee. Pictures and/or projects developed in junior- and senior-level commercial
construction classes included; all facets of a commercial construction project from inception to completion. Pass/Fail.

**Engineering**

**ENGR 1100 - Engineering Fundamentals**
3 credit hours
Prerequisite: MATH 1630 or MATH 1730. Introduces various engineering fields. Emphasis on problem-solving techniques and the use of mathematics in analyzing technical problems. Topics such as graphical representation of data, estimation, dimensions, units, error estimates, statistics, and team work addressed. Engineering ethics and impact of engineering solutions on society and the environment.

**NOTE:** This was formerly ET 1840.

**ENGR 1210 - Introduction to Materials Science and Engineering**
3 credit hours
Prerequisites: CHEM 1110/CHEM 1111. Origin and behavior of materials. Classifications of materials. Physical metallurgy-mechanical and physical properties, crystalline structure, imperfections in solids, phase diagrams, failure mechanisms in materials, hardening and tempering, isothermal diagrams. Involves hands-on experiences through lab sessions in the use of metallurgical and mechanical testing equipment. Lecture and laboratory.

**ENGR 2100 - Introduction to Engineering Design**
3 credit hours
Introduction to computer-aided design (CAD) for product design, modeling, and prototyping. Individual use and team-based environment to design and prototype a functional and marketable product. Application to design, manufacturing, and analysis using geometric tolerancing and dimensioning. Two hours lecture and three hours laboratory.

**ENGR 2110 - Statics**
3 credit hours
Prerequisites: ENGR 1100 and MATH 1910. Corequisite: PHYS 2011 or PHYS 2111. Mechatronics Engineering majors must complete PHYS 2111. Fundamental concepts and conditions of static equilibrium; their application to systems of forces and couples acting on rigid bodies; and the calculation of centers of gravity, centroids, and moments of inertia.

**ENGR 2120 - Dynamics**
3 credit hours

**ENGR 2130 - Electrical Circuit Analysis I**
3 credit hours
Prerequisites: ENGR 1100 and MATH 1910. Fundamentals of electrical circuits. Volt-ampere characteristics for circuit elements; independent and dependent sources; Kirchhoff's laws and circuit equations. Source transformations; Thevenin's and Norton's theorems; superposition. Phasor analysis, impedance calculations, and computation of sinusoidal steady state responses. AC power, maximum power transfer, and three-phase circuits. Two hours of lecture and three hours of laboratory.

**ENGR 3510 - Electrical Circuit Analysis II**
3 credit hours
Prerequisites: ENGR 2130, PHYS 2120, and MATH 3120. Analysis of the RC and RL first-order circuits. Use of Laplace Transform techniques to analyze linear circuits with and without initial conditions. Characterization of circuits based upon impedance, admittance, and transfer function parameters. Fourier series, circuit analysis with Fourier transform, determination of frequency response of circuits, filter design. Lecture and Laboratory.

**ENGR 3520 - Digital Circuits Fundamentals**
3 credit hours
Prerequisite: ENGR 2130. Introduces logic design with emphasis on practical design techniques and circuit implementation. Topics include Boolean algebra; theory of logic functions; mapping techniques and function minimization; logic equivalent circuits and symbol transformations; transistor-transistor-logic (TTL)/metal oxide semi-conductor (MOS) logic into gate implementations; electrical characteristics; propagation delays; signed number notations and arithmetic. Digital design using random logic and programmable logic devices (FPGAs and CPLDs). Lecture and laboratory.

**ENGR 3530 - Electronics and Instrumentation**
3 credit hours
Prerequisite: ENGR 2130. Introduces use and
analysis of electronic circuits and input mechanism of various sensors, design of analog signal conditioning systems based on the system requirement, as well as understanding the theory and the art of modern instrumentation and measurements (I&M) systems. Topics include BJT and MOSFET circuit model and analysis; operational amplifier; instrumentation amplifier; survey of sensor input mechanisms; analog signal conditioning and sensor application; measurement system architecture; errors in measurement; standard used in measurement. Two hours lecture and three hours laboratory.

ENGR 3550 - Fluid Mechanics  
3 credit hours  
Prerequisites: ENGR 2120 and MATH 3110. Continuum, velocity field, fluid statics, manometers, basic conservation laws for systems and control volumes, dimensional analysis. Euler and Bernoulli equations, viscous flows, boundary layers, flow in channels and around submerged bodies, one-dimensional gas dynamics, turbo-machinery. Applications in hydraulic, pneumatic, and fluidics discussed. Two hours lecture and three hours laboratory.

ENGR 3560 - Mechanics of Materials  
3 credit hours  
Prerequisites: ENGR 1210, ENGR 2110, and MATH 3120. Plane stress, plane strain, and stress-strain laws. Application of stress and deformation analysis to members subjected to centric, torsional, flexural, and combined loading. Introduces theories of failure, buckling, and energy methods.

ENGR 3570 - Machine Design  
3 credit hours  
Prerequisites: ENGR 2100, ENGR 2120, and ENGR 3560. Analytical design methods. Stress analysis, working stress, combined stresses, failure theories, fatigue failure. Design techniques for shafts, fasteners, gears, bearings, and belt and chain drives. Includes a design project. Two hours lecture and three hours laboratory.

ENGR 3590 - Kinematics and Dynamics of Machinery  
3 credit hours  
Prerequisite: ENGR 2120. The kinematics and dynamics of machinery and its applications to mechatronic systems. Analysis of motion translation/rotation in machinery, energy of machine mechanisms. Involves projects, seminars, and workshops regarding graphical, analytical, and numerical techniques for dynamic analysis and synthesis of machines. Combined lecture and laboratory.

ENGR 3915 - Technical Project Management and Soft Skills  
3 credit hours  
Prerequisite: Junior standing or permission of instructor. Project management as sanctioned by the International Project Management Institute and how to assess and boost emotional intelligence or soft skills. Student successfully completing course will earn 20 Professional Development Units (PDUs) issued by the International Project Management Institute. 
NOTE: This was formerly ET 4915.

ENGR 3920 - Engineering Safety  
3 credit hours  
Safety and health in the manufacturing, construction, and utilities industries, including pertinent laws, codes, regulations, standards, and product liability considerations. Organizational and administrative principles and practices for safety management and safety engineering, accident investigation, safety education, and safety enforcement. 
NOTE: This was formerly ET 4420 - Industrial Safety.

ENGR 3930 - Systems Engineering  
3 credit hours  
Prerequisites: ENGR 2100, ENGR 3915, and ENGR 3970. An interdisciplinary course with both technical and management aspects of large, multifaceted engineering projects. Special emphasis placed on design, implementation, and improvement of mechatronic systems. Topics include systems engineering, engineering management, economics, quality control and engineering, project management, production systems planning and operations, and human factors.

ENGR 3970 - Engineering Economy  
3 credit hours  
Prerequisite: Junior standing or permission of instructor. Development of capital budgets. Justification of capital projects using time value of money concepts. Replacement analysis. Review of justification of actual capital projects and computer applications. Introduces economic risk assessment and Lean Six Sigma from an economic viewpoint. 
NOTE: This was formerly ET 4970.
ENGR 4500 - FE Exam Preparation
1 credit hour
Prerequisite: Senior standing or completion of all 3000-level courses. Review of topics covered on the general session of the Fundamentals of Engineering exam. Covers all aspects of engineering curriculum including mathematics, engineering probability and statistics, chemistry, computers, ethics and business practices, engineering economics, engineering mechanics (statics and dynamics), strength of materials, material properties, fluid mechanics, electricity and magnetism, and thermodynamics.

ENGR 4510 - Programmable Logic Controllers and Networks
3 credit hours
Prerequisite: ENGR 3510. Introduces programmable logic controllers (PLCs). Emphasizes ladder diagrams and programming of PLC. Introduces network systems such as DeviceNet, ProfiNet, and ProfiBus. Emphasizes the integration of PLCs in automation systems. Lecture and laboratory.

ENGR 4520 - Electrical Power and Machinery
3 credit hours

ENGR 4530 - Controls and Optimization
3 credit hours
Prerequisites: ENGR 3520 and ENGR 4510. Theories and applications of control systems, optimization of mechatronic systems, feedback controls, root-locus, digital controls, PID, frequency response, and pole positions. Introduces microcontrollers. Systems approach implemented. Lecture and laboratory.

ENGR 4580 - Mechatronic System Design
3 credit hours
Prerequisites: ENGR 3550 and ENGR 3590. Presents specifics in the mechanical design of mechatronic systems. Includes problem analysis, conceptualization, design/material selection, and performance analysis. Addresses mechanical subsystems, bill of materials, and economic analysis of the system. Lecture and laboratory.

ENGR 4590 - Automation System Design
3 credit hours
Prerequisite: Completion of all 3000-level courses and ENGR 4580. Corequisite: ENGR 4530. Capstone design project. Design and analysis of a complete mechatronic system using controllers, sensors, and actuators. Advance systems programming with current industrial network programs and GUIs. Implementation of project and process management principles as well as professional documentation and presentation. Lecture and laboratory.

Engineering Technology

ET 1210 - Introduction to Metals and Metallurgy
3 credit hours
Origin and behavior of metals. Extractive metallurgy—reduction of metallic ores, production of stock shapes, identification and selection of ferrous and nonferrous metals. Physical metallurgy—mechanical and physical properties, crystalline structure, phase diagrams, hardening and tempering, isothermal diagrams, metallurgy of welds, service problems, casting processes. Exercises in the use of basic welding, foundry, and metallurgical testing equipment. Two hours lecture and three hours laboratory.

ET 2310 - Computer-Assisted Drafting and Design I
3 credit hours
Covers basic technical drawing/sketching and drafting concepts using personal computers, plotters, and appropriate CAD software. Two hours lecture and three hours laboratory.

ET 2920 - Industrial Orientation Internship
1 to 3 credit hours
Prerequisite: Consent of the instructor. Provides industrial exposure for students with little or no industrial work experience. Students will be placed in an acceptable company for introductory industrial experiences. Arrangement for this course must be made in advance. Students may take from one to three credit hours; may be repeated for up to a maximum of three credit hours. Pass/Fail.

ET 2930 - Cooperative Education Experience I
3 credit hours
Prerequisite: Permission of department. Provides students with opportunity for on-the-job training in conjunction with on-campus academic experiences. Students will participate in professional growth seminars. Pass/Fail.
ET 2940 - Cooperative Education Experience II  
3 credit hours  
Prerequisite: ET 2930; permission of department.  
Continuation of ET 2930. Pass/Fail.

ET 3210 - Machine Tool Technology  
3 credit hours  
Prerequisites: ET 1210 and ET 2310. Metals, their sources, manufacture, and properties; basic metalworking hand tools, measurements; layout; drawing and safety. Exercises in the use of the basic machine tools in machine shop work. Lecture and laboratory. Two hours lecture and three hours laboratory.

ET 3260 - Manufacturing Processes and Materials  
3 credit hours  
Prerequisite: ENGR 1210. An analysis of machines, tools, processes, and materials used in production.

ET 3360 - Computer-Assisted Drafting and Design II  
3 credit hours  
Prerequisites: CMT 3320 or ET 2310. Utilizes PC and CAD software to develop skills in the creation and analysis of mechanical solid models for design and production purposes. Includes the use of shading and rendering to enhance three-dimensional model display and the extraction of two-dimensional engineering drawings. Two hours lecture and three hours laboratory.

ET 3601 - Electrical Circuit Analysis I  
3 credit hours  
Prerequisite: ENGR 1100. Corequisite: MATH 1910. Fundamentals of electrical circuits. Addresses basic circuit components and quantities. Emphasis on DC circuit calculations and theorems. Uses lab equipment to build and test DC circuits. Two hours lecture and three hours laboratory.

ET 3602 - Electrical Circuit Analysis II  
3 credit hours  
Prerequisite: ET 3601 and MATH 1910. Addresses basic circuit components and quantities of AC circuits. Introduces three-phase circuits and transformers. Emphasis on AC circuit calculations and theorems. Uses lab equipment to build and test AC circuits. Two hours lecture and three hours laboratory.

ET 3610 - Introduction to Electricity and Electronics  
4 credit hours  
Prerequisite: MATH 1710 or MATH 1730. Orientation to direct current, alternating current, magnetism, filters, and semiconductor devices. Rectifier-filters and basic transistor amplifiers are also examined as representative electronic circuits. Use of meters, oscilloscopes, and other test instruments are stressed in the laboratory. Three hours lecture and three hours laboratory.

ET 3615 - Principles of Electricity  
3 credit hours  
Prerequisite: MATH 1710 or MATH 1730. An overview of basic electrical circuits and systems, direct current circuits, alternating current circuits, and electrical devices and control schemes. Electrical motors, relays, solenoids, transformers, and power supplies examined. National Electric Code also examined. For students enrolled in Construction Management or Concrete Industry Management. Laboratory exercises stress the use of test instruments and the construction of basic electrical circuits. Two hours lecture and three hours laboratory.

ET 3620 - Digital Circuits Fundamentals  
3 credit hours  
Prerequisite: ET 3601 or permission of instructor. Provides thorough coverage of basic digital electronic circuits analysis and design. TTL and CMOS families examined. Number systems, mapping, and minimization techniques covered. Digital design using random logic and programmable logic devices (FPGAs and CPLDs). Two hours lecture and three hours laboratory.

ET 3630 - Electronics  
3 credit hours  
Prerequisite: ET 3602 or permission of instructor. Introduction to analog electronics. Defines basic parameters and theory of operation of discrete semiconductor devices. Introduces fundamentals of electronic circuits analysis and design. Applications illustrate use and laboratory projects provide hands-on experience. Two hours lecture and three hours laboratory.

ET 3640 - Digital Circuits Design  
3 credit hours  
Prerequisite: ET 3620; corequisite: ET 3630 or permission of instructor. In-depth study of sequential circuit analysis and design that includes sate machine design. Emphasis on the use of available development boards using both FPGAs and CPLDs.
and their respective CAD tools. PLDs programmed using latest relative CAD systems. Two hours lecture and three hours laboratory.

**ET 3650 - Introduction to Microprocessors**  
3 credit hours  
Prerequisites: CSCI 1170 and ET 3620. Covers architecture of microcontrollers and microprocessor-based systems and their related components. Machine language programming extensively used to solve problems and demonstrate the relationship of the microprocessor and its supporting peripherals. Basic microcomputer architecture also emphasized. Two hours lecture and three hours laboratory.

**ET 3660 - Communication Electronics**  
3 credit hours  
Prerequisite: ET 3630 or permission of instructor. Theory of electronic circuits as applied to communication; special electronics circuits required in communications systems. Testing theory and procedures. Various methods of electronic communications. Testing and evaluation of electronic circuits. Two hours lecture and three hours laboratory.

**ET 3670 - Computer-Assisted Printed Circuit Board Design**  
2 credit hours  
Prerequisites: ET 3620 and ET 3630 or permission of instructor. Utilizes computer software to develop skills in creating schematic and printed circuit board artwork for use in printed circuit board production. Includes plotting, printing, and generating all necessary documents required for fabrication. One hour lecture and three hours laboratory.

**ET 3810 - Engineering Thermodynamics**  
3 credit hours  
Prerequisites: ENGR 1100; PHYS 2010/PHYS 2011 or PHYS 2110/PHYS 2111; MATH 1910. Basic concepts of engineering thermodynamics, properties and thermodynamic states, work, heat, first law, second law, entropy, ideal gases, and analysis of conventional power and refrigeration systems.

**ET 3830 - Statics**  
3 credit hours  
Prerequisites: ENGR 1100 and the following courses which may be taken concurrently: MATH 1910 and PHYS 2010 / PHYS 2011 or PHYS 2110 / PHYS 2111. Fundamental concepts and conditions of static equilibrium; their application to systems of forces and couples acting on rigid bodies; and the calculation of centers of gravity, centroids, and moments of inertia.

**ET 3840 - Dynamics**  
3 credit hours  
Prerequisite: ET 3830. Rectilinear curvilinear, and rotary motion of rigid objects both with and without consideration of the unbalanced force causing the motion. Application of the principles of work, energy, impulse, and momentum to the solution of engineering problems.

**ET 3860 - Strength of Materials**  
3 credit hours  
Prerequisite: ENGR 2110. The mechanics of materials emphasizing the analysis and design of statically determinate beams, columns, and structural members in torsion and application of the three moment equations to statically indeterminate beams.

**ET 3910 - Introduction to Operations Management**  
3 credit hours  
Prerequisite: Junior standing or permission of instructor. A foundation course in manufacturing and service operations management. Problem-solving applications emphasized.

**ET 3920 - Industrial Internship I**  
3 credit hours  
Prerequisite: Consent of instructor. Student is employed by an acceptable industry for industrial experience. Credit given for actual work with employer. Arrangement for this course must be made in advance. Pass/Fail.

**ET 3930 - Industrial Internship II**  
3 credit hours  
Prerequisite: ET 3920. A continuation of Internship I. Same stipulations apply. Pass/Fail.

**ET 3950 - Metrology**  
3 credit hours  
Overview of methods and procedures of precision measuring and gauging as used in inspection and quality control by industry. Two hours lecture and three hours laboratory.

**ET 3960 - Industrial Quality Technology**  
3 credit hours  
Prerequisite: Junior standing or consent of instructor. Covers breadth and some depth in quality technology. Explores history of quality, present techniques, and future predictions. Covers six-sigma methodology at
the "greenbelt" level. Certification after industry project. Lecture.

**ET 3970 - Cooperative Education Experience III**
3 credit hours
Prerequisite: ET 2940; permission of department. Continuation of ET 2940. Pass/Fail.

**ET 3980 - Cooperative Education Experience IV**
3 credit hours
Prerequisite: ET 3970; permission of department. Continuation of ET 3970. Pass/Fail.

**ET 4230 - Advanced Machine Tool Technology**
3 credit hours
Prerequisite: ET 3210. Taper turning, boring and thread chasing, and calculations of screw threads and other operations. Gear terminology and calculations; practice gear cutting on the milling machine; use of index head. Two hours lecture and three hours laboratory.

**ET 4280 - Computer-Aided Manufacturing: Numerical Control (NC)**
3 credit hours
Prerequisites: ET 2310 and ET 3210 or consent of instructor. The role of NC in today's manufacturing environment; machines and machine control systems of a typical installation. Justifying NC equipment. Emphasis on writing and debugging programs for a three-axis milling machine and a two-axis turning machine utilizing both computer numerical control and computer-aided part programming. For those with little experience or seeking to broaden their knowledge. Two hours lecture and three hours laboratory.

**ET 4330 - Advanced Computer-Aided Drafting**
2 credit hours
Prerequisite: ET 3360 or permission of instructor. Topics include customizing menus, 3-D concepts and surface modeling, AutoLisp, rendering, and slide shows. Interactive computer drafting and design using advanced AutoCAD software and add-ons. Primarily for students who want to increase their capabilities using CAD. One hour lecture and three hours laboratory.

**ET 4340 - Design of Machine Elements**
3 credit hours
Prerequisite: ET 3860. Analytical design methods. Stress analysis, working stress, combined stresses, failure theories, fatigue failure. Design techniques for shafts, fasteners, gears, bearings, and belt and chain drives. Includes a design project.

**ET 4440 - Fire Safety**
3 credit hours
Fundamental methods of fire protection, prevention, and suppression. Includes characteristics and behavior of fire, fire hazards of materials and buildings, codes and standards for fire prevention and protection, fire protection equipment and systems, and fire fighting forces and how they operate.

**ET 4450 - Industrial Hygiene**
3 credit hours
Corequisite: ENGR 3920 or permission of instructor. An introduction to industrial or occupational hygiene—that science and art devoted to the anticipation, recognition, evaluation, and control of those environmental factors or stresses, arising in or from the workplace, which may cause sickness, impaired health and well-being, or significant discomfort and inefficiency among workers or citizens of the community.

**ET 4490 - Topics in Industrial Technology**
1 to 6 credit hours
Subject topics offered as required to meet the needs of the class.

**ET 4590 - Manufacturing Automation Systems**
3 credit hours
Prerequisite: Junior status or consent of instructor. Technical, human, and business aspects of modern automation system. Includes automation controls, levels of control and major components/subsystems, object-based software components, intelligent actuators and sensors, emerging trends, flexible manufacturing systems (FMS), computer integrated manufacturing (CIM), industrial systems and supply chain applications, organizational approaches, and automation justification.

**ET 4600 - Programmable Logic Controllers**
2 credit hours
Prerequisite: ET 3602 or permission of instructor. Introduction to programmable logic controllers (PLCs). Selection, operation, and troubleshooting. Ladder diagrams and programming of PLC emphasized. One hour lecture and three hours laboratory.

**ET 4610 - Instrumentation and Controls**
3 credit hours
Prerequisites: ET 3620 and ET 3630. Devices and
techniques used in the measurement of physical parameters. Consideration of accuracies and sources of error, identification of typical measurements, sensors and transducers, control stability and response. Two hours lecture and three hours laboratory.

**ET 4630 - Local Area Networks**  
3 credit hours  
Provides the necessary foundation experience to understand the design, implementation, and management strategies of local and wide area networks (LAN/WAN). Data Communication Standards and protocol, fundamentals included. Will include lecture, laboratory activities, and a LAN design requirement. Two hours lecture and three hours laboratory.

**ET 4640 - Industrial Electricity**  
3 credit hours  
Prerequisite: ET 3602 or permission of instructor. AC power theory and circuits for industrial applications, polyphase systems, power factor correction, and transformers. Theory, applications, and selection of motors and generators. Industrial motor control and power transmission. Two hours lecture and three hours laboratory.

**ET 4660 - Microprocessor Interfacing**  
3 credit hours  
Prerequisites: ET 3640 and ET 3650 or permission of instructor. Emphasis on interfacing various analog and digital devices to a microcontroller/microprocessor-based system: memory expansion, A/D and D/A, display devices, keyboards and keypads, electromechanical devices, and sensors. PLDs (FPGAs/CPLDs) interfaced to facilitate rapid prototyping of digital system design. Two hours lecture and three hours laboratory.

**ET 4670 - Microprocessor Design**  
3 credit hours  
Prerequisites: ET 3640 and ET 4660 or permission of instructor. Advanced microprocessor system design. Emphasis on the design of core CPUs and imbedded components using high-density FPGA/CPLD development boards. Industrial applications of microprocessor-based systems. Two hours lecture and three hours laboratory.

**ET 4701 - Industrial Topics**  
1 to 6 credit hours  
Problems in any one of a variety of areas to meet the needs of the class.

**ET 4710 - Professional Development Seminar**  
1 credit hour  
Prerequisite: Junior status. Orientation to industrial job opportunities, placement practices, interview techniques, and preparation of application materials (resume, cover letter, and portfolio if warranted). Guest lecturers, films, and student and faculty presentations arranged in seminar fashion. One-hour lecture weekly.

**ET 4790 - Advanced Problems in Technology**  
3 credit hours  
Prerequisite: Completion of all courses in a given area or approval of instructor. For the advanced student who wishes to work on a designated problem in a specific area. Works on an individual problem or project independently under the guidance of an instructor.

**ET 4800 - Senior Problems in Industrial Technology**  
3 credit hours

**ET 4801 - Computer Engineering Technology**  
1 to 3 credit hours  
Prerequisites: ET 4670; CSCI 3160. All required freshman-, sophomore-, and junior-level courses in all disciplines have to be completed before registering for this course. Engineering situations are solved by experimental means. Student must have experimental approach, gather data, interpret results, and prepare a formal technical written and oral report.

**ET 4802 - Electro-Mechanical Engineering Technology**  
1 to 3 credit hours  
Prerequisites: ET 3650, ET 3860, ET 4610, and ET 4860. All required freshman-, sophomore-, and junior-level courses in all disciplines have to be completed before registering for this course. Engineering situations are solved by experimental means. Student must have experimental approach, gather data, interpret results, and prepare a formal technical written and oral report.

**ET 4803 - Mechanical Engineering Technology**  
1 to 3 credit hours  
Prerequisites: ET 3860, ET 4340, and ET 4815. All
required freshman-, sophomore-, and junior-level courses in all disciplines have to be completed before registering for this course. Engineering situations are solved by experimental means. Student must have experimental approach, gather data, interpret results, and prepare a formal technical written and oral report.

ET 4815 - Heating, Ventilation, and Air Conditioning
3 credit hours
Prerequisite: ET 3810 or permission of instructor. Design and operation of heat and mass transfer systems which produce the needed environments for manufacturing operations, industrial processes, and human comfort. Systems that use mechanical equipment such as pumps, blowers, fans, compressors, and heat exchanges found in fields such as air conditioning, low temperature metallurgy, food preservation, chemical processing, and industrial manufacturing covered. Two hours lecture and three hours laboratory.

ET 4830 - Vibration
3 credit hours
Prerequisite: ET 3840. Provides a broad-based background in vibration analysis and introduces present practices. Topics include free, damped, and forced vibrations with one degree of freedom; vibration isolation; free vibration with two degrees of freedom; and introduction to matrix formulation. Two hours lecture and three hours laboratory.

ET 4850 - Fluid Power
3 credit hours
Prerequisites: ENGR 1100, ET 3810. Systems and the basic components that make up these systems, including hydraulic, pneumatic, and fluidic. Emphasis on understanding the language and graphic symbols associated with fluid power, the performance characteristics of system components, and problem solving. Two hours lecture and three hours laboratory.

ET 4860 - Robotics
3 credit hours
Prerequisites: MATH 1910; CSCI (3 hours). Fundamentals of robots. Types of robots, types of controls, the prime movers, the application of robots in the industrial environment, and problem solving. Two hours lecture and three hours laboratory.

ET 4900 - Productivity Strategies
3 credit hours
Prerequisite: Junior standing or permission of instructor. Analysis, design, and implementation of productivity strategies and productivity improvement programs for a wide variety of organizations. Touches a spectrum of disciplines such as work design, quality, design engineering, and employee involvement. Includes lean manufacturing with certification available after successful industry project.

ET 4920 - Plant Layout and Materials Handling
3 credit hours
Prerequisites: ET 2310 and ET 3910. An overview of facility planning including equipment selection, work flow analysis, activity relationship analysis, and plant layout for product, process, and JIT requirements. Teams assigned actual projects in industry. CAD layout presentations to industry management required.

ET 4990 - Industrial Engineering Systems
3 credit hours
Prerequisite: Junior standing or permission of instructor. System design of work tasks including establishing time standards by time and motion study and work sampling; ergonomic design for integration of the human into the work task environment. Scientific methods supplemented by quality considerations with emphasis on statistical quality control (SQC). Computer software used for design and analysis.

Environmental Science and Technology

EST 2810 - Introduction to Environmental Science
3 credit hours
The technical, economic, and political aspects of environmental science. Introduction to specific problems dealing with many pollution issues. Specific monitoring, abatement techniques, and equipment. An overview of energy production processes, industrial pollution problems, air, noise, solid and hazardous wastes, along with economic and environmental concerns. Field trips, lecture, and research projects and/or papers highlight specific topics of special interest to students.

EST 4760 - Seminar in Environmental Science and Technology
1 credit hour
Prerequisite: Permission of department. Student presentations on capstone projects. Incorporates guest speakers, readings, reflective thought, career
and job search, and discussions on environmental
issues.

EST 4770 - Pollution Control Technology
3 credit hours
Prerequisites: 8 hours each in biology, chemistry, and
physics, or consent of instructor. Solid waste and
water pollution control technology. Legislative
regulations and quality standards, pollution types and
sources, detection and analysis instruments, and
treatment or abatement principles and practices.

EST 4780 - Air, Solids, and Noise Pollution
Technology
3 credit hours
Prerequisites: 8 hours each chemistry, biology, and
physics or permission of instructor. Air, noise, solid
and hazardous waste pollution technology, including
legislative regulations and quality standards: sources,
detection, and analysis instrumentation and practices,
and treatment and abatement principles, equipment,
and practices.

EST 4810 - Energy and the Environment
3 credit hours
Prerequisites: 4 hours chemistry and 3 hours
mathematics or consent of instructor. Sources and
methods of energy production and classifications of
energy usages, with emphasis on usage trends,
energy conservation strategies, and alternate energy
utilization.

EST 4820 - Solar Building Design
3 credit hours
Prerequisites: 4 hours science and 3 hours
mathematics or consent of instructor. Broad
introduction to the environmental and economic
impact of solar energy for residential and light
industrial construction including day lighting, passive
solar design, and hot water heating.

EST 4840 - Energy Auditing
3 credit hours
Prerequisites: 4 hours chemistry and 3 hours
mathematics or consent of instructor. Types of energy
consumption and classifications of energy usages,
with emphasis on conservation strategies and total
management for residential and industrial plants.

EST 4980 - Environmental Public Health
3 credit hours
Prerequisites: 8 hours college biology and 8 hours
college chemistry. Applying the sciences of biology,
Geosciences

Warner Cribb, Chair
Aber, Abolins, Boda, Brown, Collins, Du, Garbharran, Harris, Hiett, Henry, Lobegeier, Momm, Zawislak

Courses in the Department of Geosciences are designed to meet the General Education needs of all students, to broaden their knowledge of the physical environment, to enhance their cultural development, and to provide a solid foundation for those planning to enter fields in which geoscience knowledge is essential.

The department offers programs leading to a Bachelor of Science degree with a major in Geoscience and concentrations in Physical Geography or Geology. To provide the student with maximum opportunities for career preparation, the two concentrations are subdivided into five career patterns: physical geography and geographic techniques within the Geography concentration; and geology, earth science, and earth science for teachers within the Geology concentration. Proper selection of courses will permit a student to work as a professional in a chosen area, pursue graduate studies, or be licensed to teach.

Minors in Physical Geography, Geology/Earth Science, and Remote Sensing are offered.

The department participates in the Environmental Sustainability and Technology major.

The Geosciences Department also sponsors an internship program which provides opportunities to receive on-the-job training with various agencies employing persons with geographic/geologic training. Details of this program may be obtained from the department.

Honors College
The Department of Geosciences offers the following course in Honors: GEOL 1030/GEOL 1031.

Graduate Study
The department offers a Geoscience concentration in the Master of Science in the Professional Sciences degree program, with emphases in geographic information systems, environmental geosystems, and general geoscience. The department also offers minors in Physical Geography and Earth Science/Geology at the graduate level. The list of available courses offered can be found in the Graduate Catalog.

Geology/Earth Science Minor

Department of Geosciences
The minor in Geology/Earth Science requires 18-22 hours.

Required Courses (8 hours)
- GEOL 1040 - Physical Geology 4 credit hours AND
- GEOL 1041 - Physical Geology Lab 0 credit hours
  OR
- GEOL 1030 - Introduction to Earth Science 3 credit hours AND
- GEOL 1031 - Introduction to Earth Science Lab 1 credit hour
  with a grade of A or B
- GEOL 1050 - Historical Geology 4 credit hours

Electives (10-14 hours)
- 10-14 hours at the 3000 level or above
Geoscience, Geology Concentration (Earth Science for Teachers), B.S.

Department of Geosciences
615-904-8019
Clay Harris, program coordinator
Clay.Harris@mtsu.edu

The Earth Science for Teachers curriculum is designed for those who plan to teach earth science in the secondary school system. This curriculum consists of 82 hours distributed among career pattern requirements (22 hours), career pattern electives (10 hours), a cognate (20 hours), and a minor in Secondary Education (30 hours) involving education courses and directed teaching. An additional 41 hours are required for General Education. Student must contact Secondary Education minor advisor for approval of appropriate courses for licensure. For specific procedures and additional requirements for teacher licensure, see College of Education.

NOTE: Please see Secondary Education Minor for requirements and additional information.

Required Courses (22 hours)

- GEOL 1050 - Historical Geology 4 credit hours
- GEOL 1030 - Introduction to Earth Science 3 credit hours AND
- GEOL 1031 - Introduction to Earth Science Lab 1 credit hour
  OR
- GEOL 1040 - Physical Geology 4 credit hours AND
- GEOL 1041 - Physical Geology Lab 0 credit hours
- GEOL 3010 - Oceanography 3 credit hours
- GEOL 4020 - Geomorphic Regions of the United States 4 credit hours
- GEOL 4050 - Meteorology 3 credit hours
- PGEO 1030 - Physical Geography 4 credit hours
  NOTE: Geology concentration requires grade of B- or above in GEOL 1030/1031 or GEOL 1040/1041.

NOTE:

Geology concentration requires grade of B- or above in GEOL 1030/1031 or GEOL 1040/1041.

Electives (10 hours)

Choose 10 hours of Geoscience electives from any GEOL course, any advisor-approved math or science course.

Math/Science Cognate (20 hours)

- ASTR 1030 - Exploring the Universe 3 credit hours AND
- ASTR 1031 - Observing the Universe 1 credit hour
- BIOL 1110 - General Biology 4 credit hours * AND
- BIOL 1111 - General Biology Lab 0 credit hours *
- BIOL 1120 - General Biology 4 credit hours AND
- BIOL 1121 - General Biology Lab 0 credit hours
- CHEM 1010 - Introductory General Chemistry I 4 credit hours * AND
- CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours *
  OR
- CHEM 1110 - General Chemistry I 4 credit hours * AND
• CHEM 1111 - General Chemistry I Lab 0 credit hours *
• CHEM 1020 - Introductory General Chemistry II 4 credit hours AND
• CHEM 1021 - Intro to General Chemistry II Lab 0 credit hours
OR
• CHEM 1120 - General Chemistry II 4 credit hours AND
• CHEM 1121 - General Chemistry II Lab 0 credit hours
• PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND
• PHYS 2011 - Physics Problems Laboratory I 4 credit hours
• PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
• PHYS 2021 - Physics Problems Laboratory II 4 credit hours
• MATH 1720 - Plane Trigonometry 3 credit hours *

NOTE:

* Counted in General Education requirements

Minor in Secondary Education (30 hours)

• YOED 2500 - Planning and Assessment 3 credit hours
• YOED 3000 - Classroom Management 3 credit hours
• YOED 3300 - Problem-Based Instructional Strategies 3 credit hours
• YOED 4030 - Residency I: Grades 7-12 9 credit hours
• YOED 4400 - Residency II 12 credit hours
Curriculum: Geoscience, Geology Concentration (Earth Science for Teachers)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Following is a suggested pattern of study for the first two years; however, consultation with the assigned advisor is necessary before registration.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours
- Social/Behavioral Sciences, 6 credit hours
- MATH 1720 - Plane Trigonometry 3 credit hours (Math)
- GEOL 1050 - Historical Geology 4 credit hours
- Pgeo 1030 - Physical Geography 4 credit hours
- GEOL 1030 - Introduction to Earth Science 3 credit hours AND
- GEOL 1031 - Introduction to Earth Science Lab 1 credit hour
  OR
- GEOL 1040 - Physical Geology 4 credit hours AND
- GEOL 1041 - Physical Geology Lab 0 credit hours

Choose 6 hours from:
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 33 Hours

Sophomore

- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- BIOL 1110 - General Biology 4 credit hours (Nat Sci) AND
- BIOL 1111 - General Biology Lab 0 credit hours (Nat Sci)
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- GEOL 3010 - Oceanography 3 credit hours
- GEOL 4020 - Geomorphic Regions of the United States 4 credit hours
- GEOL 4050 - Meteorology 3 credit hours
- YOED 2500 - Planning and Assessment 3 credit hours
- CHEM 1010 - Introductory General Chemistry I 4 credit hours AND
- CHEM 1011 - Intro to General Chemistry I Lab 0 credit hours
  OR
- CHEM 1110 - General Chemistry I 4 credit hours AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1020 - Introductory General Chemistry II 4 credit hours AND
- CHEM 1021 - Intro to General Chemistry II Lab 0 credit hours
  OR
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours

Subtotal: 31 Hours

Junior

Subtotal: 34 Hours

Senior

Subtotal: 25 Hours

Total hours in program: 123

Academic Map

Following is a printable, suggested four-year schedule of courses:
Geoscience, Geology (Earth Science for Teachers), B.S., Academic Map
Geoscience, Geology Concentration (Earth Science), B.S.

Department of Geosciences
615-904-8019
Clay Harris, program coordinator
Clay.Harris@mtsu.edu

This Earth Science career pattern is designed for students who plan to become professional earth scientists or who wish to pursue graduate study in earth science. The Earth Science career pattern consists of 79 hours distributed among career pattern requirements, a cognate, an 18-hour minor, and free electives. General Education requirements complete the 120-hour requirement.

Required Courses (42 hours)

- GEOL 1030 - Introduction to Earth Science 3 credit hours AND
- GEOL 1031 - Introduction to Earth Science Lab 1 credit hour
  OR
- GEOL 1040 - Physical Geology 4 credit hours AND
- GEOL 1041 - Physical Geology Lab 0 credit hours
- GEOL 1050 - Historical Geology 4 credit hours
- GEOL 3000 - Mineralogy 5 credit hours
- GEOL 3010 - Oceanography 3 credit hours
- GEOL 3050 - Field Methods in Geology 3 credit hours
- GEOL 4020 - Geomorphic Regions of the United States 4 credit hours
- GEOL 4050 - Meteorology 3 credit hours
- PCEO 1030 - Physical Geography 4 credit hours
- Geoscience electives from any GEOL or PCEO course or any advisor-approved math or science electives. 12 credit hours

NOTE:

Geology concentration requires a B- or above in GEOL 1030/1031 and/or GEOL 1040/1041

Cognate (18 hours)

- ABAS 3340 - Soil 3 credit hours
- PCEO 4530 - Geographic Information Systems 3 credit hours
- MATH 1720 - Plane Trigonometry 3 credit hours *
- Additional MATH/SCI electives to be approved by major academic advisor 9 credit hours

NOTE:

*Counted in General Education requirements

Electives (22 hours)

- Approved by major academic advisor
Curriculum: Geoscience, Geology Concentration (Earth Science)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Following is a suggested pattern of study for the first two years; however, consultation with the assigned advisor is necessary before registration.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- GEOL 1050 - Historical Geology 4 credit hours
- MATH 1720 - Plane Trigonometry 3 credit hours (Math)
- Social/Behavioral Sciences 6 credit hours
- PGEO 1030 - Physical Geography 4 credit hours
- GEOL 1030 - Introduction to Earth Science 3 credit hours AND
- GEOL 1031 - Introduction to Earth Science Lab 1 credit hour
  OR
- GEOL 1040 - Physical Geology 4 credit hours AND
- GEOL 1041 - Physical Geology Lab 0 credit hours
  Choose 6 hours from:

615-904-8015
Clay Harris, program coordinator
Clay.Harris@mtsu.edu

This Geology career pattern is designed for students who plan to become professional geologists or who wish to pursue graduate study in geology. The Geology career pattern consists of 78 hours distributed among career pattern requirements (53 hours), and two cognates. An additional 41 hours of General Education requirements are required.

Required Courses (53 Hours)

- GEOL 1030 - Introduction to Earth Science 3 credit hours AND
- GEOL 1031 - Introduction to Earth Science Lab 1 credit hour
  OR
- GEOL 1040 - Physical Geology 4 credit hours AND
- GEOL 1041 - Physical Geology Lab 0 credit hours
- GEOL 1050 - Historical Geology 4 credit hours
- GEOL 3000 - Mineralogy 5 credit hours
- GEOL 3050 - Field Methods in Geology 3 credit hours
- GEOL 3160 - Geologic Literature and Report Writing 2 credit hours
- GEOL 4000 - Petrology and Petrography 5 credit hours
- GEOL 4020 - Geomorphic Regions of the United States 4 credit hours
- GEOL 4030 - Invertebrate Paleontology 5 credit hours
- GEOL 4070 - Sedimentation and Stratigraphy 5 credit hours
- GEOL 4080 - Structural Geology 5 credit hours
- GEOL 4100 - Geophysical Prospecting 4 credit hours
- GEOL 4130 - Hydrogeology 4 credit hours
- PGEO 4530 - Geographic Information Systems 3 credit hours

NOTE:

Geology concentration requires grade of B- or above in GEOL 1030/1031 and/or GEOG 1040/1041.

Cognate 1

- CHEM 1110 - General Chemistry I 4 credit hours AND *
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours
- MATH 1910 - Calculus I 4 credit hours *
- MATH 1920 - Calculus II 4 credit hours
- MATH/SCI elective 3 credit hours

Cognate 2

- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND *
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours
OR
- PHYS 2110 - Calculus-Based Physics I 0 credit hours AND *
- PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours
- BIOL 1110 - General Biology 4 credit hours AND

Academic Map

Following is a printable, suggested four-year schedule of courses:
Geoscience, Geology (Geology Career Pattern), B.S., Academic Map
Geoscience, Physical Geography Concentration (Geographic Techniques), B.S.

Department of Geosciences
615-904-8372
Henrique Momm, program coordinator
Henrique.Momm@mtsu.edu

This program is designed for students who plan to become professional geographers or who wish to pursue graduate study in physical geography and/or related fields. This career pattern requires a minimum of 42 hours of departmental core requirements, a math/science cognate (18 hours), and 19 hours of advisor-approved electives (selected in consultation with and approved by the major academic advisor), and General Education requirements.

Required Courses (42 hours)

- PGEO 1030 - Physical Geography 4 credit hours
- GEOL 4050 - Meteorology 3 credit hours
- PGEO 3401 - Field Studies in Physical Geography 4 credit hours
- PGEO 4380 - Cartography 4 credit hours
- PGEO 4490 - Remote Sensing 4 credit hours
- PGEO 4530 - Geographic Information Systems 3 credit hours
- PGEO 4560 - Intermediate Geographic Information Systems 3 credit hours
- GEOL 4020 - Geomorphic Regions of the United States 4 credit hours
- GEOL 1030 - Introduction to Earth Science 3 credit hours AND
- GEOL 1031 - Introduction to Earth Science Lab 1 credit hour
  OR
- GEOL 1040 - Physical Geology 4 credit hours AND
- GEOL 1041 - Physical Geology Lab 0 credit hours

Departmental Electives (9 hours)

- PGEO or GEOL electives 9 credit hours

Cognate

- MATH 1530 (Statistics) plus 15 hours of advisor-approved College of Basic and Applied Sciences coursework

General Electives

- 19 hours, advisor-approved

Curriculum: Geoscience, Geography Concentration (Geographic Techniques)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Following is a suggested pattern of study for the first two years; however, consultation with the assigned advisor is necessary before registration.
Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)

Academic Map

Following is a printable, suggested four-year schedule of courses:

Geoscience, Physical Geography (Physical Geography Career Pattern), B.S. Academic Map
Physical Geography Minor

Department of Geosciences
The minor in Physical Geography requires 18 hours (all in courses with a PGEO designation) to be selected by the student and approved by a member of the faculty assigned as advisor. The minor will be specific enough to support the student's career plans.

Remote Sensing Minor

Department of Geosciences
The minor in Remote Sensing consists of 18 semester hours.

Required Courses (18 hours)

- PGEO 1030 - Physical Geography 4 credit hours
- PGEO 4490 - Remote Sensing 4 credit hours
- PGEO 4510 - Laboratory Problems in Remote Sensing 4 credit hours
- PGEO 4530 - Geographic Information Systems 3 credit hours
- PGEO 4560 - Intermediate Geographic Information Systems 3 credit hours
Geology

GEOL 1030 - Introduction to Earth Science
3 credit hours
Corequisite: GEOL 1031. The earth and its relationship to its space and environment emphasized. Forces and processes which combine to mold the face of the earth and its atmosphere, as well as the internal constitution of the earth. Three hours lecture. Together, GEOL 1030 and GEOL 1031 satisfy 4 hours of the Natural Sciences portion of the General Education requirement.

GEOL 1031 - Introduction to Earth Science Lab
1 credit hour
Laboratory to accompany GEOL 1030.

GEOL 1040 - Physical Geology
4 credit hours
Corequisite: GEOL 1041. The origin, composition, and structure of the solid earth: rock-forming minerals; igneous, sedimentary, and metamorphic rocks; earthquakes and plate tectonics; surface processes; geologic time. Identification and description of minerals and rocks in hand sample. Use of topographic and geologic maps. Three hours lecture and two hours laboratory per week.

GEOL 1041 - Physical Geology Lab
0 credit hours
Corequisite: GEOL 1040.

GEOL 1050 - Historical Geology
4 credit hours
Prerequisites: GEOL 1030 and GEOL 1031 or GEOL 1040/GEOL 1041. The major divisions of geologic time with emphasis on earth movements, sea fluctuations, life of the time, and the effect these have had on our present environment. Close attention to the development of the physiographic regions of North America, which are correlated with chronologically similar events in other parts of the world. Topographic maps, geologic maps, and fossil animals and plants. Three hours lecture and two hours laboratory per week.

GEOL 3000 - Mineralogy
5 credit hours
Prerequisites: GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041 or permission of instructor. Crystallography and crystal chemistry. Physical and chemical properties of silicate and non-silicate mineral groups. Examination of the common rock-forming minerals in hand sample and thin section. Four hours lecture and two hours laboratory per week.

GEOL 3010 - Oceanography
3 credit hours
Prerequisites: GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041 or PGEO 1030. Physiography, structures, and sediments of the ocean floor; coastal and oceanic environments; and the nature of sea water, currents, waves, and tides. Geological processes, geophysical studies, and oceanographic instrumentation discussed.

GEOL 3030 - Geoscience of Energy Resources
3 credit hours
Prerequisites: GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041 or PGEO 1030. Geoscience aspects of energy resources and their impact on the environment. Topics include occurrence, exploration, development, and reclamation, as well as historical trends. Three hours lecture per week.

GEOL 3050 - Field Methods in Geology
3 credit hours
Prerequisites: MATH 1720 or MATH 1730; GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041 and GEOL 1050; major or minor in Geoscience. Introduction to field observation in geoscience. Topics include tape and compass surveys, orientation of rock strata, measurement of stratigraphic section, map preparation, and use of GPS. Three hours lecture/field work per week.

GEOL 3060 - Computer Methods in Geology
3 credit hours
Prerequisites: GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041 and GEOL 1050; major or minor in Geology/Earth Science. Extensive use of personal computers for processing field data, map contouring, geologic reports and illustrations, lettering and cartography, image processing, geologic databases, and digital maps. Brief treatment of classical cartography. Four to five hours lecture/laboratory per week.

GEOL 3160 - Geologic Literature and Report Writing
2 credit hours
Prerequisites: GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041; GEOL 1050; 8 semester hours of upper-division GEOL courses. Acquisition and presentation of geological data from traditional and
database sources. Preparation of geologic field and laboratory reports in addition to professional reports and papers.

**GEOL 3401 - Field Course**  
4 credit hours  
Prerequisite: Permission of department. Supervised study in some geological area preceded by classroom preview and concluded by a time of evaluation. Emphasis on the natural and physical elements of the environment, with special attention directed toward the geomorphology and geology of specific areas. For fees and specific credit, consult the director, division of geology.

**GEOL 3402 - Field Course**  
4 credit hours  
Prerequisite: Permission of department. Supervised study in some geological area preceded by classroom preview and concluded by a time of evaluation. Emphasis on the natural and physical elements of the environment, with special attention directed toward the geomorphology and geology of specific areas. For fees and specific credit, consult the director, division of geology.

**GEOL 4000 - Petrology and Petrography**  
5 credit hours  
Prerequisite: GEOL 3000. Igneous, sedimentary, and metamorphic rocks. Theories of formation and evolution based upon mineralogical and geochemical evidence. Examination and classification of rocks in hand sample and thin section. Three hours lecture and three hours laboratory per week.

**GEOL 4020 - Geomorphic Regions of the United States**  
4 credit hours  
Prerequisites: GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041. Origin, regional distribution, and geomorphic features and history of landforms of the United States. Students will be required to analyze maps, structure sections, and aerial photography to determine geomorphic forms and the forces and processes that produced these forms. Three hours lecture and two hours laboratory per week.

**GEOL 4030 - Invertebrate Paleontology**  
5 credit hours  
Prerequisite: GEOL 1050. Invertebrate and microscopic animal life of the past, including recently preserved representatives and their ancient fossilized ancestors. Numerous field trips to local fossil-collecting sites. Designed to aid in the preparation of earth science teachers, geologists, and biologists. Three hours lecture and three hours laboratory per week.

**GEOL 4040 - Engineering Geology**  
3 credit hours  
Prerequisites: GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041 or equivalent; MATH 1710 and MATH 1720 or MATH 1730 or equivalent. Principles and applications of geology in engineering practice. Engineering geology exploration, behavior of soils and rocks for engineering projects, application of engineering geology to the solution of construction and environmental problems.

**GEOL 4050 - Meteorology**  
3 credit hours  
A general, non-mathematical introduction to the atmosphere. Emphasis on main elements such as temperature, precipitation, clouds, and humidity. In-depth analysis of storms, tornadoes, and hurricanes and human alteration of the atmosphere such as the ozone hole. Weather forecasting and climate change.

**GEOL 4070 - Sedimentation and Stratigraphy**  
5 credit hours  
Prerequisites: GEOL 1050 and GEOL 3000 or consent of instructor. Sedimentary rocks, the process of sedimentation, the alteration of sediments through time, and examination of resulting stratigraphic units. Designed for geoscience majors and those with interests in soil mechanics and civil engineering. Three hours lecture and three hours laboratory per week.

**GEOL 4080 - Structural Geology**  
5 credit hours  
Prerequisites: MATH 1720 or MATH 1730; GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041; GEOL 1050. Orientation and deformation of rock. Geometric, analytical, and statistical solutions to structural problems. Emphasis on three-dimensional visualization, geological map interpretation, and the mechanics of deformation. Three hours lecture and three hours laboratory per week.

**GEOL 4090 - Problems in Geology**  
1 to 6 credit hours  
Prerequisites: A minimum of 12 semester hours of geology (excluding GEOL 1030/GEOL 1031) at least 6 hours of which must be upper division; consent of instructor. A problem-solving course. Includes an
independent research-oriented project commensurate with the student's interests and qualifications. May be repeated up to a maximum of 6 hours.

GEOL 4100 - Geophysical Prospecting
4 credit hours
Prerequisites: MATH 1910; PHYS 2010/PHYS 2011 or PHYS 2110/PHYS 2111. (PHYS 2020/PHYS 2021 or PHYS 2120/PHYS 2121, GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041, and MATH 1920 also recommended.) Survey of seismic, gravimetric, and magnetic/electrical exploration methods. An applied course covering some elementary theory, basic field practice, computation fundamentals, interpretation techniques. Three hours lecture and two hours laboratory per week.

GEOL 4120 - Environmental Geology
4 credit hours
Prerequisites: GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041 or PGEO 1030 or consent of instructor. Application of geologic information to minimize possible environmental degradation and maximize utilization of resources in the natural and modified environment; local examples and field trips. Topics include engineering properties of earth materials, natural hazard prediction and reduction, water supply, solid and hazardous wastes, mineral resources, global change, land-use planning, environmental impact analysis. Three hours lecture and two hours laboratory per week.

GEOL 4130 - Hydrogeology
4 credit hours
Prerequisites: MATH 1720 or MATH 1730; GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041; GEOL 1050. Basic processes and measurement of the hydrologic cycle, including precipitation, evaporation, surface runoff, stream flow, soil moisture, and ground water. Emphasis on ground water including geology of occurrence, principles of flow, conceptual models of regional flow, chemistry and quality, well hydraulics, aquifer characteristics, resource development, detection of pollutants, and contaminant transport. Three hours lecture and two hours laboratory per week.

GEOL 4140 - Inorganic Geochemistry
3 credit hours
Prerequisite: GEOL 3000. Principles of inorganic geochemistry. Geochemistry of the earth and solar system, isotopic geochronometers, thermodynamics and rates of geochemical processes, chemical weathering, chemical compositions of surface and groundwater. Three hours lecture per week.

GEOL 4150 - Environmental Applications of Hydrogeology
3 credit hours
Prerequisite: GEOL 4130. An advanced course in hydrogeology that emphasizes applied methods for assessing hazardous and solid waste facilities and contaminated ground water remediation techniques. Included will be site characterization methods, ground water sampling procedures, and monitoring well installation techniques. Three hours lecture per week.

GEOL 4571 - Internship in Geology
3 credit hours
Prerequisites: Major or minor in geology; 15 hours of geology/geography with junior or senior standing; permission of employer and department. Practical experience for students in a professional setting relating to geologic work. Counted as a free elective, not as a part of major or minor requirement. After completion of one internship, 4571 or GEOL 4572, the other may be taken (total of six credits).

GEOL 4572 - Internship in Geology
3 credit hours
Prerequisites: Major or minor in geology; 15 hours of geology/geography with junior or senior standing; permission of employer and department. Practical experience for students in a professional setting relating to geologic work. Counted as a free elective, not as a part of major or minor requirement. After completion of one internship, GEOL 4571 or 4572, the other may be taken (total of six credits).

GEOL 4580 - Seminar in Geology
1 credit hour
Prerequisite: Senior standing in geology. A reading and discussion seminar in which current topics in the geological sciences are examined to broaden the major's knowledge of the scope and literature of the discipline.

Physical Geography

PGEO 1030 - Physical Geography
4 credit hours
The physical earth as the home of humans. The global earth in space, tools of the discipline, the atmosphere, the hydrosphere, and the biosphere. Field trips may be required. Three hours lecture and two hours laboratory per week.
PGEO 3000 - Maps and Mapping
3 credit hours
Introduces the art of making maps. Examines the cartographic process of effective symbolization, generalization, and interpretive processes that produce effective visualization of geographic data.

PGEO 3401 - Field Studies in Physical Geography
4 credit hours
Supervised study in some geographical area, preceded by classroom preview and concluded by a time of evaluation. Emphasis on natural and cultural elements of the environment with special attention directed toward the pattern of human occupancy. For fees and specific credit, consult the instructor.

PGEO 4000 - Climatology and Climate Change
3 credit hours
Prerequisites: PGEO 1030 or GEOL 1030/GEOL 1031 or GEOL 1040/GEOL 1041. Non-mathematical introduction to the causes and patterns of global climates and in-depth analysis of climate change, including paleoclimatology and recent global cooling and warming trends, their natural and human-induced causes, potential future trends, human and environmental adaptation, and mitigation including geoengineering.

PGEO 4010 - Biogeography
3 credit hours
Prerequisites: PGEO 1030 or GEOL 1030/GEOL 1031 or GEOL 1040 GEOL 1041. Examines the science of biogeography, geographic principles, and foundations of biogeography. Topics include patterns of biodiversity, ecological biogeography, specialization and extinction forces, and the frontiers of biogeography.

PGEO 4020 - Environmental Issues, Impacts, and Sustainability
3 credit hours
Prerequisites: PGEO 1030 or GEOL 1030 GEOL 1031 or GEOL 1040 GEOL 1041. Examines the geographic aspects of how locations affect such modern issues of air and water pollution, hazardous waste, climate change, and food production. Provides an overview of the modern environmental concerns, their causes, consequences, and factors needing to be examined in order to gain an understanding of these problems.

PGEO 4280 - Special Topics and Problems in Physical Geography
1 to 6 credit hours
Prerequisite: Permission of department. Research participation or guided readings in a particular area or topic appropriate to the student's interest and professional objectives.

PGEO 4380 - Cartography
4 credit hours
General knowledge of the field including familiarity with the techniques and tools of professional cartography and graphics. Selected lectures, class discussions, and a series of map construction assignments. Three hours lecture and two hours laboratory per week.

PGEO 4490 - Remote Sensing
4 credit hours
The various aspects of remote sensing such as radar, satellite imagery, and infrared data. Use of data in preparation of maps and application to land use and environmental problems examined. Three hours lecture and two hours laboratory per week.

PGEO 4511 - Advanced Remote Sensing
3 credit hours
Prerequisite: PGEO 4490. Advanced topics in remote sensing including, but not limited to, active sensors (LiDAR and RADAR), hyperspectral, and spectroscopy. Three hours lecture/laboratory per week.
geographic information system (GIS) to problem solving.

PGEO 4560 - Intermediate Geographic Information Systems
3 credit hours
Prerequisite: PGEO 4530. Lecture and laboratory work related to the principles and applications of geographic information (GIS). Continued training in GIS analysis including raster analysis, spatial analysis, network analysis, and geocoding. Examines data management including data editing and geodatabase design and creation. Other topics include resource management, demographic, and civic applications.

PGEO 4570 - Advanced Geographic Information Systems
3 credit hours
Prerequisite: PGEO 4560; coursework in statistics and computer programming recommended. Advanced course in spatial analysis. Using spatial statistics, Visual Basic programming, and databases to solve problems involving proximity, density, clustering, the cost of travel paths, etc. Other major topics include environmental modeling and error analysis.

PGEO 4571 - Internship in Physical Geography
3 credit hours
Prerequisites: Permission of department; major or minor in geography. Practical experience for students in a professional setting relating to geographic work. Counted as a free elective, not part of major or minor requirements. After completion of one internship, 4571 or GEOG 4572, the other may be taken (total of 6 credits).
Mathematical Sciences

Donald A. Nelson, Chair

Adamson, Barnwal, Barlow, Bleiler, Calahan, Chappell, Ding, Green, Hamlin, Hart, Havener, Hong, Huang, Khaliq, Kimmins, Krishnamani, Leander, Lischka, Martin, McCormick, Melnikov, Murdock, Quinn, Reng, Ring, Rowell, Schmidt, Sinkala, Stephens, Strayer, Tenpenny, Truitt, Walsh, Wang, Worsey, Wu, Ye, Zha, Zhang, Zijlstra

The purpose of the Department of Mathematical Sciences is to provide students education in the mathematical sciences necessary to function and succeed in an increasingly complex, technological world. Courses offered by the department are designed to prepare students who plan to enter graduate schools or professional schools of medicine or engineering; to teach in elementary schools, secondary schools, or community colleges; to major in mathematics, in computer science, in the natural or physical sciences, or in other areas with mathematics requirements; or to enter careers in business, industry, or government. Courses also are provided to meet cultural and General Education requirements. Programs in the department lead to the Bachelor of Science degree with a major in Actuarial Science or Mathematics. Mathematics major students choose one of the following concentrations: Professional Mathematics or Mathematics Education. Minors are offered in Mathematics; in Mathematics for Managerial, Social, and Life Sciences; and in Statistics.

Honors College

MATH 1730, MATH 1910, and MATH 1920 are offered regularly for students in the University Honors College. Upon request by the Honors College, MATH 1010 and MATH 1710 are offered. MATH 4600 can also be offered as an Honors course.

Graduate Study

The Master of Science and Master of Science in Teaching degrees are offered in mathematics. A minor in Mathematics is offered for the master's degree. Requirements for these degrees and a list of the courses offered for graduate credit are in the Graduate Catalog.
Mathematics for Managerial, Social, and Life Sciences Minor

Department of Mathematical Sciences
A minor in Mathematics for Managerial, Social, and Life Sciences consists of 18 semester hours. A student may count BIA 2610 and BIA 3620 for the 3-hour MATH 2050 course and may count either CSCI 1160 or CSCI 1170 as one 3-hour course. All courses in the Mathematics for Managerial, Social, and Life Sciences minor must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Mathematics for Managerial, Social, and Life Sciences minor must be completed with a grade of C (2.00) or better and be approved by the department chair.

Required Course (3 hours)
- MATH 1810 - Applied Calculus I 3 credit hours OR
- MATH 1910 - Calculus I 4 credit hours

Electives (15 hours)
- MATH 1630 - College Mathematics for Managerial, Social, and Life Sciences 3 credit hours * OR
- MATH 1730 - Pre-Calculus 4 credit hours *
- MATH 1920 - Calculus II 4 credit hours
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3120 - Differential Equations I 3 credit hours
- MATH 3260 - Differential Equations II 3 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- any upper-level statistics or actuarial science course

NOTE:
*At most one of MATH 1630 or MATH 1730 may be counted for the minor.

Mathematics Minor

Department of Mathematical Sciences
A minor in Mathematics consists of 18 semester hours. All courses in the Mathematics minor must be completed with a grade of C (2.0) or better. All courses transferred from other institutions for credit in the Mathematics minor must carry a grade of C (2.0) or better and be approved by the department chair. Students must complete at least 3 semester hours at the upper-division level in the minor through MTSU.

Required Courses (8 hours)
- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours

Electives 10 hours
Must be selected with the approval of the Mathematics minor advisor.
Mathematics, Actuarial Science Concentration, B.S.

Department of Mathematical Sciences
615-898-2669
Don Hong, program coordinator
Don.Hong@mtsu.edu

A major in Mathematics requires the mathematics core of 21 hours plus 15 hours of specified upper-level courses in the department and at least 12 hours of supporting coursework (either in or out of the department). The supporting coursework must complement the student's program and be approved by the advisor. Each Mathematics major is required to complete MATH 4990. All courses in the Mathematics major or minor (including supporting coursework) must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Mathematics major or minor must carry a grade of C (2.00) or better and be approved by the department chair.

The Actuarial Science concentration is designed for students who have a strong mathematical ability with an interest in applying their mathematical knowledge to insurance, finance, risk management, investments, and other areas of business. The program is classified by the Society of Actuaries (SOA) as an Advanced Undergraduate Actuarial Science program and is in complete compliance with the requirements set forth by the Society of Actuaries and the Casualty Actuarial Society (CAS) in the Year 2000 Syllabus and beyond. Therefore, the student can choose coursework necessary to prepare for the SOA/CAS Course/Exams 1 through 4 and SOA Course 6.

Mathematics majors preparing for the actuarial examination series and an actuarial science career should complete this professional program in Actuarial Science. The program requires that the student complete the mathematics core; upper-division actuarial science courses consisting of ACSI 4140, ACSI 4220, ACSI 4230, ACSI 4330, and two elective courses chosen from ACSI 4240, ACSI 4340, ACSI 4630, ACSI 4640 and STAT 4200; and supporting coursework consisting of STAT 4190 and STAT 4320 and MATH 4990. The student is required to complete ACTG 3000, ECON 2410, ECON 2420, and FIN 3610. A minor from the Jennings A. Jones College of Business is required. A minor in Insurance is strongly suggested. A Computer Science or Information Systems elective and CSCI 1170 are required.

The following specialized courses do not count toward a Mathematics major or minor: MATH 1010, MATH 1410, MATH 1420, MATH 1530, MATH 1630, MATH 1710, MATH 1720, MATH 1730, MATH 1810, and MATH 4010. However, MATH 1630, MATH 1730, and MATH 1810 may count toward a minor in Mathematics for Managerial, Social, and Life Sciences.

Mathematics Core (21 hours)

Each student majoring in the department must complete the following core (21 hours):

- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours OR
- STAT 3150 - Mathematical Statistics I 3 credit hours

NOTE:

Students with a major in Actuarial Science may substitute STAT 3150 for MATH 2010 and MATH 2050; and ACSI 4200 for MATH 3460.
Curriculum: Mathematics, Actuarial Science

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- CSCI 1170 - Computer Science I 4 credit hours
- Natural Sciences (2 prefixes) 8 credit hours
- Humanities and/or Fine Arts 3 credit hours

Subtotal: 29 Hours

Sophomore

- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- Humanities and/or Fine Arts 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- ECON 2410 - Principles of Economics, Macroeconomics 3 credit hours (Soc/Beh Sci)
- ECON 2420 - Principles of Economics, Microeconomics 3 credit hours
- ACSI 4200 - Introduction to Mathematics of Investment 3 credit hours
- ACSI 4220 - Mathematics of Pricing Theory 3 credit hours
  Choose 6 hours from:
  - HIST 2010 - Survey of United States History I 3 credit hours OR
  - HIST 2020 - Survey of United States History II 3 credit hours OR
  - HIST 2030 - Tennessee History 3 credit hours

Subtotal: 31 Hours

Junior

- STAT 3150 - Mathematical Statistics I 3 credit hours
- STAT 4190 - Mathematical Statistics II 3 credit hours
- ACSI 4140 - Mathematical Foundations of Actuarial Science 3 credit hours
- ACSI 4230 - Mathematics of Compound Interest 3 credit hours
- ACSI 4330 - Actuarial Mathematics I 3 credit hours
- ACTG 3000 - Survey of Accounting for General Business 3 credit hours
- FIN 3610 - General Insurance 3 credit hours
- Elective 3 credit hours
• Minor 3 credit hours
• CSCI/INFS elective 3 credit hours (approved by advisor)

Subtotal: 30 Hours

Senior

• STAT 4320 - Probability and Stochastic Processes 3 credit hours
• MATH 4990 - Seminar in Mathematics 3 credit hours
• STAT/ACSI electives 6 credit hours
• Minor courses 12 credit hours
• Electives 3 credit hours
• Social/Behavioral Sciences 3 credit hours

Subtotal: 30 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Mathematics, Actuarial Science, B.S., Academic Map
Mathematics, Mathematics Education Concentration, B.S.

Department of Mathematical Sciences
615-898-2669
Michael Beck, program coordinator
Michael.Beck@mtsu.edu

A major in Mathematics requires the mathematics core of 21 hours plus 15 hours of specified upper-level courses in the department and at least 12 hours of supporting coursework (either in or out of the department). The supporting coursework must complement the student's program and be approved by the mathematics advisor. A single minor outside the department is required.

Each Mathematics major is required to declare a concentration. Concentrations include Professional Mathematics, Mathematics Education, and Actuarial Science.

Each Mathematics major is required to complete the Seminar in Mathematics, MATH 4990. All courses in the Mathematics major or minor (including supporting coursework) must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Mathematics major or minor must carry a grade of C (2.00) or better and be approved by the department chair.

Students preparing to teach mathematics at the secondary level (grades 7-12) must complete the major in Mathematics with a concentration in Mathematics Education. In addition to the mathematics core, they must take as upper-division coursework MATH 3070, MATH 4510, MATH 4620, MATH 4990, and one elective in the department. Supporting coursework consists of MATH 3320, MATH 3330, MATH 4540, CSCI 1160, and MATH 4740. A minor in Secondary Education through MTeach is required. Students seeking state licensure must also pass all applicable portions of the Praxis Series Exams, developed and administered by the Educational Testing Service. For the latest information regarding these exams contact the Office of Testing Services (898-2863). To complete their programs of study in a timely manner, students must consult their major and minor advisors each semester.

The following specialized courses do not count toward a Mathematics major or minor: MATH 1010, MATH 1410, MATH 1420, MATH 1530, MATH 1630, MATH 1710, MATH 1720, MATH 1730, MATH 1810, and MATH 4010. However, MATH 1630, MATH 1730, and MATH 1810 may count toward a minor in Mathematics for Managerial, Social, and Life Sciences.

Mathematics Core (21 hours)

Each student majoring in the department must complete the following core (21 hours):

- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours OR
- STAT 3150 - Mathematical Statistics I 3 credit hours

Curriculum: Mathematics, Mathematics Education

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.

Freshman

- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- Humanities and/or Fine Arts 3 credit hours
- Natural Sciences (2 prefixes) 8 credit hours
- Social/Behavioral Sciences 3 credit hours
- MSE 1010 - Step 1: Inquiry Approaches to Teaching 1 credit hour
- MSE 2010 - Step 2: Inquiry Lesson Design 1 credit hour

Subtotal: 30 Hours

Sophomore

- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- CSCI 1160 - Introduction to Computing: A Multimedia Approach 4 credit hours
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)

Academic Map

Following is a printable, suggested four-year schedule of courses:
Mathematics, Mathematics Education, B.S., Academic Map
Mathematics, Professional Mathematics Concentration (Advanced Mathematics), B.S.

Department of Mathematical Sciences
615-898-2669
Don Nelson, program coordinator
Donald.Nelson@mtsu.edu

A major in Mathematics requires the mathematics core of 21 hours plus 15 hours of specified upper-level courses in the department and at least 12 hours of supporting coursework (either in or out of the department). The supporting coursework must complement the student's program and be approved by the mathematics advisor.

Each Mathematics major is required to declare a concentration. Concentrations include Professional Mathematics, Mathematics Education, and Actuarial Science.

Each Mathematics major is required to complete the Seminar in Mathematics, MATH 4990. All courses in the Mathematics major or minor (including supporting coursework) must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Mathematics major or minor must carry a grade of C (2.00) or better and be approved by the department chair.

Students opting to study the discipline of mathematics will choose between tracks in general mathematics, advanced mathematics, business, statistics, and industrial mathematics. In addition to the mathematics core, they will take 9 additional upper-level courses in the department chosen with the approval of the mathematics advisor. A single minor outside of the department and CSCI 1170 are required.

The following specialized courses do not count toward a Mathematics major or minor: MATH 1010, MATH 1410, MATH 1420, MATH 1530, MATH 1630, MATH 1710, MATH 1720, MATH 1730, MATH 1810, and MATH 4010. However, MATH 1630, MATH 1730, and MATH 1810 may count toward a minor in Mathematics for Managerial, Social, and Life Sciences.

Advanced Mathematics Track

Students interested in preparing for a graduate degree in mathematics should pursue this track. In addition to the mathematics core, they must take MATH 3120, MATH 4250, MATH 4510; two courses from MATH 3260, MATH 4230, MATH 4270, MATH 4420, MATH 4530, MATH 4700; and 9 hours of approved supporting coursework chosen from among upper-level courses in the department. The program must include at least one sequence in either algebra (MATH 4420/MATH 4510), analysis (MATH 4230-MATH 4250), or differential equations (MATH 3120-MATH 3260). Six hours of a foreign language are recommended.

Mathematics Core (21 hours)

Each student majoring in the department must complete the following core (21 hours):

- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours OR
- STAT 3150 - Mathematical Statistics I 3 credit hours

Curriculum: Mathematics, Professional Mathematics (Advanced Mathematics)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.
Freshman

A major in Mathematics requires the mathematics core of 21 hours plus 15 hours of specified upper-level courses in the department and at least 12 hours of supporting coursework (either in or out of the department). The supporting coursework must complement the student's program and be approved by the mathematics advisor. Each Mathematics major is required to declare a concentration. Concentrations include Professional Mathematics, Mathematics Education, and Actuarial Science. Each Mathematics major is required to complete the Seminar in Mathematics, MATH 4990. All courses in the Mathematics major or minor (including supporting coursework) must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Mathematics major or minor must carry a grade of C (2.00) or better and be approved by the department chair. Students opting to study the discipline of mathematics will choose between tracks in general mathematics, advanced mathematics, business, statistics, and industrial mathematics. In addition to the mathematics core, they will take 9 additional upper-level courses in the department chosen with the approval of the mathematics advisor. A single minor outside of the department and CSCI 1170 are required. The following specialized courses do not count toward a Mathematics major or minor: MATH 1010, MATH 1410, MATH 1420, MATH 1530, MATH 1630, MATH 1710, MATH 1720, MATH 1730, MATH 1810, and MATH 4010. However, MATH 1630, MATH 1730, MATH 1810, and may count toward a minor in Mathematics for Managerial, Social, and Life Sciences.

Business Track
This track is appropriate for students who seek a broad background from such diverse but mutually supportive areas as mathematics, statistics, computer science, and business. The program offers preparation for the job market or for further study in the more specialized areas of actuarial science, operations research, statistics, computer science, or finance. In addition to the mathematics core, students pursuing this track must take STAT 4190, ACSI 4200, and either STAT 4200 or STAT 4360. The supporting coursework consists of 11 hours of computer science or information systems courses. The student must complete a minor in the Jennings A. Jones College of Business as well as ACTG 2110 and ACTG 2120 or ACTG 3000 and ECON 2410, ECON 2420.

Mathematics Core (21 hours)
Each student majoring in the department must complete the following core (21 hours):

- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours OR
- STAT 3150 - Mathematical Statistics I 3 credit hours

Curriculum: Mathematics, Professional Mathematics (Business)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories.
Students should consult their advisors each semester to plan their schedules.

**Freshman**
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- Humanities and/or Fine Arts 3 credit hours
- Social/Behavioral Sciences 3 credit hours
- Natural Sciences 4 credit hours
- CSCI/INFS/BIA electives 7 credit hours

Subtotal: 31 Hours

**Sophomore**
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- ECON 2410 - Principles of Economics, Macroeconomics 3 credit hours (Soc/Beh Sci)
- ECON 2420 - Principles of Economics, Microeconomics 3 credit hours
- Natural Sciences 4 credit hours
- Elective 3 credit hours
  Choose 6 hours from:
  - HIST 2010 - Survey of United States History I 3 credit hours OR
  - HIST 2020 - Survey of United States History II 3 credit hours OR
  - HIST 2030 - Tennessee History 3 credit hours

Subtotal: 32 Hours

**Junior**
- STAT 4190 - Mathematical Statistics II 3 credit hours
- Minor or elective courses 6 credit hours
- CSCI/INFS/BIA elective 4 credit hours
- STAT 3150 - Mathematical Statistics I 3 credit hours OR
- MATH 2050 - Probability and Statistics 3 credit hours
- ACSI 4200 - Introduction to Mathematics of Investment 3 credit hours OR
- MATH 4200 - Introduction to Mathematics of Investment 3 credit hours OR
- ACTG 3000 - Survey of Accounting for General Business 3 credit hours OR
  - ACTG 2110 - Principles of Accounting I 3 credit hours AND
  - ACTG 2120 - Principles of Accounting II 3 credit hours
• ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
• ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
• HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)

Subtotal: 25 Hours

Senior

• STAT 4200 - Statistical Methods for Forecasting 3 credit hours OR
• STAT 4360 - Regression Analysis 3 credit hours
• MATH 4990 - Seminar in Mathematics 3 credit hours
• Humanities and/or Fine Arts 3 credit hours
• Minor or elective courses 12 credit hours
• Electives 5 credit hours
• ACSI/STAT electives* 6 credit hours

Subtotal: 32 Hours

Total hours in program: 120

NOTE:

*Choose from ACSI 4220, ACSI 4230, ACSI 4630, ACSI 4640, STAT 4320, or STAT 4380.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Mathematics, Professional Mathematics (Business), B.S., Academic Map
Mathematics, Professional Mathematics Concentration (General Mathematics), B.S.

Department of Mathematical Sciences
615-898-2669
Don Nelson, program coordinator
Donald.Nelson@mtsu.edu

A major in Mathematics requires the mathematics core of 21 hours plus 15 hours of specified upper-level courses in the department and at least 12 hours of supporting coursework (either in or out of the department). The supporting coursework must complement the student's program and be approved by the mathematics advisor.

Each Mathematics major is required to declare a concentration. Concentrations include Professional Mathematics, Mathematics Education, and Actuarial Science.

Each Mathematics major is required to complete the Seminar in Mathematics, MATH 4990. All courses in the Mathematics major or minor (including supporting coursework) must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Mathematics major or minor must carry a grade of C (2.00) or better and be approved by the department chair.

Students opting to study the discipline of mathematics will choose between tracks in general mathematics, advanced mathematics, business, statistics, and industrial mathematics. In addition to the mathematics core, they will take 9 additional upper-level courses in the department chosen with the approval of the mathematics advisor. A single minor outside of the department and CSCI 1170 are required.

The following specialized courses do not count toward a Mathematics major or minor: MATH 1010, MATH 1410, MATH 1420, MATH 1530, MATH 1630, MATH 1710, MATH 1720, MATH 1730, MATH 1810, and MATH 4010.

However, MATH 1630, MATH 1730, MATH 1810, and may count toward a minor in Mathematics for Managerial, Social, and Life Sciences.

General Mathematics Track

Students desiring a broad general background in mathematics should pursue this track. In addition to the mathematics core, they must take MATH 3120, MATH 4510; three additional courses from MATH 3260, MATH 4230, MATH 4250, MATH 4270, MATH 4310, MATH 4320, MATH 4420, MATH 4530, MATH 4700 and STAT 3150, STAT 4190; and 9 hours of approved supporting coursework chosen from among upper-level courses in the department.

Mathematics Core (21 hours)

Each student majoring in the department must complete the following core (21 hours)

- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours OR
- STAT 3150 - Mathematical Statistics I 3 credit hours

Curriculum: Mathematics, Professional Mathematics (General Mathematics)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.
Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- CSCI 1170 - Computer Science I 4 credit hours
- Natural Sciences 4 credit hours
- Humanities and/or Fine Arts 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours OR
- STAT 3150 - Mathematical Statistics I 3 credit hours
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 31 Hours

Sophomore

- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3120 - Differential Equations I 3 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- Minor or elective courses 9 credit hours
- Natural Sciences 4 credit hours
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 32 Hours

Junior

- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- MATH 4510 - Abstract Algebra I 3 credit hours
- MATH/STAT electives* 6 credit hours
- Social/Behavioral Sciences (2 rubrics) 6 credit hours
- Minor or elective courses 6 credit hours
- MATH UD elective 3 credit hours

Subtotal: 27 Hours
Senior

- MATH 4990 - Seminar in Mathematics 3 credit hours
- MATH/STAT elective 3 credit hours
- Humanities and/or Fine Arts 3 credit hours
- MATH UD electives 6 credit hours
- Electives 12 credit hours
- Minor or elective course 3 credit hours

Subtotal: 30 Hours

Total hours in program: 120

NOTE:

*Choose from MATH 3260, MATH 4230, MATH 4250, MATH 4270, MATH 4310, MATH 4320, MATH 4420, MATH 4530, MATH 4700, STAT 3150, STAT 4190.

Academic Map

Following is a printable, suggested four-year schedule of courses:

Mathematics, Professional Mathematics (General), B.S., Academic Map
Mathematics, Professional Mathematics Concentration (Industrial Mathematics), B.S.

Department of Mathematical Sciences
615-898-2669
Don Nelson, program coordinator
Donald.Nelson@mtsu.edu

A major in Mathematics requires the mathematics core of 21 hours plus 15 hours of specified upper-level courses in the department and at least 12 hours of supporting coursework (either in or out of the department). The supporting coursework must complement the student’s program and be approved by the mathematics advisor.

Each Mathematics major is required to declare a concentration. Concentrations include Professional Mathematics, Mathematics Education, and Actuarial Science.

Each Mathematics major is required to complete the Seminar in Mathematics, MATH 4990. All courses in the Mathematics major or minor (including supporting coursework) must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Mathematics major or minor must carry a grade of C (2.00) or better and be approved by the department chair.

Students opting to study the discipline of mathematics will choose between tracks in general mathematics, advanced mathematics, business, statistics, and industrial mathematics. In addition to the mathematics core, they will take 9 additional upper-level courses in the department chosen with the approval of the mathematics advisor. A single minor outside of the department and CSCI 1170 are required.

The following specialized courses do not count toward a Mathematics major or minor: MATH 1010, MATH 1410, MATH 1420, MATH 1530, MATH 1630, MATH 1710, MATH 1720, MATH 1730, MATH 1810, and MATH 4010. However, MATH 1630, MATH 1730, MATH 1810, and may count toward a minor in Mathematics for Managerial, Social, and Life Sciences.

Industrial Mathematics Track

The industrial mathematics track offers students a program of study that incorporates the areas of mathematics that contribute to business and industry. Coursework is designed to produce graduates who have strong qualifications that make them competitive for positions in industry and provides a solid foundation for students interested in pursuing graduate study in the area. The minor must be chosen from Computer Science, Physics, Chemistry, Biology, Aerospace, or Engineering Technology.

In addition to the mathematics core, students pursuing this track must take MATH 3120, MATH 3260, MATH 4250, and MATH 4310. Required supporting coursework includes CSCI 1170 and CSCI 2170. Nine additional hours of supporting coursework must be chosen with the approval of the mathematics advisor from MATH 4601, MATH 4230, MATH 4270, MATH 4320, MATH 4700 and STAT 4190.

Mathematics Core (21 hours)

Each student majoring in the department must complete the following core (21 hours):

- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours OR
- STAT 3150 - Mathematical Statistics I 3 credit hours
Curriculum: Mathematics, Professional Mathematics (Industrial Mathematics)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.

**Freshman**
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- CSCI 1170 - Computer Science I 4 credit hours
- CSCI 2170 - Computer Science II 4 credit hours
- Natural Sciences 4 credit hours
- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 32 Hours

**Sophomore**

• STAT 3150 - Mathematical Statistics I 3 credit hours
• HIST 2010 - Survey of United States History I 3 credit hours OR
• HIST 2020 - Survey of United States History II 3 credit hours OR
• HIST 2030 - Tennessee History 3 credit hours

Subtotal: 30 Hours

Senior

• MATH 4310 - Numerical Analysis I 3 credit hours
• MATH 4990 - Seminar in Mathematics 3 credit hours
• MATH/STAT electives 9 credit hours
• Minor or elective courses 6 credit hours
• Humanities and/or Fine Arts 3 credit hours
• Electives 4 credit hours

Subtotal: 28 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Mathematics, Professional Mathematics (Industrial), B.S., Academic Map
Mathematics, Professional Mathematics Concentration (Statistics), B.S.

Department of Mathematical Sciences
615-898-2669
Don Nelson, program coordinator
Donald.Nelson@mtsu.edu

A major in Mathematics requires the mathematics core of 21 hours plus 15 hours of specified upper-level courses in the department and at least 12 hours of supporting coursework (either in or out of the department). The supporting coursework must complement the student's program and be approved by the mathematics advisor.

Each Mathematics major is required to declare a concentration. Concentrations include Professional Mathematics, Mathematics Education, and Actuarial Science.

Each Mathematics major is required to complete the Seminar in Mathematics, MATH 4990. All courses in the Mathematics major or minor (including supporting coursework) must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Mathematics major or minor must carry a grade of C (2.00) or better and be approved by the department chair.

Students opting to study the discipline of mathematics will choose between tracks in general mathematics, advanced mathematics, business, statistics, and industrial mathematics. In addition to the mathematics core, they will take 9 additional upper-level courses in the department chosen with the approval of the mathematics advisor. A single minor outside of the department and CSCI 1170 are required.

The following specialized courses do not count toward a Mathematics major or minor: MATH 1010, MATH 1410, MATH 1420, MATH 1530, MATH 1630, MATH 1710, MATH 1720, MATH 1730, MATH 1810, and MATH 4010. However, MATH 1630, MATH 1730, MATH 1810, and may count toward a minor in Mathematics for Managerial, Social, and Life Sciences.

Statistics Track

The statistics track offers students a program of study in one of the broadest areas of applied mathematics. Statistical methods are used in many fields, including agriculture, business, communications, government, health, industry, public policy, sports, and science. Courses provide students the opportunity to learn data analysis and to develop skills in statistical methods of wide application. Emphasizing a blend of theory and practice, the program is designed to provide students with the necessary background for employment as statisticians in the public or private sector and to provide a solid foundation for those students interested in graduate studies.

In addition to the mathematics core, students pursuing this track must take STAT 3150 and STAT 4190; MATH 4990; and two courses from STAT 4200, STAT 4320, STAT 4360, STAT 4370, STAT 4380. One minor outside the department is required. Students also complete supporting coursework of 20 hours that complement the student's program chosen with approval of the statistics advisor. These courses include computing, information systems, and other relevant courses.

Mathematics Core (21 hours)

Each student majoring the department must complete the following core (21 hours).

- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 2010 - Elements of Linear Algebra 3 credit hours
- MATH 3110 - Calculus III 4 credit hours
- MATH 3460 - Foundation of Higher Mathematics 3 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours OR
- STAT 3150 - Mathematical Statistics I 3 credit hours
Curriculum: Mathematics, Professional Mathematics (Statistics)

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Students should consult their advisors each semester to plan their schedules.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours

- STAT elective** 3 credit hours
- Supporting courses* 8 credit hours
- Minor or elective courses 6 credit hours
- Humanities and/or Fine Arts 3 credit hours
- Electives 8 credit hours

Subtotal: 31 Hours

Total hours in program: 120

NOTE:

*Courses, chosen with approval of statistics advisor, include computing, information systems, and other relevant courses.

**STAT 4200, STAT 4320, STAT 4360, STAT 4370, STAT 4380

Academic Map

Following is a printable, suggested four-year schedule of courses:
Mathematics, Professional Mathematics (Statistics), B.S., Academic Map
Statistics Minor

Department of Mathematical Sciences
A minor in Statistics requires 18 semester hours. Additionally, with advisor approval, one semester of calculus may be counted as the elective course. All courses in the Statistics minor must be completed with a grade of C (2.00) or better. All courses transferred from other institutions for credit in the Statistics minor must carry a grade of C (2.00) or better and be approved by the department chair. Students must complete at least 3 semester hours at the upper-division level in the minor through MTSU.

Required Courses (15 hours)

- STAT 3150 - Mathematical Statistics I 3 credit hours
- STAT 4190 - Mathematical Statistics II 3 credit hours *
- STAT 4360 - Regression Analysis 3 credit hours *
- STAT 4370 - Nonparametric Statistics 3 credit hours *
- STAT 4380 - Experimental Design 3 credit hours *

*May substitute MATH 2050 with advisor approval

Elective (3 hours)

One course selected from

- MATH 3120 - Differential Equations I 3 credit hours
- MATH 3260 - Differential Equations II 3 credit hours
- MATH 4310 - Numerical Analysis I 3 credit hours
- MATH 4320 - Numerical Analysis II 3 credit hours
- CSCI 3180 - Introduction to Numerical Analysis 3 credit hour
Actuarial Sciences

ACSI 4140 - Mathematical Foundations of Actuarial Science
3 credit hours
Prerequisites: MATH 3020 (or MATH 3110) and STAT 3150; or consent of instructor. Integrates calculus, probability, and risk management topics into fundamental tools for assessing risk in an actuarial environment. Calculus and probability topics include derivatives, integrals, partials, random variables, distributions, and conditional probability. Risk topics include frequency and severity. Insurance concepts such as retention, deductible, coinsurance, and risk premiums. For students in Actuarial Science, a preparatory course for the Society of Actuaries/Casualty Actuarial Society Course/Exam 1.

ACSI 4200 - Introduction to Mathematics of Investment
3 credit hours
(Same as MATH 4200.) Prerequisites: MATH 1910 and one semester of probability/statistics; or consent of instructor. Calculus and probability/statistics used to model and analyze investments in bonds, treasury bills, stocks, and other derivatives. Topics include obtaining the price of a bond as a function of interest rate, developing formulas for duration and convexity to study the sensitivity of price to interest rate, and mathematical modeling of investor preference and attitude toward risk.

ACSI 4220 - Mathematics of Pricing Theory
3 credit hours
Prerequisites: ACSI 4200/MATH 4200 and ECON 2410, ECON 2420; or consent of instructor. Applies calculus and theory of interest tools to intermediate topics in microeconomics. Topics include mathematics of supply, demand, and equilibrium; prices, costs, and the gains from trade; consumer behavior; elasticities; competition; monopoly; market power, collusion, and oligopoly; the mathematics of risk and uncertainty; and surplus economics. For students in Actuarial Science, a preparatory course for the Society of Actuaries/Casualty Actuarial Society Course/Exam 2.

ACSI 4230 - Mathematics of Compound Interest
3 credit hours
Prerequisite: ACSI 4200/MATH 4200 or consent of instructor. For students in Actuarial Science, offers preparation for the Society of Actuaries/Casualty Actuarial Society Exam 2. Topics include measurement of interest (including accumulated and present value factors), annuities certain, yield rates, amortization schedules, sinking funds, and bonds and related securities.

ACSI 4240 - Mathematics of Interest Theory, Economics and Finance
3 credit hours
Prerequisite: ACSI 4230 or consent of instructor. Applies calculus and theory of interest tools to intermediate topics in microeconomics and macroeconomics and topics in finance. Topics include pricing activities, the simplified Keynesian model, interest and discount rates, valuation of payment streams, yield rates, amortization, cash flows and internal rate of return, stock and bond valuation, portfolio risks, the Capital Asset Pricing Model (CAPM), efficient markets, capital structure, leverage, financial performance measurement, and basic option pricing and the Black-Scholes model. For students in Actuarial Science, a preparatory course for the Society of Actuaries/Casualty Actuarial Society Course/Exam 2.

ACSI 4280 - Undergraduate Research
1 to 4 credit hours
Prerequisite: Permission of department. Independent investigation of a selected research problem under the guidance of a faculty member resulting in an oral and written report of results. May be repeated for a maximum of four credits.

ACSI 4330 - Actuarial Mathematics I
3 credit hours
Prerequisites: ACSI 4230 and STAT 4190; or consent of instructor. First of a two-semester sequence; offers preparation for the Society of Actuaries/Casualty Actuarial Society Course/Exam 3. Topics include survival distributions and life tables, life insurance, life annuities, and net premiums.

ACSI 4340 - Actuarial Mathematics II
3 credit hours
Prerequisite: ACSI 4330. Second of a two-semester sequence; offers preparation for the Society of Actuaries/Casualty Actuarial Society Course/Exam 3. Topics chosen from net premium reserves, multiple life functions, multiple decrement models, valuation theory and pension plans, and insurance models (including expenses and nonforfeiture benefits and dividends).
ACSI 4600 - Problems in Actuarial Science  
1 to 6 credit hours  
Prerequisites: Senior standing and consent of instructor.  
Students wishing to enroll must submit a written course/topic proposal to the department prior to the semester in which ACSI 4600 is taken.  
Proposal must be approved prior to taking the course.  
At the conclusion, each enrollee must submit a written report to the department.

ACSI 4630 - Mathematics of Risk Management  
3 credit hours  
(Only as MATH 4630.) Prerequisite: ACSI 4200/MATH 4200. For students in Actuarial Science, offers preparation for the Society of Actuaries/Casualty Actuarial Society Course 6. Topics include mathematical modeling of volatility; pricing of bonds, stocks, and other derivatives with uncertainty; benchmark portfolios; asset/liability management for property/casualty insurers; liability associated with a financially distressed company. Heath-Jarrow-Morton and Cox-Ingersoll-Ross models.

ACSI 4640 - Mathematics of Options, Futures, and Other Derivatives  
3 credit hours  
(Only as MATH 4640.) Prerequisites: ACSI 4630/MATH 4630 and ACSI 4200/MATH 4200. For students in Actuarial Science, offers preparation for the Society of Actuaries/Casualty Actuarial Society Course 6. Topics include risk management using options, interest rate swaps, interest rate caps, Black-Scholes analysis, Taylor series expansion to obtain hedge parameters, portfolio insurance, numerical procedures, interest rate derivatives, and use of Black's model.

Mathematics

MATH 0990 - Basic Geometry  
3 credit hours  
Plane and solid geometry including measurement formulas, properties of plane figures, proof techniques, symmetry, congruency, and construction. Open only to those lacking required high school geometry course for unconditional admission to University.

MATH 1000 - Essentials of Mathematics  
3 credit hours  
The practices of learning mathematics. Required for students whose ACT Mathematics score is 15-16 or whose mathematics assessment indicates placement.

Emphasis on problem solving, critical thinking, math study skills, and solving and graphing linear equations and inequalities. Course will meet for three hours in the classroom and will have a required two-hour lab component, which will include structured online activities. Does not fulfill General Education Mathematics requirement.

MATH 1010 - Mathematics for General Studies  
3 credit hours  
Prerequisites: Two years of high school algebra and a Math Enhanced ACT of at least 19 or DSPM 0850 or COMPASS placement. Course satisfies the General Education Mathematics requirement and is also part of the mathematics sequence for students preparing to become elementary school teachers. Topics include logic, sets, algebraic reasoning, probability, statistics, and consumer mathematics.

MATH 1020 - Mathematics Colloquium  
1 credit hour  
Introduces new mathematical sciences students to the mathematics major. Topics include degree requirements, faculty resources, technological resources, research opportunities, and career options. About half of the meetings will involve one hour in-class lectures and activities, and half will involve attending talks, some of which may occur outside the scheduled class meeting time.

MATH 1410 - Concepts and Structure of Elementary School Mathematics  
3 credit hours  
Prerequisites: Two years of high school algebra and a Math Enhanced ACT of at least 19 or DSPM 0850 or COMPASS placement. Algebra-based study of school mathematics in keeping with the recommendations of the National Council of Teachers of Mathematics. Tools for problem solving, set theory, functions, number theory, and examinations of number systems from counting numbers to irrational numbers.

MATH 1420 - Informal Geometry  
3 credit hours  
Prerequisite: A grade of C or better in MATH 1410. Geometry-based study of school mathematics in keeping with the recommendations of the National Council of Teachers of Mathematics. Studies of plane, solid, coordinate, and motion geometry as well as constructions, congruence, similarity, and concepts of measurement. A variety of instructional technology tools investigated.
MATH 1530 - Applied Statistics
3 credit hours
Prerequisites: Two years of high school algebra and a Math Enhanced ACT 19 or greater or equivalent. Descriptive statistics, probability, and statistical inference. The inference unit covers means, proportions, and variances for one and two samples, and topics from one-way ANOVA, regression and correlation analysis, chi-square analysis, and nonparametrics.

MATH 1630 - College Mathematics for Managerial, Social, and Life Sciences
3 credit hours
Prerequisites: Two years of high school algebra and a Math Enhanced ACT greater than 25 or MATH 1710. Topics include solving systems of linear equations, Leontief models, linear programming, mathematics of finance, set theory, and probability theory.

MATH 1710 - College Algebra
3 credit hours
Prerequisite: DSPM 0850 or two years of high school algebra; a Math Enhanced ACT 19 or greater or COMPASS placement. Course satisfies the General Education Mathematics requirement. Topics include functions—linear, quadratic, exponential, and logarithmic; analysis of graphs; linear systems; inequalities; counting principles; and probability. Graphing calculator required. Course may be taken by correspondence. Not open to those who have had MATH 1730.

MATH 1720 - Plane Trigonometry
3 credit hours
Prerequisite: Strong background in algebra recommended. Trigonometric functions of the acute and general angle, circular functions, graphs of trigonometric and inverse functions, identities, solutions of right and general triangles, equations, complex numbers, and vectors. Not open to those who have had MATH 1730. Graphing calculator required.

MATH 1730 - Pre-Calculus
4 credit hours
Prerequisite: MATH 1710 or successful completion of high school precalculus course. An integrated and rigorous study of the algebra and trigonometry needed to successfully attempt calculus. Emphasis on functions, their analysis and their applications. Level of algebraic sophistication developed above that found in MATH 1710. Topics include exponentials and logarithms, analysis of graphs, and word problems. Graphing calculator required.

MATH 1810 - Applied Calculus I
3 credit hours
Prerequisite: Eligibility to take MATH 1710. First of a four-course sequence. Introduces mathematical modeling applied to real-world problems. Sets, functions, inverse models, limits, continuity, first and second order model building, single variable differentiation, implicit differentiation, inverse problems (exponential and log models). First and second derivatives used to study the behavior of real-world applications.

MATH 1910 - Calculus I
4 credit hours
Prerequisite: MATH 1730 with a grade of C or better or Math ACT of 26 or better or Calculus placement test score of 73 or better. An introduction to calculus with an emphasis on analysis of functions, multidisciplinary applications of calculus, and theoretical understanding of differentiation and integration. Topics include the definition of the derivative, differentiation techniques, and applications of the derivative. Calculus topics related to trigonometric, exponential, and logarithmic functions also included. Course concludes with the fundamental theorem of calculus; the definition of antiderivative and the definite integral; basic applications of integrations; and introductory techniques of integration. Graphing calculator required.

MATH 1920 - Calculus II
4 credit hours
Prerequisite: MATH 1910. A topics course providing a wide view of different techniques and applications of calculus in the plane. Techniques of integration and applications of integration fully developed. Power series and Taylor series included. Emphasis on multidisciplinary applications includes Taylor series approximation; applications of integration to physics, biology, and business; and geometric and power series applications. Graphing calculator required.

MATH 2010 - Elements of Linear Algebra
3 credit hours
Prerequisite: MATH 1910. Vectors and vector spaces, matrices and systems of linear equations, geometry of vector spaces and linear transformations in a vector space.
MATH 2050 - Probability and Statistics
3 credit hours
Prerequisite: Calculus I. Data analysis, probability, and statistical inference. The inference material covers means, proportions, and variances for one and two samples, one-way ANOVA, regression and correlation, and chi-square analysis.

MATH 2110 - Data Analysis
1 credit hour
Prerequisite or corequisite: MATH 1530 or MATH 2050 or equivalent. Using computer software for graphing and analysis of scientific and statistical data.

MATH 2930 - Cooperative Education
1 to 3 credit hours
Experiential learning that occurs in real employment situations. Must be taken in sequence or approved by the director of Cooperative Education. Graded on a pass/fail basis.

MATH 2940 - Cooperative Education
1 to 3 credit hours
Experiential learning that occurs in real employment situations. Must be taken in sequence or approved by the director of Cooperative Education. Graded on a pass/fail basis.

MATH 3070 - College Geometry
3 credit hours
Prerequisite: MATH 3460. Advanced treatment of standard topics in Euclidean geometry using informal and axiomatic approaches. Includes proofmaking techniques, traditional and transformational geometry, finite geometries, and a brief introduction to other geometries.

MATH 3080 - Discrete Structures
3 credit hours
(Same as CSCI 3080.) Prerequisites: CSCI 1160 or CSCI 1170 and MATH 1910 or consent of instructor. Topics include formal logic, proof techniques, matrices, graphs, formal grammars, finite state machines, Turing machines, and binary coding schemes.

MATH 3110 - Calculus III
4 credit hours
Prerequisite: MATH 1920. Adjusts calculus techniques developed in the plane (Calculus I and II) to make them applicable in three-dimensional space. Introductory study of the nature of three-dimensional space and definition of the algebraic calculations in three-dimensional space. Differential and integral calculus definitions and techniques revised to appropriately transfer into this new space. Topics include multivariate functions, partial differentiation, partial integration, multiple integration, and multidisciplinary applications.

MATH 3120 - Differential Equations I
3 credit hours
Prerequisite: MATH 1920. The solution and application of ordinary differential equations with emphasis on first order equations, second order linear equations, Laplace Transform method, systems of differential equations, and numerical methods.

MATH 3180 - Introduction to Numerical Analysis
3 credit hours
(Same as CSCI 3180.) Prerequisites: MATH 1920 and CSCI 1160 or CSCI 1170. Topics include series approximation, finite differences, interpolation, summation, numerical differentiation and integration, iteration, curve fitting, systems of equations and matrices, and error analysis.

MATH 3260 - Differential Equations II
3 credit hours
Prerequisite: MATH 3120. A continuation of MATH 3120 with emphasis on series solutions, method of Frobenius, orthogonal functions, equations of Bessel, Legendre, Gauss, Chebyshev; introduction to partial differential equations.

MATH 3300 - Discrete Mathematics for Middle Grades Teachers
3 credit hours
Prerequisites: MATH 1410, MATH 1420, and MATH 1710. Supports the development of prospective middle grades teachers' knowledge of discrete mathematics. Topics include set theoretic topics, logic, counting, probability, graph theoretic topics. Focuses on students' learning discrete mathematics topics as well as the teaching of related mathematical topics to middle grades students. Field experience in a nearby middle school incorporated.

MATH 3310 - Functions: Connecting Algebra and Geometry for Middle Grades Teachers
3 credit hours
Prerequisites: MATH 1410, MATH 1420, and MATH 1710. Supports the development of prospective middle grades teachers' knowledge of discrete mathematics. Topics include set theoretic topics, logic, counting, probability, graph theoretic topics. Focuses on students' learning discrete mathematics topics as well as the teaching of related mathematical topics to middle grades students. Field experience in a nearby middle school incorporated.
the teaching of mathematical topics to middle grades students to support learning about the connected nature of mathematics. Field experience in a nearby middle school incorporated.

MATH 3320 - Teaching Mathematics in Grades 5-8
3 credit hours
Prerequisite: Admission to the teacher education program. Required of all Mathematics majors seeking a license to teach mathematics in grades 7-12. Strongly encouraged for elementary education majors with a 5-8 emphasis. Topics from number relationships, mental computation and estimation strategies, patterns and functions, algebra, statistics, probability, geometry, and measurement. Must be taken prior to student teaching.

MATH 3330 - Teaching Mathematics in Grades 9-12
3 credit hours
Prerequisites: Admission to teacher education, completion of the mathematics core, and MATH 3320. Required of all Mathematics majors seeking a license to teach mathematics in grades 7-12. In-depth study of mathematics learning and teaching strategies in secondary school mathematics. Selected topics from junior and senior high school curricula provide a foundation for student investigations into the conceptual nature of mathematics and applications in the secondary school curriculum. Must be taken prior to student teaching.

MATH 3460 - Foundation of Higher Mathematics
3 credit hours
Prerequisite: MATH 1920. The language of mathematics, set theory and proof, relations and functions, number systems, mathematical structures. Focuses on the transition from lower-division study to upper-division study by actively engaging the student in problem solving, mathematical reasoning, and both informal and technical writing.

MATH 3970 - Cooperative Education
1 to 3 credit hours
Experiential learning that occurs in real employment situations. Must be taken in sequence or approved by the director of Cooperative Education. Graded on a pass/fail basis.

MATH 3980 - Cooperative Education
1 to 3 credit hours
Experiential learning that occurs in real employment situations. Must be taken in sequence or approved by the director of Cooperative Education. Graded on a pass/fail basis.

MATH 4010 - Selected Topics in Elementary Mathematics
3 credit hours
Prerequisites: MATH 1410, MATH 1420, and MATH 1010. Required of students who are preparing to teach grades 5-8. Examines in greater depth topics to which the student has prior exposure; emphasizes the relevance and implications of these topics to the middle school classroom.

MATH 4200 - Introduction to Mathematics of Investment
3 credit hours
(Same as ACSI 4200.) Prerequisites: MATH 1910 and one semester of probability/statistics; or consent of instructor. Calculus and probability/statistics used to model and analyze investments in bonds, treasury bills, stocks, and other derivatives. Topics include obtaining the price of a bond as a function of interest rate, developing formulas for duration and convexity to study the sensitivity of price to interest rate, and mathematical modeling of investor preference and attitude toward risk.

MATH 4230 - Vector Analysis
3 credit hours
Prerequisite: MATH 3110. A review of vector algebra and vector differentiation with emphasis on aspects of these topics not covered in previous calculus courses. Stress on line and surface integrals; Divergence Theorem and Stokes' theorem with generalizations and related topics.

MATH 4250 - Theory of Calculus
3 credit hours
Prerequisites: MATH 3110 and MATH 3460. Theoretical development of limits, continuity, differentiation, and integration in one dimension.

MATH 4270 - Introduction to Topology
3 credit hours
Prerequisites: MATH 3110 and MATH 3460. Fundamental concepts of topology including continuity, compactness, connectedness, separation axioms, and metric spaces.

MATH 4280 - Undergraduate Research
1 to 4 credit hours
Prerequisite: Permission of department. Independent investigation of a selected research problem under
the guidance of a faculty member resulting in an oral and written report of results. May be repeated for a maximum of four credits.

**MATH 4310 - Numerical Analysis I**
3 credit hours
Prerequisites: CSCI 1170 and MATH 2010 or consent of instructor. Application of computer-oriented numerical algorithms to algebraic equations, differential and integral equations, and linear algebra. Rigorous mathematical treatment of error included.

**MATH 4320 - Numerical Analysis II**
3 credit hours
Prerequisite: MATH 4310. A continuation of MATH 4310.

**MATH 4420 - Number Theory**
3 credit hours
Prerequisite: MATH 3460. Divisibility, congruences, quadratic residues, Diophantine equations, quadratic forms, and continued fractions.

**MATH 4470 - Introduction to Modern Algebra**
3 credit hours
Prerequisite: MATH 3460. A treatment of sets, relations, operations, and the construction of number systems in algebra.

**MATH 4510 - Abstract Algebra I**
3 credit hours
Prerequisite: MATH 3460. An introduction to groups, with a brief introduction to rings, integral domains, and fields.

**MATH 4530 - Abstract Algebra II**
3 credit hours
Prerequisite: MATH 4510. The theory of rings, fields, integral domains, and vector spaces.

**MATH 4540 - Topics in Secondary School Mathematics**
3 credit hours
Prerequisites: Admission to teacher education, completion of the mathematics core, MATH 3070 and MATH 4510. Required of all Mathematics majors seeking a license to teach mathematics in grades 7-12. Examines in greater depth topics to which the student has prior exposure; emphasizes the relevance and applications of these topics to the pre-college level classroom.

**MATH 4600 - Problems in Contemporary Mathematics**
1 to 6 credit hours
Pass/Fail grading in specified sections.

**MATH 4601 - Problems in Contemporary Mathematics Complex Variables**
3 credit hours
Prerequisite: MATH 3460. Fundamental principles and applications of complex variables.

**MATH 4602 - Problems in Mathematics**
1 to 6 credit hours
Prerequisite: Consent of instructor. Problem-oriented course providing opportunities for mathematical study in areas of need.

**MATH 4620 - History and Philosophy of Mathematics**
3 credit hours
Prerequisite: MATH 3460. Background in geometry and number theory helpful. The character of mathematical thought by way of mathematical problems that have occupied the outstanding mathematicians of Babylon, Egypt, Greece, China, the Renaissance, and modern times paralleled with a study of three schools of mathematical philosophy: intuitionism, logicism, and formalism.

**MATH 4630 - Mathematics of Risk Management**
3.00 credit hours
(Same as ACSI 4630.) Prerequisite: ACSI 4200 or MATH 4200. For students in Actuarial Science, offers preparation for the Society of Actuaries/Casualty Actuarial Society Course 6. Topics include mathematical modeling of volatility; pricing of bonds, stocks, and other derivatives with uncertainty; benchmark portfolios; asset/liability management for property/casualty insurers; liability associated with a financially distressed company. Heath-Jarrow-Morton and Cox-Ingersoll-Ross models.

**MATH 4640 - Mathematics of Options, Futures, and Other Derivatives**
3.00 credit hours
Prerequisites: ACSI 4630 or MATH 4630 or ACSI 4200 or MATH 4200. For students in Actuarial Science, offers preparation for the Society of Actuaries/Casualty Actuarial Society Course 6. Topics include risk management using options, interest rate swaps, interest rate caps, Black-Scholes analysis, Taylor series expansion to obtain hedge parameters,
portfolio insurance, numerical procedures, interest rate derivatives, and use of Black's model.

**MATH 4700 - Combinatorics and Graph Theory**  
3 credit hours  
Prerequisites: MATH 2010 and MATH 3460. Selected topics in combinatorics and graph theory emphasizing combinatorial problem solving and algorithmic proof.

**MATH 4740 - Research Methods**  
3 credit hours  
(Same as BIOL/CHEM/PHYS 4740.) Prerequisite: YOED 3520. Provides secondary science and mathematics teacher candidates with the tools that scientists use to solve scientific problems. Students will use these tools in a laboratory setting, communicate findings, and understand how scientists develop new knowledge.

**MATH 4800 - Seminar in Mathematics with Technology**  
3 credit hours  
Prerequisite: 18 semester hours in mathematics including calculus or consent of instructor. Examine and utilize the technological tools available for doing mathematics. Emphasis on non-numerical tools such as theorem provers and algebraic manipulation systems.

**MATH 4990 - Seminar in Mathematics**  
3 credit hours  
Open only to Mathematics majors; normally taken during last regular semester of coursework. Required of all Mathematics majors. Offers graduating Mathematics majors a broad perspective of mathematics, mathematical activity, and problem solving in various areas of application; offers preparation for professional examinations; acquaints students with job possibilities and aids in career decisions; acquaints students with the nature of graduate study in mathematics. Pass/Fail.

**Statistics**

**STAT 3150 - Mathematical Statistics I**  
3 credit hours  
Prerequisite: Two semesters of calculus. Probability theory including basic probability laws, properties of distributions, mathematical expectation, special discrete and continuous distributions, functions of random variables, and selected applications.

**STAT 4190 - Mathematical Statistics II**  
3 credit hours  
Prerequisite: STAT 3150 or equivalent. Theory of statistical inference. Topics include sampling distributions, decision theory, estimation, test of hypothesis, regression analysis, analysis of variance, and selected applications.

**STAT 4200 - Statistical Methods for Forecasting**  
3 credit hours  
Prerequisite: STAT 4190. Topics include application of regression models in forecasting and exponential smoothing methods to forecast nonseasonal time-series, seasonal series, and globally constant seasonal models; stochastic time series models; and forecast evaluation.

**STAT 4280 - Undergraduate Research**  
1 to 4 credit hours  
Prerequisite: Permission of department. Independent investigation of a selected research problem under the guidance of a faculty member resulting in an oral and written report of results. May be repeated for a maximum of four credits.

**STAT 4320 - Probability and Stochastic Processes**  
3 credit hours  
Prerequisites: Two semesters of calculus and STAT 3150 (or MATH 2050) or consent of instructor. Theoretical basis for stochastic processes and their use as models of real-world phenomena. Topics include Markov chains, Poisson processes, Brownian motion and stationary processes. Applications include Gambler's Ruin, birth and death models, hitting times, stock option pricing, and the Black-Scholes model.

**STAT 4360 - Regression Analysis**  
3 credit hours  
Prerequisite: MATH 2050 or BIA 3620. Theory and application of regression models. Approaches to model building and data analysis. Computation and interpretation of results facilitated through the use of statistical software packages.

**STAT 4370 - Nonparametric Statistics**  
3 credit hours  
Prerequisite: MATH 2050 or equivalent. Statistical tests that require no assertions about parameters or about the form of the population from which the samples are drawn. A wide range of practical problems studied.
STAT 4380 - Experimental Design
3 credit hours
Prerequisite: MATH 2050 or BIA 3620. Topics include one-way analysis of variances, multiple comparison, multifactor analysis of variance, and various practical issues in experimental design. Computation and interpretation of results facilitated through the use of statistical software packages.

STAT 4600 - Problems in Statistics
1 to 6 credit hours
Prerequisites: Senior standing and consent of instructor. Students wishing to enroll must submit a written course/topic proposal to the department prior to the semester in which STAT 4600 is taken. Proposal must be approved prior to taking the course. At the conclusion, each enrollee must submit a written report to the department.
The Department of Military Science offers courses applicable to all branches of the United States Army and through which a student can earn an academic minor. These courses give students a broad knowledge of Army leadership, management, and technical skills thereby preparing them for an Army commission and subsequent entrance to an officer's basic branch course at one of the Army service schools. The objectives of producing officers through the ROTC (Reserve Officers Training Corps) program are to

1. provide officers a broad educational base;
2. provide a basic military education for students;
3. teach basic fundamentals and techniques of leadership and management;
4. develop, in conjunction with other academic disciplines, individual character and attributes required of an officer in the U.S. Army.

Army ROTC Scholarship Program
Students enrolled at MTSU are eligible to apply for two- and three-year Army ROTC scholarships which pay for tuition, fees, and a book allowance, plus a monthly stipend per year. High school seniors are eligible to apply for a four-year scholarship during the senior year. Additionally, there are National Guard and Army Reserve Scholarships available.

ROTC Nurse Summer Training Program
This three-week clinical leadership experience is open only to nursing students who have completed one clinical nursing course and MS 3130. The student receives pay; in addition, travel, lodging, and most meal costs are defrayed by the U.S. Army. There is a 120-hour clinical assignment with an Army Nurse Corps preceptor at an Army hospital in the U.S. or overseas. Nursing students receive 3 semester hours of credit for NURS 4035 - Special Topics in Nursing.

Uniforms and Pay
Students enrolled in the basic course do not wear uniforms and are not required to have a particular haircut. Textbooks are provided free of charge.
Advanced course students, junior and seniors, are provided uniforms and textbooks free of charge. They must sign a contract with the U.S. government and complete the advanced course, resulting in an active Army, National Guard, or Army Reserve commission as a 2nd lieutenant upon graduation. While enrolled in the advanced course, the student receives $4,500-5,000 per year and approximately $1,000 plus travel costs for LDAC attendance.

Military Science Curriculum

Military Science Curriculum
615-898-2406
Joel Miller, program coordinator
Joel.Miller@mtsu.edu

Military Science courses are designed to fulfill the educational and training requirements for commissioning in the U.S. Army (Regular Army, U.S. Army Reserve, or Army National Guard). The curriculum consists of a basic course (first two years) and an advanced course (final two years). The basic course is open to all MTSU students without
incurring any military service obligation. Army, Navy, Marine Corps, or Air Force basic training graduates can be placed directly into the advanced course. Advanced placement may also be earned by attending the four-week leader training course at Fort Knox, Kentucky, normally between the sophomore and junior years. The advanced course is offered during the last four semesters of Military Science and includes a five-week Cadet Leader Course (CLC) at Fort Knox, Kentucky. Upon successful completion of the advanced course and upon graduation from the University, the student will be commissioned a second lieutenant in the United States Army.

**Freshman (Basic)**

- MS 1010 - First Year Basic Military Science 2 credit hours
- MS 1020 - First Year Basic Military Science 2 credit hours
- MS 3080 - U.S. Army History 2 credit hours

**Sophomore (Basic)**

- MS 2010 - Second Year Basic Military Science 2 credit hours
- MS 2020 - Second Year Basic Military Science 2 credit hours
- MS 3000 - Basic Military Science 6 credit hours *

**Junior (Advanced)**

- MS 3110 - First Year Advanced Military Science 3 credit hours
- MS 3120 - First Year Advanced Military Science 3 credit hours
- MS 3130 - Military Science Field Methods 6 credit hours

**Senior (Advanced)**

- MS 4110 - Second Year Advanced Military Science 3 credit hours
- MS 4120 - Second Year Advanced Military Science 3 credit hours

**NOTE:**

*MS 3000 is only for students who have not had freshman or sophomore ROTC class or have not been to basic training.

Students may also enroll in MS 1000 to participate in physical training, color guard, and/or Raiders.

**Military Science Minor**

Department of Military Science

A minor in Military Science consists of 20 semester hours and is available to those students who complete all advanced level requirements. The following courses are required of all students: MS 3110 (3 hrs.), MS 3120 (3 hrs.), MS 3130 (6 hrs.), MS 4110 (3 hrs.), MS 4120 (3 hrs.); and MS 3080 (2 hrs.)
Military Science

**MS 1000 - Military Science Practicum (Elective)**
1 credit hour
Corequisite: Enrollment in MS Basic or Advance course or permission of department chair. For those interested in enrichment activities which contribute to the development of leadership and management abilities, including adventure training, small unit military tactics, and drill and ceremonies.

**MS 1010 - First Year Basic Military Science**
2 credit hours
Practical application in adventure-oriented skills such as rappelling, marksmanship techniques, and survival. Focuses on leadership development with a hands-on approach to classroom instruction. Also includes a general overview of the U.S. Army’s mission, organizational structure, and customs and traditions. Meets twice weekly, 85 minutes per class.

**MS 1020 - First Year Basic Military Science**
2 credit hours
Prerequisite: MS 1010 or permission of department chair. Further development in adventure-oriented skills. Hands-on approach to basic rifle marksmanship, land navigation, and first aid. Students fire the M16A2 rifle, conduct a land navigation course, and learn first aid skills through practical application. Continued focus on leadership development. Meets twice weekly, 85 minutes per week.

**MS 2010 - Second Year Basic Military Science**
2 credit hours
Prerequisites: MS 1010 and MS 1020 or permission of department chair. Development of leadership potential through practical exercise. Leadership, small unit tactics, first aid, basic rappelling, weapons familiarization, oral communication exercises, and team-building skills.

**MS 2020 - Second Year Basic Military Science**
2 credit hours
Prerequisites: MS 1010, MS 1020, and MS 2010 or permission of department chair. Application of basic map reading and compass principles, unit organization at squad level, small unit tactics, branches of the U.S. Army, discussion of the advanced program. Practical exercises, land navigation, first aid, current events, marksmanship, water safety training. Continues team-building development.

**MS 3000 - Basic Military Science**
6 credit hours
Prerequisite: Permission of department chair. Four-week training normally taken during the summer between the sophomore and junior academic years by students who have not taken all prerequisite MS 1000 and 2000 level courses. Training conducted at a designated U.S. Army installation; practical experience in leadership, small unit tactics, weapons, drill, and communications under field conditions. U.S. Army pays the student for attending the training.

**MS 3080 - U.S. Army History**
2 credit hours
Prerequisites: MS 1010 and MS 1020 or permission of department chair. Introduces students enrolled in the ROTC program to the U.S. Army’s development and role in military operations from colonial times to the present.

**MS 3110 - First Year Advanced Military Science**
3 credit hours
Prerequisites: MS 1010, MS 1020, MS 2010, and MS 2020; or MS 3000; or equivalent credit for previous military service. Formal instruction in troop leading procedures, U.S. Army problem solving, branches of the U.S. Army, combat orders, leadership traits and principles, small unit tactics based on infantry rifle squad and platoon, map reading and land navigation skills, and military briefings. Focus on leadership development, instilling the warrior ethos, and preparation for the Cadet Leader Course and potential for service as a junior officer. Two one-hour, twenty-five-minute periods of class work and two one-hour, twenty-five minute periods of laboratory per week.

**MS 3120 - First Year Advanced Military Science**
3 credit hours
Prerequisite: MS 3110. Formal instruction in leadership, principles of war, squad and platoon tactics, situational training exercises, patrolling techniques, map reading and land navigation. Hands-on application of troop leading procedures, written and oral combat orders, maneuver techniques, and field craft. Focus on leadership development, instilling the warrior ethos, and preparation for the Cadet Leader Course and potential for service as a junior officer. Two one-hour, twenty-five-minute periods of class work and two one-hour, twenty-five minute periods of laboratory per week.

College of Basic and Applied Sciences 370
MS 3130 - Military Science Field Methods
6 credit hours
Prerequisites: MS 3110 and MS 3120. Six weeks of training normally taken during the summer between the junior and senior academic years. Training conducted at a designated U.S. military installation; practical experience in leadership, military teaching, weapons, and communications under field conditions. The U.S. Army pays the student for attending the training.

MS 3140 - Military Leadership and Management
2 credit hours
Prerequisites: Contracted students in Army ROTC and department chair approval. Dynamics of leadership and officership in the U.S. Army and inherent responsibilities of an officer in today’s environment discussed. Explores good and bad leadership, the principles of war, and their applications to war fighting through U.S. history.

MS 4110 - Second Year Advanced Military Science
3 credit hours
Prerequisites: MS 3110 and MS 3120. Seminar in leadership and management designed to prepare the senior student for active duty responsibilities. The commander, the staff, the military team, and U.S. Army ethics are the main focus. Emphasis on instilling warrior ethos. Two one-hour, twenty-five-minute periods of class work and two one-hour, twenty-five minute periods of laboratory per week.

MS 4120 - Second Year Advanced Military Science
3 credit hours
Prerequisites: MS 3110, MS 3120, and MS 4110. Seminars in leadership and management to prepare the senior student for active or reserve duty responsibilities. Focus is military law, U.S. Army writing standards, and organizational skills. Emphasis on leading soldiers in the complex situations of current military operations. Two one-hour, twenty-five-minute periods of class work and two one-hour, twenty-five minute periods of laboratory per week.
Physics and Astronomy

Ron Henderson, Chair
Erenso, Ford, Frank, Higgins, Kavich, Klumpe, Perevalova, Robertson, Smith, Wallin, Weller, Youngkins

The Department of Physics and Astronomy offers students the opportunity to study the fundamental principles and methodologies of physics for careers at the bachelor's level or in preparation for graduate study in physics or engineering. The department also offers a program for students interested in teaching physics in a high school setting as well as specially tailored programs in astronomy, astrophysics, and medical physics. The physics common requirements form the framework for the Physics major. Students then choose an area of concentration that parallels their professional goals.

The departmental program of study leads to a Bachelor of Science degree in Physics. Students must also choose from one of the following concentrations: Professional Physics, Physics Teaching, Applied Physics, or Astronomy. The department also offers minors in Physics, Electro-Acoustics, and Astronomy.

Honors College
The Department of Physics and Astronomy offers the following courses in Honors: ASTR 1030 and ASTR 1031. See online class schedule and Honors information.

Astronomy Minor

Department of Physics and Astronomy
The minor in Astronomy consists of 19 semester hours in astronomy and physics. At least four upper-division hours must be taken at MTSU.

Required (10 hours)

- ASTR 1031 - Observing the Universe 1 credit hour
- ASTR 3401 - Experimental Astronomy 1 credit hour
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours
  AND
- PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
- PHYS 2021 - Physics Problems Laboratory II 4 credit hours
  OR
- PHYS 2110 - Calculus-Based Physics I 0 credit hours AND
- PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours
  AND
- PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
- PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours

Electives (9 credits)

- ASTR 1030 - Exploring the Universe 3 credit hours
- ASTR 2030 - Solar System Astronomy 3 credit hours
- ASTR 2040 - Stars, Galaxies, and Cosmology 3 credit hours
- ASTR 3050 - Directed Study in Astronomy 1 to 4 credit hours
- ASTR 3400 - Fundamentals of Astrophysics 3 credit hours
Electro-Acoustics Minor

Department of Physics and Astronomy
The minor in Electro-Acoustics consists of at least 21 semester hours.

Required (18 hours)

- MATH 1910 - Calculus I 4 credit hours
- PHYS 1600 - Physics of Music 3 credit hours
- PHYS 3310 - Concepts and Applications of Digital Electronics 3 credit hours
- PHYS 3350 - Concepts and Applications of Analog Electronics 4 credit hours
- ET 3610 - Introduction to Electricity and Electronics 4 credit hours

Electives (3 hours)

- PHYS 3000 - Acoustics and Signal Analysis 3 credit hours
- ET 3620 - Digital Circuits Fundamentals 3 credit hours
- ET 3660 - Communication Electronics 3 credit hours

Physics Minor

Department of Physics and Astronomy
The minor in Physics consists of 19 semester hours in physics and astronomy. Students minoring in Physics should work closely with their Physics advisor to tailor a program which meets their needs. At least four upper-division hours must be taken at MTSU.

Required (8 hours)

- PHYS 2110 - Calculus-Based Physics I 0 credit hours AND
- PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours
- PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
- PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours
  or
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours
  or
- PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
- PHYS 2021 - Physics Problems Laboratory II 4 credit hours

Electives (11 hours)
Physics, Applied Physics Concentration, B.S.

Department of Physics and Astronomy
615-898-2130
Ron Henderson, program coordinator
Ron.Henderson@mtsu.edu

The Applied Physics concentration is designed for students interested in fields not traditionally associated with a physics degree, but that value the critical thinking and problem-solving skills associated with a physics major.

Required Courses

- PHYS 3150 - Topics and Methods of Theoretical Physics I 3 credit hours OR
- MATH 3120 - Differential Equations I 3 credit hours OR
- MATH 3110 - Calculus III 4 credit hours
- PHYS or ASTR electives (upper division) 5 credit hours
- Cognate electives 15 credit hours
- CSCI 1170 - Computer Science I 4 credit hours

Cognate Elective Areas

Actuarial

- STAT 3150 - Mathematical Statistics I 3 credit hours
- STAT 4190 - Mathematical Statistics II 3 credit hours
- ACSI 4140 - Mathematical Foundations of Actuarial Science 3 credit hours
- ACSI 4200 - Introduction to Mathematics of Investment 3 credit hours OR
- MATH 4200 - Introduction to Mathematics of Investment 3 credit hours
- ACSI 4230 - Mathematics of Compound Interest 3 credit hours

Advanced Physics

- PHYS/ASTR Any upper division Physics or Astronomy

Business

- ACTG 3000 - Survey of Accounting for General Business 3 credit hours
- FIN 3000 - Principles of Financial Management 3 credit hours OR
- FIN 3010 - Business Finance 3 credit hours
- BLAW 3400 - Legal Environment of Business 3 credit hours OR
- BLAW 3430 - Commercial Law 3 credit hours
- MGMT 3610 - Principles of Management 3 credit hours
- MKT 3820 - Principles of Marketing 3 credit hours

Computational Methods

- CSCI 2170 - Computer Science II 4 credit hours
- CSCI 3037 - Computer Languages: Visual Programming 3 credit hours
- CSCI 3160 - Introduction to Assembly Language 3 credit hours
- CSCI 3180 - Introduction to Numerical Analysis 3 credit hours
• CSCI 3250 - Operating Systems 3 credit hours
• CSCI 4330 - Parallel Processing Concepts 3 credit hours

Computer Applications

• INFS 2400 - Web Development 3 credit hours
• INFS 3100 - Principles of Management Information Systems 3 credit hours
• INFS 3200 - Business Application Development 3 credit hours
• INFS 3400 - Object Oriented Programming with C#.NET 3 credit hours
• INFS 4300 - Security Assurance for Information Systems Audit 3 credit hours
• INFS 4790 - Database Design and Development 3 credit hours

Natural Science

• BIOL 1110 - General Biology 4 credit hours AND
• BIOL 1111 - General Biology Lab 0 credit hours
• BIOL 1120 - General Biology 4 credit hours AND
• BIOL 1121 - General Biology Lab 0 credit hours
• BIOL 2230 - Microbiology 4 credit hours AND
• BIOL 2231 - Microbiology Lab 0 credit hours
• CHEM 3010 - Organic Chemistry I 4 credit hours AND
• CHEM 3011 - Organic Chemistry I Lab 0 credit hours
• CHEM 3020 - Organic Chemistry II 4 credit hours AND
• CHEM 3021 - Organic Chemistry II Lab 0 credit hours
• CHEM 3530 - Principles of Biochemistry 4 credit hours AND
• CHEM 3531 - Principles of Biochemistry Lab 0 credit hours

Operations

• BCED 4670 - International Business Communication 3 credit hours
• MGMT 3620 - Supply Chain Operations 3 credit hours
• BIA 2610 - Statistical Methods 3 credit hours
• BIA 4010 - Business Analytics and Visualization 3 credit hours
• BIA 3620 - Introduction to Business Analytics 3 credit hours AND
• BIA 3621 - Introduction to Business Analytics Lab 0 credit hours

Supplemental Math

• MATH 2010 - Elements of Linear Algebra 3 credit hours
• MATH 2050 - Probability and Statistics 3 credit hours
• MATH 3070 - College Geometry 3 credit hours
• MATH 3260 - Differential Equations II 3 credit hours
• MATH 3460 - Foundation of Higher Mathematics 3 credit hours

Technology

• ET 1210 - Introduction to Metals and Metallurgy 3 credit hours
• ET 2310 - Computer-Assisted Drafting and Design I 3 credit hours
Physics Common Requirements

The common requirements required of ALL Physics majors consist of

**Physics Core (25 hours)**

- PHYS 1010 - Physics Colloquium 1 credit hour
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND
  PHYS 2011 - Physics Problems Laboratory I 4 credit hours
  OR
- PHYS 2110 - Calculus-Based Physics I 0 credit hours AND
  PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours
- PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
  PHYS 2021 - Physics Problems Laboratory II 4 credit hours
  OR
- PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
- PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours
- PHYS 3100 - Modern Physics I 3 credit hours * OR
- PHYS 3070 - Concepts in Modern Physics I 3 credit hours
- PHYS 3110 - Modern Physics II 3 credit hours * OR
- PHYS 3080 - Concepts in Modern Physics II 3 credit hours
- PHYS 3111 - Modern Physics Laboratory 1 credit hour
- PHYS 3610 - Thermodynamics 3 credit hours * OR
- PHYS 3510 - Concepts in Thermodynamics and Statistical Mechanics 3 credit hours OR
- PHYS 3400 - Intermediate Physics 3 credit hours
- PHYS 3800 - Physics Seminar 1 credit hour
- PHYS 3900 - Physics Practicum 1 credit hour
- PHYS 4850 - Physics Research 2 credit hours OR
- ASTR 4850 - Astronomy Research 2 credit hours
- PHYS 4900 - Physics Senior Thesis 2 credit hours OR
- ASTR 4900 - Astronomy Senior Thesis 2 credit hours

**NOTE:**

* Substitutions are allowed as follows: PHYS 3100 (PHYS 3070), PHYS 3110 (PHYS 3080), and PHYS 3610 (PHYS 3510 or PHYS 3400).
Curriculum: Physics, Applied Physics

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine arts, Mathematics, Natural sciences, and Social/Behavioral Science categories.

Freshman

- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- PHYS 1010 - Physics Colloquium 1 credit hour
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours (Nat Sci) AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours (Nat Sci) OR
  - PHYS 2110 - Calculus-Based Physics I 0 credit hours (Nat Sci) AND
  - PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours (Nat Sci)
- PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
  - PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours
- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
  - CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
- CHEM 1120 - General Chemistry II 4 credit hours AND
  - CHEM 1121 - General Chemistry II Lab 0 credit hours

Subtotal: 31 Hours

Sophomore

- PHYS 3100 - Modern Physics I 3 credit hours OR
- PHYS 3070 - Concepts in Modern Physics I 3 credit hours
- PHYS 3110 - Modern Physics II 3 credit hours OR
- PHYS 3080 - Concepts in Modern Physics II 3 credit hours
- PHYS 3111 - Modern Physics Laboratory 1 credit hour
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)
- PHYS 3150 - Topics and Methods of Theoretical Physics I 3 credit hours OR
- MATH 3110 - Calculus III 4 credit hours OR
- MATH 3120 - Differential Equations I 3 credit hours
- PHYS 3900 - Physics Practicum 1 credit hour
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- CSCI 1170 - Computer Science I 4 credit hours
- Elective 3 credit hours
- Social/Behavioral Sciences 3 credit hours
• HIST 2010 - Survey of United States History I 3 credit hours OR
• HIST 2020 - Survey of United States History II 3 credit hours OR
• HIST 2030 - Tennessee History 3 credit hours

Subtotal: 30-31 Hours

Junior

• PHYS 3610 - Thermodynamics 3 credit hours OR
• PHYS 3510 - Concepts in Thermodynamics and Statistical Mechanics 3 credit hours OR
• PHYS 3400 - Intermediate Physics 3 credit hours
• HIST 2010 - Survey of United States History I 3 credit hours OR
• HIST 2020 - Survey of United States History II 3 credit hours OR
• HIST 2030 - Tennessee History 3 credit hours
• Humanities/Fine Arts (2 rubrics) 6 credit hours
• Electives 6 credit hours
• Cognate 6 credit hours
• Social/Behavioral Sciences 3 credit hours
• PHYS/ASTR (upper division) 3-4 credit hours

Subtotal: 30-31 Hours

Senior

• PHYS 3800 - Physics Seminar 1 credit hour
• Cognate 9 credit hours
• Electives 12 credit hours
• PHYS/ASTR (upper division) 2-3 credit hours
• PHYS 4850 - Physics Research 2 credit hours
• PHYS 4900 - Physics Senior Thesis 2 credit hours

Subtotal: 28-29 Hours

Total hours in program: 120

Academic Map

Following is a printable, suggested four-year schedule of courses:
Physics, Applied Physics, B.S., Academic Map
Physics, Astronomy Concentration, B.S.

Department of Physics and Astronomy
615-898-2130
Ron Henderson, program coordinator
Ron.Henderson@mtsu.edu

All physics majors must choose to concentrate in Professional Physics, Physics Teaching, Applied Physics, or Astronomy. Each concentration specifies additional upper-division electives in physics and astronomy and other disciplines which vary by concentration. A minimum of 12 upper-division semester hours in the physics major must be taken at MTSU.

The physics core consists of 25 semester hours of physics and astronomy. Other requirements include 8 semester hours of chemistry and 8 semester hours of mathematics.

The Astronomy concentration is designed for students interested in a degree specializing in astronomy, but who do not plan to attend graduate school in astronomy or astrophysics. In addition to the physics common requirements, the following courses are required:

**Required Courses**

- ASTR 1031 - Observing the Universe 1 credit hour
- ASTR 2030 - Solar System Astronomy 3 credit hours
- ASTR 2040 - Stars, Galaxies, and Cosmology 3 credit hours
- ASTR 3400 - Fundamentals of Astrophysics 3 credit hours
- ASTR 3401 - Experimental Astronomy 1 credit hour

**Supporting Courses Required**

- CHEM 1110 - General Chemistry I 4 credit hours AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours
- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 3120 - Differential Equations I 3 credit hours OR
- PHYS 3150 - Topics and Methods of Theoretical Physics I 3 credit hours

**Physics Common Requirements**

The common requirements required of ALL Physics majors consist of

**Physics Core (25 hours)**

- PHYS 1010 - Physics Colloquium 1 credit hour
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours
  OR
- PHYS 2110 - Calculus-Based Physics I 0 credit hours AND
- PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours
- PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
- PHYS 2021 - Physics Problems Laboratory II 4 credit hours
OR
• PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
• PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours
• PHYS 3100 - Modern Physics I 3 credit hours * OR
• PHYS 3070 - Concepts in Modern Physics I 3 credit hours
• PHYS 3110 - Modern Physics II 3 credit hours * OR
• PHYS 3080 - Concepts in Modern Physics II 3 credit hours

Academic Map

Following is a printable, suggested four-year schedule of courses:
Physics, Astronomy, B.S., Academic Map
Physics, Physics Teaching Concentration, B.S.

Department of Physics and Astronomy
615-898-2130
Ron Henderson, program coordinator
Ron.Henderson@mtsu.edu

All physics majors must choose to concentrate in Professional Physics, Physics Teaching, Applied Physics, or Astronomy. Each concentration specifies additional upper-division electives in physics and astronomy and other disciplines which vary by concentration. A minimum of 12 upper-division semester hours in the physics major must be taken at MTSU.

The physics core consists of 25 semester hours of physics and astronomy. Other requirements include 8 semester hours of chemistry and 8 semester hours of mathematics.

The Physics Teaching concentration offers preparation for careers as physics teachers, as well as serving as an appropriate degree path for other physics majors who do not plan to attend graduate school. In addition to the physics common requirements, the following courses are required:

**Required Courses (8 hours)**

- PHYS 3930 - The Teaching of Physics 3 credit hours
- PHYS 3950 - Physics Licensure I 1 credit hour
- PHYS 3960 - Physics Licensure II 1 credit hour
- ASTR 1030 - Exploring the Universe 3 credit hours

**Supporting Courses (26 hours)**

- BIOL 1110 - General Biology 4 credit hours AND
- BIOL 1111 - General Biology Lab 0 credit hours
- CHEM 1110 - General Chemistry I 4 credit hours AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours
- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours
- MATH 2050 - Probability and Statistics 3 credit hours
- MATH 3120 - Differential Equations I 3 credit hours OR
- PHYS 3150 - Topics and Methods of Theoretical Physics I 3 credit hours

**Note:**

Contact the Physics and Astronomy department office for scholarship opportunities for Physics Teaching students.

**Teacher Licensure in Physics**

Students seeking a license to teach physics in secondary schools (grades 7-12) must complete (1) a major in physics with a concentration in Physics Teaching, and/or (2) a minor in Secondary Education through MTeach.

Students must contact their Secondary Education Minor advisors for approval of appropriate courses.
Physics Common Requirements

The common requirements required of ALL Physics majors consist of

Physics Core (25 hours)

- PHYS 1010 - Physics Colloquium 1 credit hour
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND

Senior

- PHYS 3960 - Physics Licensure II 1 credit hour
- PHYS 4900 - Physics Senior Thesis 2 credit hours
- Humanities and/or Fine Arts 3 credit hours
- Electives 22 credit hours

Subtotal: 28 Hours

Total hours in program: 120

NOTE:

The minimum number of hours for graduation is 120; however, the number of hours required for this program may exceed this if students choose the Secondary Education Minor in addition to the Physics Teaching concentration.

Academic Map

Following is a printable, suggested four-year schedule of courses:
Physics, Physics Teaching, B.S., Academic Map
Physics, Professional Physics Concentration, B.S.

Department of Physics and Astronomy
615-898-2130
Ron Henderson, program coordinator
Ron.Henderson@mtsu.edu

All physics majors must choose to concentrate in Professional Physics, Physics Teaching, Applied Physics, or Astronomy. Each concentration specifies additional upper-division electives in physics and astronomy and other disciplines which vary by concentration. A minimum of 12 upper-division semester hours in the physics major must be taken at MTSU.

The physics core consists of 25 semester hours of physics and astronomy. Other requirements include 8 semester hours of chemistry and 8 semester hours of mathematics.

The Professional Physics concentration offers preparation for graduate work in physics, medical physics, astrophysics, or engineering. In addition to the physics common requirements, the following courses are required:

**Required Courses**

- PHYS 3150 - Topics and Methods of Theoretical Physics I 3 credit hours
- PHYS 3160 - Topics and Methods of Theoretical Physics II 3 credit hours
- PHYS 3200 - Scientific Modeling and Problem Solving 2 credit hours
- PHYS 3300 - Classical Mechanics 3 credit hours
- PHYS 4310 - Electricity and Magnetism 3 credit hours
- PHYS 4330 - Electricity and Magnetism II 3 credit hours
- PHYS 4380 - Quantum Mechanics 3 credit hours

**Supporting Courses (16 hours)**

- CHEM 1110 - General Chemistry I 4 credit hours AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours
- MATH 1910 - Calculus I 4 credit hours
- MATH 1920 - Calculus II 4 credit hours

**Physics Common Requirements**

The common requirements for all Physics majors consist of

**Physics Core (25 hours)**

- PHYS 1010 - Physics Colloquium 1 credit hour
- PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours
  OR
- PHYS 2110 - Calculus-Based Physics I 0 credit hours AND
- PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours
- PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
- PHYS 2021 - Physics Problems Laboratory II 4 credit hours
  OR
• PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
• PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours
• PHYS 3100 - Modern Physics I 3 credit hours
• PHYS 3110 - Modern Physics II 3 credit hours
• PHYS 3111 - Modern Physics Laboratory 1 credit hour
• PHYS 3610 - Thermodynamics 3 credit hours
• PHYS 3800 - Physics Seminar 1 credit hour
• PHYS 3900 - Physics Practicum 1 credit hour
• PHYS 4850 - Physics Research 2 credit hours OR
• ASTR 4850 - Astronomy Research 2 credit hours
• PHYS 4900 - Physics Senior Thesis 2 credit hours OR
• ASTR 4900 - Astronomy Senior Thesis 2 credit hours

Professional Physics: Medical Physics Track

The medical physics track offers preparation for graduate work in medical physics and radiation oncology physics, eventually leading to a career as a medical physicist in a clinical or academic setting. In addition to the physics common requirements and the Professional Physics concentration requirements, the following courses are recommended:
• PHYS 3600 - Radiation Oncology Physics 3 credit hours
• PHYS 3601 - Medical Physics Practicum 1 credit hour
• PHYS 4600 - Topics in Medical Physics 3 credit hours
• BIOL 2010 - Human Anatomy and Physiology I 4 credit hours AND
• BIOL 2011 - Human Anatomy and Physiology I Lab 0 credit hours
• BIOL 2020 - Human Anatomy and Physiology II 4 credit hours AND
• BIOL 2021 - Human Anatomy and Physiology II Lab 0 credit hours

Professional Physics: Astrophysics Track

The astrophysics track offers preparation for graduate work in astronomy or astrophysics. In addition to the physics common requirements and the Professional Physics concentration requirements, the following courses are recommended:
• ASTR 1031 - Observing the Universe 1 credit hour
• ASTR 2030 - Solar System Astronomy 3 credit hours
• ASTR 2040 - Stars, Galaxies, and Cosmology 3 credit hours
• ASTR 3400 - Fundamentals of Astrophysics 3 credit hours
• ASTR 3401 - Experimental Astronomy 1 credit hour

Curriculum: Physics, Professional Physics

Curricular listings include General Education requirements in Communication, History, Humanities and/or Fine Arts, Mathematics, Natural Sciences, and Social/Behavioral Sciences categories. Consult with a physics advisor for courses to take during the junior and senior years.

Freshman
• PHYS 1010 - Physics Colloquium 1 credit hour
• PHYS 2010 - Non-Calculus-Based Physics I 0 credit hours (Nat Sci) AND
- PHYS 2011 - Physics Problems Laboratory I 4 credit hours (Nat Sci)
  OR
- PHYS 2110 - Calculus-Based Physics I 0 credit hours (Nat Sci) AND
- PHYS 2111 - Calculus-Based Physics Laboratory I 4 credit hours (Nat Sci)
- PHYS 2020 - Non-Calculus-Based Physics II 0 credit hours AND
- PHYS 2021 - Physics Problems Laboratory II 4 credit hours
  OR
- PHYS 2120 - Calculus-Based Physics II 0 credit hours AND
- PHYS 2121 - Calculus-Based Physics Laboratory II 4 credit hours
- MATH 1910 - Calculus I 4 credit hours (Math)
- MATH 1920 - Calculus II 4 credit hours
- CHEM 1110 - General Chemistry I 4 credit hours (Nat Sci) AND
- CHEM 1111 - General Chemistry I Lab 0 credit hours (Nat Sci)
- CHEM 1120 - General Chemistry II 4 credit hours AND
- CHEM 1121 - General Chemistry II Lab 0 credit hours
- ENGL 1010 - Expository Writing 3 credit hours (Comm)
- ENGL 1020 - Research and Argumentative Writing 3 credit hours (Comm)

Subtotal: 31 Hours

Sophomore

- PHYS 3100 - Modern Physics I 3 credit hours
- PHYS 3110 - Modern Physics II 3 credit hours
- PHYS 3111 - Modern Physics Laboratory 1 credit hour
- PHYS 3150 - Topics and Methods of Theoretical Physics I 3 credit hours
- PHYS 3160 - Topics and Methods of Theoretical Physics II 3 credit hours
- COMM 2200 - Fundamentals of Communication 3 credit hours (Comm)
- Mathematics 7 credit hours
- ENGL 2020 - Themes in Literature and Culture 3 credit hours (Hum/FA) OR
- ENGL 2030 - The Experience of Literature 3 credit hours (Hum/FA) OR
- HUM 2610 - Foreign Literature in Translation 3 credit hours (Hum/FA)

Subtotal: 26 Hours

Junior

- PHYS 3200 - Scientific Modeling and Problem Solving 2 credit hours *
- PHYS 3610 - Thermodynamics 3 credit hours *
- PHYS 3900 - Physics Practicum 1 credit hour
- PHYS 4380 - Quantum Mechanics 3 credit hours *
- Electives 9-12 credit hours
- Humanities and/or Fine Arts (2 rubrics) 6 credit hours
- Social/Behavioral Sciences (2 rubrics) 6 credit hours

Subtotal: 30-33 Hours
Senior

- Electives 12-15 credit hours
- PHYS 3300 - Classical Mechanics 3 credit hours *
- PHYS 3800 - Physics Seminar 1 credit hour
- PHYS 4310 - Electricity and Magnetism 3 credit hours *
- PHYS 4330 - Electricity and Magnetism II 3 credit hours *
- PHYS 4850 - Physics Research 2 credit hours
- PHYS 4900 - Physics Senior Thesis 2 credit hours

Choose 6 hours from:

- HIST 2010 - Survey of United States History I 3 credit hours OR
- HIST 2020 - Survey of United States History II 3 credit hours OR
- HIST 2030 - Tennessee History 3 credit hours

Subtotal: 32-35 Hours

Total hours in program: 120

NOTE:

*Offered every other year

Academic Map

Following is a printable, suggested four-year schedule of courses:

Physics, Professional Physics, B.S., Academic Map
Astronomy

**ASTR 1030 - Exploring the Universe**  
3 credit hours  
A general introduction to astronomy through an overview of planets, stars, systems of stars, and the overall structure of the universe. Topics will be discussed by answering questions such as "How do you weigh stars?" and "Will the universe die?"

**ASTR 1031 - Observing the Universe**  
1 credit hour  
Prerequisite or corequisite: ASTR 1030. Introduction to observational astronomy through laboratory exercises and outdoor observing activities. Topics include telescopes, the analysis of starlight, and observations of stars and planets.

**ASTR 2030 - Solar System Astronomy**  
3 credit hours  
Prerequisite: MATH 1710. Comprehensive study of the solar system including models of solar and planetary formation. Analysis of the chemical makeup and physical nature of the Sun, planets, moons, and comets using mathematics and the scientific method. Focus on planetary interiors, surfaces, atmospheres, solar-planetary interactions, and solar system evolution. Discussion of spacecraft missions, future solar system exploration, and possibilities of extraterrestrial life.

**ASTR 2040 - Stars, Galaxies, and Cosmology**  
3 credit hours  
Prerequisite: MATH 1710. A comprehensive study of stellar, galactic, and cosmological astronomy. Analyzes the basic theories of stellar and galactic formation and evolution using mathematics and the scientific method. Includes the cataclysmic topics of supernovae, neutron stars, pulsars, and black holes as well as the nature of galaxies including the Milky Way galaxy, active galaxies and quasars, and the formation and evolution of our universe, the big bang theory, and the possibility of other life in the universe.

**ASTR 3050 - Directed Study in Astronomy**  
1 to 4 credit hours  
Prerequisite: PHYS 2021 or PHYS 2120 and approval of department chair. Individualized intensive study of a specific topic in astronomy or astrophysics not normally covered in the standard undergraduate physics and astronomy curriculum. Arrangements must be made with an approved faculty member prior to registration.

**ASTR 3400 - Fundamentals of Astrophysics**  
3 credit hours  
Prerequisite: PHYS 2021 or PHYS 2120 and MATH 1910. Modern astronomical knowledge and techniques using classical and modern physical principles. Possible topics include star formation, black holes and neutron stars, galaxy structure and evolution, formation of planetary systems, and large-scale structure of the universe.

**ASTR 3401 - Experimental Astronomy**  
1 credit hour  
Prerequisites: PHYS 2021 or PHYS 2120 or consent of instructor. Principles and techniques of astronomical data acquisition and reduction. Possible research topics involve photometry, spectroscopy, astronomical applications of electronic detectors, and computer modeling.

**ASTR 4800 - Special Topics in Astronomy**  
3 credit hours  
Prerequisites: PHYS 3100 and PHYS 3150 or approval of department chair. In-depth, organized study of a contemporary topic of interest not normally covered in the undergraduate physics and astronomy curriculum. Possible topics include planetary geology, radio astronomy, stellar atmospheres or interiors, space physics, pulsating stars, dark matter and energy, galactic evolution, and general relativity and cosmology.

**ASTR 4850 - Astronomy Research**  
2 credit hours  
Prerequisite: Consent of instructor. Independent study of a selected research problem in astronomy. Includes experimental and/or theoretical investigation of an important yet unexplored problem or experimental design. Includes literature research and experimental design/problem formulation and execution resulting in oral and written presentation of results suitable for submission/presentation to a suitable journal/conference. One hour lecture and significant additional time working with research mentor.

**ASTR 4900 - Astronomy Senior Thesis**  
2 credit hours  
Prerequisites: ASTR 4850 and consent of department chair. Focuses on a specific research/experimental design problem chosen with the consent of the thesis committee and with the potential for original discovery or for creative development of a tool, technique, or instrumentation applicable to scientific research.
Independent pursuit of research objectives outlined in a research proposal results in a written thesis, the approval of which will include an oral defense. One hour lecture and independent writing of thesis.

Physics

PHYS 1010 - Physics Colloquium
1 credit hour
Introduces new physics and astronomy students to the physics major. Topics include degree requirements, faculty resources, research opportunities, and career options. Half of the meetings will involve one hour lectures during class, and half will involve attending talks, some of which may occur outside the scheduled class meeting time.

PHYS 1110 - Discovering Physics
4 credit hours
Prerequisite: MATH 1710, MATH 1730, or MATH 1630. Uncover the fundamental concepts of physics in a hands-on approach that involves observations, measurements, forming hypotheses, and validation of ideas in groups of students' peers. Combined lecture/laboratory sessions.

PHYS 1600 - Physics of Music
3 credit hours
Prerequisite: MATH 1710 or consent of instructor. The physics of music, acoustics, and sound for students without prior physics background.

PHYS 2010 - Non-Calculus-Based Physics I
0 credit hours
Prerequisite: MATH 1710 with a minimum grade of C (2.0) or MATH 1730. Required corequisite: PHYS 2011. Web-based discussion class to be taken in conjunction with the cooperative-learning based problems lab PHYS 2011. Classical mechanics traditionally covered in a first-semester college physics course. Kinematics, forces, momentum, angular motion, calorimetry, and sound waves. Class time used for discussion of the Web-lecture material and for the administration of exams.

PHYS 2011 - Physics Problems Laboratory I
4 credit hours
Prerequisite: MATH 1710 with a minimum grade of C (2.0) or MATH 1730. Required corequisite: PHYS 2010. Group-oriented problems course taken in conjunction with the Web-based discussion class PHYS 2010. Students work in groups with the topics presented in the PHYS 2010 discussion class. Covers kinematics, forces, momentum, angular motion, calorimetry, and sound waves. Skills associated with the development of experimental investigations including graphical analysis and estimation of uncertainties emphasized. Two two-and-one-half-hour laboratory sessions.

PHYS 2020 - Non-Calculus-Based Physics II
0 credit hours
Prerequisite: PHYS 2111. Required corequisite: PHYS 2110. Web-based discussion class taken in conjunction with the cooperative-learning based problems lab PHYS 2111. Fundamentals of optics, modern physics, and electronics traditionally covered in a second-semester college physics course. Reflection and refraction, vision, diffraction effects, quantum mechanics, atomic and nuclear physics, and analog and digital electronics. Scheduled class time is used for discussions of the Web-lecture material and for the administration of exams.

PHYS 2021 - Physics Problems Laboratory II
4 credit hours
Prerequisite: PHYS 2111. Required corequisite: PHYS 2110. Group-oriented problems course to be taken in conjunction with the Web-based discussion class PHYS 2020. Students work in groups with the topics presented in the PHYS 2020 discussion class. Optics, modern physics, and electronics traditionally covered in a second-semester college physics course. Reflection and refraction, vision, diffraction effects, quantum mechanics, atomic and nuclear physics, and analog and digital electronics. The skills associated with the development of experimental investigations including graphical analysis and estimation of uncertainties emphasized. Two two-and-one-half-hour laboratory sessions.

PHYS 2110 - Calculus-Based Physics I
0 credit hours
Prerequisite: MATH 1910 with a minimum grade of C (2.0). Corequisite: PHYS 2111. A calculus-based introduction to mechanics and wave motion. One and one-half hours lecture.

PHYS 2111 - Calculus-Based Physics Laboratory I
4 credit hours
Prerequisite: MATH 1910 with a minimum grade of C (2.0). Corequisite: PHYS 2110. Laboratory course to accompany PHYS 2110. Experiments in mechanics, waves, and thermodynamics. Data reduction, error analysis, and report writing. Two three-hour sessions.
PHYS 2120 - Calculus-Based Physics II
0 credit hours
Prerequisites: PHYS 2111; MATH 1920 with a minimum grade of C (2.0). Required corequisite: PHYS 2121. A lecture course that supplements the discussion in PHYS 2121. Topics include a microscopic view of electrical force and field, polarization, electric circuits, magnetic force and field, electric potential, symmetries of fields, Maxwell’s equations, electromagnetic radiation, optics, and wave phenomena. One and one-half hours lecture.

PHYS 2121 - Calculus-Based Physics Laboratory II
4 credit hours
Prerequisites: PHYS 2111; MATH 1920 with a minimum grade of C (2.0). Required corequisite: PHYS 2120. A laboratory-based course to accompany PHYS 2120. Includes discussions, group problem solving, and hands-on activities. Two three-hour sessions.

PHYS 3000 - Acoustics and Signal Analysis
3 credit hours
Prerequisites: PHYS 1600 and MATH 1910. Detailed overview of acoustics including an introduction to digital signals and their analysis. Application areas include architectural, musical, and environmental acoustics. Intended for students interested in the technical side of the music industry.

PHYS 3050 - Directed Study in Physics
1 to 4 credit hours
Prerequisites: PHYS 2021 or PHYS 2120 and approval of department chair. Individualized intensive study of a specific topic in physics not normally covered to the extent desired in the standard curriculum. Arrangements must be made with an approved faculty member prior to registration.

PHYS 3070 - Concepts in Modern Physics I
3 credit hours
Prerequisites: PHYS 2021 or PHYS 2120 and MATH 1920. Introduction to the concepts of twentieth-century physics. Discusses fundamental concepts of modern physics including molecular physics, statistical distributions, solid state physics, and nuclear particle physics. Not intended to prepare students for graduate school in physics.

PHYS 3100 - Modern Physics I
3 credit hours
Prerequisites: PHYS 2021 or PHYS 2120 and MATH 1920 with a minimum grade of C (2.0). Introduction to the fundamental principles of modern physics (special relativity and quantum mechanics) and their application to atomic physics.

PHYS 3110 - Modern Physics II
3 credit hours
Prerequisite: PHYS 3100. Survey of major topics including molecular physics, statistical physics, solid state physics and solid state devices, nuclear models, nuclear decay and reaction, and elementary particle physics.

PHYS 3111 - Modern Physics Laboratory
1 credit hour
Prerequisite or corequisite: PHYS 3110. Concepts and ideas which formed the basis for an understanding of the atom and atomic phenomena. One hour lecture and one three-hour independent study laboratory.

PHYS 3150 - Topics and Methods of Theoretical Physics I
3 credit hours
Prerequisites: PHYS 2021 or PHYS 2120 and MATH 1920 with a minimum grade of C (2.0). Theoretical techniques used for problem solving in physics. Reference frames and coordinate systems, approximation techniques, solution of electrical circuits and mechanical systems, simple harmonic motion and wave motion, Maxwell’s equations.

PHYS 3160 - Topics and Methods of Theoretical Physics II
3 credit hours
Prerequisite: PHYS 3150. A continuation of PHYS 3150. The Schroedinger equation, heat flow, diffusion, the Lagrangian description of motion.

PHYS 3200 - Scientific Modeling and Problem Solving
2 credit hours
Prerequisites: One year of physics and MATH 1920 or consent of instructor. Techniques of computational
physics as applied to the solution of scientific problems.

**PHYS 3300 - Classical Mechanics**  
3 credit hours  
Prerequisite: PHYS 3150 (or PHYS 2120 and MATH 3120). Mechanics (including statics and dynamics) of particles in three dimensions using vector analysis, motion of rigid bodies, Lagrangian mechanics, and Hamilton's equations.

**PHYS 3310 - Concepts and Applications of Digital Electronics**  
3 credit hours  
Prerequisite: PHYS 2021 or PHYS 2120 or ET 3610. Investigates applications of modern digital technology. Fundamentals of logic gates and programmable devices examined along with contemporary integrated circuits for use in data acquisition and the control of scientific experiments. Sound cards, alarm systems, and laboratory measurement circuits typify projects constructed in the hands-on laboratory. Two hours lecture and one three-hour laboratory.

**PHYS 3330 - Health Physics and Radiation Protection**  
3 credit hours  
Prerequisites: PHYS 2021 or PHYS 2120. Radiation protection methods, dosimetry techniques, and survey instruments. Practical knowledge of the methodology for paramedical personnel, industrial workers, and others who deal with radioisotopes and X-ray equipment. Two hours lecture and one three-hour laboratory.

**PHYS 3350 - Concepts and Applications of Analog Electronics**  
4 credit hours  
Prerequisite: PHYS 2021 or PHYS 2121 or ET 3610. Introduction to contemporary analog electronics utilizing integrated circuits to treat traditional circuits, power supplies, operational amplifiers, comparators, and multivibrators. Conversion of analog to digital signal for interfacing to microcomputers. Emphasis on practical applications. Three hours lecture and one three-hour laboratory.

**PHYS 3400 - Intermediate Physics**  
3 credit hours  
Prerequisite: PHYS 2021 or PHYS 2121 and MATH 1920. Provides an intermediated treatment of the principles of thermodynamics, electromagnetics, and oscillatory behavior with applications. Course is not intended for physics majors participating in the Professional Physics concentration. Three hours lecture.

**PHYS 3510 - Concepts in Thermodynamics and Statistical Mechanics**  
3 credit hours  
Prerequisite: PHYS 3080 or PHYS 3110. Introduction to the concepts of thermodynamics and statistical mechanics. Discusses the fundamentals of thermodynamics from both the macroscopic and microscopic points of view including entropy, enthalpy, heat engines, Helmholtz and Gibbs free energy, the partition function, and quantum statistics. Not intended to prepare students for graduate school in physics.

**PHYS 3600 - Radiation Oncology Physics**  
3 credit hours  
Prerequisites: MATH 1910 and a one-year introductory sequence in physics. Introduction to field of radiation oncology physics, including a discussion of fundamental physics and techniques associated with the diagnosis and treatment of cancer using electromagnetic radiation and particle beams. Includes experiences in a radiation oncology clinic and interactions with practicing medical physicists.

**PHYS 3601 - Medical Physics Practicum**  
1 credit hour  
Prerequisite or corequisite: PHYS 3600. Real-world/clinical applications of concepts and theory from PHYS 3600, especially those associated with detectors and dosimetry. May include hands-on activities at the Vanderbilt-Ingram Cancer Center.

**PHYS 3610 - Thermodynamics**  
3 credit hours  
Prerequisite: PHYS 3110 and PHYS 3150 or consent of instructor. Introduction to statistical physics, kinetic theory, and thermodynamics from a unified microscopic point of view. Selected applications to various systems of interest presented.

**PHYS 3800 - Physics Seminar**  
1 credit hour  
Prerequisite: PHYS 3100. Develops and refines inquiry, communication, and presentation skills through exposure to new developments in physics, technical brief writing, and resume and job interview preparations.

**PHYS 3900 - Physics Practicum**
1 credit hour
Prerequisite: PHYS 3100 and consent of instructor. Refines thinking, communication, and interpersonal skills through exposure to on-the-spot technical questions and a laboratory teaching experience as an assistant in an introductory physics laboratory. One hour lecture and two two-and-one-half hour experiences as a teaching assistant to be scheduled with department faculty.

PHYS 3910 - Advanced Physics Laboratory
1 credit hour
Prerequisites: PHYS 2021 or PHYS 2120 and PHYS 2121. The skills, art, and physics important in pursuing independent research. Experiments dealing with mechanical, optical, or thermodynamic principles explored. Report writing, literature research, and the use of analysis tools emphasized. One hour lecture and one three-hour independent study laboratory.

PHYS 3920 - Advanced Physics Laboratory
1 credit hour
Prerequisites: PHYS 2021 or PHYS 2120 and PHYS 2121. The skills, art, and physics important in pursuing independent research. Experiments dealing with mechanical, optical, or thermodynamic principles explored. Report writing, literature research, and the use of analysis tools emphasized.

PHYS 3930 - The Teaching of Physics
3 credit hours
Prerequisite: PHYS 3950. Introduces physics teaching pedagogies resulting from physics education research. Methods studied to include inquiry, discovery, and modeling-based approaches. Seminar meeting will be supplemented with extensive experience as a learning assistant in a hands-on cooperative-learning and/or discovery-learning based introductory physics course.

PHYS 3950 - Physics Licensure I
1 credit hour
Prerequisites: PHYS 2021 or PHYS 2121 and MATH 1920. Overview of fundamental physics topics covered on licensure exams that lead to endorsement to teach high school physics. Subject matter will focus on topics typically covered in the second semester of introductory physics. One-hour twenty-five minutes lecture per week.

PHYS 4310 - Electricity and Magnetism
3 credit hours
Prerequisite: PHYS 3160. Topics including electric and magnetic fields, electrostatic potential, and potential energy and fields in matter, discussed in a mathematically rigorous manner. A variety of good applications of mathematical methods in physics.

PHYS 4380 - Quantum Mechanics
3 credit hours
Prerequisites: PHYS 3110 and PHYS 3160. Topics include both one- and three-dimensional solutions to the Schroedinger equation, including the infinite square-well, finite square-well, tunneling, the harmonic oscillator, and the hydrogen atom with a discussion of angular momentum at a mathematically rigorous undergraduate level.

PHYS 4390 - Advanced Quantum Mechanics
3 credit hours
Prerequisite: PHYS 4380. Advanced topics in quantum mechanics, including time-independent and time-dependent perturbation theory, systems of indistinguishable particles, the Aharonov-Bohm effect, Fermi's Golden Rule, and an introduction to quantum field theory.

PHYS 4600 - Topics in Medical Physics
3 credit hours
Prerequisites: PHYS 3110 and PHYS 3160. Topics in medical physics at an advanced undergraduate level. Possible topics include charged-particle interactions and equilibrium in matter, cavity theory, dosimetry, CTs, and MRIs.

PHYS 4630 - Principles of the Solid State
3 credit hours
Prerequisites: PHYS 3110 and PHYS 3150. Includes crystal structures, lattice dynamics, statistics of
conductors and semiconductors, thermal properties, the metallic state, free electron theory, band theory of solids, dielectric and magnetic properties of solids, and the low temperature behavior of matter, particularly solids. Three hours lecture.

**PHYS 4740 - Research Methods**
3 credit hours
(Same as BIOL/CHM/MATH 4740.) Prerequisite: YOED 3520. Provides secondary science and mathematics teacher candidates with the tools that scientists use to solve scientific problems. Students will use these tools in a laboratory setting, communicate findings, and understand how scientists develop new knowledge.

**PHYS 4800 - Special Topics in Physics, Special Topics A**
3 credit hours
Prerequisites: An extensive physics background and permission of instructor. Detailed study of a selected topic of current interest in physics not normally covered in the regular undergraduate physics curriculum. Possible topics include advanced atomic physics, high-energy physics (nuclear and elementary particles), scattering theory, astrophysics, and general relativity.

**PHYS 4810 - Special Topics in Physics, Special Topics B**
3 credit hours
Prerequisites: An extensive physics background and permission of instructor. Detailed study of a selected topic of current interest in physics not normally covered in the regular undergraduate physics curriculum. Possible topics include advanced atomic physics, high-energy physics (nuclear and elementary particles), scattering theory, astrophysics, and general relativity.

**PHYS 4850 - Physics Research**
2 credit hours
Prerequisite: Consent of instructor. Independent study of a selected research problem in physics. Includes experimental and/or theoretical investigation of an important, yet unexplored, problem. Includes literature research, experiment design/problem formulation and execution, resulting in oral and written presentation of results suitable for submission for publication in a suitable journal. One hour lecture and significant additional time working with research mentor.

**PHYS 4860 - Physics Research**
2 credit hours
Prerequisite: Consent of instructor. Independent study of a selected research problem in physics. Includes experimental and/or theoretical investigation of an important, yet unexplored, problem. Includes literature research, experiment design/problem formulation and execution, resulting in oral and written presentation of results suitable for submission for publication in a suitable journal. One hour lecture and significant additional time working with research mentor.

**PHYS 4900 - Physics Senior Thesis**
2 credit hours
Prerequisites: PHYS 4850 or PHYS 4860 and consent of department chair. Brings undergraduate experience to focus on a specific research problem; chosen with the consent of the thesis committee and with the potential for original discovery or for creative development of a tool or technique applicable to scientific research. Independent pursuit of research objectives outlined in a research proposal results in a written thesis whose approval will include an oral defense. One hour lecture and independent writing of thesis.
